The Christian Science Weekly

Published Thursday

By The Christian Science Publishing Society

Complete

VOL. 1 BOSTON, MASS., U. S. A., SEPTEMBER 1, 1898. NO. 1

SALUTATORY.

We herewith launch a new publication in connection with our movement. The growing necessities of the situation seem to demand, at times, a speedier means of communication with the Field than our monthly *Journal* affords.

New or amended By-Laws and Church Rules, which, from time to time, are passed to meet accruing needs and emergencies, should sometimes reach the Field more promptly than is possible with only a monthly messenger. The *Weekly* is projected, in part at least, to meet this need. Then, too, our files contain many communications in the nature of experiences, testimonies, and dissertations which, for want of space in the *Journal*, must often be indefinitely laid aside or entirely withheld from publication, and which are too valuable and helpful to meet such a fate. The *Weekly* will tend to remedy this difficulty and afford an additional means of spreading the good Word.

Let it not be inferred, however, that the *Weekly* is to take the place of the *Journal*. Not so. The *Journal* occupies, and shall ever occupy, a necessary and distinctive place in the history and literature of Christian Science. It can never, by the logic of events, sink lower in the scale of its mission and existence, but by the necessity of growth and progress, must continue in an ascending scale to perform the important function which gave it birth. Its establishment was fraught with far too much of sacrifice, struggle, and hardship,—its place in the rise and progress of the Cause has been, is, and shall continue to be, much too important, to admit of its losing one jot or tittle of its proverbial value. The *Weekly* will be but a convenient, and, we trust and believe, an invaluable adjunct to the *Journal*: a friend and co-laborer, as it were.

It is likely we shall hear from our beloved Leader, the Rev. Mary Baker Eddy, through its columns, from time to time. It will not, however, we feel warranted in saying, become, by any means, an exclusive avenue of communication from her to the Field. She will regard the *Journal*—her first born—as the more important and regular channel for the impartation of her words of loving counsel, admonition, and rebuke to her large and rapidly increasing family of children. The *Journal* will be the mother publication; the *Weekly* its child.

It will be a feature of the *Weekly* to supply, in each issue, a brief synopsis of the current events of the world, sufficient, perhaps, to keep the busy workers fairly well informed as to the more important facts of general interest.

For prices and terms see the advertisement on the fourth page.

CURRENT EVENTS.

Saturday, August 20, witnessed a grand parade of battleships on North River, New York. Sampson and Schley and their men came home in six steel ships, and their coming was the occasion of a most enthusiastic demonstration by the citizens of New York.

The President sent his Cabinet officers to meet them. The mayor of New York and a committee of distinguished citizens told them of the country's pride and gratitude, and gave them the keys of the city at its gate.

It was a glorious morning when the victorious fleet steamed up the harbor in majestic single column, saluted and saluting, and accompanied by a flotilla two miles long of steamboats, yachts, and launches, densely packed and extending from shore to shore. New York had seen no such spectacle before.

From throats of a million or more of their countrymen and countrywomen on two shores rose the chorus of welcome to the returning heroes. The heart of a thankful nation was in the cry.

Steadily through the crowded waters ploughed the cruisers and battleships—seven in all, when the Texas joined them—keeping the signalled distance apart, moving at the signalled speed of eight knots, guided by the same sure hands which had made them irresistible.

Thus they moved up and reached the tomb of him who said, "Let us have peace," set on a hill, the verdure of which was hidden by a cheering, flag-waving multitude.

A general revival of business is certain to follow the coming in of peace. If the administration and the politicians, including the members of the Senate and House of Representatives at Washington, will now address themselves to the building up of the country's vast resources with the same energy and in the same non-partisan spirit which characterized their action in relation to the war with Spain, a prosperity will ensue sufficiently general to remove at least some of the oppressions and inequalities now so prevalent. More genuine patriotism and less politics and partisanship in piping times of peace, would tend greatly toward remedying the present inequitable conditions.

The conclusion of the war is signalized by the mustering out of a part of our volunteer troops. It is reported that from seventy-five to one hundred thousand are to be mustered out and returned to their homes. The brave boys who volunteered in defence of their nation's honor and of the right, although released from their service much earlier than might have been anticipated, will receive that hearty welcome at the hands of their dear home friends, and all other good people, that their unselfish devotion to country and principle deserves.

Admiral Cervera was given a rousing ovation on his arrival at the Union Station in Boston recently as he passed through on his way to New York. A great crowd welcomed him at the station and a still greater saw him off on the Fall River boat train. "Three cheers for Cervera," were proposed and given with a will. The Spanish officer bowed his acknowledgments with uncovered head. In spite of the presence of policemen, the admiral's hand was kept busy shaking hands with his enthusiastic admirers, until he was finally safely landed aboard the train.

Copyrighted, 1898, by Mary Baker G. Eddy.

Hawaii is now under our flag. The islands are now formally a part of the Department of California in the military organization. General order No. 95, made public by the War Department making the change is as follows:—

"War Department, Washington, July 12, 1898.

"By direction of the President, the Hawaiian Islands and their dependencies, which were annexed to the United States by joint resolution of Congress, approved July 7, 1898, are hereby attached to and included in the Department of California. R. A. ALGER, *Secretary of War.*"

Manila has been taken by bombarding and carrying its fortifications by storm. The victory was an easy one; but it is unfortunate that the news of the declaration of peace had not reached Admiral Dewey and General Merritt before the attack. It would have avoided unnecessary bloodshed and destruction of property. Nevertheless, the humane policy of our commanders and the care they exercised not to cause such a result were most commendable, and have, indeed, brought forth many words of praise from the press of England and other countries.

On August 14, the correspondent of the *Boston Herald* entered Havana in the Moran, carrying the American flag; the first to enter since the blockade began last April. Both Captain-General Blanco and Secretary Congosto refused to grant the correspondent an interview; but he nevertheless learned that General Blanco had sent his resignation to the authorities at Madrid, and had begged its acceptance, stating that he did not wish to have charge of carrying out the agreements of the peace protocol.

What some of the newspapers term "England's master stroke," has been accomplished in England's assumption of a protectorate over the whole of South Arabia, from Bab-el-Mandeb straits to the Gulf of Oman, which is equal in extent to the whole of France, and comprises a line of fortifications which may in the future dominate the road to India, and assist in dominating the Persian Gulf and Persian trade. The *Vossische Zeitung* believes that Russia will now act with energy to secure a position in the Persian Gulf.

Hostilities with Spain have terminated with the treasury in good condition. Not only is the treasury balance increasing daily, on account of receipts from the bond sale, but the war revenue law is bringing in even more money than had been expected, and the receipts of the government are averaging more than $1,500,000 on each business day.

The available cash balance, which was down to little more than $200,000,000 soon after the declaration of war, has risen to the comfortable figure of $271,957,512.

The blockade of Porto Rico has been raised and her harbors are now open to commerce. All the American ships that have been on duty there, except the monitors and a few gunboats, will go north immediately. The monitors will lie in Guanica harbor until the troops go into San Juan. It is impossible for the ships to enter the harbor of the Porto Rican capital now, because the channel is blocked by sunken ships and torpedoes.

The present indications point to trouble with the insurgents both in Cuba and the Philippines. It would seem as though our allies were to become enemies. The enlightened policy of the administration, if firmly adhered to, will no doubt convince the now suspicious ones of the entire good faith of our government, and that it seeks rather the best interests of the insurgents than the selfish advancement only of American interests.

The *Boston Herald* thus editorially speaks of President McKinley:—

"President McKinley has come out of the war with an enhanced reputation in all ways, and is, therefore, stronger than ever. He has proved himself a man good in council and in action, and he can, to a greater degree than ever, act his own pleasure."

Many people starting for their outings into the country and the seashore have been greatly disappointed this summer. The cause of the trouble is a shortage in the film market. Films for some of the best known cameras are not to be obtained at any price, and tourists who had left their orders until just before they started from the city were greatly chagrined to learn that there were no films to be had.

Judge Day having resigned his position as Secretary of State, the question of his successor is now agitating the public mind. Judge Day's career as President McKinley's premier, while not, in the ordinary sense, a brilliant one, has been a most able and successful one, reflecting credit alike upon himself, the administration, and the country.

The rapid development of trolley lines through the rural districts in every part of the country has set inventive genius at work to devise wagons for the conveyance of garden products to market by means of trolley cars. In Ohio it is proposed to put the loaded wagons on trucks, to be coupled to trolley cars, and thus pulled to market.

A notable gathering of Scientists (Material, not Christian) has just been held in Boston. Monday, August 22, began the fiftieth anniversary of the American Association for the Advancement of Science. An unusual number of scientists came together, and the convention proved to be an extremely interesting one.

"Old Glory" now waves officially over Hawaii. The government of the islands has been formally turned over to the United States. No change has yet been made in the officials. There was a conspicuous absence of native Hawaiians on the occasion.

Dr. Koch claims the mosquito is most active in communicating the microbe of malaria. But what is the doctor going to do about it? When it comes to activity, a single mosquito can beat a whole college of physicians.—*Central City Democrat.*

English opinion seems to be that Uncle Sam should settle the Philippine question wholly without suggestion or interference from the other powers. We know of no reason why the people of Uncle Sam's domain should not share this opinion.

The Paris Peace Commission will have only the question of the disposition of the Philippine Islands to discuss. All other matters are included in the diplomatic agreement.

It is reported that Spain's flag is no longer seen about the city of Havana. Also that the officials fear an outbreak by the Spanish there.

Only the city and suburbs of Manila were surrendered to Admiral Dewey. The residue of the Philippines come under the terms of the protocol.

It is now estimated that the gold output of Cripple Creek, Colorado, for this year, will reach $20,000,000. That of last year was $12,000,000.

Not a ship was injured in Admiral Dewey's fleet in the bombardment of Manila. Verily Dewey as a naval hero is a success.

The colored troops at the battle of El Caney are reported as having fought with a bravery equal to that of any of their white fellow-soldiers.

Judge J. M. Hobson, father of Lieut. Hobson, has been appointed postmaster of Greensboro, Ala.

SHE NEVER FELL.

BY C. E. M.

On the morning of the dedication of the Chicago church, November 14, 1897, I was in my bedroom in the third story of our house (the house is three stories and basement). I was getting ready to go to the morning service, and my little daughter, five years old, was playing about, when suddenly I felt a silence. I instantly noticed that the child was no longer there and that the window was open.

I looked out and saw her unconscious form on the ground below, her head on the cement sidewalk. Instantly I thought "All is Love."

As I went down-stairs the entire paragraph in "No and Yes," p. 19, beginning, "Eternal harmony, perpetuity, and perfection constitute the phenomena of Being," came to me and took up its abode with me, and with it the clear sense of the great gulf fixed between the child and the lie that claimed to destroy. The child was brought in, and as she was carried up-stairs she cried. As she was laid down the blood was spurting from her mouth and had already covered her neck and shoulders. I instantly said, "There is one law—God's law—under which man remains perfect," and the bleeding immediately stopped.

The child seemed to relapse into unconsciousness, but I declared, "Mind is ever present and controls its idea," and in a few moments she slept naturally. During the morning she seemed to suffer greatly if she was moved at all, and her legs seemed paralyzed—lifeless. In the afternoon all sense of pain left, she slept quietly, and I went to the afternoon service, rejoicing greatly in my freedom from the sense of personal responsibility.

When I returned she sat in my lap to eat some supper, with no sense of pain, but still unable to control her limbs, which presented the appearance of entire inaction.

At eight o'clock she was undressed without inconvenience, and there was no mark on her body but a bruised eye. During the day she had not spoken of herself. At eleven o'clock, when I went up-stairs, I found her wide awake, and she said, "Mamma, error is trying to say that I fell out of the window, but that cannot be. The child of God can't fall; but why do I lie here? Why can't I move my legs?"

The answer was: "You can move them. Mind governs, and you are always perfect." In a moment she said, "I will get up and walk." It seemed to require one or two trials to induce her legs to obey, but she rose, walked across the room and back, climbed into bed, stretched her legs out and said, "I knew error could not talk!"

She then sat up, ate a lunch, fell into a natural slumber, and woke bright and happy in the morning.

For two days there was an uncertainty of movement, a seeming inability to walk in a straight line, but she moved about constantly, frequently rebuking the error aloud and declaring, "Love helps me walk."

On Wednesday harmony was established. Some weeks after her little sister said to her: "You did fall out of the window, didn't you?" But the reply was: "My body fell, but I am not in my body. Can God's child fall?" And the little three-year-old answered: "No, because God is good."

[Republished from the *Christian Science Journal*.]

MISCELLANIES.

Says Col. Sabin in the *Washington News Letter*:—

"Wherever I have been in the East I found that Christian Science is well known, and in most instances received with respectful consideration.

"One old man in my travels said that any one who believed in God healing the sick was simply crazy. He did not know. That more than a million witnesses in the world stand ready to testify, and are testifying, to the fact that God does heal the sick; that He is healing the sick to-day all over the world through Christian Science, cannot be questioned by the well informed or the seeker after the Truth. The evidence is everywhere and of such a character that none who are with the Truth can doubt.

"What a blessed thought, that God in His infinite goodness and kindness reaches out His hand to lead us in the ways of Love and peace."

If a man can die of nostalgia—homesickness—which General Shafter reports caused the death of one of his soldiers at Santiago, would it not be well to take into consideration the relation of mind and disease in the cases of all patients? The case in question is arousing a good deal of interest. It was that of Harvey Atkins, of the Second Massachusetts Regiment.—*Public Ledger, Norfolk, Va.*

The Rev. J. S. Detweiler not long since preached a sermon on Divine Healing at the Gospel Witness, 1298 East Twelfth Street, New York City, in which he said:—

"I want it to be understood that I have no theory of my own to present, and no experience either of myself or my family to give. I want simply to lay before you the evidence of the Divine Word in this matter, and discuss the topic I have taken up, from a purely spiritual point of view. The solution of this much-discussed question for every believer should be found in the teachings of the Bible. Do you accept the Gospel as set forth in the Old and New Testaments? If you do, then all argument ceases with you when you have familiarized yourself with your authority. The Bible answers every perplexing question that can come up in the affairs of a human being during a lifetime, and should be followed as explicity and as confidently as one would obey the detailed instructions in a handbook on some special trade."

The text, from Exodus, 15 : 26, was, "For I am the Lord, that healeth thee," and the whole discourse followed closely the lines laid down, being reference after reference, with specimen quotations to verses and chapters in both the old and the new revelations, which cited examples of "healing through faith," and the many exemptions from famine and disease and the destroying forces of nature enjoyed by the Lord's chosen. More than fifty such passages were read, telling of the seeming miracles wrought by the Apostles through their Christ-given power, of the health that came to believers by faith and prayer, and of the direct promises of both the Father and the Son that all these things should be.

As illustrative of the purpose of Christ, Rev. Mr. Detweiler gave the language of Hebrews, 2 : 14, "He also Himself likewise took part of the same; that through death He might destroy him that had the power of death, that is, the devil; and deliver them who, through fear of death, were all their lifetime subject to bondage." Christ's practice, he said, was in pursuance of this declaration, and he read from Matthew, 4 : 23: "And Jesus went about all Galilee, teaching in their synagogues, and preaching the gospel of the kingdom, and healing all manner of sickness among the people."

Rev. Mr. Detweiler censured severely ministers of the Gospel who failed to attach due significance to the many declarations of the Word he had given, and said, "I make the charge to-day that in many a place only a small part of the Gospel is being preached in strict accordance with the Scriptures."

The general supposition that the morning Bible-Lessons appearing in the present *Quarterly* were prepared by the Rev. Mary Baker Eddy, is erroneous. She suggested and arranged the order of the subjects, but the lessons were prepared by the Bible-Lesson Committee.

We will say in answer to inquiries, that there is no law or rule at headquarters or elsewhere requiring those building branch churches to employ any particular contractor or architect. The same liberty of selection should prevail in this matter that is recognized in other matters.

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

A DEDICATORY POEM.

BY MARY BAKER G. EDDY,

THE DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE.

And the eyes of them that see shall not be dim, and the ears of them that hear shall hearken. — *Isaiah.*

THOU All in All, of every age,
And rising, radiant sphere—
Help us to write a deathless page
Of truth—this waning year.

Help us to humbly seek and sow
And reap Thy wise behest—
Whate'er the boon, a joy, or woe—
Knowing Thou knowest best.

Aid the soul-sense to soar and sing
Above the tempest's glee;
Give us the eagle's fearless wing,
The dove's to mount to Thee.

All-Merciful, how faint, unfed,
Is every hungry heart;
Give us each day our daily bread,
In knowing what Thou art.

PLEASANT VIEW, CONCORD, N. H., August, 1898.

CHURCH DEDICATION AT THE WHITE MOUNTAINS.

SUNDAY, August 7, there was dedicated a beautiful little Christian Science Chapel near the White Mountain House, in the heart of the White Mountains of New Hampshire.

A year previously a number of Christian Scientists who were guests at this delightful summer hotel set in motion the movement which resulted in the erection of this novel little church edifice. It is delightfully situated in one of the most charming valleys of the White Mountain region. The building is light and airy, simply but beautifully finished in spruce interiorly, and having a rustic external appearance. It is furnished with comfortable folding chairs and has a seating capacity of nearly two hundred.

It is destined, no doubt, to become a favorite place of worship for Christian Scientists and others who yearly make their way to the charming mountain resorts in its vicinity. On the occasion of the dedication there were two services held, one at 10.30 A.M., and the other at 3 P.M. At both services the chapel was filled to repletion, some standing. In the evening the service was repeated in the dining-room of the hotel for the benefit of the help who were deprived of the privilege of attending during the day. A beautiful and Christianly act, truly.

The services were most interesting and impressive, consisting of a lesson-sermon prepared by the Readers for the occasion, singing, prayer, the reading of an historical sketch of the growth and progress of the church in that part of the state, and an address of greeting from our Leader. The sermon was made up, as is the custom with Christian Scientists, of selections from the Bible and the Christian Science text-book, "Science and Health with Key to the Scriptures," read alternately by two Readers. The passages read were singularly appropriate to the location and circumstances surrounding the occasion, and impressed the hearers deeply.

Following the reading of the sermon, Miss Crafts, soloist of the Christian Science Church in Boston, known as the Mother Church, sang in an artistic and impressive manner, "The Holy City."

After this one of the Readers read a brief but interesting history of the progress of the cause of Christian Science in this part of New Hampshire, and of the building of this church, which was as follows:—

It has been suggested that a little history of the growth of Christian Science in these grand old mountains would be interesting. For the benefit of those who have not read the article pertaining to this growth in the *Christian Science Journal*, August, 1897, we will repeat it.

"About six years ago we placed upon the table in the public parlor of the White Mountain House, the text-book of Christian Science, 'Science and Health with Key to the Scriptures,' by Mary Baker G. Eddy. At this time guests would take it up, look at it, and, seeing what it was, would quickly lay it down and slip away as if they had done something of which they were ashamed. To-day Science and Health, with all the books by its author, are upon the table in the parlor, and it is nothing uncommon to us to see them all in the hands of our guests. About four years ago we commenced holding services in one room in the house, our number being three or four persons. The number increased, until in the season of 1896 our audience filled four rooms which open into each other, one of which was once occupied by our beloved Mother. The last three Sundays of the season of 1896 we held services in the public parlor by request of our guests. August 8, 1897, we had an audience of seventy-five people in the parlor."

To-day, August 7, 1898, we dedicate this little chapel as a love-offering to our beloved Leader and our Cause. The thought has been present with us that the Truth, once planted in the human heart, grows of itself, for growth is the law of the Infinite. In John, 6 : 45, we read: "It is written in the prophets, And they shall be all taught of God." In our text-book, page 449, we read: "When the spiritual sense of Truth unfolds her harmonies to you, take no risk in the policy of error." Also, Matthew, 21 : 42: "Jesus saith unto them, Did ye never read in the scriptures, The stone which the builders rejected, the same is become the head of the corner: this is the Lord's doing, and it is marvelous in our eyes?"

This church was built by Christian Scientists from different parts of the United States, and is the first one of this denomination erected in the state of New Hampshire, the home of the Discoverer and Founder of Christian Science, Mary Baker G. Eddy. April 26, 1898, we commenced beautifying the grounds with shade trees. May 3 we commenced to break ground, and May 23, the foundation being nearly completed, four followers of this blessed Truth quietly

Digitized by Google

went to the ground at 5 A.M., and laid the corner-stone, with the simple ceremony of a few moments of silent prayer, followed by the audible repetition of our Lord's Prayer. This stone contains the Bible, our text-book, "Science and Health with Key to the Scriptures," with all the author's other works; the *Christian Science Journal*, and the names of those to whom first came the idea of building the church. July 3 we held our first service in it. July 23 it was completed, amid trials and triumphs. It stands free from any encumbrance.

Following this the other Reader read a message of greeting from the Rev. Mary Baker G. Eddy, Discoverer and Founder, and Leader of Christian Science, which was listened to with the deep interest always attendant upon her addresses. The message was as follows:—

First Church of Christ, Scientist,
White Mountain House, Fabyan, N. H.

My Beloved Brethren: To-day I am privileged to congratulate the Christian Scientists of my native state for having built the First Church of Christ, Scientist, at the White Mountains. Your kind card inviting me to be present at its dedication came when I was so occupied that I omitted to wire the receipt thereof, and to return my cordial thanks at an earlier date. The beautiful birch-bark on which it was written pleased me, it was so characteristic of our Granite State,—and I treasure it next to your compliments. That rustic scroll brought back to me the odor of my childhood, a love that stays the shadows of years. God grant that this little church shall prove a historic gem on the glowing records of Christianity, and lay upon its altars a sacrifice and service acceptable in God's sight.

Your rural chapel is a social success quite sacred in its results. The prosperity of Zion is very precious in the sight of divine Love holding unwearied watch over a world. Isaiah said: "How beautiful upon the mountains are the feet of him that bringeth good tidings, . . . that saith unto Zion, Thy God reigneth." Surely, the Word that is God must, at some time, find utterance and acceptance throughout the earth; for he that soweth shall reap; to such as have waited patiently for the appearing of Truth, the day dawns, and the harvest bells are ringing.

Let us, then, be up and doing,
With a heart for any fate;
Still achieving, still pursuing,
Learn to labor and to wait.

The peace of Love is published,—and the sword of the Spirit is drawn, nor will it be sheathed till Truth shall reign triumphant over all the earth. Truth, Life, and Love are formidable, wherever thought, felt, spoken, or written, in the pulpit, in the court-room, by the wayside, or in our homes; they are the victors, never to be vanquished. Love is the generic term for God, it formed this trinity, and no man can sunder it. Life is the spontaneity of Love, inseparable from it; and Life is the Lamb slain from the foundation of the world,—even that which was dead and is alive again, was lost and is found; for Life is Christ, and Christ, as aforetime, heals the sick, saves sinners, and destroys the last enemy, death.

In 1888 I visited these mountains, and spoke to an attentive audience collected in the hall at the Fabyan House. Then and there I foresaw this hour, and spoke of the little church to be in your midst, closing my remarks with the words of Hemans:

For the strength of the hills, we bless Thee,
Our God, our father's God!

The sons and daughters of the Granite State are rich with signs and symbols, sermons in stones, refuge in mountains, and good universal. The rocks, rills, mountains, meadows, fountains, and forests of our native state should be prophetic of the finger Divine that writes in living characters their lessons on our lives. May God's little ones cluster around this rock-ribbed church, like tender nestlings in the crannies of the rocks, and preen their thoughts for upward flight.

Though neither dome nor turret tells the tale of your little church, its song and sermon will touch the heart, point the path above the valley, up the mountain, and on to the celestial hills, echoing the Word welling up from the Infinite, and swelling the loud anthem of one Father-Mother, God—o'er all victorious! Rest assured that He in whom dwelleth all life, health, and holiness will supply all your needs according to His riches in glory.

With love,

MARY BAKER G. EDDY.

PLEASANT VIEW, CONCORD. N. H., August 1, 1898.

The above account is substantially as published in the *Boston Herald* of August 9, 1898.

The Lesson-Sermon prepared for the occasion is published in the September number of the *Christian Science Journal*.

AFTER DARKNESS COMETH LIGHT.

BY KENDALL.

A LITTLE more than forty years ago there lived, in a small interior town of Michigan, a boy just entering his teens who for his studious conduct and close attendance at school was the favorite with his teacher, and who, when other boys of his age were at their play, preferred to pass his time either at his studies or listening to the conversation of elder persons, especially if the subject were a literary, scientific, or religious one. The principal drug store of the village was the evening rendezvous for those interested in these subjects, and there, perched on a counter, would he sit a silent but attentive listener to their discussions till the hour of closing.

On the death of his father the boy went to reside with an uncle in an eastern city and pursue his studies. The change of climate seemed to be disastrous to him, for when the cold weather of his first winter at the east appeared he was taken with a severe cough, which, in spite of the efforts of the doctors, continued till the warm weather of spring. With the recurrence of cold weather the following winter, again came that terrible cough, attended by hemorrhages, and the doctors, finding themselves powerless to check it, advised an immediate removal to his former home in the west, declaring he could not survive another season of the eastern climate.

The boy of fifteen, although the glorious doctrine of Christian Science was as yet unknown to the world, had an inspiration of the Truth, like the patriarchs of old though as with them it was but dim and feeble compared to the present flood of divine light that is illuming the world, and he commenced to demonstrate, in his own unaided way, the great Truth that had lain dormant, buried in the error of ages, for eighteen hundred years. Although he did not comprehend the great divine Principle that was soon to burst upon the world, freeing mankind from its bondage to error, yet with the faint light he had gathered from inspiration, he used the best means within his knowledge, and with good results. The struggle between Truth and error was short and decisive, and in the eyes of the wondering doctors a miracle was performed, for in a week's time the terrible, wrenching cough had been entirely conquered, the hemorrhages forever ceased, and a foundation built on Truth that nothing could ever shake.

This was the last time the doctors were ever called upon to minister to his ailments, and for forty years to the present day he has demonstrated on himself the great doctrines of Christian Science, though if asked, "By what power do ye these things," it would have puzzled him to answer, for the great and glorious faith, that had been buried in error for so many centuries, had not yet reached its resurrection morn. Though a close and constant student of the Bible, especially of the New Testament, groping for the light, he

Digitized by Google

was only gaining faint glimpses of the Truth. At the age of twenty he attached himself to an Orthodox church, but gained no new light thereby as he found so much that was repellent and unsatisfactory. He tried another in the search for light with the same results, and then commenced a study of all the different creeds available, only to be dissatisfied, as the errors that were everywhere apparent became revealed to him from the faint glimmer of the Truth that had come to him. He finally formulated a new creed, of which, as he believed, he was the only follower.

Thus he lived on, listening to the preaching of one creed after another, gathering here and there stray crumbs of truth as they fell from the different tables, until one Sabbath morn, about a year ago, he dropped in, as he then thought from mere curiosity, but as he now believes from the influence of the divine Spirit, where a band of Christian Scientists were assembled for worship. Here was something new, in name, but as he listened, more and more interested, the fact dawned upon him that his wanderings were over, for here was the true Church. He drank in with avidity the Truth for which he had been thirsting for so long and here found true fellowship and the "peace which passeth all understanding," and reached the desired haven at last.

Though commencing late in life, as years in this world are computed, the Truth has renewed his youth, and he is an active worker in the vineyard in spreading the tidings of great joy to all the people, making amends for the years lost in searching for the true light. May not the phenomenal growth of Christian Science, extending as it does through all the Orthodox churches, be largely due to bringing in the many, who, like him, have caught a faint glimmer of the true light while groping in the darkness of error, longing for deliverance from their bondage, and ready and waiting for the coming of the Master. The fields are already white for the harvest, Christ has come again, and the grain is being gathered in by the power of the Spirit.

And the Spirit and the Bride say, Come;
And let him that heareth say, Come;
And let him that is athirst, Come;
"And whosoever will
Let him take the Water of Life freely."

RETROSPECTION.

BY CHARLES EDWARD RIEDLINGER.

THROUGH the sash curtains of my room the light crept dimly. Above them the window was free and the full moon filled the space with a clean, pure light. The day had been very warm and the atmosphere was just cooling. As I awoke from an early nap I raised my hand to draw the curtains back and admit the beautiful light, clear and unobstructed. As I turned over on my bed my hand unconsciously fell on two objects which had been placed there when removing some clothing from my trunk. I raised them up that I might see them by the moonlight. One was a little silver medal with white satin ribbon; the other a little gold cross. Instantly my thoughts bridged a few years, and I saw a boy of eleven or twelve years marching up the aisle of a Roman Catholic church with many other children. The organ played magnificent music, and the singers' voices seemed angelic to the boy. I watched him as he kneeled with fervent devotion, and a sincere light spread over his face as the "First Communion" was ministered to him. I saw anew his teacher in spiritual affairs pin to his coat a red carnation and a white satin ribbon holding a little silver medal. That boy grew in the religion of his devoted mother; and within a few years afterwards I saw him many times in earnest conversation with the reverend "Father," for the boy now desired to join the priesthood. Later I saw him in mental anguish, and I watched him as one by one the threads which made the rope of his faith raveled and broke. Finally the anchor no longer held his boat, and he drifted on past the signal station of the Roman Catholic church. He drifted o'er *all* the troubled seas of Protestant churches. And I saw him at the last one—the Congregational church. When all had left, he detained the minister. Together they kneeled by a chair. The pastor's prayers were long and ardent, for he loved the boy. But from his unwilling lips the youth's burning heart tried in vain to wring the prayer of Protestant faith. Then the boat drifted on, into the seas of the religions of the Orient, and found the Mohammedan and the Chinese and the Indian—barren. At the World's Fair in 1893, I saw him with the Brahmin priests studying the thoughts "out of the mysterious East." I saw him study Theosophy and Spiritualism, and then I saw him, almost discouraged, plunge into Hypnotism. After *practising* there for a time his boat began to near a shore, and then I heard a dull thud as it was grounded on the solid land. Not knowing how long he would stay, in fact simply surveying the shore, with anxious, yet unbiased gaze, he emerged from the boat, and I saw him reading a little book. He read it from cover to cover. He said, "This is Truth! I will follow." Then I saw a little gold cross. My thoughts had returned from the hasty reconnaissance of the few short years, and the cross was in my hand. The boy of eleven or twelve years has grown into young manhood, and is now growing into the likeness of manhood in Christ. As I look back over those years, I am glad for their experience, for out of much tribulation have I learned God. Spiritualism would keep us in subjection to many spirits, good and evil, while Christian Science holds us in one divine Love. Hypnotism would communicate and force suggestion into its subject, while Christian Science knows that we are all the reflection of the one perfect Mind, hence we need not transmit suggestions of health and harmony, for they are man's *natural* habitat, and need only be discovered to him. Theosophy would have us waste our time in speculation on future *lives*, whereas Christian Science is a *present* help, and by it we live this life so that the future may take care of itself. Dear reader, if you are drifting, come to my weather-beaten boat, and it will land you on the shore

'Gainst which the winds and waves can shock,
Oh, nevermore!

HAPPINESS AT LAST.

BY B. M. W.

EVER since a child twelve years old I have been searching for happiness. At that age my mother passed on, leaving me desolate. My father, sister, and brothers, could not fill the vacancy. One of the members of the Methodist Church, where I always attended, said, "The Bible says, God is a father of the fatherless, and that means mother too." So I joined the church, and for a time found consolation in trying to live up to its rules, thinking that, by so doing, I was pleasing God and my mother.

Then a change came. The class meetings I used to love became distasteful; the prayers that once seemed so full of real goodness and earnestness seemed far removed from the simple prayer taught us by Jesus. I fought these feelings for a long time, thinking I was wrong, the church right. After a time I concluded I would like to be a missionary, but on mentioning it to the minister he thought I was too young to undertake the work now, but in a few years more I could think of it.

Having read many of my father's medical books, I became interested in medicine and trained nursing. I thought, perhaps in caring for the sick I could find peace, could get out of self and make some one else happy. I applied at the training school connected with the Brooklyn Hospital, was accepted, and passed two years there, that being the time required to receive a diploma.

The next four years I spent doing private nursing, in

Digitized by Google

New York and Brooklyn the greater part of the time. After finishing what, from a nurse's standpoint, would have been a successful summer, I came to my home in New York, tired of sick and dying people, tired of religion, tired of the doctors.

But at last I was to find that for which I sought. Living in the same house were two young ladies who were Christian Scientists. I met them and was told of the Truth; and now, after a search of eighteen years, I have found God, mother, happiness.

Belle M. Wisner, West Newburgh, N. Y.

A LESSON FROM THE CLOUDS.

BY F. L. B. B.

JUST at dusk one summer evening, when a dark veil or mist seemed to arise between our eyes and the setting sun, an immense pile of clouds, billowy in grace and motion, was outlined against the bluest of skies, in the south-east, touching neither the earth nor the heavens above.

Dark and earth-stained at the base, ceaselessly struggling and slowly rising majestically upward, the scene became lighter and brighter, until the summit of the mass shone out in snowy, dazzling whiteness, with a radiance caught from the unseen sun; and all so far above the earth, that the fact that the sun had disappeared on the plane below, did not affect their silvery shining.

The picture was likened in my thought to the body of Christian Scientists, "the cloud of witnesses" to the Truth. All have left materiality behind to a certain extent. Some are still darkened, at times, with much seeming error; yet all are constantly striving to reach the summit, to attain to the perfect man. As we rise higher and higher above materiality, the brighter grows the way, until we catch the light of the effulgence of the sun of righteousness, and are spiritually illumined in an atmosphere of Love Divine.

If again we descend, and sense becomes darkened, and we bring suffering upon ourselves, it is only to put forth still greater effort to reach the point where is reflected the pure white radiance of Divine Mind.

The time cometh when we shall all rise, to remain "forever with the Lord," reflecting eternally perfect rest and harmony.

"And the city had no need of the sun, neither of the moon, to shine in it: for the glory of God did lighten it, and the Lamb *is* the light thereof" (Revelation, 21 : 23).

TESTIMONIES.

A Christian Scientist residing in St. Augustine, Florida, wrote me of a demonstration which impressed me as being a beautiful illustration of the power of Love over hate.

She said: "The war does not seem so real to me as it has hitherto. There is much feeling in this old Spanish city against our boys, and a few Sundays ago a policeman, after firing his revolver a number of times, which made the crowd scatter, arrested one of them, a young boy.

"It was in front of our house, and hundreds of furious soldiers gathered around the policeman and were going to lynch the boy.

"I realized God's power as I never did before, and called the ringleaders to bring the soldiers to me, which they did.

"I talked to them, or Truth spoke, a few moments, and the frenzied mob was subdued by the Love that never fails.

"'She is right, boys; three cheers for the lady!' and they gave it with a vigor, and dispersed."

Was not this a grand demonstration of the power of ever-present Love?—*Emma E. Fiske, Washington, D. C.*

I had been an invalid for ten years with dyspepsia and its relative claims, and finally Bright's disease and paralysis, which confined me to bed four months. On the tenth of July, 1896, the doctors decreed that I had only a few hours to live. That night a Christian Scientist took my case. On the thirteenth I went out doors in a wheel chair, sitting upright for nearly three hours, and on the twenty-fifth I took a journey of one hundred and nineteen miles.

My physical healing has been slow but sure. I can eat any and every thing. Bright's disease is entirely healed, and many other organic claims gone. I feel that I am gaining every day. My spiritual growth has been grand, and I know did every one realize the true, pure happiness Christian Science brings, they surely would want to enter it. We never can be thankful enough to our dear Mother for showing us the way to God, health, and happiness.

E. D. W., Elmira, N. Y.

Five years ago I was healed through Christian Science. One claim which brought great fear was so-called incurable disease of the heart.

For two years before accepting Truth, a dear friend had told me repeatedly that Christian Science would heal me, and in her loving, patient way, tried to lead me to Christ to be healed. But that stolid indifference of mine, worse than open antagonism, kept my eyes holden and my ears locked. Only when I knew *materia medica* could do nothing for me, and after an M. D. said to my husband, "Keep her quiet, from overdoing, and from all excitement, she may live years, and she may go very suddenly," did I turn to Christ, Truth, and was healed.

There are no words to express the peace which followed the first treatment, and there has been an abiding sense of "that peace of God, which passeth all understanding" from that time to this.—*Flora Snodgrass, Spokane, Wash.*

It seemed that I had all the "ills that flesh is heir to." I had nine plasters on my body when I took the first treatment in Christian Science. I tore off five after the first treatment, and the other four after the second one. Mortal mind said, "If you take the one from the heart you will pass away," but I tore it off and felt no effect whatever. I wore glasses for twenty years, and was confined to three pairs much of the time. I laid them off nearly two years ago. I have brought my children out of many severe claims.

Our little pug dog was brought in one day. They said he was poisoned and was nearly dead. I at once declared there were no elements of poison in Love, and mortal belief could not mesmerize me, and the dog was well the next morning. Science and Health is my only teacher.

Mrs. Mary E. Leach, Chicago, Ill.

I had been an invalid for twenty years and had given up all hope of ever being well. I was made all over new by Christian Science, and can "run and not be weary; and walk and not faint." I have remained well ever since I was healed, about eight months ago, of catarrh of the head, dyspepsia, and liver complaint. I am sixty-six years old.

Sarah C. Hume, Stratton, Texas.

BRAVE minds, howe'er at war, are secret friends,
Their generous discord with the battle ends;
In peace they wonder where dissension rose,
And ask how souls so like could e'er be foes.—*Tickell.*

CHURCH RULE.

THE attention of the Field is called to the following church rule:

"The regular meetings of this church shall convene annually. They shall be held on the first Tuesday in June following the Communion Sunday of that year, beginning in June, 1899, for the special purpose of listening to the reports of the treasurer, clerk, and the committees, and general reports from the fields of the members of this church."

It will be seen by this rule that the annual meeting which was to have taken place in October of this year will not occur.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

JOSEPH ARMSTRONG, C. S. D.,

PUBLISHER,

95 FALMOUTH STREET, BOSTON, MASS.

The Christian Science Journal,

Founded, APRIL, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REVEREND MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical Healing, as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscriptions:

Payable in advance, postage free, to any part of the United States and Canada. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents. Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

THE CHRISTIAN SCIENCE QUARTERLY,

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday Services in all the Christian Science Churches throughout the year.

VOL. 1 BOSTON, MASS., U. S. A., SEPTEMBER 8, 1898. NO. 2

CURRENT EVENTS.

William Wilson, editor of "The London Year Book" and other publications, amplifies the article which was published by the *Spectator* on Saturday last regarding France's attitude toward the United States in the late war. He says that not long after the opening of the war the French government conceived a plan, the object of which was to rescue Spain, to administer a rebuke to American ambition, and to assert European supremacy in the complications in the Western world. By a combination of good fortune and diplomatic adroitness, the French government secured the support of the other continental powers, Germany and Russia included. The stroke was all but completely prepared, and nothing remained but to secure, if not the active adherence, at least the tacit consent or neutrality, of the English government. At this point the first and last check to the scheme was received. The English people, so reasoned the French Cabinet, have suffered more from American aggression of late years than any other nation. Deeply angered by the worst part of the American press, they must have reached the limit of their endurance under the menaces of President Cleveland. Here, therefore, is their opportunity for an easy and overwhelming revenge. Accordingly the proposition of diplomatic intervention, if that should be sufficient, or force of arms if needful, was definitely submitted to Lord Salisbury. To the unmeasured surprise and grief of the French Cabinet, a reply was delivered to the effect that if the plan was not directly abandoned, not only would Her Majesty's government refuse to countenance its execution, but would join forces with the American government and declare war on France and such supporters as should come to her assistance. The negotiations at once fell through, and the French government was compelled to beat a retreat.

Emperor Nicholas of Russia, on August 24, ordered Count Muravieff, the Foreign Minister, to hand to the foreign diplomats in St. Petersburg a note declaring that the maintenance of peace and the reduction of the excessive armaments now crushing all nations, is the ideal for which all governments ought to strive. The following is a part of the note:

"The maintenance of general peace and the possible reduction of the excessive armaments which weigh upon all nations, present themselves in existing conditions to the whole world as an idea toward which the endeavors of all governments should be directed. The humanitarian and magnanimous ideas of His Majesty the Emperor, my august master, have been won over to this view in the conviction that this lofty aim is in conformity with the most essential interests and legitimate views of all the powers, and the imperial government thinks the present moment would be very favorable to seeking the means."

In connection with the above the following is of interest:

"Russia possesses the largest standing army on earth, and each year it grows in size. Every year some 280,000 conscripts join the Russian forces, which in time of peace number 1,000,000 men. On a war footing this rises to 2,500,000, and calling out of the reserve would increase it to 6,947,000 well-trained soldiers. Should necessity arise, the militia would be called out, bringing the Czar's forces up to 9,000,000 men."

Promptly at the time appointed, the great spectacular pageant of warships put in its appearance in Boston harbor on Friday, at two o'clock P.M.

The fleet sailed by Boston Light in the following order: The Massachusetts, Machias, Detroit, Castine, Wilmington, Helena, Marietta, Bancroft, Topeka.

It was about one o'clock when the Massachusetts entered the Narrows, and was greeted by tremendous cheering from the soldier boys at Fort Warren, gathered on the parapet. Nothing like that cheering was ever heard in Boston harbor before, and the shouts sounded at Telegraph Hill like the noise of a distant storm.

It was 1:20 when the last ship in the parade, the Topeka, passed Fort Warren, and was given the final round of applause. Then the crowds from the hills and beaches dispersed, and the outer harbor was left in its usual peaceful condition.

The parade had taken about twenty minutes in passing Boston Light, and was stretched out about two miles in length. Boston turned out almost *en masse* to witness the parade, and the reception given the great war vessels was certainly an enthusiastic one.

The great Fair at Omaha has not thus far attracted as much attention in the east as its importance demands. It has recently been said by an eastern man who visited it that those from the east are amazed at its extent and magnificence; and he further says, "I have seen all the great fairs held in Europe in recent years; the Paris Exposition, as well as fairs of Belgium and Germany; and this Omaha Exhibition compares favorably with any of them. Indeed, I like it better than anything I have seen in Europe. It is not as extensive as the World's Fair in Chicago, but it pleased me quite as well. I am sure that the electrical exhibits surpass anything ever seen. It is too bad that eastern people do not know more about this Fair. It is well worth the trip west to see it."

President McKinley has recently ordered a number of promotions among the officers who participated in the capture of Manila. Among others are the following:—

To be major-generals of volunteers—Brigadier-General T. M. Anderson, Brigadier-General Arthur MacArthur, Brigadier-General F. V. Greene.

To be brigadier-generals of volunteers—Colonel S. Overshine, 23d United States Infantry; Colonel Irving Hale, 1st Colorado Volunteer Infantry; Lieutenant-Colonel G. A. Whittier, United States Volunteers.

To be major-general of volunteers by brevet—Brigadier-General John B. Babcock,

Copyrighted, 1898, by Mary Baker G. Eddy.

A meeting of the Universal Peace Union recently took place at Mystic, Conn. Among other things, President Alfred H. Love, of Philadelphia, said,—

"Thirty-two years ago, when the Universal Peace Union was organized, I made the following statement: 'If we have not a desire beyond popular approbation; if we have not a record equal to criticism, a love superior to any man's hate, a charity that extends to all the world, a trust that is centred in the Supreme Being, and a faith willing to accept martyrdom in obedience to the moral, we had better make no move for universal peace.'"

A unique newspaper has recently been established in Cornwall, England. Its object is to make its readers healthy and happy. It is called *The Ostrich*. Only agreeable things are to be published in it. It is printed on a pale rose-colored paper, and certain words like "happy," "good," "peace," "success," "agreeable," "healthy," "beautiful," etc., are printed in heavy type. All such words as "death," "pain," "killed," "misfortune," etc., are avoided. In the entire paper, with the exception of one column, not a single disagreeable word is printed.

The interest in the business opportunities offered in Cuba and Porto Rico, which is felt by the business men of the United States, is shown by the large number of letters on that subject now being received by the Treasury Bureau of Statistics. These come from all parts of the country, but especially from the great manufacturing, producing, and business centres. The inquiries are generally for statistics as to the imports into those islands, the purpose evidently being to determine the class of articles demanded and the countries from which the supplies have been drawn of late.

The English press and people are loud in their praise of Ambassador Hay. They say his services have been invaluable in bringing about good feeling between this country and Great Britain. They speak warmly of the pleasantness of matter and of manner in his after-dinner speeches, and of his charm as a highly bred and cultivated man in the ordinary intercourse of society, official and unofficial.

President McKinley has appointed his Peace Commissioners. The complete list comprises Secretary of State Day, Senator Cushman K. Davis of Minnesota, Senator William P. Frye of Maine, the Hon. Whitelaw Reid of New York, and Justice White of Louisiana. Judge Day is to be chairman of the commission.

The following constitute Spain's Peace Commissioners to meet in Paris with the American commissioners:—

Senor Leon y Castillo, Spanish Ambassador at Paris; Senor Urrutia, Spanish Minister at Brussels; the Duke of Najera, Governor of Cadiz; Senator Marcoartu and Senor Abarzuza.

Governor-General Blanco has issued an official proclamation, in which he counsels the Cubans to be quiet in face of defeat, advises them to take no part in political affairs, says that the United States will care for their interests, and concludes by saying that he did all in his power for the Spaniards in Cuba.

General Garcia has been relieved of his command by General Gomez, acting under instructions from the provisional government of the insurgents. This is in disapproval of his action during the Shafter incident, and in view of the fact that Garcia was not in harmony with the American government.

Advices from Managua, Nicaragua, are to the effect that the members of the convention which has been engaged in forming a federal constitution in the United States of South America, have signed the constitution which binds Nicaragua, Salvador, and Honduras as an independent nation.

Secretary of War Alger insists that an investigation of the alleged irregularities and abuses in the War Department is not necessary. He says that if anything is done Congress will have to take the initiative. The blame, if anything has gone wrong, rests with the commanding officers.

A notable gathering of bankers recently occurred in Denver, Col. The National Bankers' Association held its annual meeting there. It is estimated that the combined wealth represented by the delegates present exceeded $1,000,000,000, and deposits of more than $4,000,000,000.

It is reported that Captain-General Blanco will welcome our commissioners, and do all in his power to restore tranquillity. Havana has resumed activity in a commercial way, and places of amusement and cafes are re-opened. Americans are to be carefully guarded from attack.

According to New York commercial estimates, the absorption of the Spanish colonies means the surrender on their part of customs revenues amounting to over $10,000,000, or a sum equal to one-quarter of the collections of this country.

It is now rumored that an Anglo-German alliance has been effected. It is said that the agreement is complete, and based on the lines of the speech of Mr. Joseph Chamberlain. Its authenticity yet remains to be vouched for.

The Rhode Island Supreme Court has decided that Christian Scientists do not violate the law prohibiting the practice of medicine without a license, because they do not give medicine.—*Albany Law Journal* of July 30, 1898.

The Boston Subway is now ready for use throughout the entire system, and has been opened to the public. This is undoubtedly one of the greatest achievements of its kind known to the world.

The Hon. Henry Robinson has just been appointed to the postmastership of Concord, New Hampshire. Mr. Robinson is a lawyer of distinguished ability, and has long been prominent in New Hampshire politics.

Up in Maine there is a movement on foot among the school children to raise funds with which to build a new battleship. Nearly $50,000 have been already contributed. The idea originated with two Maine boys.

It seems that the Cubans are now feeling better towards this country. General Lawton is appeasing their anxiety. Their confidence in the good purpose of the American government is being restored.

Word comes from Paris, France, that the movement in favor of a revision of the Dreyfus case is growing stronger. It may be that he will have another trial.

The sentiments of the merchants of Manila would seem to be unanimous in favor of annexation to the United States.

All American troops, excepting those actually needed for service, have been ordered home from Porto Rico.

The public schools are about to be reopened in Santiago de Cuba on a strictly non-sectarian basis.

Twenty-eight new torpedo craft are to be added to our navy, sixteen of them destroyers.

Major-General Merritt has sailed from Manila to join the Peace Commissioners in Paris.

Up to date Helen Gould's war contributions foot up to $127,000.

MISCELLANIES.

ately a sort of epidemic for employing women in the sportation service of the country has broken out, says the *York Sun*. It seems to have started last winter at Mid-own, Conn., where a woman got employment as a motor-on a street car. The notoriety the line got as a result discouraging, so the pioneer was discharged, but the on that women would make first-class conductors, if not manipulators, in small towns struck more than one street oad manager.

ut in Vincennes, Ind., a month or so ago, the local street way company, in a fit of economy, decided to discharge nen conductors and employ women. Fifty women ap-l for the job and five were put to work at $5 a week.

t Chillicothe, O., the experiment has been running along essfully for several months, and the superintendent of Electric Railroad Light & Power Company, W. J. ers, has written an optimistic letter to the *Electrical ineer* on the subject:—

We could not afford to employ men, and we could not why women would not make as good conductors as men. keep them on duty ten hours a day, and pay them $14 week, and they are proving themselves in every way com-nt and efficient. We are very particular in selecting n, and had no trouble in getting good applications, and a t many more than we are able to employ. It gives us a clean service, and we think that this will be a new field the employment of women."

ladison, Ind., has caught the epidemic, too, but somehow citizens seem to have been inoculated against it. The ilies of the men who have been thrown out of work by new women conductors have been making a big fuss t it, and the citizens declare they will walk before they patronize cars conducted by women.

he steam railroads are falling into line. It is four or five s now since a vigorous howl went up because the Brook-Elevated decided to employ women ticket agents. A few ths ago the Baltimore & Ohio Railroad put women in ge of eighteen of its offices. Time and again it has been ored that the New York Elevated and the New York tral Railroad would substitute women in its stations all g the line. Already there are more women employed he Central's offices than on any other road.

ome six or seven weeks ago, it was announced that the istian Scientists of Parker and Wise Counties would hold ice? as it was too late to build an arbor. Mr. B. L. Fer-rnoon the following notice was handed to Matt. Russell:

VEAL STATION, TEXAS, July 27, 1898.

r. Matt. Russell:—We, the board of trustees of Parsons h School, give notice that we cannot permit you as a istian Scientist, or any other of the same faith, to hold kind of meeting such as Christian Science in the school ding or upon the grounds belonging to same.

G. C. SPANN, *Pres. Board.*
. H. HARTNESS, *Sec. pro tem.*

he said grounds contained all the good shade near by, and question was, Will the Christian Scientists hold their ice? as it was too late to build an arbor. Mr. B. L. Fer n solved the problem by tendering his store to the Scien-

Sunday at 11 A.M. found an interested congregation d upon hay bales for pews. It was a scene never wit-d in these parts before. Amid barrels, boxes, hardware, s, groceries, and stationery, the congregation sang, rer, my God, to thee." Then the 91st Psalm was read, wed by a silent prayer, and the Lord's Prayer, with its tual interpretation. The "sermon" consisted of the les-prepared for all churches of this denomination in the Lesson *Quarterly*, subject, "Spirit," and was composed ible references and their correlative passages from "Sci-and Health with Key to the Scriptures," by Mary Baker G. Eddy. The best of interest was manifested by all, and perfect order prevailed. At the close of the afternoon services Mr. Ferguson was thanked publicly for his kindness, and several sought him out and thanked him personally. So begins the first chapter in Christian Science in Veal Station, and hereafter there will be services every Sunday at the residence of Matt. Russell. Everybody is welcome.

The Parker County News, Weatherford, Texas.

WE ARE THE TEN TRIBES.

CHICAGO, July 18.—At a meeting to-day of persons interested in establishing the identity of Anglo-Saxons with the House of Israel, or the "lost ten tribes," held in the Y. M. C. A. parlors, an Anglo-Israel Association was organized. The object of the association is to spread the truth of the claimed identity with the chosen people. It will be the purpose of the organization to hold meetings at regular intervals, when papers will be read upon the theme, discussions had thereon, questions answered, and literature distributed. The fact that England and the United States bear all the marks by which the kingdom of Israel was to be identified in these latter days, and that the people are accomplishing the especial mission of this people, has been a source of wonder to many Bible students. A temporary organization was effected, with George E. Inglis as chairman, and George Ker as secretary.

DENVER, COL., July 19, 1898.

Dear Editor:—I enclose you the above clipping. It shows us what the world is beginning to realize. The article in our last *Journal*, "Interesting Prophecy," is so beautiful and true when compared with St. John, I could but repeat, "He that hath an ear, let him hear what the Spirit saith unto the churches," which is the world to-day.

A. L. WILLOUGHBY.

TRENTON, N. J., August 1, 1898.—Mrs. Lydia Parsons, the ninety-nine-year-old woman who is showing signs of returning youth, goes right on growing young. "I used to be a rheumatic once in a while when the weather got damp, but I've got all over that now. I never have an aching bone, any more, and I can walk as easily as I ever could." For nearly twenty years, Mrs. Parsons wore spectacles, and the lenses were strong. Even then it was with difficulty that she read the Bible, to which she is warmly devoted. Suddenly her eyesight returned, and she is able to read without glasses as easily as she could when she was a girl. For twelve years she was deaf, only the loudest tone of voice was audible to her; but with the return of the sense of sight came the faculty of hearing, and to-day she can detect a whisper across the room; and now, to make the remarkable case more remarkable, lines of black are creeping into her hair, which was pure white.—*New York Journal.*

THE CLOUD OVER VICTORY.

THE pomp and stately pageantry of War,
Fame's trumpet-tongue, delights to spread afar
Its gallant prowess, deeds of high emprise
Win for the Victors praise from hearts and eyes.
But War exacts cruel asperities—
Too oft its bravest heroes victims fall,
And homes of love are shrouded with a pall—
While multitudes of maimed seek our relief.
E'en Victories bring inevitable grief;
Life's golden chalice we too often greet,
To find alas! the wine embittered sweet.
We joyfully accord the Warrior's name
Loud plaudits and the laurel wreath of fame;
Shall we less heed the sad, pathetic plea
Of valiant sufferers who fought for you and me?

New York Times. FREDERICK SAUNDERS.

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address. one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

EDITORIAL.

The *Weekly* has made its first bow to the Field. We trust and believe it was received in the spirit in which it was sent forth,—the spirit of love and helpfulness.

The dedicatory poem of the Rev. Mary Baker Eddy is pregnant with meaning for the hour.

Sincerely do we hope that "the eyes of them that see shall not be dim, and the ears of them that hear shall hearken."

Our great effort should be to have constantly seeing eyes and hearing ears. As the children of Israel and the disciples of olden time saw and heard, they were instructed and blessed. In so far as they failed to see and hear, they met the inevitable penalty of such failure, whether it took the severer form which came from wilful disobedience, or the milder form which came from ignorant or careless disobedience. As it was then, so is it now. So shall it continue to be "to the end."

The increased quantity of matter made necessary by the publication of the *Weekly* will require a correspondingly larger number of contributions from the Field. We feel sure that our beloved co-workers will respond to this additional demand with the same generosity and unselfishness of purpose that have so liberally characterized their tributes to the *Journal*.

We should like to have it understood that articles sent us may be published in either the *Journal* or *Weekly*, as the convenience or judgment of the editors may require or dictate. In other words, let the articles be written only in the interest of the Cause, and when sent in let it be understood that they are in the hands of those who have been assigned the duty of using them in such way as, from the vantage-ground of their experience, they may deem best.

It shall be the endeavor to keep the columns of the *Weekly*—as it has been to keep those of the *Journal*—free from anything in the nature of personal crimination or recrimination, charge or counter-charge, or controversy of any kind. Only as articles are manifestly written in the sole interest of the Truth we have espoused, should they have place in our publications. We feel that this will continue to be the controlling desire of all.

Let it not be inferred that because we publish a great many testimonies, we desire only these. We are glad also of articles in the line of essay and dissertation. These, as a rule, are written from the experience of the author as truly as those relating to the healing of disease. In fact, we are glad of whatever is *good* and helpful to the Field and the outside world.

We shall hope when our *Weekly* child (puns upon this name are strictly forbidden) is fairly on its feet, it will grow both materially and spiritually.

FROM CUMBERLAND PRESBYTERIANISM TO CHRISTIAN SCIENCE.

BY REV. MATT. RUSSELL.

I was raised by strict members of the Cumberland Presbyterian Church. At eighteen years of age I joined the church and endeavored to live up to its highest teaching.

I was impressed that there was a higher work for me to do, and told one of the most God-fearing men in the ministry of those impressions. He advised me to join the Presbytery, and in course of time I was licensed and ordained to the whole work of the ministry, and for sixteen years I conscientiously did the work of the highest spiritual teachings of the Confession of Faith.

In March, 1897, I was employed by J. A. Wilmar & Co. to introduce "The Bible Interpreter" in the North.

At Fort Scott, Kansas, I met my son, and when I told him of my wife's sad condition he said I ought to see a Christian Scientist—that he would cure her. He was so enthusiastic over what he had heard and seen in Kansas and Nebraska that I decided to have a talk with the first Scientist I should meet.

At Decatur, Illinois, I met Mr. Smith and others, and, contrary to my expectation, I found them very intelligent people, and not in the least bit cranky. I determined to have my wife treated if she would accept it.

There was one thing about our talks that impressed me more than anything else, and that was that when he advanced a thought that was contrary to my belief and I commenced to controvert his point, at once he would dismiss the subject, telling me that I was not ready for that yet; but I thought I wanted to know.

One evening a disease that I had brought with me from Texas made its appearance. I gave it all the old remedies and a lot of new ones. I was in a sorry plight, suffering the most excruciating pains, and the last remedy known to *materia medica* was exhausted. Suffering humanity commenced to look to some other source for help. My friend S. was appealed to. He declared the truth and I went to sleep, the only rest I had had for twenty-seven hours. Strange, but after treatment I had my doubts. It all seemed so strange that I could not realize nor accept the truth.

The seed was sown in good ground, for four weeks later, at Janesville, Wisconsin, I bought a copy of Science and Health to send to my wife. I believed now that she would be greatly helped, and she had written me that she would accept treatment. I took that book to my room after supper, and at two o'clock I laid it down, only to commence again with the morning. As I turned page after page my interest increased, and so it went for several days and nights. I saw things differently. I had been craving more light. My faith had been placed upon God, and I was willing to follow my leader and fear no evil. I made it a point to ask every Scientist a lot of questions, and I am satisfied no child was ever more eager to gain information than I was. I never missed a Sunday service nor a Friday evening experience meeting. When I reached Madison, Wisconsin, the first thing I did was to buy Science and Health and "Miscellaneous Writings." I had learned that there was to be no teaching for a while at least, so I applied every moment of time to study and investigation, *and asking questions.*

Digitized by Google

Then I had my first demonstration in Christian Science. My old belief made its appearance again in a severe form, and I was instantly healed. Never was there a more surprised man than I was. It did not seem possible, and yet I could not doubt. I said, "Even the devils are subject to us." I was so elated over my demonstration that I commenced to treat a bad case of hemorrhoids with the best results. It seemed that my happiness was almost complete.

I now turned my thoughts toward home, and after a while my wife wrote me that she was in better health than she had been for years, had thrown her medicine away, and was reading Science and Health regularly.

I did not care to belong to the Cumberland Presbyterian Church any longer, so I wrote asking a letter, but somehow that letter did not reach its destination in time, and I did not get the letter of dismissal. I came home for the holidays, but the word had preceded me that I had gone off after some fool fad or ism from the North. Malicious falsehoods were circulated as to what Christian Science taught, and it was surprising to hear those learned people talk about something they had never heard of before, much less investigated.

Without the fear of punishment, or hope of reward, I delivered two talks, and could have delivered several more, but saw I was stirring up too much opposition. One dear brother became quite alarmed for the church (not God's cause), and called a meeting of the Presbytery to investigate rumors detrimental to my ministerial character.

When the Presbytery met I told them that I could no longer preach the doctrines of the Cumberland Presbyterian Church, and surrendered my credential of licensure and ordination, and they gave me a certificate of Christian and moral character.

I am free now, and there is on my table an invitation from a loyal student to join The First Church of Christ, Scientist, in Boston, Mass.

Truly the field is white unto the harvest, and the laborers are few. There are only seven of us in the county, two preachers and one editor, but with God with us we are in the majority. I fear no evil. Years ago I went out into the field and organized Cumberland Presbyterian Churches.

Why should I not, with a far better system of religion, one that will demonstrate itself and prove that it is of God, do more for the Master than ever before?

The profane world has been for years demanding of the churches a better defined line of living than they have been giving, and the time has come when an advance must be made or the churches will recede to the background.

Christian Science solves the problem and satisfies man that God is a very present help. It does away with dogmas and worn-out theories, and brings man into the realization of his relation to his Creator.

VEAL STATION, TEXAS, March, 1898.

CHRISTIAN SCIENCE IN DENTISTRY.

BY CHARLES L. VAN FOSSEN, D.D.S., C.S.

For some time past it has seemed to me that the subject of Christian Science should be presented to the dental profession, and I have eagerly scanned the Journals monthly, with the hope that some one better qualified than I had given us a paper on this subject; but, being disappointed, and feeling that this is a matter which would be of great benefit to all dentists in their daily work, I therefore beg the privilege of giving my experience, in the hope that it may be the means of causing many to investigate, and thereby to profit as I have done.

INTEMPERANCE CURED BY CHRISTIAN SCIENCE.

A little less than two years ago the subject of Christian Science was suggested to me as a possible means of relief from alcoholism, the habit having such a hold on me that I was unable to do without my regular potion, and, having relapsed from a course of treatment by the gold cure, I had fallen into that state of abject helplessness known only to the alcohol slave. I had no faith whatever in Christian Science when it was presented to me, but told a friend that if he thought he could assist me he might treat me, as I earnestly desired to rid myself of the habit, or disease. He told me he would take up the case. A few evenings later he called at my home and gave me an idea of what Christian Science is, and it was then that I first noticed that in the last few days I had been more moderate than for some time previous in my drinking, but did not say so to him. From this time on the desire for alcohol gradually left me, and shortly thereafter, when I took an inventory of myself, I found that for days I had had no desire to drink, and then it fully dawned on me that my friend, through Christian Science, had done the work.

While being treated for the liquor habit my taste for tobacco gradually left me, after I had been an habitual smoker and chewer for over ten years. From the time I arose in the morning till I retired at night, except at meals, I had tobacco in my mouth. This desire left me under Christian Science treatment, and has never returned.

This liberation from bondage caused me to look into Christian Science, and, while it was different from any line of thought I had ever investigated, I soon learned that just in proportion as I understood it I could demonstrate or prove its teachings, provided I earnestly and conscientiously lived and practised it, and adhered to its fundamental rules. I began to see that I was simply a child with a new study, and that I must not expect to solve all the difficult problems till I had graduated away from its basic principles.

For a period of over four years I had worn glasses for astigmatism, and was compelled to close up my office whenever an accident, necessitating repairs, occurred to my glasses, using my eyes without glasses invariably throwing me into a severe sick headache. Through Christian Science treatment I removed my glasses, and since that time, over a year ago, have had perfect eyes. I never think of shielding them day or night.

CHRISTIAN SCIENCE HELPFUL IN DENTAL PRACTICE.

The application of Christian Science to the practice of dentistry, I at first thought one of the impossibilities; but with my little understanding I desire to say that it applies better than I could even have hoped for. It has enabled me to do more work, do it better and with less fatigue than I ever did before.

It has enabled me to allay the fear of my patients to such an extent that I hardly know what it is to have an irritated and troublesome patient in the chair. In handling of children I operate with almost as much ease as with the ordinary adult, provided I can have the child away from the parents, who generally insist on standing at the chair, forcing the child into the idea that the work is very painful.

There is nothing harder for the dentist to meet than worry, irritability, or fretfulness, whether in himself or in the patient, for, in either case, the condition is reflected to the other. Some trivial happening will disturb your equanimity, and before you know it everything goes wrong. Your gold balls on you, your instrument slips and you puncture the dam, when a large filling is only half completed.

Your assistant does not do anything right—generally she can anticipate your wants, but now she gets just the things you don't want and has misplaced the things you need most.

These are a few of the conditions which seem to surround us, and we find ourselves either compelled to dismiss the patient, to return and finish the operation another time, or we complete the work in an unsatisfactory manner, and then find ourselves in a state of complete collapse.

This state of mind—and that is all it is, a state of mind—is met by the Christian Scientist before it becomes magnified into a great reality, and the illusion is dispelled. Not by a senseless assertion that "nothing ails me," as the manifestation

Digitized by Google

of sickness of both mind and body is just as real to the Christian Scientist, from a material standpoint, as it is to you, and he knows full well the suffering you undergo; but from the spiritual standpoint he sees the utter unreality of the condition, and he goes to work with his understanding of the rules with as much certainty of the result as you do when applying the simplest rule in arithmetic, and is able to obtain the correct result just in proportion to his knowledge and application of such rules.

Every case that is brought to Christian Science is not healed, for the same reason that every man who attends a dental college does not make a dentist.

Christian Science has been the means not only of releasing me from the bondage of appetite, but of showing me the way to be contented and happy, and how to keep so; and it is with great pleasure that I say to my brother practitioners of dentistry that if you are not satisfied in every way with your condition, either physical or mental, procure a copy of "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, the text-book of Christian Science, give it careful study, and you will receive the same blessing that I have.

[The above is published from *Items of Interest*, a monthly magazine of Dental Art, Science, and Literature, August, 1898.—ED.]

CHRISTIAN SCIENCE CHURCHES ORGANIZED.

THE interest which has been taken in Christian Science in this city for many months, and which has constantly been on the increase, has resulted in a movement that promises to be successful for the establishment of a permanent organization in South Bend. A meeting was held on Friday evening, August 19, at which papers of incorporation prepared by Attorney F. E. Lambert were presented, read, and adopted. These will soon be filed, and the society will then be upon a permanent basis.

The articles of incorporation are not long. They open by stating that James S. Alward, Joseph M. Hamer, and William B. Dickson have agreed to form a society to be known as the First Church of Christ, Scientist, the society to have a corporate existence of fifty years. The objects are set forth to be the "promulgation and demonstration of the teachings of the Bible as interpreted in 'Science and Health with Key to the Scriptures,' by Mary Baker G. Eddy. The business affairs are to be transacted by a board of three trustees, who shall be elected at the annual meetings on the second Monday of each January to serve one year. Their duties will be designated and controlled by certain rules and by-laws yet to be adopted. The trustees for the first year have been elected, and are James S. Alward, Joseph M. Hamer, and William B. Dickson.

The seal of the society, according to the incorporation papers, is to be "a circular metallic seal with the words 'First Church of Christ, Scientist, South Bend,' engraved thereon."

The incorporation papers bear date of August 19. They have been signed by James S. Alward, Joseph M. Hamer, William B. Dickson, C. S., Grant L. Waldsmith, Clara B. Dickson, C. S., Hattie L. Reynolds, Adelaide Squires, and Adele V. Kahn. Others are expected to affix their names before the papers are filed. The society is at present holding its Sunday services in the Auditorium of the Public Library. It is understood to be the intention to hold Sunday services in the new Auditorium when that structure shall have been completed.

A business meeting of the society will be held on Friday evening.—*The South Bend Daily Tribune.*

It is almost five years since Christian Science was introduced in this county by an ardent believer and worker for the cause of Christ-Truth, Miss Rebecca Parry of Scranton, Pa., who is a member of The First Church of Christ, Scientist, of Boston, commonly known as the Mother Church. This church has a membership of over eleven thousand. The building is a magnificent one, being built of granite, at a cost of nearly a quarter of a million dollars. The Cause is rapidly spreading, the movement having over a million followers with over three hundred organized churches. New York city has four churches, Philadelphia two, Washington, D. C., one, Buffalo, two; and recently churches were dedicated in Canada and Chicago. The Chicago church cost $107,000. Christian Science was little known, and in fact not heard of, by the majority of people in this vicinity five years ago, but now there are many who can testify of having been healed by the Christ-Truth,—by the understanding of what truth is as per Jesus' words: "Ye shall know the truth, and the truth shall make you free." And to study the word in search of Truth a number have for the past few years met each Sunday to study the Scriptures in this new light, and finally have fitted up a room in the residence of J. C. Bierley, West Main Street, as their place of worship. Having notified those who are friendly to the cause that the time had come when they would organize, with invitations to join, they met accordingly last Sunday and were organized into a church to be known as First Church of Christ, Scientist, of Howard, Pa. This church will be considered, as are all others, a branch church of the Mother Church. There are many inquiries as to Christian Science and its methods by those who have heard of its wonderful healing. Those now desiring information can procure the same by writing to Secretary First Church of Christ, Scientist, Howard, Pa. All services are public; no one is excluded, but all are cordially invited to attend.—*Bellefonte Republican, Pa.*, August 25, 1898.

IN GRATEFUL ACKNOWLEDGMENT.

BY MARTHA SUTTON THOMPSON.

I WAS the weakly one of the family, and the ordeals of school life, teaching, disappointments, and an injury received on the school ground culminated in invalidism. For twelve years I kept my bed, excepting that during two years of that time I was able to be wheeled in a chair and go about the room hanging on crutches. But after that, for three years before I found Christian Science, I was quite bedfast.

I was very hopeful, and clung to the conviction that *something* would cure me. I had lost faith in medicine, and quit its use. The hardest trial came just before the dawn. My sight was nearly put out, and for fifteen months I had to lie in a dark room. No one knows the awfulness of this condition unless he has experienced it. During the last two years of my invalidism I struggled constantly for divine healing; was sometimes better, but afterwards worse than ever.

I became almost crazed sometimes, with the conflict of thought. The Bible, from Genesis to Revelation, promised healing conditionally; but in proportion as I considered I fulfilled the required conditions, I grew worse. I could not give up the struggle for God's healing, and to go on seemed to threaten insanity. At last one day my sister-in-law read from the St. Paul *Pioneer Press* an account of healing by Christian Science. I had had a magazine of Mental Science stating cases of wonderful healing, but paid no attention to it. But as soon as I heard this I believed. Hardly knowing whom to approach, I wrote to three practitioners. To each I put the question, "What is the difference between Mental Science and Christian Science?" Two letters came explaining that no difference existed between Christian Science, Mental Science, Divine Healing, and the doctrines and practice of Jesus. The third letter sent the simple reply, "The difference between Christian Science and Mental Science is just the difference between the truth and a lie." I said, "This last letter is from the real Christian Scientist." I began treatment, saying in my first letter that I had every confidence in my recovery. The healing was gradual. I was treated four months. In eleven days my eyes had so far recovered that I could open the blinds and look out of doors upon one of our beautifully shaded streets. After

Digitized by Google

fifteen months of darkness, neither pen nor tongue can describe the beauty of that scene as it appeared to me. My muscles were flimsy as rags, but I learned to "run and not be weary, walk and not faint."

I was first treated in June, 1887. In November I took a class course. I have been in the work ever since and have the best of health. The only real foundation for happiness is the understanding and demonstration of Divine Science. The reality of life begins to appear.

When I came to Grand Forks eight years ago Christian Science was unknown here. Soon two or three met together. But the city proved a veritable Capernaum for a few years. Nevertheless, the prejudice was gradually broken, and we are no longer threatened with violence, maligned in the pulpits, nor despitefully used in the streets, but our church society is recognized by the other denominations.

We first organized as a church in 1891, and in 1896 obtained a charter from the state. Our membership is not large at any time, as a great part of the population here comes and goes, and quite a number of the members have gone to other localities and transferred their membership. The greatest number of members we have had was forty-two. The average attendance at our Sunday School last quarter was twenty. We have a Students' Association, which provides literature for our Dispensary and Reading Room, where the sales for the past year amounted to over four hundred dollars. A church fund has been started, and we know, the reality of every good thing being in mind, we have only faithfully to demonstrate and the church will appear, even to material sense.

THE LORD'S PRAYER.

Says Mr. W. B. Addington in a recent number of the *National Single Taxer:*—

I believe that the Lord's Prayer is the grandest combination of words in the English language. It comprehends in its scope the sum of all human wants and hopes. It dispenses with all creeds and brings humanity into one great brotherhood, as children of one father.

Let us partly analyze it.

"Our Father who art in Heaven; hallowed be thy name." How can the relationship be closer than that of father and children? And if children, what a great brotherhood we should be—a brotherhood without any conditions whatsoever!

"Thy kingdom come; thy will be done on earth." Christ gave this prayer, through his disciples, to the world as a model. It was no visionary or idle dream of his. He believed it possible that God's will could be done on earth. He said, "The Kingdom of God is at hand;" and again, "The Kingdom of God is within you," believing that even then, if men willed it, the Kingdom of God could be established.

"Give us this day our daily bread." Not that provision had not already been made by which men by easy labor could get their daily bread. Christ knew it was possible, if the purpose of the Almighty in giving this earth to all had been heeded, that men could secure their bread; and knowing that men were not getting the fruits of their labor, in the face of the fact that provision had been made for all, and knowing also that aggregated wealth, then as now, had repudiated the first petition in the Lord's Prayer, he prayed that men should get their daily bread, not in charity, but as a bounty of "Our Father."

Again, let us note the close similarity between "Our Father" and an earthly father. It is said that a man who does not care for his family is worse than an infidel. It is not pretended by any one that "Our Father" has not made provision for his children in giving this earth to them. God was intensely materialistic in this. He knew their needs. He knew that they could not live without it. He looked farther than this, and made the earth a universal gift to all men. There were no conditions; it was a free gift to all.

One of Christ's missions, if not his greatest plan, was to bring men and things into right relations with "Our Father and his provision for his children." It was not so much to emphasize the fact that he was the Son of God, but that God was our common Father; that if his intentions in the provision he had made for his children were not disregarded, his Kingdom would come on earth and his will be done; and that it was possible and easy for men to have their daily bread, and not receive it in charity from self-styled "almoners of the Almighty."

We who think we see a little into the future hope for that resurrection-day of humanity for which Christ came, taught, and died, when "Our Father" will be a universal prayer, when God's will shall be done on earth, and when men shall have their daily bread with scarcely more anxious thought for it than the lily which toils not nor spins.

TESTIMONIES.

Through the *Journal* I would like to thank Mrs. Eddy for her kind remembrance of the contributors to Mother's Room and Flower Fund. Even before her letter requesting the children to begin to earn their own money for school expenses, etc., appeared in the *Journal*, I was doing as she wished, for, although I am only sixteen years of age, I taught a ten months' school last year, and my earnings paid all the expenses of our living.

We live in western Nebraska, where scarcely any crops have been raised, and my father had been away two years trying to earn our living by days' labor, and I was very glad of the opportunity to help.

I have two sisters and a brother younger than myself, who will share in the gift, and thank her for her love to them, and will try to fulfil her wish. I shall continue my endeavor to do good in this way, as well as in many others, and hope and know, I shall succeed if I seek the proper guidance and do my best.—*May E. Beck, Grant, Neb.*

I enclose herewith a note for the Field. I am sure it will interest others to *know* that the *little book* is doing its work on our battleships, as well as on land. I wish that every ship that leaves our ports could be armed with one of these war destroyers.

On board the auxiliary cruiser "Yankee," manned by the New York Naval Reserve, there are at least three copies of Science and Health, owned and read by the citizen sailors. One, a pocket edition, the gift of a Christian Science mother to her son on his departure for Cuba, has fastened on a front fly-leaf the 91st Psalm. The "Yankee" has seen a good deal of hard service in Cuban waters so far, but has escaped unharmed, and the health of her crew has been excellent. "Surely He shall deliver thee. . . . His *Truth* shall be thy shield and buckler."—*L. M. C., Hempstead, L. I.*

CHURCH RULE.

The attention of the Field is called to the following church rule:

"The regular meetings of this church shall convene annually. They shall be held on the first Tuesday in June following the Communion Sunday of that year, beginning in June, 1899, for the special purpose of listening to the reports of the treasurer, clerk, and the committees, and general reports from the fields of the members of this church."

It will be seen by this rule that the annual meeting which was to have taken place in October of this year will not occur.

NOTICES.

All correspondence with the clerk of the Mother Church on matters pertaining to his office, should be addressed to William B. Johnson, C. S. B., 95 Falmouth St., Boston, Mass.

Per capita taxes and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 136, Fall River, Mass.

Works on Christian Science

WRITTEN BY

Rev. MARY BAKER G. EDDY.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid	$3 18
Two to Twelve books to one address, each, Prepaid	3 00
Twelve or more books to one address, each, Prepaid	2 75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid	6 00
Twelve or more to one address, each, Prepaid	5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid	$2 25
Twelve or more books to one address, each, Prepaid	2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

JOSEPH ARMSTRONG, C. S. D.,

PUBLISHER,

95 FALMOUTH STREET, BOSTON, MASS.

The Christian Science Journal,

Founded, APRIL, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REVEREND MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical Healing, as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscriptions:

Payable in advance, postage free, to any part of the United States and Canada. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents. Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

THE CHRISTIAN SCIENCE QUARTERLY,

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday Services in all the Christian Science Churches throughout the year.

Terms of Subscription:

One copy, one year, 50 cents; Fifty copies or more to one address, one year, each, 50 cents; Foreign subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States and Canada.

Terms of Sale:

One or more copies, each, postage paid, 15 cents; Fifty copies or more to one address, postage paid, each, 12½ cents.

CHURCH MANUAL. Containing Rules and By-Laws of the Mother Church, also list of members. Price, one copy, $1; six copies to one address, $5; twelve copies to one address, $9.

VOL. 1 BOSTON, MASS., U. S. A., SEPTEMBER 15, 1898. NO. 3

ITEMS OF INTEREST.

The American and Canadian joint commission has begun its deliberations in Quebec. Among other important questions it will have to settle as between the United States and Canada, are the export timber question, which is thought to be a vital issue; the Pelagic sealing question, which is now considered a matter of less concern than the timber question; the fisheries and alien labor question. The tendency toward better commercial relations and a greater measure of amity between the two countries is certainly commendable. It is to be hoped that such cordial relations as should always have existed between the two countries will result from this joint commission, which, on both sides, is composed of men of eminent ability.

Labor-Day was generally observed throughout the country. More than the usual earnestness and enthusiasm prevailed. The dignity of American labor was again successfully vindicated. These demonstrations are most helpful and educative. They tend to emphasize the power of the laboring classes. God speed the day when that mighty principle enunciated nearly nineteen hundred years ago by the greatest laborer the world has produced—because he labored for the whole world—may become the rule governing capital and labor: "Therefore whatsoever things ye would that men should do to you, do ye even so to them."

President McKinley has appointed the Commissioners to investigate the alleged abuses in the War Department:—

Lieutenant-General Scofield, retired; General and ex-Senator John B. Gordon of Georgia; General and ex-Senator Manderson of Nebraska; General Grenville M. Dodge; Colonel James A. Sexton of Chicago, the newly elected Commander-in-chief of the G. A. R.; ex-Secretaries of War Robert T. Lincoln and Daniel S. Lamont; President Gilman of Johns Hopkins University, and Dr. W. W. Keen, surgeon and physician, of Philadelphia. These gentlemen have not yet accepted.

The mustering out of volunteer regiments has begun, but the army cannot at once be reduced to a peace footing. Technically, peace will not be established until the final treaty is drawn up at Paris and afterward ratified by the American and Spanish governments. In any case, we shall for a good while to come have to maintain large bodies of troops in the Philippines and Cuba, with several regiments also in Porto Rico. How many troops we may need in Cuba nobody can yet foresee. It is evident that the United States will maintain a considerable army for several years.

The National Encampment of the Grand Army of the Republic at Cincinnati, the early part of the present month, seems to have been a complete success. It is said to have had its red-letter day on the 7th, and the attendance in the city reached fabulous figures, according to the statements of the two dozen railroads that were taxed beyond their capacity. Col. J. A. Sexton, of Chicago, was chosen Commander-in-chief, and Philadelphia selected as the place of meeting of the next annual encampment.

President McKinley has appointed the following persons on the Industrial Commission: Andrew L. Harris of Ohio, S. N. D. North of Boston, Mass., Frank P. Sargent of Illinois, Ellison A. Smythe of South Carolina, John M. Farquhar of New York, Eugene D. Conger of Michigan, Thomas W. Phillips of Pennsylvania, Charles J. Harris of North Carolina, and M. D. Ratchford of Indiana.

September 5, there assembled at the American House in Boston, the National Railroad Master Blacksmiths' Association. The morning and afternoon sessions were devoted to the president's annual address and the reports of officers and committees, and the organization of convention work. It is the first time that this association, which represents thirty-two states and Canada, has met in Boston.

General Collazo has issued a proclamation to the Cubans in Santiago, calling upon them to lay down their arms and submit to the wishes of the American government. He says, "The people of the United States are determined that Cuba shall be free, and I believe they will maintain this firm basis until Congress shall pass such legislation as shall recognize the independence of this republic."

At the opening of the Cabot Memorial at Bristol, England, lately, Lord Dufferin made a speech in which he dwelt almost exclusively on the Anglo-American relations. Among other things he said, "In the solution of the difficulties that have arisen in the East, the United States will be compelled to share, but it is pretty certain that their interests will not clash with those of Great Britain."

The President has made the following additional promotions for distinguished services at Santiago:—

To be major-generals of volunteers: Brigadier-General William Ludlow and Brigadier-General S. S. Sumner.

To be brigadier-generals: Colonel Richard E. Combs, 5th Infantry, and Lieutenant-Colonel Joseph T. Haskell, 17th Infantry.

According to the records of the War Department the total number of officers and enlisted men killed in the war with Spain was 264. While this loss is to be deeply regretted, yet the percentage is so small as compared with other wars, ancient or modern, and considering the magnitude of this war, that it is without a parallel in history.

A remarkable agitation in England against compulsory vaccination has at last carried the day. The fight was a bitterly contested one all along the line. The vaccination

Copyrighted, 1898, by Mary Baker G. Eddy.

Digitized by Google

act is now amended in such a way that parents who represent that they have conscientious scruples against the vaccination of their children are to have their own way.

A revision of the celebrated Dreyfus case has been unanimously decided upon by the French cabinet. The trial will in all probability be revised upon the ground that a new fact had occurred of a nature to establish the innocence of the prisoner. This new fact being the confession of Colonel Henry that he had committed forgery.

A company of great magnitude has been organized to control industries in Cuba and Porto Rico. It has a capital stock of $18,000,000, and New York and Philadelphia millionaires are interested. It aims to cover all of the leading industries from railroad and steamship lines to manufacturing gas and making public improvements.

Wars and rumors of wars have not yet ceased. Fighting has been going on between the Anglo-Egyptians and dervishes at Omdurman, resulting in the capture of that place by the Anglo-Egyptians.

There has also been fighting at Crete between the Christians and Mussulmans.

The British steamer Pectan was sunk between Cape Tenez and Cape Chercel on the north coast of Algeria, by collision with the French steamer Druentia of Marseilles. The Druentia rescued the crew of the Pectan, numbering fifty-nine persons, and safely landed them at Algeria.

Ernest T. Hooley testifies in bankruptcy proceedings in London to having paid certain titled Englishmen large sums of money for the use of their names in business enterprises. Financially speaking there seems to be *something* in a name over there.

President McKinley, from the portico of the White House, recently reviewed the First District of Columbia Volunteers, on their return from the war.

The National Capitol was in holiday attire as a tribute to these troops.

Mr. Joseph Chamberlain, the British secretary of state for the colonies, said to a reporter recently that the treaty with Germany had actually been signed. He also spoke in favor of the retention of the Philippines by the United States.

It is now thought by those in position to know that the trolley wire will soon be a thing of the past. A practical third-rail system has been devised. A third rail will be used in the track instead of the feed wire overhead.

The appropriations made for the government needs, required by law to be prepared at the end of the recent session of Congress, amount to nearly $900,000,000. $361,000,000 were to meet the expenses of the war.

C. S. Sargent, of Boston, Mass., has been unanimously elected president of the American Street Railway Association. The next annual convention of the Association will be held at Chicago.

The Chinese government has assented to Russia's conditions regarding the New-Chwang railroad loan contract, although these conditions run counter to China's agreement with Great Britain.

The Evacuation Commission is ready for business at Havana. Captain-General Blanco received the American commissioners with all the usual official courtesies.

A general election is to be held in Cuba immediately to choose delegates for the Camaguey Convention.

A new constitution and laws are contemplated.

Boston gave the returning heroes of the 9th Massachusetts a warm and heart-felt welcome. Nothing of the kind has been witnessed since the days of '65.

The chairman of the late Democratic convention of Iowa declared himself as emphatically opposed to the policy of absorbing the Spanish colonies.

Justice White of the United States Supreme Court has declined to act as one of the peace commissioners between this country and Spain.

Queen Victoria has approved the appointment of the Earl of Minto to succeed the Earl of Aberdeen as Governor-General of Canada.

The entire Republican ticket was elected in Vermont. Col. Edward C. Smith of St. Albans was the successful candidate for governor.

Ex-United States Senator Manderson of Nebraska, is mentioned as a possible successor to Ambassador Hay at the Court of St. James.

The Portuguese ministry under José Luciano de Castro has resigned office, and the retiring premier is asked to form a new government.

The British Foreign Office announces the appointment of George N. Curzon as Viceroy of India, to succeed the Earl of Elgin.

Senator Gray of Delaware, has accepted an appointment on the Peace Commission, in place of Justice White, who declined.

Pope Leo XIII. has issued an encyclical to the people of Scotland, urging them to return to the Roman Catholic faith.

It is reported that a movement is on foot to divide the State of Montana. It is suspected that there is some politics in it.

The Empress Dowager of China has relieved the Emperor of all actual power; Li Hung Chang is again chief adviser.

General Miles stands upon the words he uttered as published, and challenges Secretary Alger to action at once.

The government of Haiti has refused to permit the United States to establish a weather station on its territory.

Spain has accepted the terms of peace. The Spanish Senate has adopted the provisions of the protocol.

Turkey disclaims all responsibility for losses sustained by Americans in the Armenian massacres.

September 5, Wilhelmina, who came of age on August 31, was crowned Queen of the Netherlands.

Harvard University was founded September 8, 1636,—two hundred and sixty-two years ago.

A West Indian weather service has been put in operation by the United States government.

A general arbitration treaty has been signed between Italy and the Argentine Republic.

Mail service has been resumed between the United States and Spain.

General Miles and staff have returned home from Porto Rico.

MISCELLANIES.

MR. EDITOR, Dear Sir:—I suppose we shall have to admit the facts of Christian Science. Their claims are quite another thing. No doubt they are fully persuaded that all their claims can be proved, and this lively faith amounts with them to absolute knowledge, though not so with others. There has been a very prevalent disposition to deny their alleged cures of disease, but any candid inquirer may satisfy himself that cures, and most remarkable cures, are done by them, not seldom, but frequently, cures which have seemed impossible by other and more orthodox means. Well, if they can cure one disease it may be that they can cure two or twenty, and if so they may successfully compete with the regular schools which only cure a proportion and not all they undertake.

Their treasure, admitting that they have one, is in earthen vessels, and so may be mixed with some objectionable things, which is no reason for rejecting the treasure itself.

We must admit their facts. If their claims bear investigation, we shall have to admit them, too. Let us, therefore, investigate, without prejudice or prepossession. We can gain nothing by denying the truth. INQUIRER.

The Courier, Poughkeepsie, N. Y., August 28, 1898.

A writer in the London *Journal of Finance* says:—

"It is no exaggeration to say that for a long series of years Spain has been steadily drifting to financial disaster. The pace has varied, but the course has never changed. Her balance-sheets have exhibited a dismal sequence of deficits—some of them comparatively small, but many of them appalling in their amount. Only once or twice for nearly half a century has a Spanish minister of finance realized a surplus—so seldom that the events might almost be counted as lucky accidents. The debit balances are represented to-day by a floating debt so huge in its proportions that to restore the finances of the nation to a healthy basis would in itself prove a sufficiently onerous task, without the additional burden which the calamities of the past few months will entail."

The *Omaha Labor Bulletin* truthfully says:—

"The prayers now being offered to God all over the United States for the hungry and defrauded—the prayers for God to alter his changeless principles because finite and selfish man has set up principles to the contrary—contain much foolishness. We must not only put ourselves in rapport with principles which destroy evils over which the individual has control, and heal ourselves, but we must go into the byways and get a majority of the people to put themselves in rapport with principles which destroy evils over which society has control, and heal our brothers. We must work and sacrifice as well as pray. Good material conditions, as well as good moral will-power, are necessary to the higher development of human life."

As an evidence of the methods pursued by certain "Yellow Journals" in this country, we quote the following from *The Review of Reviews*:—

"Miss Elizabeth Banks gives a vivacious and not altogether edifying account of American yellow journalism. She says that the first assignment she received was to walk up and down in a disreputable district in order to be arrested as a bad character, so that she might tell her experiences in the lock-up over night. This she refused to do, but, according to her account, women reporters are constantly told off on tasks of a similar nature. Altogether, Miss Banks' account of the lot of the woman reporter in America is by no means cheerful."

They had been teaching her child physiology at school.

Dear Miss M.:

Please don't learn my Mary Ann any more about her insides. It's no use as I can see. Besides, it's rude.—*Life.*

FROM JUDAISM TO CHRISTIAN SCIENCE.

BY CLAUDIA MARX.

For by one Spirit are we all baptized into one body, whether we be Jews or Gentiles.—1 Corinthians, 12, 13.

IT often afforded me a sense of satisfaction, that the birthplace of Copernicus had been mine also. I would stand at the foot of his monument and admire the moral courage of the great astronomer who had dared to overthrow a world's false conceptions regarding the planets. How little was his mission, compared to the one our dear Leader was led to fulfil, teaching us to enter into the unexplored fields of infinite Mind, giving us the Key of the Kingdom.

Born of Jewish parents, I did not have the opportunity to become acquainted with the life and teachings of our Master. The New Testament was not allowed to enter into my home, and to pronounce the name of Jesus was considered an error. But God leads us in paths that we have not known. My Sunday School gave me very little comfort. The teacher was so cross with the children that his teachings did not make the least impression on me. I formed a great liking for my Gentile schoolmates, and they reciprocated my affection. Their honest thoughts uplifted me, and occasionally I would steal away to their Sunday School.

After I finished my school education, my family came to America. Soon after, I got married, and from a happy, carefree girl, I became a careworn, ailing wife. Then followed the death of two children and the complete breaking down of my own health. Physicians had given me up.

As a last resort I was sent to California, and the climate failing to give me help, I took treatment from a so-called Christian Scientist. I improved for a while and returned to Denver, but soon fell back into my old condition of dyspepsia and insomnia.

Then I was led to a true Scientist, in name as well as life, who took me to her loving heart and taught me and my husband in a class in April, 1895. My entire life changed from that time. Health and happiness are brightening my path again. A great hunger and thirst after righteousness took possession of me, and I am willing to lay down all for Christ, Truth. I became a member of the Mother Church, and also of the home church, and the blessed privilege was bestowed upon me to be one of the Sunday School teachers here, which I consider one of my most sacred duties. My little girl, six years old, is brought up in this new faith, and knows nothing else.

Hoping this great Love will lead me on, and help me to destroy every thought of sectarian bitterness in Jew or Gentile who comes in my path, I am waiting for more of the divine anointing.

"SHE NEVER FELL."

BY L. J. W.

THE above designated demonstration, in the *Weekly* of September 1, by a Chicago Christian Science mother and her little daughters, was one calculated to startle the dullest ears and the blindest eyes into discerning and perceiving the healing power of Truth as taught by our Leader. The Reader in a Christian Science church was commenting on this case and its glorious outcome at a Wednesday night testimonial meeting, when a gentleman in the congregation arose and read from a little pocket Bible a parallel case from the twentieth chapter of Acts. Surely (divine) history is repeating itself. How natural it is to be well, and unnatural to be in discord. We as Christian Scientists must find no loitering ground in the blessed work if found ready to fulfil the promise given in the twelfth verse of the fourteenth chapter of St. John, *i.e.*, "Verily, verily, I say unto you, He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father."

"Perfect love casteth out fear."

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor.

CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address. one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

EDITORIAL.

MR. EDWARD A. KIMBALL, of the Board of Lecturers, is having a most successful tour in the West. He has recently lectured at several places in Colorado, among others, Denver and Leadville. At both of these cities much interest was manifested in Christian Science. The *Denver Republican* thus speaks of his lecture there:—

"That there is at present a very lively interest felt in Denver in the doctrine of Christian Science was evidenced by the attendance at the Broadway Theatre on the occasion of a lecture on the subject by Edward A. Kimball, C.S.B., of Chicago, Ill.

"Mr. Kimball delivered his lecture in this city on Friday night to an audience that completely filled the Broadway Theatre, including all available space on the stage and standing room in the foyer. The audience was composed of people representing nearly every class of society and the religious denominations of the city—men and women."

We are glad to note this awakening of interest in the subject. So much that is false, and as unlike genuine Christian Science as possible, has been published and circulated in the name of Christian Science, that it is gratifying to all having the welfare of the Cause at heart, that this additionally effective propagandism has been brought into requisition.

While it is true that the most convincing manner of presenting the claims of Christian Science is through the healing of sickness and the various other means of its practical application,—for these means combine at once the theory and practice,—yet so accustomed are the general public to hearing the adherents of any system of religion, philosophy, metaphysics, or science present their claims from the rostrum, that they are not otherwise apt to give it attention.

Thus far Christian Science has made its way to recognition through the labors, books, writings, and addresses of its Discoverer and Founder, the Rev. Mary Baker Eddy, through the healing which, in her earlier years of labor, she performed, through the works of those who have become sufficiently earnest and apt students of the Science to be able to do healing themselves, through the public services held each Sabbath in the various towns and cities in this country and Europe where Science has secured a foothold sufficient to warrant the establishment of churches and societies, through the testimony or experience meetings, and through the authorized publications of the Publishing Society. These have all, truly, been effectual; but methods must multiply to meet increasing demands. These demands are being additionally met through the recently adopted lecture system. That its work will be crowned with the success it merits has already been demonstrated. Its future achievements will doubtless be in relative proportion to those of the past.

In this connection may we not appropriately inquire as to the cause of the apathy concerning this new provision for promulgating the Truth, which seems to prevail throughout the Eastern and New England States? In the latter we have yet to hear of the first call for the services of any of the Lecture Board. Why is this? Is the more alert and enterprising West to carry off the honors in this respect? We are not urging. We never do urge. To urge is not according to Science methods. We are simply asking the why and wherefore; and that, too, without having consulted or conversed with any member of the board.

The close observer of the signs of the times can see in the current events of the world a marvelous fulfilment of the prophecies of the Bible. The prescience of the writers of Holy Writ becomes more and more wonderful to the Biblical student who is able, even in small measure, to interpret their sayings in the light of universal government by divine Principle, whose laws are uniform and ever-active.

The sudden drop of about twenty-five degrees in the mercury was not unwelcome even to Christian Scientists. We think we speak for all when we say that a continuance of the same—that is, the lower temperature—will be entirely unobjectionable.

"IF THEY DRINK ANY DEADLY THING, IT SHALL NOT HURT THEM."

I WANT to tell you how a little girl got into serious difficulty, and how Christian Science saved her life. She is the daughter of Mr. and Mrs. Frank Cole, of Riverside, California, and at the time of which I am writing, was not quite three years old. She had seen the other children, in play, put their mouths under the water-faucet to get a drink. So, one day, she thought she would do the same thing, but, unfortunately, she put her little mouth under the faucet of a ten-gallon tank of gasoline, from which, shortly afterward, a half-inch stream was found running. It is thought she swallowed a considerable quantity. The mother ran for Mrs. D——, a Christian Scientist, and met her with the exclamation: "I am afraid baby is dying. She drank some gasoline, and is as black as a negro." "Do you want any other help than Science?" she was asked. "O, nothing, nothing else; if Science cannot save her, nothing else will." When the house was reached, the baby was lying in its father's arms, groaning with every breath, and surrounded by the family and excited neighbors. The Scientist and the father took the little one into an adjoining room to be alone with God, and here they worked to demonstrate His omnipotence and omnipresence; the divine Life, in whom there is no death. Very soon the child began to vomit blood, which she did five or six times, and after each attack it seemed, to mortal sense, as if there were no life there. But the work continued. In less than an hour the vomiting ceased; soon the natural color returned, the baby opened her eyes and was given a spoonful of milk. The breathing became natural and she fell asleep. When she awoke she called for her mother, and there remained only the weakness to be demonstrated over. Blood and gasoline afterward passed her bowels. She drank milk a number of times during the afternoon and through the night. Next morning she was at the breakfast-table, and the following day she visited her grandma, walking a considerable distance. This occurred a long time ago, and

Digitized by Google

her mother says a more healthy child never lived than she has been ever since. It rejoiced the heart to hear the father's expressions of love and gratitude for this beautiful Truth. A physician who, after a life-long experience in the practice of medicine, has given it up and has come into the understanding and practice of Christian Science, saw the child, and said this was a wonderful demonstration of the power of Truth, and that no medical aid could have saved her. A neighbor, the wife of an M. D., who knew the circumstances of the case, saw the baby next day, and said, "Is it possible that you did not call a doctor?" Her second question, "What *is* Christian Science?" reminds one of Pilate's question, "What *is* Truth?" It is indeed "answered by demonstration" (Science and Health, pref. viii.).

E. D. S., Riverside, Cal.

The *Riverside Express* speaks of the above demonstration as follows:—

"The little two-year-old daughter of Frank Cole, in all innocence, drank some gasoline on Monday night. For some time it seemed that the little one could live but a few moments, but it has got well, and, strange as it may seem, under the treatment of a Christian Scientist, and not a particle of any other treatment. The local press noticed the case, but did not notice the treatment it received, but simply says the child is out of danger. Now we have always noticed a great 'difference in ginger.' If an M. D. had been called to the case, and he was successful, the papers would say 'under the skilful treatment of Dr. ——, is out of danger.' Had the child died, the whole subject of treatment would have been in the clam language. In the case mentioned the treatment is in the clam language. Had the child died, the whole newspaper fraternity would have been insufficient to give it notoriety, but the parents and all the neighbors would have been brought into court and tried for manslaughter, to put it mildly. Now we think that a 'wayfaring man, though a member of the legislature and an editor,' can see the difference. The M. D. has a license to kill or let people die; the Scientist has not. See? We have only said this much in the name of fair play and common decency. We are not a Scientist."

[Republished from the *Christian Science Journal.*]

MRS. MOSQUITO'S GUILT.

Science is the arch iconoclast. It smashes the monuments of deduction and shatters the statues erected on the altar of vanity to self-opinionation with a club compared to which the famous bludgeon of Hercules was but a gosling's feather, and an impact compared to which that of Sullivan's "terrible right" in the heyday of its dynamic power was as slight as the blow of a zephyr. Hardly a day passes but it crushes some idol of false knowledge and leaves its worshipers to weep and gnash their teeth in humiliation and disappointment over the ruins.

The latest havoc made by the club of science upon our time-honored beliefs is its overthrow of all commonly accepted theories concerning the propagation of malarial fever—variously called "chills and fever," "ague," and "swamp fever." Most of us thought—and we derived our motive for so doing from the family physician—that this febrile affection with the numerous aliases was taken into the system in the form of robust *bacilli*, either with the food or drinking water, or was inhaled through the nostrils or mouth into the lungs, whence these bacilli emigrated into the circulation, causing our inhabited anatomies to become by turns as hot as fire or as cold as ice.

Few have ever gone far along life's road and not experienced these penalties inflicted by malarial fever.

The doctors have told us time and again that the germs of the disease lurked in swamps and marshy places, and that it was nurtured on decaying wood and decomposing vegetable matter. They assured their trusting patients that these baleful bacteria impregnated the water and poisoned the air. They warned all who would avoid infection to shun the products of the truck farm, to avoid sleeping where the wind could blow from wet and marshy lands, and to drink only double-distilled, boiled or rain water during the summer months.

All these theories have been overthrown—all these precautions rendered null and void—by a recent discovery and its extensive and startling promulgation.

Doctor Patrick Manson, after a long series of researches and experiments, has ascertained to his satisfaction that the parasites called *oscillaria malariae*, found in the blood corpuscles of victims of malarial fever, and known also under the name of *hæmatozoa*, cannot enter the blood through the lungs or through the mucous membrane of the stomach or intestines. He concludes that the *hæmatozoa* must be smuggled into man's system through his skin by some insect that sucks his blood and flies about. Doctor Manson, after running down a lot of valueless clews, at last found that the guilty wretch that for countless generations has made men, women, and children—and even pigs, chickens, and dogs—gape, shiver, and burn with malaria, caused doctors to grow wealthy, impoverished patients, and enriched druggists, is no other than the gore-drinking Mrs. Mosquito. She and she alone is the culprit; for science has established the further fact that Mr. Mosquito is only a singer of songs, while his wife is a drinker of human blood.

She it is who has been going about during all these years with her bill and person charged with regiments of *hæmatozoa* and introducing the blight of malaria into the privacy of American homes.

The extinction of malarial fever is thus brought down to the narrowest point of solution. Exterminate the mosquito family root and branch, and the thing is done.

The St. Louis Republic.

HOW I BECAME A CHRISTIAN SCIENTIST.

BY S. B. REYNOLDS.

Less than two years ago, if any one had said to me, that I would be writing anything of this kind, or in any way having anything to do with religion or anything that had the Bible for its text-book, they would have been told in unmistakable terms, that they had lost their mind.

Fostered in the fold of Presbyterianism, I could not escape the inevitable,—which was reading the Bible every morning and evening, and most of the Sabbath day. But, under that instruction, many passages of Scripture seemed contradictions, and not being able to master or silence the questioning thoughts, I drifted out to investigate many of the other numerous 'isms and creeds, but was no nearer a solution of the doubts than before. Later I drifted into infidelity, being for more than eighteen years a confirmed infidel—had reached the stage where the very name, religion or Christian, made me angry and filled me with hate. I managed, however, to keep it under control, unless some one would feel that they were specially called upon to beg me to join their church, or reprimand me for using profane language. Yet I would always, when asked, accompany my wife to church and to whatever church she desired. I would sit and listen to a sermon that I did not believe a word of (and to some that seemed worse than nonsense) and keep silent, but when minister, elders, and members would gather around and beg me to join their church, I could not refrain from telling them just what I thought, so that my wife's requests to accompany her to church grew less, until her healing in Christian Science of a claim the M. D.'s said was incurable without a surgical operation that she had about one chance in fifty to live through, and, if deferred a few weeks, there would be no help. Then came the invitation to accompany her to Christian Science meetings, and right here I wish to say that, even as an infidel, I admired in Christian Scientists the striving to mind their own busi-

Digitized by Google

ness. They didn't even ask me how I liked the sermon, thereby placing me where I would have to say, "I don't believe a word of it," or answer "Very well"—(lying).

So things ran along for a year or more. In the mean time, my wife took a course in class instruction under one of Mrs. Eddy's students. Some time after, this same teacher was to have another class. My wife suggested, one day, that I had better go through this class. As she had known my views for more than fifteen years, I thought she was joking. I can never describe my surprise upon finding her in earnest. I said, "No; I have no desire to get into a controversy with those people; they mind their own business, they don't go around throwing their beliefs in every one's face, and, until they do, I will let them alone and never put a straw in their way. I have no time to throw away, listening to a minister trying to patch the Bible up so it will stick together." I then fell into a reverie, soliloquizing somewhat thus:—

The foundation is not even built on sand, much less a rock. On the sixth day of creation, God made man, male and female. In the second chapter of Genesis He made man of the dust of the ground, and later on made a woman out of a rib, and still later on (Genesis sixth chapter) became disgusted, repented, and was sorry He had made man, and said He would destroy man, beast, and every creeping thing. What had the poor man done? If the Creator makes mistakes and repents, what can you expect of creation? Why avenge His mistakes on creation?

Like Adam, the whole universe had passed before me and I hadn't seen anything to fall in love with, and, like him, I fell asleep (Genesis second chapter, verses 21 and 22). Here my wife tried to arouse me, saying, "Go to the class in Christian Science." I replied this time, "If after the teacher knows my views on the Bible he doesn't object, I'll go." (Confident he would object, of course.) To my surprise his reply came back: "Why certainly, if he wants to come, I would be highly pleased to have him." So when my turn came for a question in class, the teacher said, "Mr. R., is God everywhere?"

Ans. "They say He is."

Teacher. "Well, but what do *you* say?"

Ans. "To my conception He is everywhere."

Teacher. "Then, Mr. R., where is Heaven?"

Ans. "I've given that up long ago."

Teacher. "Well, don't you think, that where God is, in His presence would be Heaven?" To this I assented.

Teacher. "Then where are you?"

Ans. "Eternally lost, I suppose."

As I had been told that so many times and was confident that he was about to tell me so, too, I thought I would save him the embarrassment; but he smiled and said, "Since you say God is everywhere and Heaven is where God is, then Heaven must be everywhere, hence, you must be in the midst of Heaven now, always have been and can't get out, there's no other place to go. Get out if you can."

Language fails here. Suffice it to say that no fish ever was caught that searched more diligently or struggled harder to find a hole in the meshes of the net, only to find them becoming closer and closer, and smaller and smaller. Then in my experience was fulfilled the words of the Psalmist, "He brought me up also out of a horrible pit, out of the miry clay, and set my feet upon a rock" (Psalm 40 : 2). The very passages of Scripture which were most derided, have in them now a light far above the brightness of the mid-day sun. And while I have, as yet, but scarcely touched the hem of the garment, yet this I do know, that any who follow the Light, as taught in "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, will be led out of a horrible pit of darkness into Light; for God, Himself, is Light.

This is my first attempt at writing for publication, and I know it's but the babbling of an infant, but if you think it will be a light to any along the weary road, or will arouse any one out of the darkness in which I had fallen asleep, you are at liberty to publish or do with it what you think best.

TESTIMONY OF A FARMER.

My occupation is that of a farmer. My age is fifty-one years. For five years I had been a great sufferer from what the physicians—and I had consulted the best in Waldo and Penobscot Counties, this state—said was a leaking heart. For three years my case was pronounced a hopeless one. My regular physician told me that there was no power on earth that could even help me. I could do no work of any kind, had become very much emaciated, and when the town officers of South Newburg, Maine, on account of my health, exempted me from paying a poll-tax, I began to think I had to die. I made all arrangements for my funeral, engaging the minister and pall-bearers, and did not think I would live a month.

Wednesday morning, May 12, 1897, I went with my father to Bangor, as I supposed for the last time, to draw from the bank what money I had there and to arrange my earthly affairs. While in Bangor, I stepped into an eating-house to lunch and rest. I was very nearly prostrated. With both arms on the table and using both hands, I could barely raise my cup to my mouth. My extremely nervous condition attracted the attention of the proprietor, who proved to be a gentleman I had known fifteen years before, but whom I had not seen in all those years. In our conversation I told him of my condition, and he remarked that if I would go with him he would take me to a man that he thought could cure me.

That was the first time I had ever given Christian Science a sober thought. I then and there took one more strychnine tablet, which I thought was the only thing that was keeping me alive from one day to another, and said to my friend, "We will go and see the Scientist."

It was about eleven o'clock in the forenoon when we called. In less than five minutes he had convinced me that Christian Science was the only thing that could save me. In twenty minutes I had taken my first treatment and was ready to start for home, a distance of about fifteen miles, promising to take no medicine of any kind whatever, and to return to Bangor the following Friday, to remain until Monday.

I was unable to reach Bangor before Saturday noon that week, and lost no time in finding the Scientist to tell him that I had taken no medicine, and that my case seemed as hopeless as ever. I was treated twice Saturday and Sunday. Late Sunday afternoon, as my room was in the building with the Scientist, I stepped in and told him that I was feeling worse than ever before, was thoroughly discouraged, and about to give up in despair. He laughed and said, "Mr. S., you are all right. We live because we are obliged to. There is but one Life, and that Life is God. Error is stirred to its destruction, and you need have no fear, for Truth will make you free." This, with some other things he said, seemed to give me new courage, and I went to my room and retired early.

When I awoke in the morning I felt like a new man. I knew I had been healed. I got up early and walked three miles before breakfast. My strength and appetite had returned. The Scientist said it would be well to continue absent treatment, and I did for one week, although I was satisfied that the work was done before I left Bangor.

I returned home that Monday, and the next day held a breaking-up plough, and from the day I took the tablet spoken of not a particle of medicine have I taken, and I have been able to do as hard a day's work as any man in South Newburg.

To think of the hard work I have done in the past sixteen months and of the forty pounds of good flesh I gained in a very short time, and to be able to say that I never enjoyed better health than I now do, speaks volumes for Christian Science.—*H. H. D. Smith, South Newburg, Maine.*

"SATISFIED."

BY J. F. M.

I shall be satisfied, when I awake, with thy likeness.

I WONDER how many have ever noticed the placing of the commas in the passage from the seventeenth Psalm given above. How many have read it without heeding them at all. Changing the arrangement, as the punctuation warrants us in doing, it will read, "I shall be satisfied with thy likeness when I awake," Read thus, it seems to me that the following inferences can be drawn:—

1. We shall awake.

2. When we awake we shall awake with the likeness of God.

Viewed thus these words are packed with meaning. The promise is to all. To be satisfied is all that man can want or God can give, and this condition of satisfaction is to be attained by all when they awake—which they certainly will do—from their dream of mortal mind, and come to a knowledge of their true self—the likeness of God.

The trumpet-peal that will awaken has been sounded by our Leader, and all who study our text-book will surely grow in spirituality. Those ears which have waxed gross with materiality will be quickened by the spirit of Love—Truth—Life, and they will awake with the likeness of the Father to that true Life which the Lord has promised to them that love him,—that satisfaction which the Psalmist anticipated and longed for.

A GRATEFUL ACKNOWLEDGMENT.

BY EMILIE W. GILBERT.

WE wish to make a grateful acknowledgment.

First, to the Giver of all good gifts.

Second, to the Mother whose marvelous demonstration of Love reaches all humanity, helping to soften, strengthen, and lift them into that larger sense of Love that knows no hate.

Third, to her student who, when we were weary and thirsty, gave us a "cup of cold water in Christ's name," never fearing the consequences. (See Science and Health, p. 562.)

In a blinding storm of error, on a dark night, we were separated from our Shepherd. After weary searching on a barren mountain-side, stumbling, groping, starving, thirsty, there came across our path one whose privilege it was to guide us, O! so tenderly, back to the fold. It was as if she had said, "You are tired; stand still; look up. Do you see that star? (Science and Health) follow that and it will lead you to your Shepherd, and to Good (God). You are thirsty, drink," giving us a cup of cold water. The water was from that fountain that springs up into everlasting Life, but the cup was the giver's own. At first it appeared to us as silvern, then golden, and now we discern it to be covered with the purest gems. These cups are the gift of the Mother to her children, and it is their rich legacy to give freely, inasmuch as they have received freely. We can only say, "Thank you," but Jesus said, "Inasmuch as ye have done it unto one of the least of these, my brethren, ye have done it unto me."

"MOTHER."

BY C. S. B.

IT was my privilege not long ago to loan a few Christian Science Journals, and when they were brought back this familiar criticism was reiterated: "You Christian Scientists worship Mrs. Eddy, for you call her 'Mother,' spelling it with a capital letter, thus placing her next to God." Did this cry originate in what we so proudly term the "Cradle of Liberty"? I know not, but were it smothered there with love, it could not *seem* to have such a great echo.

From our earliest recollection we have heard George Washington called "Father of his country," but never have I known it to be hinted that we worshiped him or placed him next to God. That loyal, worthy compliment surely grew out of the appreciation of his courage, wisdom, honor, and self-denial. But it took the courage and meekness of a *woman* to discover, maintain and protect a Cause, which Jesus promised us should be revealed; a Science which proves his very words. "But the Comforter . . . shall teach you all things."

TESTIMONIES.

Extract from a Letter.

Dear Mrs. P.:—I have been intending to write to you for the past week, but this is the first time I have made a start.

We are having bad weather now. It has rained for nearly a week without a stop until to-day, and our camp looks like a lake. In some places the water is a foot deep, and we think we shall have to be moved as soon as it stops raining. The rainy season has just got a good start, and if it keeps this up much longer we shall have to use boats. Some of the boys are sick, but I am feeling fine. I had a claim of sore throat, but I read the book Science and Health, and I am all right now. I don't get much time to read, but I manage to read some every day. I have been promoted since I came here, and have more work to do. Yours truly,

H. S. D., Co. F, Forty-ninth Iowa Vol. Inf.

IT has been two years since we obtained our first knowledge of Christian Science, which came to us through that white-winged messenger, the *Journal*, loaned us by a Scientist. The beauty of the literature and the truth it set forth impressed us so thoroughly that we have held fast from that time, saying it was what we had been looking for, a religion that carried the healing power with the preaching of the gospel. It has been our all ever since.

We have two children, aged three and four years, and have thoroughly tested Christian Science in healing their many claims and our own. Although we did not seek Christian Science for the healing, various diseases, catarrh, rupture, poor eyesight, hereditary colic, and membranous croup, have been healed. It has brought to our home peace, plenty, and Heaven, in place of worry, want, and disease.

When our little Lucile was two years old, we were visiting her grandparents. She was taken ill with membranous croup. When they saw her so quickly healed, the grandmother believed, and in a short time sought Christian Science for herself. She had been an invalid for forty-five years, the main trouble being spinal disease. Another claim was smoking tobacco, advised for dyspepsia. Christian Science has healed both diseases, and she is a daily student of Science and Health, and demonstrates for herself. She is now seventy-five years old.

Through our work a young man has taken Science and Health to the front, being enlisted in the Fourteenth Indiana Signal Corps, and so the good news is spreading and will fulfil its mission.

J. W. and May H. Bush, Irvington, Ind.

I SEND many thanks for the blessings I have received from reading "Science and Health with Key to the Scriptures," and also for the *Christian Science Journal*.

There has been a great deal said about the price of Science and Health, but if the wealth of the United States of America was laid at my feet for my Science and Health I would not take the money if I could not get another copy.

Emeline B. Johnson, Peoria, Ill.

Works on Christian Science

WRITTEN BY

Rev. MARY BAKER G. EDDY.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid	$3 18
Two to Twelve books to one address, each, Prepaid	3 00
Twelve or more books to one address, each, Prepaid	2 75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid	6 00
Twelve or more to one address, each, Prepaid	5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid	$2 25
Twelve or more books to one address, each, Prepaid	2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

JOSEPH ARMSTRONG, C. S. D.,

PUBLISHER,

95 FALMOUTH STREET, BOSTON, MASS.

The Christian Science Journal,

Founded, APRIL, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REVEREND MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical Healing, as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscriptions:

Payable in advance, postage free, to any part of the United States and Canada. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents. Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

THE CHRISTIAN SCIENCE QUARTERLY,

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday Services in all the Christian Science Churches throughout the year.

Terms of Subscription:

One copy, one year, 50 cents; Fifty copies or more to one address, one year, each, 50 cents; Foreign subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States and Canada.

Terms of Sale:

One or more copies, each, postage paid, 15 cents; Fifty copies or more to one address, postage paid, each, 12½ cents.

CHURCH MANUAL. Containing Rules and By-Laws of the Mother Church, also list of members. Price, one copy, $1; six copies to one address, $5; twelve copies to one address, $9.

THE CHRISTIAN SCIENCE HYMNAL. Bound in two styles — Cloth and Leather. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00; Leather, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the building of the Mother Church, The First Church of Christ, Scientist, in Boston. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00.

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents; Cloth binding, 45 cents.

HEARINGS ON PROPOSED MEDICAL BILLS in Massachusetts and New York. 23 pp.

ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By EDWARD A. KIMBALL, 24 pp.

THE BUSWELL TRIAL. 24 pp.

REPLY TO SERMON. By SEPTIMUS J. HANNA, 30 pp.

THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.

HEALING THROUGH CHRISTIAN SCIENCE. By SEPTIMUS J. HANNA, 32 pp.

One copy or more, each, 10 cents; Twelve copies to one address, $1.00; Twenty-five copies to one address, $1.75; Fifty copies to one address, $3.00.

COMMUNION HYMN. "SAW YE MY SAVIOUR?"

Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

ITEMS OF INTEREST.

The Council of the so-called Provisional Government of the Republic of Cuba, has issued a manifesto to the Cuban people, with an order to the military commanders of the Cuban army, both of which have been promulgated. The manifesto proceeds in part as follows:—

"Though the principal object of our revolution has been obtained—that is, the destruction of Spanish domination—the work of this council is not yet at an end; for the Cuban Republic—the ideal for which we have fought—has not yet been constituted. Now that hostilities have ceased and Spain has renounced her sovereignty, it is the duty of this council to set before the Cuban people the feelings and purposes of the men who made the revolution.

"The entrance upon the field of a powerful and decisive factor, upon which we have always relied, and toward which the hearts of all Cubans have always turned, has put an end to the horrors of war, to the benefit of all concerned. This prompt solution we must acknowledge we could never have obtained. We are grateful.

"When, after a long struggle, the United States Congress recognized the right of the people of Cuba to be free and independent, and ordered the Spanish forces to withdraw from the island, no Cuban government was recognized; but the one we had constituted, though not recognized, was not opposed and has not been opposed. No steps have been taken to dislodge it from the place where it exercised its functions, nor has it been considered an illegitimate authority, which events have dissolved or destroyed for the good of the people of Cuba.

"The intention of the United States was that as soon as the obstacle of Spanish rule had been removed the whole Cuban people should choose a government that would shape the destinies of the island.

"The people of the United States have all along appreciated the fact that the majority of the people of Cuba is in agreement with our people, for the motto of the United States government has been the same as our own—absolute independence for Cuba. Under these conditions the Americans could not take a hostile attitude toward us or consider our authority illegitimate and harmful to the welfare of the Cuban people. We have, therefore, decided to call together another assembly, which will determine our future course."

The Sovereign Grand Lodge of Odd Fellows held its annual session in Boston, commencing September 19. Delegates representing all the Odd Fellows of the United States and Canada were present, numbering upwards of two hundred. The Grand Lodge in a body attended morning service at the Church of the Disciples, Sunday, September 18. The Rev. Dr. Edward Everett Hale preached the sermon, which was entitled, "The Universal Brotherhood of Man." In the course of his remarks Dr. Hale said, "The whole present drift of civilization recognizes the great truth that men must bear each other's burdens. In the first half of this century men said that the eighteenth century was a century of analysis, of separation; and that this present century ought to be a century of synthesis, of congregation. The last fifty years have certainly made good the promise that this was to be a century of communion, of union, of synthesis." He also said, "The duties of the next century are the stamping out of disease; the steady reduction of the death-rate from year to year; the state care of the aged, not as paupers, but as persons who have earned the right to such care by the people." Speaking of the war, Dr. Hale said, "We meet at the end of one of the great wars of the ages. In one hundred days God has set forward the civilization of the world one hundred years. We see the fruits already. The lesson of the war is like the last flash from the thunder-storm; the lesson of 'peace on earth, good will among men.'"

Porto Rico, though hardly a twelfth the size of Cuba, will prove one of the fairest and finest of our new possessions. Though hot, it has no yellow fever or special scourge. Its soil seems exhaustless in its richness; its people enterprising; its exports even now large; its roads admirable; its people prosperous. And now with the open Bible, free schools, and the incoming of American enterprise, its future is rich in promise.

A notable meeting of the almost extinct Afro-American League of the United States, recently took place in Rochester, N. Y. The conference was called to discuss questions of vital importance to the colored race, and the result was, the formation of a society to supplant the Afro-American League. The name of the new organization, which is national in its scope, is the "National Afro-American Council."

The Philippino National Assembly was inaugurated at Malolos, September 16, with great enthusiasm. Aguinaldo was received with cheers and also with cries of "Viva Americano." He read a decree convening the members, and a message eulogizing the army, and thanking the friendly nation, which had set the historical example of liberty, and assisted a down-trodden race.

All signs point to the largest wheat crop in our history, filling the bins to the tune in 1897, of 660,000,000 bushels; and as for corn the 2,284,000,000 bushels of the yellow grains, are quite likely to be outdone in 1898. All this means prosperity to our farmers, food for all our hungry stomachs and a generous supply toward the world's hunger.

The battleship Gloucester, Commander Wainright, that rendered such noble service to our country in the late war, and which had on board several copies of "Science and Health with Key to the Scriptures," is now anchored at the Charlestown Navy Yard.

Now that Hawaii has been annexed to the United States, industrial conditions there are becoming an interesting question. It is thought, by those in a position to know, that it is not a good place for those dependent upon manual labor to go.

Copyrighted, 1898, by Mary Baker G. Eddy.

The smallest and oldest sect in the world is said to be found in the little city of Nablus in North Palestine. They number about one hundred and fifty souls and have defied the ravages of war, poverty, and oppression for three thousand years.

Philip D. Armour, Marshall Field, and Norman B. Ream, have obtained the control of the Baltimore and Ohio Railroad. It is claimed that this purchase gives what is called a trunk line from ocean to ocean, controlled by Chicago capital.

Colonel Roosevelt recently bade good-bye to his Rough Riders, with tears in his eyes and a smile on his lips. His men showed their love for him by presenting to him a bronze statue of what the cowboys call a "Broncho Buster."

Aside from the loss of her colonies and the ships destroyed in battle, the war has cost Spain about $374,800,000. Information to this effect has been received at the navy department from the naval attaches of this government abroad.

The French cabinet affairs have reached a crisis. The ministers of war and public works have resigned. The revision of the Dreyfus case has been left to a commission. General Chanoine is now head of the war department.

It looks somewhat as though all the Philippine Islands might be forced upon this country. It seems to be the policy of the administration to avoid this result if possible, but it may be that "manifest destiny" decrees otherwise.

Mr. B. F. Keith of Keith's Theatre, Boston, has forwarded a check of one thousand dollars to Mayor Quincy to be used in maintaining the free baths. Mr. Keith evidently believes that "cleanliness is next to godliness."

General Maximo Gomez has resigned the command of the Cuban army. It seems the General objected to some of the civil officials' alleged attitude of complaisance in the American domination of Cuba.

Sunday, September 18, the Mass. State Society of the Sons of the Revolution made their first pilgrimage to Rutland, where they dedicated a tablet to the memory of General Rufus Putnam.

The coal mines of Great Britain and the United States yielded nearly 400,000,000 tons the past year, readily robbing gold and wheat and corn of their crown, and making coal king.

Another department is to be created in the United States army. It will include the islands captured from Spain. General Miles is preparing to meet the new demands made.

"Red Tape Stupidity," is the name applied by some to the alleged trouble and shortcomings in the War Department, including the sickness prevailing among the troops.

The expenditures for the war are proving less than was calculated, and every revision of the amount required has thus far put it lower than the earliest calculation.

Cuba is said to be a land of great mineral wealth. The land is now occupied by primitive people who are deprived of the opportunity of developing its resources.

General Miles' friends are pleased with the prospects of an investigation. He will insist, it is said, upon a Congressional inquiry, and will give publicity to all the facts.

Senator Hoar again declines the London ambassadorship. The President has tendered it to Secretary Long, but he declines on account of his wife's health.

The cash balance in the United States Treasury, exceeds three hundred million dollars, and is likely soon to rise to three hundred and twenty-five million.

Word comes from Washington that the President has decided to keep the Island of Luzon, Spain to retain the rest of the Philippines.

It is stated that the largest Bible in the world is a manuscript Hebrew Bible in the Vatican weighing three hundred and twenty pounds.

General Miles recommends a force of ten thousand regular troops for Cuba, four thousand for Manila, and four thousand for Porto Rico.

The Catholics claim spiritual dominion over about six millions of the from eight to ten millions of people in the Philippines.

Secretary of State Day is reported to have said that the Peace Treaty will be ready in six weeks.

The election in Maine resulted in the success of the Republican ticket, but by decreased majorities.

Dean Farrar says he regards the "Church of England as only part of the great church of Christ."

Concord, Massachusetts, recently celebrated its two hundred and sixty-third birthday.

The American Peace Commission has sailed for Paris with full instructions as to its duty.

A new alliance is now bruited, this time between China and Japan.

The Spanish army has commenced to evacuate Porto Rico.

Stephen A. Chase's P. O. Box is now 56 instead of 136.

CONCORD ITEMS.

From the Concord, N. H., *Daily Monitor*, of recent date, we clip the following:—

The rations of Companies C and E were made agreeably larger yesterday by the addition of oranges, grapes, bananas, and peaches, the gift of the Rev. Mary Baker Eddy. To-day a fish dinner with all "the fixings" will be served to the same companies by Mrs. Eddy's generosity; J. H. S. Wilcox being her almoner for the occasion.

The Rev. M. W. Borthwick of Manchester, held a gospel temperance meeting last evening at the Curtis Memorial Church. The reverend gentleman's remarks on temperance were forceful and interesting. During the forenoon he preached at West Concord.

Mrs. Mary Baker Eddy, who has given $120 to the Soldiers' Aid Society, asks why were not suitable tents provided for our soldiers the night they returned to Concord, and whose fault was it?

The New Hampshire department, G. A. R., delegation to the National Encampment at Cincinnati, reached Concord on the return trip at 5.45 this morning, all well and reporting a most enjoyable trip.

Howard W. Wommack of Bow, brought to this office, on Saturday, a sprig of blackberry blossoms, a remarkable exhibit for this season of the year.

Hon. Channing Folsom, superintendent of public instruction, took possession of his office to-day.

MISCELLANIES.

Mr. Dwight L. Moody recently preached a sermon in the Congregational Church at Northfield, Mass., having for his subject, "The Return of our Lord," from which we quote:—

"There is one thing in which we churches all agree, and that is that our Lord is coming back. I do not want to teach dogmatically on my own authority, but to my mind this precious doctrine, for such I must call it, of the return of the Lord to this earth is taught in the New Testament as clearly as any doctrine in it. Whoever neglects this has only a mutilated Gospel, for the Bible teaches not only of the death and sufferings of Christ, but also of His return to reign in honor and glory. His second coming is mentioned and referred to over three hundred times, yet I was in the church fifteen or sixteen years before I ever heard a sermon on it. There is hardly any church that does not make a great deal of baptism, but in all Paul's epistles I believe baptism is spoken of only thirteen times, while he speaks about the return of our Lord fifty times.

"I suppose, if we were asked for two of the sweetest passages in the Bible, we would say those passages in the Gospel of St. John and the first epistle to the Corinthians which bring out the death and resurrection and that He is coming again. No doctrine has suffered more from its friends than this one has. Some people have set the time, but it is clearly thought that the day and the hour will not be known. We find also that He is to come unexpectedly and suddenly. 'For, as the lightning cometh out of the east and shineth even unto the west; so shall also the coming of the Son of Man be.' And again, 'Therefore be ye also ready for in such an hour as ye think not the Son of man cometh.' Some people say that means death. But the word of God does not say it means death. Death is our enemy, but our Lord has the keys of death. He has conquered death, hell, and the grave, and at any moment He may come to set us free from death and destroy our last enemy for us.

"Christ is the Prince of Life. There is no death where he is. Death flees at His coming. Dead bodies sprang to life when He touched them or spoke to them. His coming is not death. Look at that account of the last hours with His Disciples. What does He say to them? 'If I go away, I will send death after you to bring you to me.' 'I will send an angel after you'? Not at all. He says, 'I will come again and receive you unto Myself.' Some may shake their heads and say this subject is too deep for young converts. But, my friends, Paul wrote about these things to the young converts among the Thessalonians.

"There are four great facts which were prophesied: The Son of God was promised and has come. The Son of Man has gone. The Holy Spirit has come and the Son of Man is coming again. You believe the first three; why not believe the fourth?"

The following clipping from the *Waterbury American*, is interesting in connection with Science and Health, p. 402, l. 32.

The *Boston Herald* has this to say on the apparent decline of the drink habit. "The labor department returns, which are carried up to and through the calendar year of 1896, seem to indicate that the consumption of alcoholic beverages of all kinds is gradually declining in this country, when estimated on a per capita basis. So far as distilled spirits are concerned, there cannot be the least doubt of this. This is not, in our opinion, the result of prohibitory laws, but of the gradual upbuilding of a public sentiment which encourages resistance to the abuses of alcoholic liquors, and which makes it a disgrace—and this in nearly all classes of society—for a man or a woman to use these beverages to an excess."

We do not vouch for the strict truthfulness of the following, which is going the rounds of the papers:—

A Maine man who recently experienced religion now goes about the state preaching for the reformation of sinners, and the other day he was announced to deliver a sermon in a schoolhouse in the town of Wayne, the home of the gun-making Maxims. When he got to the schoolhouse there was only one man in the building. After waiting a while for the crowd to appear the evangelist declared to the audience of one that he should go on and preach just the same as if the room were crowded. So he did preach for about an hour and a half, and at the close he asked the lone listener to lead in prayer. The man looked puzzled, and then, fishing out a little slate, wrote, "I am deaf and dumb and haven't heard a word you said."

In Boston the trolley lines run special cars for the convenience of Christian Scientists living in the suburbs. Observing this, the members of a certain other church near by, which also draws its attendance mainly from a distance, asked a similar privilege. To their surprise they were refused, and on asking the reason were given this explanation: "The Christian Scientists can be depended upon to use the cars whatever the weather. You could not, and we should frequently be 'out,' in case of a storm."

Wherever the Christian Scientists have erected churches, as in Boston, Chicago, and New York, they have been uniformly crowded. The step on their part is a new one, and it may well be regarded with attention, as it indicates an institutional quality which many were not prepared to see.

The Church Economist, New York.

Grand Army veterans will appreciate the honor which is done to them by President McKinley's selection of the head of their order for one of the commissioners to investigate the War Department. This is the President's tactful recognition of the fact that the veterans of 1861–65 have a very great interest in the war of 1898, and are competent to speak with authority as to the manner in which it should have been conducted. They are qualified to say what of the hardships of the soldiers were preventable and what unpreventable—for they have been "through the mill" themselves.

Boston Journal.

Says *The Review of Reviews:*—

"The September *Atlantic* shows remarkable activity in printing a brilliant sketch of the life and character of Bismarck, from the pen of William Roscoe Thayer. Inasmuch as the great German's death was on July 30, such a publishing feat seems to enlist the *Atlantic* with the foremost of timely magazines."

The *Outlook*, in commenting on Mr. Moody's Northfield conference, questions "whether more harm than good is not likely to result from his rash declaration, in the face of much Christian experience to the contrary, that one must hold to the story of Jonah and that of Noah's ark, Lot's wife, etc., as historical facts or give up belief in Christ and the Gospel."

Colonel Oliver H. Payne's gift of $1,500,000 to Cornell University for a medical school furnishes still another substantial testimonial to the soothing and beneficent uses of Standard Oil. Presumably the institution which is intended for the alleviation of pain will not be named after its benefactor.—*Boston Herald.*

The *Christian Register* says: "When it comes to measuring the value of any religious movement, it is not merely a question of size, but of quality. There was a time when one man with God was, indeed, a majority—one man misunderstood, standing alone or hanging on a cross."

"That no person can be in heaven in the full meaning of that term," says the *Leader*, "except as he is in a heavenly frame of mind, is a teaching of the Scriptures and of reason."

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address. one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

THE WEEKLY.

WE are receiving many congratulatory letters anent the new publication, and a few of another sort. We are grateful for both. The animus back of one or two is so manifest that it would not deceive any one. The opposition to Christian Science and its Leader, and the purpose to decry its literature, crop out in various forms, and an occasional letter evidencing this feeling is helpful to us, even though its author assumes the name of Christian Science. We can thereby more easily discriminate between the true and the false.

We should be glad to publish in full all the loving expressions received, but our space forbids. On behalf of the Cause, and of our beloved Leader who, through the divine aid, has built up the Cause to proportions at once gratifying and amazing, we extend our sincere thanks to one and all.

We make extracts from the letters thus far received.

1. From a Scientist who is editorially connected with a daily newspaper:—

"A royal welcome to the *Christian Science Weekly*. I am sure that it has a field by itself or we should not have it. May that field constantly be enlarged until, through this new *Weekly* messenger aided by our dear *Journal*, the word of Truth is carried all around the globe. The first number, which is now before me, gives great promise, and will do great good. What a pleasure it will be to have news from the Field each week instead of monthly! The Field is ripe for the harvest, and the *Weekly* comes along just in time to take part in the reaping. Let all show their gratitude by subscribing at once and inducing all their friends who are interested at all in Science to do the same. The *Weekly* can be of great benefit to us all, and it will be."

2. From an ex-minister of the Gospel:—

"All with whom I talk are more than pleased with the matter and the manner of the new publication. For myself I take great satisfaction in the taste displayed in the mechanical make up, in the work it has cut out for itself, and in the way in which that work is done. It is to be a battering ram to error, a missionary among the lowly, a tract to the inquiring, a bugle call to the warrior, and an educator to us all, in all-round common-sense Americanism, *i.e.*, Christianity."

3. From an earnest worker in Baltimore:—

"And now after those wonderful morning lessons, when our cup of blessings seemed full indeed, a Christian Science *Weekly!* I need hardly say it has met with a warm welcome at this end of the line."

4. From a wide-awake New York worker:—

"In remitting my subscription to the *Weekly*, I desire to state that it meets a demand which had often presented itself to me, namely, that every one interested in Christian Science might be kept correctly posted on current events in connection with both the Mother Church and the Field generally. It will also be a great boon to those lacking time to wade through the daily papers, with their countless allusions to all kinds of error. I have a little acquaintance with editorial work, and can readily appreciate what an additional amount of perseverance and method are needed to produce the new publication.

"All will profit who receive it."

5. From an active worker in Grand Rapids, Michigan:—

"Have just received two copies of the *Christian Science Weekly*. Surely divine Love, through our dear Mother, has met our need again, and this paper will feed and nourish the hungry children while waiting each month for the next *Journal*, for the time to most of us I know seems long."

6. From one of our Leader's old and tried students, in St. Joseph, Mo.:—

"The *Christian Science Weekly* is before us. I must say I am delighted to think we are going to hear from headquarters every week. Its general arrangement is excellent, and is a wise provision to catch the overflow of our dear *Journal*. Our beloved Mother's Poem, so appropriate and full of meaning, then "Current Events," "Testimonies," and articles by different writers, all go to prove how intensely practical is Christian Science, and meets the claim, held by some, that Christian Science is something supernatural, and therefore impracticable. We predict for the *Weekly* a wide circulation, and it will certainly be the means of spreading the glad tidings more rapidly, introducing our *Journal*, —so replete with good things."

7. From Jacksonville, Florida, this cheery word:—

"In behalf of our happy and prosperous little church, I send a cheery greeting and warm welcome to the new-born babe of our beloved *Journal*, whose place, indeed, it cannot take, but to which it will prove a satisfying supplement. A joyful surprise, as the eye rested first on the familiar seal above, so dear to every Christian Scientist, and below, "Copyrighted, 1898, by Mary Baker G. Eddy," verifying its genuineness. Christian Scientists are all so voraciously hungry for their *Journal*, that, many times, a month has seemed long to wait, and if it went over the month we have been anxious."

8. Another active New Yorker says:—

"This meek and humble messenger, this promising 'child of the regiment,' we accept with open arms and with joy and gratitude that God has answered our prayers and recognized a readiness to receive and appropriate this new and effective instrument of His will. We thank God for that one who, far ahead, has discerned the snares and pitfalls; who has so courageously discovered the path, so patiently pointed the way, and who so lovingly watches, warns, and wins the stranger, spreading for him a table of gladness rich to behold; and now a new joy is added to the feast."

9. Chicago sends greeting thus:—

"I want to express my gratitude for and earnest appreciation of, the *Christian Science Weekly* just received and read. It is indeed a splendid offering to "the Field," and will, I am sure, be received by all with the same joy it brings to me, who am ever hungry for every word of Truth. The weeks between the coming of the always eagerly looked-for *Journal* will now be well filled."

Digitized by Google

10. From an active student of our Leader in Boston:—

"I wish to express my thanks for the new *Weekly* just issued. It seems to me to be a valuable adjunct. It fills a niche which the *Journal* and tracts did not, and will surely do good wherever it goes. Ofttimes one will take up a paper when books and magazines seem too ponderous for their need, and therefore this *Weekly* will feed them with 'milk of the word,' and create a desire for the 'weightier things of the law,' as promulgated in our other literature. It also shows to the people that we are not bigots and ignoramuses, as has been often said of us, and that Scientists are enjoyers of all good things,—not for show, but for Truth's sake."

11. From one of the old, faithful, and tried of Manchester, N. H.:—

"'The Lord shall open unto thee his good treasure, the heaven to give the rain unto thy land in his season, and to bless all the work of thine hand: and thou shalt lend unto many nations, and thou shalt not borrow' (Deuteronomy, 28 : 12).

"Verily this Scripture is being fulfilled in the advent of the little *Weekly* which has just come to hand. I have never felt equal to putting into words what our *Journal* has been to me as it comes monthly, freighted with its wealth of good things, and I have left my thanks to the faithful and patient editors and contributors to be *felt* rather than heard. When I came into Christian Science, Science and Health was the only published work; how different to-day! with all our Mother's books; the *Journal*, Hymnal, Quarterlies, tracts, and now the *Weekly*. What a growth in sixteen years. There is no longer any excuse for ignorance on this subject, and there will soon be none."

12. From a loyal worker in Atlanta, Georgia:—

"I wish to thank and congratulate you and the Cause on the new *Christian Science Weekly*. I have longed for the day when reform would begin in the Press, and lo! it is here. There is so much false literature that we need this for distribution."

FEAR OF STORMS DESTROYED.

BY HELEN A. DOZIER.

In August, 1896, a young man called. I had seen him at the Baptist church during my occasional attendance there with my sister. It was upon this sister he called, but she being absent, it devolved upon me to entertain him. I felt a little embarrassed at first, not knowing what kind of conversation would interest him.

Thinking that he was a Baptist, and had been absent from Jacksonville for several years, I expressed regret that he had chosen just this time for a visit to his old home, as his beloved pastor was about to be removed from his church, owing to the discontent of some of its members. He replied that he had heard the sad news since his arrival and was very sorry to hear it,—then after a moment's hesitation he said that he was no longer a member of the Baptist Church, but had become a Christian Scientist.

I almost gasped for horror, thinking that the mighty, indeed, had fallen. I was astonished that a member of so orthodox a church should be led off by this fad of a new religious sect that had arisen in our land, but calming my thoughts I said that I had heard of such a religion, but knew nothing of its claims, and asked him to tell me something about it.

He began by saying that it was the religion of the Bible as taught and demonstrated by Jesus while on earth. He warmed in his narration and I became very much interested in the cures of disease that he was telling about. My sister returned, and after the usual salutation, the interesting conversation was resumed, and he remained with us until ten o'clock—he never tiring of telling, and we never tiring of listening to his wonderful disclosures.

When he arose to leave, I thought I would test the truth of this new found faith. I said, "Mr. ——, do you think you could heal me of the fear of thunder and lightning?" "Yes; but I can do better than that for you, I can put you in the way of helping yourself." "O no, no," I replied, "I do not wish you to do that; I don't believe in what you say, but as you do, why the cure must come through your faith. I am in earnest about wishing to be healed of that fear, for I am almost insane during a thunder storm, running to my room, darkening the windows, and covering my head with pillows as long as the storm lasts and the rumbling of thunder continues; almost paralyzed with fright and the dread of death."

The next morning Mr. —— called, bringing copies of the *Journal* and a little book called "Unity of Good," which he left for our perusal.

About two o'clock that same day, while we were at the dinner table, a thunder storm came up, and I sat quietly through the storm, eating my dinner. Such a thing had not occurred before in years. I felt assured that there was some wonderful force at work and that there was some efficacy in what he had declared.

As time passed on and storm after storm had come and gone, and I had been enabled to weather each one with less and less fear, I thought more good could be done. I had suffered all my life with an annoying complaint and I wished very much to be rid of it. Hearing that there was a Scientist living not far from where I resided, I sauntered around to her house one afternoon at dusk. I was ashamed to be seen going to the house of a Christian Scientist for such a purpose, for I considered the sect as very unorthodox; but my disease was a great annoyance and the case was urgent, so I called, taking a friend to introduce me.

The lady answered my rap herself. She looked very human and spoke kindly and gently, inviting me to enter the house. I could not make up my mind to enter. I was afraid of something supernatural, as the appearance of some ghost on short notice.

However, I asked her if she would kindly lend me the book Science and Health, by Mrs. Mary Baker G. Eddy, which she did. On taking my leave, I asked her if she was a healer. She answered in the affirmative, and I asked her to heal me of my old chronic disease, not, however, without many misgivings as to her ability to do so.

She not only healed me of this disease, but of many others. I have read Science and Health time and time again, and am now studying it with the Quarterly and the Bible, and I find the scales of unbelief constantly falling from my eyes, or from my thought rather, and I can demonstrate Truth for myself in many things.

I now realize why Jesus came to the earth; to show man how to regain his God-given dominion, and to triumph over sin, sickness, and death.

Thanks be to God for sending Mrs. Eddy to this age, to enlighten our darkened understanding.

PAIN AND PLEASURE.

BY E. D. WAGNALLS.

Does it make any difference to the body whether it is forced to indulge so-called pleasant dissipations, or is pierced with a sword? Does the flesh recognize either? Certainly not. This, then, clears the body of all guilt. But you say that *I* can recognize the difference. Who or what is this "*I*" that claims to be cognizant of pleasure or pain? We have already admitted that the body could have nothing to do with it. We feel that we can prove that this "I" lied from self-deception.

To be able to cognize anything there must be intelligence. There is but one Intelligence, and that one is God. God made all that was made, *therefore it must be in His likeness*, hence all that ever was made is good. There is nothing else above, below, or within this grand creation,—no place for anything else, for God is All-in-all.

Thus we see most conclusively that God is All and that there is naught beside Him. It is equally apparent that pain or sensual pleasure, sickness or sin, are not in His crea-

Digitized by Google

tion, which embraces all. We must admit, therefore, that these claims do not, cannot exist, never existed, never came from anywhere but from our self-deceived consciousness. Remove this self-deception by pouring in the real, the undeniable spiritual facts, and we find in its stead the peace, joy, and love which were always there, but which we refused to recognize, preferring rather to make this deception a reality.

Now, why cannot pain and sensual pleasure exist? Why are not sin and sickness realities?

Can a thing exist and yet destroy itself? A claim of sickness is quite like a soap-bubble. It gets larger and larger until, by its own expansion, it bursts into its native nothingness, and the place thereof knows it no more. Can that which is real become in a few moments an unreality, or can it ever change? That which is unreal must be unreal still, and that which is real must ever remain so. The product of two times two is four. Has that fact ever changed, or can it ever change? The lie says that two times two is five. This statement must ever remain the false because it can never be changed to the true. Likewise if anything is, was, or ever shall be false, it never has, can, or will possess reality; *vice versa*, if anything is, was, or ever shall be real, it never has, can, or will possess unreality, self-deceived sense saying what it may, contrariwise.

Again, God is the Principle of His spiritual universe, and there is no other universe. He is the Principle of existence, for God is Life. Can sickness or iniquity exist in the Principle which is too pure to behold iniquity?

Let us rejoice and be exceeding glad that these claims are self-deception, for they have no God, no Principle, no Life, no Truth, no Love.

BELIEF AND UNDERSTANDING.

BY E. M. B.

MANY of my friends say, "I hear you have adopted the new belief in God." I answer, "No; I am developing the understanding of God, or Good." "Oh well," they reply, "it is the same thing, only a change in phraseology." Allow me to give you an illustration, and see then if you are of the same opinion.

Two gentlemen are sitting in a schoolroom; one a mathematician, the other ignorant of the principle governing numbers. The scholar remarks to his friend, "I am going to solve a problem in addition," and as he crosses the room to the blackboard, the other looks wonderingly to see the result. He sees a line of figures placed upon the board, and as the scholar runs his finger along the line, and places two figures below as the correct answer, he *believes* it to be correct, and has absolute faith that he can do likewise. Taking the chalk he also places figures in line on the board, but, ignorant of the mental process by which the correct answer is gained, he places indiscriminately any two figures below, in imitation of his friend, and then looks to him for approval, and is surprised when told that he has failed in the vital part of his work, that it has absolutely no value, as it is a blind belief, with no principle governing it. He must make the principle of numbers his own, in order to gain a correct result, and so demonstrate his understanding of the science, which never varies, never changes. So also in the Science of Being, we must absolutely separate the belief from understanding.

Believing that Life and Intelligence are in matter, and that mortal man is a creator, can never make it so, as he creates but the illusion of Life and Intelligence which ends in death and nothingness.

The counterfeit bill may be so nearly perfect in appearance that the magnifying glass will be required to show its falsity, yet it will not have one atom of power when we attempt to spend it. We must know that back of either man or money, is a power, unchanging and sufficient for all purposes. When we grasp the understanding, and can demonstrate by means of it, that there is but one Life, one Intelligence, one Love, one Truth, one Harmony, and that is Infinite,—God,—the one only Principle and Power, and man, reflecting this Love, Life, and Truth, has all and lacks nothing, we shall (as a leading Scientist has said) be willing to use the multiplication table without wanting to be it.

THE CHRISTIAN SCIENCE BADGE.

BY ABBIE H. KIDD.

DURING a two weeks' vacation at one of the northern lakes, I found myself surrounded by about three hundred people. I wondered if I should find any Scientists there. One lady, hearing that I was a Scientist, wished to talk with me. After two hours' conversation, she decided to go home, take treatment, and look into the subject. A few days passed, and I became hungry to talk with a Christian Scientist. I thought among three hundred guests there must be another Scientist, and I went down to the lobby where all passed through. I had watched the faces about fifteen minutes, when I saw a gentleman whom I was sure from his badge, —the satisfied, happy expression on his face,—was a Christian Scientist. Then a lady came up and talked with him, whose "badge," was the happiest, sweetest face in the whole hotel. I soon found her alone and inquired if she were not a Christian Scientist. She quickly said, "*Yes*, and my husband and two sons." My desire was granted. They are earnest workers in Chicago. The sunlight of Love—the badge of Christian Science, which shone through the Mother's face, on that waiting multitude, the 5th of July, 1897, will never be mistaken nor forgotten by those whose blessed privilege it was to see her. Let us all carry this badge of happiness and peace that Christ may be lifted up, and all the world drawn unto Him.

TESTIMONIES.

IN August, 1896, Science and Health was loaned to me by a friend who had been healed. Upon receiving the book I promised that I would go to see her healer. But time went on, and I read with an interest that I never found in any other book, feeling sure that there was something in it that I wanted. I told my husband that I would never go to another physician or take another drop of medicine; but how I was to escape from the prison walls which had enclosed me from childhood, with claims of heredity held over me, I did not know. In September, an old belief took possession of me, and, filled with fear, after three nights of sleeplessness, struggling with will power, I sought my friend who took me to her healer.

I soon found that she had an understanding of the Bible which I longed for. I asked for treatment, and after the third one I was healed of that claim. This gave me great hope. Paying for the treatment did not seem to be all the gratitude necessary. There was but one way of showing full appreciation, and that was to begin at once to gain the inheritance which I was convinced belonged to every one of God's children.

From the time I stopped treatment I have not failed to read Science and Health every day. Neither have I looked into any other books which have pretended to teach Mind-healing. My surroundings, from a babe were such as should have brought joy, peace, and happiness; but I had always found something lacking, and condemned myself for being discontented. But now, through the reading of Mrs. Eddy's works, I find the "feast" and satisfying thought I have been searching for so long.

I cannot close without speaking of the growth of our church. The attendance last week was the largest we have ever had. The soil is well stirred and I know the harvest will be great.—*B. S. G., Grand Rapids, Mich.*

Digitized by Google

My two boys had preceded me on a visit to my mother, who lives five miles in the country. In order to be in time to meet me on the early train, mother remained in town over night, leaving the boys with their grandfather. As we drove into the yard, father met us and said to me, "Herbert (the youngest) fell out of bed last night and broke his collar bone."

What terror filled me for a moment; but before I reached the house I was perfectly calm, for the Christ was saying to me, "Peace, be still," "*My* peace I give unto you." I went in to the little fellow, who was seven years of age, and found him wild with fear. He had a high fever and was suffering intensely. My mother, who is also a student of Science, and myself, took our books, Science and Health, and before we had treated ten minutes he was singing joyously, all pain, fever, and fear gone. He was up in three days perfectly well. The work had been quickly done, amidst the greatest antagonism and fearful predictions from other members of the family.—*L. S. C., Macon, Ga.*

Dear Weekly:—I am a little girl twelve years old, and I feel as though I ought to tell a few of error's seeming claims, which I have successfully overcome with my little understanding of Christian Science.

My little sister had a severe case of measles, which I took up in Christian Science, and she was healed in a week, leaving no ill effects whatever. She also had croup, which I treated, and she was cured in a very short time.

This past winter I had a severe cold and sore throat. I could not speak aloud. I treated myself, and did not miss one half day at school. I was healed in a week. I study Science and Health and "Miscellaneous Writings" every day, and I find such an uplifting in the words contained in their pages that I cannot help but grasp the Truth of it, which has enabled me to help myself and our entire family. It has helped remarkably in all my school work. I cannot testify enough for Christian Science, as my gratitude is beyond words for finding such a blessed light shown to us by our dear Mother, Rev. Mary Baker Eddy.

Henrietta Loasby, New York, N. Y.

I was healed of spinal trouble which caused severe pain in the back of the head. I was suffering intensely when I chanced to pick up Science and Health in a lady's room. I had never heard of the book nor of our dear Mother, but I had heard the name Christian Science, and had asked what it was, but could not learn anything about it. The lady being out of her room, I took the book and began to read. I shall never forget the calm that came over me the few moments I read. The next day I took the book to my room and read all the afternoon, and that night I went to sleep free from pain for the first time in six years. The blessing that book has been to me words fail to tell. I was entirely healed and have been able to help others and lead them into the Light. A child had the croup so that it could not speak, and its eyes were swollen and inflamed. The claim yielded to the power of Truth, and in one hour the child was singing, "Shepherd, show me how to go," the best a baby of three years could sing.—*Florence J. Merrill, Danville, Canada.*

In October, 1895, my daughter was healed. She had been an invalid for four years, and we had resorted to all material means that we thought would be of any benefit to her. She was taken to a hospital in Clinton, Iowa, and had to undergo a severe operation, but was sent home no better than when she went away. She had been home about two weeks when a lady who had been helped in Christian Science called, and advised her to go to a Scientist living in Des Moines, Iowa. We decided it was our last resort. She went and took one week's treatment, and is now well and strong.

I will write a few words for myself. The lady who called to see my daughter brought Science and Health and some Journals, and I read them. I had been a member of the Orthodox Church for eight years, but never felt satisfied. When I found the truth, as it is taught in Christian Science, I felt it was just what I was hungering for, and I praise God for leading me to Christian Science.

Phebe J. Gerrard, Ames, Iowa.

I was brought up in the Roman Catholic Church and thought it was the truth, but I found through reading Science and Health, and being healed of many ills of the flesh, that that thought was a belief in two powers. I began to study the Bible, which was a new book to me, in connection with the works of our beloved Leader. I have found the Truth that makes us free. We know if we obey what has been given us we shall have wisdom to guide us in the work of Love.

Mrs. Kittie Roberts, Cleveland, O.

I was healed of tumor of the breast. Doctors said that nothing but removing it would do any good, and advised me to get ready for an operation at once, as delay was dangerous. I decided to rely on Christian Science and commenced taking treatment, and am perfectly well, not a vestige of the swelling remaining to-day.

About two years ago I had quite a demonstration in laying aside my glasses that I had worn for years.

Mrs. Annie Kleven, Gordonsville, Minn.

Christian Science has wrought a wonderful change in my thought. Where formerly it was misty and uncertain, now it is clear and positive. As the light of Truth has dawned upon me, old beliefs of sickness, the use of tobacco, liquor, etc., have disappeared, proving the great utility of Christian Science in freeing all who are willing to be freed from sickness and sin.—*R. M. C., Cincinnati, Ohio.*

NOTICES.

HEREAFTER the Wednesday experience meeting will be made throughout the Field a meeting of interest on subjects pertaining to Christian Science, as well as personal experience, and will be called the *Wednesday Evening Meeting.* A member of the Board of Lectureship will lecture at these meetings as often as once in three months. The Christian Science Board of Directors of the Mother Church will select the lecturer, subject to the Pastor Emeritus' approval, and direct him where and when to deliver his lecture, within the bounds of his section or precincts in the United States, Canada, or Great Britain.

MARY BAKER G. EDDY.

PLEASANT VIEW, CONCORD. N. H., Sept. 15, 1898.

We earnestly request the Field not to send subscriptions and other matters pertaining to the Publisher's Department, in letters enclosing articles for publication. The departments are separate and should be separately addressed. Confusion and much additional trouble to the workers at headquarters will thus be avoided.

What we especially mean by this is, that in writing to the Publisher's Department on matters relating to that department, sending subscriptions, etc., do not mix with it experiences or testimonies for publication. Keep them separate and send to the proper department so that the files of each can be separately kept.

Please bear this in mind, and thereby do unto others as you would be done by.

When sending for the *Christian Science Weekly* for an unexpired term of the *Journal*, please be careful to send the correct amount. These subscriptions should be reckoned up to and include the month named on the address of the *Journal.*

Works on Christian Science

WRITTEN BY

Rev. MARY BAKER G. EDDY.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid	$3 18
Two to Twelve books to one address, each, Prepaid	3 00
Twelve or more books to one address, each, Prepaid	2 75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid	6 00
Twelve or more to one address, each, Prepaid	5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid	$2 25
Twelve or more books to one address, each, Prepaid	2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

Direct all orders for above works, and make remittances payable, to

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REVEREND MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical Healing, as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscriptions:

Payable in advance, postage free, to any part of the United States and Canada. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents. Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

THE CHRISTIAN SCIENCE QUARTERLY,

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday Services in all the Christian Science Churches throughout the year.

Terms of Subscription:

One copy, one year, 50 cents; Fifty copies or more to one address, one year, each, 50 cents; Foreign subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States and Canada.

Terms of Sale:

One or more copies, each, postage paid, 15 cents; Fifty copies or more to one address, postage paid, each, 12½ cents.

CHURCH MANUAL. Containing Rules and By-Laws of the Mother Church, also list of members. Price, one copy, $1; six copies to one address, $5; twelve copies to one address, $9.

THE CHRISTIAN SCIENCE HYMNAL. Bound in two styles —Cloth and Leather. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00; Leather, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the building of the Mother Church, The First Church of Christ, Scientist, in Boston. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00.

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A Review of the work of the women of history. Paper, 32 cents; Cloth binding, 45 cents.

HEARINGS ON PROPOSED MEDICAL BILLS in Massachusetts and New York. 23 pp.

ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By EDWARD A. KIMBALL, 24 pp.

THE BUSWELL TRIAL. 24 pp.

REPLY TO SERMON. By SEPTIMUS J. HANNA, 30 pp.

THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.

HEALING THROUGH CHRISTIAN SCIENCE. By SEPTIMUS J. HANNA, 32 pp.

One copy or more, each, 10 cents; Twelve copies to one address, $1.00; Twenty-five copies to one address, $1.75; Fifty copies to one address, $3.00.

COMMUNION HYMN. "SAW YE MY SAVIOUR?"

Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

ITEMS OF INTEREST.

Commissioner Hermann of the General Land Office of the United States has recently issued a book entitled, "The Louisiana Purchase and our Title West of the Rocky Mountains," in which are furnished reasons for the correction of the latest official map of the United States, so far as it represents that part of our country west of the Rocky Mountains from the Canada line to the forty-second parallel of latitude, as having been acquired through the Louisiana purchase. The Commissioner, who is an ardent annexationist, adds some interesting pages to his work, in which he points out the immense benefits which have accrued to this country as the result of the policy of annexation from the earliest history of the republic to the present time. One of his sweeping assertions is, that the grand total of sums paid for our foreign acquisitions amounts to $52,000,000, a sum less than the value of one year's output of Montana's minerals, or Minnesota's annual wheat yield, or of the cattle and hay product of California of one year. The objection to our accepting territory because of its remoteness weighs for nothing with him. He calls attention to the fact that Hawaii is more accessible to the United States than was the settled portion of Louisiana in Jefferson's time, of Florida in Munroe's, of Oregon in Polk's time. California, when admitted into the Union, he insists, was far more inaccessible than is Hawaii to-day. General Joseph Lane, the first territorial Governor of Oregon, had to consume about six months in the journey from Indiana to the mouth of the Columbia River. The book contains much more of a similarly interesting nature.

The arrival of the Spanish merchant steamship Gran Antilla from Havana was the cause of much evident gratification to all the people of the harbor. She was greeted with hand-waving, cheers, and the tooting of whistles from the tugs and steamboats as soon as her nationality was discovered from a sight of her flag at the peak of the gaff, to which her own crew responded by waving their caps.

She was received as the harbinger of peace, being the first vessel that has presumed to show the Spanish colors in any American port since the war began; and her reception proves that, forceful and resolute as the American people are in war, they yet love peace with all mankind and are glad to believe that the battle-flags are to be furled, and would be gladder still to know that "the war drums throb no longer" the world over.—*Brooklyn Citizen.*

We doubt if the Odd Fellows ever received a more cordial welcome than that extended to them by Boston, on the recent occasion of their re-union in that city. A perfect day, many thousands of spectators, the applause of the multitude, the cordial greeting by the State and city officials, were prominent among the pleasant features of the occasion. The parade was a really magnificent one, consisting of great bodies of Odd Fellows, the "Patriarchs Militant," the encampments and subordinate lodges, forming a procession which aggregated upwards of twenty thousand. It was twelve years since a similar demonstration of this order took place in Boston. It will long be remembered by all interested.

Minister Angell, in a recent interview, had this to say in answer to the question, "What are our chances of collecting the Armenian indemnity?" "I do not think the claims will be paid unless we make some demonstration of force. The European ambassadors have been at work for a year and a half and have accomplished nothing. I think it would be a very good thing if the warships that are going to Manila could anchor a few days in the Sea of Marmora and fire a salute to his majesty, the sultan, from their thirteen-inch guns, the concussion from which would probably shatter every window in the Seraglio."

President McKinley has finally succeeded in getting a full commission to investigate the War Department. It consists of General Grenville M. Dodge, who is its president; Major-General John M. Wilson, chief of engineers, U. S. A.; Major-General Alexander McDowell McCook, U. S. A., retired; Colonel J. A. Sexton of Chicago; Captain Evan P. Howell of Atlanta, Ga.; ex-Minister to China Charles Denby of Indianapolis, Ind.; ex-Governor Urban A. Woodbury of Vermont; ex-Governor James A. Beaver of Pennsylvania, and Dr. Phineas S. Conner of Cincinnati.

Mrs. Richard King of Texas is probably the richest woman in the United States, not excepting Mrs. Hetty Green. Her wealth is partly inherited from her father, a former Presbyterian clergyman, the first who was ever called to preach the Gospel to Indians and mixed races that peopled the vast domain over which his own little daughter was destined to hold sway, as a landed proprietor. Mrs. King is a widow, and her landed estates in southern Texas amount to 1,250,000 acres, or about two thousand square miles.

An imperial edict just issued definitely announces that Kuang Hsu, emperor of China, has resigned his power to Tsu Shi, the Dowager Empress who has ordered the ministers to deliver their official reports to her in the future. It is said that the recent reformatory edicts have caused the change. Li Hung Chang will probably be re-instated in his former position as viceroy. It is thought that Russia's influence in China will now gain and England's suffer.

Count Cassini, the Russian ambassador, is reported as having recently said, "There has been absolutely no change in Russian sentiment or policy toward the United States, nor does there exist a reason for such a change within my knowledge. Russian policy does not conflict with the interests of the United States in any part of the world, any more in China than in England. Russia seeks only peaceable and friendly relations with all other nations."

Canada, on the 29th of September, will vote on the question of Prohibition. On that date the electors of Canada, men and women, will be called upon to mark a cross opposite

"yea" or "no" upon the ballot which propounds the question, "Are you in favor of an act prohibiting the importation, manufacture, or sale of spirits, wine, beer, ale, cider, and all alcoholic liquors and beverages?"

Physicians examining into the causes of typhoid fever at Montauk Point and other camps, have arrived at the conclusion that it is due to the flies. The germ theory seems to be taking a back seat of late, and flies and mosquitoes are becoming the chief causes of contagion. Who dare say that "science" is at least not progressive,—if by progression is meant change of opinion.

All official reports from Manila, Havana, San Juan, and Porto Rico have of late been satisfactory to the government, in spite of rumors to the contrary that had been in circulation. There are no signs of trouble. The surrender of Spanish territory is proceeding in every colony. Our army of occupation will begin moving next month.

Sir James Winter, Premier of Newfoundland, says that there is no sentiment in that colony in favor of federation with Canada. Neither party is disposed to consider the proposition of union with Canada. He adds that for the present, at least, they are quite able to work out their own destiny.

The dispute between the Argentine Republic and Chile has been settled by arbitration. An agreement to that effect has been signed, and the war preparations will now cease. These South American republics have set a good example to the older and more powerful nations of the world.

The birthplace of Edward Everett, which has stood for one hundred and fifty-three years in Dorchester, Mass., is being torn down to make way for a boulevard. The house was erected by Colonel Robert Oliver, a wealthy planter from Antigua, who settled in Dorchester in 1737.

The tributes of respect to the memory of Winnie Davis, daughter of Jefferson Davis, all through the South and a great many parts of the North, were numerous and touching. The G. A. R. Post of Narragansett Pier, volunteered to escort the body to the depot on its departure.

The Central American States have entered into a federal union to be called the "United States of Central America." The federal government is to be the supreme power within the States. The arms owned by the States and soldiers are to be turned over to the federal government.

Six thousand more men are to be sent to the Philippines. The troops now at San Francisco are ordered to be sent to Manila. Two of the best battleships have also started. The administration is preparing to meet any emergency which may arise in the far East.

It is reported from Manila that the claims of the Spanish clerical party have defeated the Filippinos almost beyond the hope of reconciliation. Seven Filippinos were recently detected at Santa Ana with money received from some priests.

Secretary Gage and United States Treasurer Roberts say they are satisfied that all serious danger of monetary stringency is passed, that they have the means at their disposal to overcome any tendency in that direction.

The Hon. George N. Curzon, until recently parliamentary secretary for the Foreign Office, who has succeeded the Earl of Elgin as Viceroy of India, has been elevated to the peerage as Baron Curzon of Kedleston.

The customs collections at the port of Santiago de Cuba from July 16 to September 1 amounted to over $107,000. The collector estimates the annual income of the province of Santiago at $2,150,000.

Word comes from Washington that a new cabinet office is likely to grow out of the enlarged foreign policy in the United States. It will be a department relating to the newly acquired colonies.

M. Lockray, French minister of marine, says that the great battles of the future will be decided at sea; that the Spanish-American war has convincingly shown the truth of this view.

General Zurlinden has been re-appointed to his post of military governor of Paris, which he occupied previous to accepting the portfolio of minister of war.

General Garcia is on his way to this country to visit his daughter. General Lawton gave the old Cuban hero a hearty reception at Santiago de Cuba.

A disastrous storm recently passed over parts of the West Indies completely wrecking the island of St. Vincent, and working havoc in many other places.

The Chinese emperor has issued an edict that European and American editors, missionaries, and their converts in his empire shall be fully protected.

Nearly four hundred of the Rough Riders' horses were sold at an average of sixteen dollars. They cost the government about sixty-five dollars apiece.

The *National Zeitung* says that the personal estate of the late Prince Bismarck does not represent as much as 2,500,000 marks (or about $500,000).

Lieutenant Hobson has saved Cervera's cruiser, the Infanta Maria Teresa, from the wreck, and it will be repaired and added to our navy.

Hon. Alfred S. Pinkerton, of Worcester, Mass., was chosen Grand Sire by the Odd Fellows at their annual meeting in Boston.

The Spanish minister of war has issued instructions for the return of the Spanish troops in the West Indies.

Mount Vesuvius is again in a state of eruption. The spectacle is said to be terrific in its splendor.

Spain declares her willingness to abandon Cuba when the United States wants it.

Chief Aguinaldo continues to asseverate his friendship for the United States.

Middlebury College in Vermont will soon celebrate its centennial.

CONCORD ITEMS.

The State Soldiers' Aid Society has received a box of supplies from Mary Butler Chapter, Daughters of the Revolution, Pittsfield, $2 from residents of North Conway, $5 from the Sheridan W. R. C., Hinsdale, and $25 from Mrs. John P. Hale.

Concord people will be interested to know that Major James Miller, U. S. A., is with the Twentieth Infantry at Fort Leavenworth, and that Lieutenant-Colonel W. S. Edgerly, U. S. A., now at Fort Myer, Washington, is to be assigned to the Sixth Cavalry with the rank of major.

A Nashua correspondent writes: "Yesterday Governor Ramsdell received a check for $25 from the venerable widow of Hon. John P. Hale, to be used by the Soldiers' Aid Society for the sick soldiers, of whom there are nearly one hundred in the various hospitals of the state at the present time."

From the *Concord Evening Monitor*, Sept. 15, 1898.

WHAT THEY SAY OF THE WEEKLY.

We are still in receipt of congratulatory letters relating to the *Weekly*. We herewith extract briefly from some of them.

1. We give the benedictory words of our beloved Leader.

"Your highly interesting monthly and weekly issues are well sustained. They exhibit experience and skilful workmanship. The last little sheet opens a vast area of influence, all on the right side. God bless you in this, as in all your undertakings. Every truth you promulgate, every good and ardent thought you entertain, makes you healthier, wealthier, wiser, and longer-lived, the evidences of the senses to the contrary notwithstanding."

2. What the *Washington News Letter* has to say.

"Since our last publishing day we have received Nos. 1 and 2, Vol. I. of the new *Christian Science Weekly*, published by the Christian Science Publishing Society of Boston.

"That the paper is an able one goes without saying, and it will fill a field which was vacant, viz., a weekly organ of the church. We hail the new weekly as a friend, and shall expect to derive much pleasure and profit from its weekly visits.

"In writing to the editor of the *News Letter*, Rev. Mary Baker G. Eddy, in referring to the new paper, closed her letter with these kind words:—

"'We are about to start a weekly newspaper in Boston, but I see no reason for its conflicting in the least with the circulation of your paper. God bless you.'"

3. From a Scientist of Cleveland, Ohio. This letter came to the *Weekly*, although addressed to "The Dear Mother."

"Through divine Love this last benediction, a weekly messenger, shall bear witness to the light. How convenient! How helpful! A common-sense necessity. Again shall liberty extend her arms to a greater number than heretofore of the weary, sin-sick ones, and freedom shall be their portion."

4. From Ocean Point, Me.

"In a few words I wish to thank you for the valuable little paper, the *Christian Science Weekly*. I know some of the feeling of those away from Boston and the Mother Church. How they look eagerly forward to the coming of the *Journal*, and often the thought is spoken that we might not have to wait a whole month for loving words from the front. Now we can be in touch each week, and I rejoice that such a privilege is granted."

5. From an active Scientist in New York City.

"Accept hearty thanks for the *Weekly*. Its beginning is promising, its growth and practical usefulness are assured, and its maturity and full stature, like all else in Christian Science, is beyond present vision. 'Current Items' I especially value. Scientists can now acquire a correct knowledge of the world's ethical and humanitarian progress without having to read a vast amount of error. The testimonies of healing and reformation are most valuable, the editorials scientifically helpful, and the publication as a whole attractive. It will certainly grow hand in hand with the monthly *Journal*, be an invaluable and ready messenger for our Leader's messages to the Field, and its appearance, I think, renewedly reminds the Christian Science world of its debt of gratitude to her."

6. From Rochester, N. Y.

"I cannot restrain the inclination to congratulate you and the Field upon the advent of the new messenger of Truth, the *Christian Science Weekly*. I read it with the same avidity that I would the *Journal*. It is, in fact, a Journal in miniature. In my opinion it fills a long-felt want. It gives new impetus to the study of Science, and will prove of great value to patients who desire to read about Christian Science."

7. From Adeline, St. Mary Parish, La.

"I feel that it would not be right to the dear Mother if I did not write and thank her for the precious new gift to her children, the *Christian Science Weekly*. Now that it has come to us we see it is the very thing we most wanted at the present time,—that is, weekly as well as monthly communication with the Field and workers."

8. From one of our Mother's students in Chicago.

"I am greatly pleased with the sprightly little *Weekly*. The dear Mother's poem is inspiring. With a blessing like that, the *Weekly* cannot fail to prosper, as our *Journal* has done. There is certainly a need of a paper of this kind. As the number of those interested increases they must be in as close touch as possible with headquarters, and with all that pertains to the work and progress of Christian Science.

"As stated in the columns of this *Weekly*, it cannot take the place of the *Journal*, yet it has a place of its own and a very important mission."

9. From Independence, Mo.

"I send my thanks and greeting for the *Christian Science Weekly*. I prophesy for this paper a glorious success. It will go hand in hand with Christianity. Its pages sparkle with clearness and purity. God will use this paper to search the gems of Christianity, bringing them to view and uniting them in Christian Science (Christ)."

10. From another active worker in New York City.

"Permit an expression of appreciation of the *Christian Science Weekly*. Those of us who have neither time nor inclination to wade through the daily newspapers find the gist of what is fit to read served in dainty and condensed form in our new *Weekly*, with the very latest from our headquarters. Surely every Christian Scientist will gladly secure copies enough to distribute to all his friends, as the most reasonable in price and acceptable manner of complying with such God-pleasing service."

11. From the *Boston Evening Transcript's* column of "Religious Interests," we clip the following:—

"The Christian Science Publishing Society has commenced the publication of a weekly paper called the *Christian Science Weekly*. The first number, of eight pages in quarto form, contains much interesting matter pertaining to the progress of the denomination. It is not designed to take the place of the monthly."

MISCELLANIES.

The eight-weeks-old baby of August Jandig of New York City, died recently from the effects of medicine prescribed for an adult, given it by mistake.

How many similar instances occur in the course of a year, a month, a day? And yet there are many people who say that all such events are due to the *wisdom* of an all-wise Providence. God forbid!

Ah, now we know why the Odd Fellows have only one degree for women and seven for men. The degrees are courses of moral instruction, and the women do not require so many. Wise order!—*Boston Herald.*

Bishop Whipple declares that "no man has ever written his name indelibly in the history of the American nation who has denied the existence of God or scoffed at religion."

Miss Weston, who has done and is still doing a great Christian work among the seamen, has received the well-earned title of "Bishop of the Bluejackets."

Patience is the ballast of the soul, that will keep it from rolling and tumbling in the great storm.—*Bishop Hopkins.*

No man ever worked honestly without giving some help to his race.—*Ruskin.*

More than $1,250,000 has been paid in royalties for Moody's hymns.

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

EDITORIAL.

THE Christian Scientist who reads the attempts of certain non-Scientists to tell others what Christian Science is, cannot but wonder if there ever was a religious philosophy so utterly misapprehended, misrepresented, and distorted as is this one. He wonders if public speakers in general are so much in the habit of discoursing upon, and even attempting to instruct their audiences concerning, things about which they know so little, as are many who assume to tell the public what Christian Science is and what it is not. If so, no wonder the world of mankind is in a state of chaos and confusion; no wonder people are so largely governed by prejudice and misconception. If Romanism and Protestantism, each by the other, are as grossly misrepresented in the pulpit and on the rostrum as Christian Science has been, it is not strange that each should regard the other with dread, suspicion, and distrust. We have read sermon after sermon, delivered by men of confessed learning and ability, the ostensible purpose of which was to expound Christian Science in an unprejudiced spirit, yet which were so full of misconception as to subject them to the charge of being caricatures of, rather than fair and intelligent disquisitions upon, the subject. It is unfortunate that those occupying the place of public instructors should so sadly fail of their true mission in this respect.

Among those who have recently assumed to tell the public of Christian Science is a worthy woman by the name of Pundita Ramabai, a Christian Hindu who is now lecturing in this country. She declares that what is known in America as Christian Science is nothing more than Hindu philosophy under a Western name. A part of her lecture is reported in the *Record of Christian Work* for August. In this lecture she speaks of certain Christian Science Ladies' Clubs and what is taught there as Christian Science. As there is not known among Christian Scientists such a thing as a "Ladies' Club,"—such social organizations being utterly foreign to their system,—it is painfully apparent, at the outset, that this estimable Christian woman is assuming to speak of that concerning which she has no knowledge whatever. To those familiar with the situation, however, her error is easily forgiven, for she has manifestly gathered her information (such as she has) from a class of people variously styling themselves Christian Scientists, Divine Scientists, Truth-Seekers, etc., but who in reality are students of occultism, and doubtless have imbibed a measure of that Hindu philosophy of which she speaks, and to which she likens Christian Science.

For the purpose of showing her conception of the subject upon which she essays to discourse we make a few quotations. She says:—

"I can tell you I have sounded the depths of that philosophy, and what did I find? I will give you an idea in my own language. It means just this:—

"You are to take the whole universe as nothing but falsehood. You are to think that it does not exist. You do not exist. I do not exist. When you realize that, that is philosophy. Can you realize it? There was once upon a time a great being called Brahma, and that person was no person at all, but something like air, full of joy and knowledge. Can you think of air as being full of joy and knowledge? I cannot understand it, but philosophy tells you that you have to believe that this being, full of joy and knowledge, without any personality, existed once upon a time. That being had no mind. It did not want to say anything or have anything near it, and therefore, of course, it did not understand anything. Then there came another being just like himself, and that being was nothing but darkness. It was all falsehood. Now this air united with that darkness and assumed personality. It became male and female, and as that person has formed all things, the logical inference is that everything is falsehood. The birds and beasts that you see do not exist. You do not exist. When you realize that you have no personality whatever, you have no life, no knowledge, nothing, then you have attained the highest perfection of what is called *yoga*, and that gives you liberation, and you are liberated from your body, and you become like him, without any personality. You draw on the blackboard zero, plus zero, minus zero, multiplied by zero, divided by zero, and it equals zero. It is just that and nothing more."

It is indeed lamentable that this well-meaning person should thus expose her ignorance. There are at least a million persons—Christian Scientists and those who have investigated the subject sufficiently to have a fair understanding of its teachings—who positively know that her notion of Christian Science is the very reverse of what Christian Science really is. It would have been impossible for her to have more successfully said what it is *not*, if that had been her deliberate aim and purpose. Not only so, but there are at least a million more persons who have read enough of Christian Science literature—that only which is entitled to the name—to know that this Hindu Christian woman is sadly awry in every statement she makes; so much so, indeed, that she has made herself ridiculous. If she had taken only a hasty glance at the Christian Science text-book, "Science and Health with Key to the Scriptures," whose author is the only promulgator of all that can honestly be claimed to be Christian Science,—because she discovered and founded the system,—she would have at once grasped enough of its teaching to know that it bears not the slightest resemblance to the incoherent mass of nonsense which she publicly declares Christian Science to be.

We shall not quote more of her unfortunate diatribe. It were useless. Nor shall we attempt here to point out wherein she belies Christian Science. We call attention to her painful exhibition of ignorance only with the hope that she may be led to investigate *Christian Science*, and not accept the foolish rumors coming to her from prejudiced sources, or obtain her information from a class of people who, while assuming the name, in both profession and practice, invert and pervert every teaching of Christian Science.

An earnest Truth-seeker, such as Pundita Ramabai manifestly is, will not long be misled by falsehood or perversion. She has the opportunity to ascertain what Christian Science is, and it is due to herself, to the thousands of adherents of

Digitized by Google

and sympathizers with the movement, and to those whom she seeks to instruct, that she have, at least, a fair and unprejudiced understanding of the subject concerning which she assumes to speak. We are satisfied that it is the farthest from her intention to misrepresent or do injustice to our sacred Cause, injure the feelings of so many of her fellowmen, create a prejudice in the minds of those she addresses, or mislead them by false statements. What is true of this lady is true of all other honest, fair-minded people. The folly of attacking a system whose only purpose is to re-establish the Christianity of Jesus Christ and the apostles, in casting upon it unfair and unwarranted reproach by charging to it the foolish doctrines of those who are among its bitterest foes, is too palpable to admit of argument.

If it is unfortunate that Pundita Ramabai should thus misrepresent our movement, it is even more so that certain denominational publications should publish her remarks as true, and even add thereto comments of their own, equally untrue and misleading. There is absolutely no excuse for such superficial and untruthful methods in the face of abundant facilities for acquiring correct information. We trust the day is not far distant when the spirit of Christ will more largely prevail among his professed followers, and that at least reasonably honest methods will be observed among the Christian sects. Falsehood and malignity will no more avail in this age than they did in the age of early and genuine Christianity.

In view of the extent and variety of the literature purporting to be in line with Christian Science, which tends to mislead and blind so many, is it strange that the adherents of Christian Science should seek to maintain the purity of its literature by throwing around it every proper safeguard? It is their duty to do so, and that duty they will continue fearlessly to discharge, regardless of carping criticism or cries of bigotry and narrowness.

AN INTERESTING LETTER.

THE following letter written by a Christian Science student to a friend is interesting and helpful:—

Kansas City, Mo., August 11, 1898.

My Dear Mr. S.:—I have before me this morning a beautiful letter written from our mutual friend and brother, who has told me of his recent conversation with you. Day by day, as I try the harder to find out what our Master commanded men should do, I can feel an increased meekness and an honest desire to more thoroughly lose sight of my own false self, and more freely realize the parable related by the Saviour as recorded in the twelfth chapter of Luke.

Read from the thirteenth to the twenty-first verses inclusive, and see how pointedly Jesus brings out the lesson that whenever man undertakes to rely upon his own sense of greatness, he surely stumbles and falls. In contrast with the arrogance manifested by this rich man, note the humble spirit manifested by Solomon, in the tenth verse of the first chapter of 2 Chronicles, wherein Solomon says, "Give me now wisdom and knowledge, that I may go out and come in before this people: for who can judge this thy people, that is so great?"

Solomon realized that there were responsibilities resting upon him, and that in himself there was not strength nor power to do that which fell upon him for attention, but he realized the omnipotence, omniscience, omnipresence,—that is the all-power, the all-intelligence, and the all-presence of God, and that through divine direction only could he accomplish that which had been assigned him.

In the eleventh verse God rewards Solomon's meekness in desiring that thing only which he needed, namely, divine guidance.

I shall never forget my first meeting with you, nor shall I ever lose sight of the time after I came into this position that you and I lunched together at, I believe, the Noon-Day Club in St. Louis, at which time I gave you a little talk on the teachings of Christian Science. I thought then, and I have thought a great many times since, that the time would come when the beauties of these teachings would be made manifest to you and to your good wife, and I have loved to think what valued soldiers for Christ you would each of you make in the broader understanding of Christ's teachings, which are revealed through the writings of the Rev. Mary Baker Eddy.

My earliest recollection of church-going goes back to the time I was somewhere in the neighborhood of four years of age, when I attended a little country church up in the western part of New York State.

I was not over six years of age, when one day I fell into possession of, I think, a Methodist Catechism, and I found therein the Lord's Prayer. I can plainly remember the exact spot, with all its surroundings, where I sat down and my little soul drank in those words. For thirty-six years I was a more or less constant attendant of the Christian churches, the Methodist, the Congregationalist, the Baptist, and the Presbyterian, and for about three years of my life I sat under the teachings and guidance of the Rev. Thomas K. Beecher in Elmira, N. Y. From all these churches there went out unquestionably a higher ideal than I ever lived, yet the story of the crucifixion, the representation of the hell fires, the instructions with regard to the miraculous performances of Jesus Christ, all served to obscure to my understanding the beautiful thoughts and teachings which our Bible contains.

In May, 1895, my eyes were opened to a broader understanding, and from that time I have been able to realize in a measure what our Saviour meant when He so often said, "Eyes ye have and ye see not, ears ye have and ye hear not:" and again where he says in the forty-third verse of the eighth chapter of John, "Why do ye not understand my speech? even because ye cannot hear my word."

Take your Bible and read from the thirty-first to the fifty-ninth verse of this chapter. Read carefully with the spirit of that same beautiful prayer in your thought which Solomon uttered, the first eighteen verses of the fourteenth chapter of John. The whole chapter is beautiful, but I want you to get Jesus' thought as clearly made manifest in the first eighteen verses of this chapter, and then read the twenty-seventh verse several times, and, "Let not your heart be troubled, neither let it be afraid."

If you will read the first nine verses of the seventh chapter of Mark thoughtfully, I think you will be astounded at the thought which Jesus evidently intended should be brought out of the statements therein recorded. Note how emphatically he rebukes their material thought, and how forcefully he brings out the fact that there is no power in anything save in the spiritual; otherwise what does he mean in the ninth verse, "Full well ye reject the commandment of God, that ye may keep your own tradition."

That is where I stumbled and fell for many years. I was trying to follow the traditions of the Elders, and was living in the thought that I could never receive the full salvation from sin, sickness, and death which Jesus Christ came to teach and establish, until such time as I should pass from this experience into that which is beyond, but I realize now, as Jesus said, that "The Kingdom of Heaven is at hand;" and I do not have to wait for my harvest, but I can live and reap the harvest of harmony now.

Christian Science is no new thing. You and I have been going to church all our lives through the desire to become Christian men, that we might live Christian lives, and that we might have the benefit here, now, as well as hereafter, of such a manner of living. We have listened to preachers expound the Bible to us for the sole purpose of gaining from them a correct understanding of what the Bible teaches. If you go to the Christian Science Church, you will find that you must do your own work. You will gain a more complete understanding of Truth than is possible to obtain from any other church at this day. I do not say this with the slightest desire to criticise any Christian denomination. I believe,

Digitized by Google

from the bottom of my heart, that the revelation of these truths to Mrs. Eddy has been possible only through her patient years of Christian service in the Christian churches. This she, herself, plainly admits.

Pardon me, my dear boy, I don't know that I have any right to write you in this way, but when I received H.'s letter telling of the beautiful time that you and he had had together at lunch, I felt sorry that I was not there with you, that I, too, might have had the benefit that always comes from such meetings, because Jesus said, "Where two or three are gathered together in my name, there am I in the midst of them;" and I feel this morning that I want this meeting with you, in thought, that Christ may be with us, and that I may have His guidance in this day's work.

IRA C. HUBBELL.

CHRISTIAN SCIENCE TESTIMONY.

The weekly testimonial service at Christian Science Hall on North State Street was unusually interesting last evening, the testimonials being numerous and of spiritual import. Two letters which were read were of exceptional interest and value and are printed below:—

Beloved Mother and Teacher:—I want to thank you, dear mother, for what to me has been a very great demonstration of Truth during the time of the recent war, and finally over the war; while I know that loyal Scientists have been at work upon the thought, to me it was your demonstration.

It has given me a greater sense of the power of Truth and Love than I could before comprehend, and I feel I can catch a glimpse of what the disciples saw after some of Jesus' great demonstrations.

According to report, out of four hundred yellow fever cases every one recovered and were afterward placed at the front because they were better than before the illness. All cases which the physicians thought could not recover gained their normal condition right before them, much to the surprise of the physicians. The number of cases of so-called loss of life has been so small as to call forth wonderment from all.

The kindness extended to prisoners; the many instances of brotherly love; the tact, discretion and wisdom displayed by President McKinley, and finally the declaration of peace, all this compared with the former war shows a much greater manifestation of Love and its power, a higher understanding of it.

In Science and Health, page 235, in your interpretation of the commandment, "Thou shalt have no other gods before me," it reads "it ends wars," and the recent demonstration proves the truth of that statement.

Again allow me to thank you for the uplifting I have experienced and also the great good the world has received through the great demonstration. With much love,

Your sincere student,

Lida W. Fitzpatrick.

Dear Blessed Mother:—I know that there are claims to your time and attention infinitely greater than any I might make, but I feel such a sense of gratitude and love to you for the great Truth as revealed to us through your book, "Science and Health with Key to the Scriptures," that I may partly be excused for choosing this method of making it known to you, even though these lines may not reach your eye.

I wish to thank you for the beautiful and blessed morning lessons we are enjoying on Sundays under the new order of services.

And to me last Sunday's lesson was especially helpful. The subject was "Christ Jesus." Christ Truth was born anew to me in the city of David in the consciousness of fidelity to Truth and Love, and this re-appearing of the Christ Truth, revealed to me so clearly that man is the eternal image of God; the deathless expression of His being, sinless and unfallen. It came about in this way:—

I was treating a man who had just returned from Santiago de Cuba. He had all the horrors of war, typhoid fever, and starvation imaged forth on his body, and had returned to his family with little hope of recovering. The newspapers gave public expression of what mortal mind believed his condition to be, with the result of a belief in a relapse from the condition in which he arrived. And when I called to see him last Friday morning his case was the talk of the town. The current of mortal thought was so strong that every evil thought imaginable suggested itself, and the atmosphere seemed filled with suggestions of death. I sat by his side pleading the allness of God and the nothingness of evil. I then thought how the prophets of old heard the voice of Truth, how you had heard God's voice, and my heart went out longingly to the great heart of Love desiring that I, too, might hear the "still, small voice," when something said to me, "Who is it that says man is sick, that man can die?" I replied, "The physical senses." Then the reply came: "The material senses are liars! Man is the image of God's being, the expression of His glory!" And one by one the evidences of the senses were shown to be false and I saw man perfect and eternal as the Father. My patient was better and gained rapidly, and to-day is up and about. I find that you have given to us the whole of Truth in "Science and Health with Key to the Scriptures," and only as we study and comprehend it can we touch the hem of the Christly garment which your life so beautifully and fully demonstrates.

I am learning, too, that only those who follow in your footsteps can understand the great labor and travail through which you have passed in giving birth, in this age, to the impersonal Truth. As I approach, though in the distance, the divinity, sublimity, and grandeur of your life-work and life-purpose my heart goes out to you in loving gratitude. Kneeling before the white Christ, I pray that I may emulate your example and be found worthy to bear the "new name" which you have given us.

Your heart I know rejoices with us in the continued growth of our cause in Fitzgerald, Ga.

Next November it will be two years since we organized our church, and we hope then to dedicate our church building, which has the distinction of being the first building of our denomination erected in this state.

With love and gratitude, I beg to be your obedient student's student. *John H. Williams.*

From the *Concord Evening Monitor, Sept. 15, 1898.*

CHURCH RULES.

ARTICLE III.

TEACHING CHRISTIAN SCIENCE.

Section 1. This Church shall annually elect three members to constitute a body called "The Board of Education." The candidates for this Board shall be elected by the Christian Science Board of Directors, and approved by the Pastor Emeritus. The Directors shall immediately inform the candidates of their election.

Members of this Church who are not Normal Class graduates of the Massachusetts Metaphysical College, but have taken a regular course in Christian Science under the instruction of loyal students, can become public teachers after passing a thorough examination before the Board of Education, of not less than three days, in Science and Health, chapter on "Recapitulation," the platform of Christian Science; page 403 of "Christian Science Practice," from line second to the second paragraph of page 405, and page 488, second and third paragraphs.

This Board shall convene annually on the first Monday of January of each year. The session shall continue not less than three days nor more than seven days. The Board shall be paid for their services a reasonable sum by each candidate. One of the Board shall preside during the session; and all the members shall be present at, and assist in, the final examination.

Digitized by Google

Sect. 2. Christian Scientists who are teachers shall carefully select for students such only as have good past records, and promising proclivities toward Christian Science. The teacher shall hold himself morally obligated to promote the progress of his students, not only during the class term, but after it, and to watch well that they prove sound in sentiment, and practical in Christian Science.

Sect. 3. Teaching Christian Science shall not be a question of money, but of morals and religion, healing and uplifting the race. Teachers shall form Associations, and for the first three years convene as often as once in three months. Teachers shall not silently address the students' thought to handle it, nor allow their students thus to do, except the individual needing it asks for mental treatment. Teachers shall persistently and patiently strive to educate their students in conformity to the unerring wisdom and law of God, and shall enjoin them to habitually study the Scriptures, and "Science and Health with Key to the Scriptures."

Sect. 4. They shall teach their students how to defend themselves against mental malpractice, and never to return evil for evil, but to know the Truth that makes free, and so be a law, not unto others, but to themselves.

Sect. 5. If a member of this Church is found trying to practise, or to teach Christian Science contrary to the statement thereof in its text-book, "Science and Health with Key to the Scriptures," it shall be the duty of this Church to admonish that member according to the Church Rule in Article I., Sect. 5.

Sect. 6. A member of this Church, who is a loyal Christian Scientist, shall take the entire charge of his students in Christian Science. He shall neither permit them to enter another student's class or Association, nor shall he join another's Association, nor teach a loyal student's student Christian Science. He shall have but one field of labor in Christian Science, except it be in the capacity of a member of the Board of Lectureship. To faithfully fulfil the solemn responsibilities of a teacher of Christian Science, or a First Reader in our Churches, the student should remain with his own student's Association and Church. But if, for sufficient cause, he shall change his location, before leaving it, he must resign the charge of his students, Association, and Church, and his Church shall carefully elect a member thereof to fill the vacancy.

Sect. 7. A loyal member of this Church may teach and receive into his Association, the students of another member who has so strayed as justly to be deemed by the First Members not ready to lead his students as a Reader in Church, or a teacher of Christian Science. Although repentant and forgiven by the Church, and retaining his membership, this weak member shall not be counted loyal till after three years of exemplary character. Then the Church may decide whether his loyalty is proven by the uniform maintenance of the life of a consistent, consecrated Christian Scientist, sufficiently to teach others this doctrine.

Sect. 8. Those beloved brethren who are distant from the Mother Church, and whose teachers have passed on, can elect for their churches, Readers who are ready for this high calling, and continue the meetings of their Associations.

Sect. 9. A person not having had class instruction from a student of Christian Science, but who is a thorough student of "Science and Health with Key to the Scriptures," and all of its author's writings on Christian Science,—also has proved by his acts that he possesses good morals and ability to heal the sick, according to the Principle and rules therein stated,—can apply for examination to the Board of Education in Boston, Massachusetts. After careful examination, if he is found qualified to practise and teach Christian Science, he shall receive a certificate from the Board of Education.

Sect. 10. A teacher from the United States, who is a resident in a foreign country, shall not teach Christian Science to a citizen of the United States.

Sect. 11. Teachers at present shall not receive over thirty students in a class, and shall teach but two classes yearly.

Sect. 12. Students are examined, and given certificates, by this Board for no other purpose than practising and teaching Christian Science. All other applications will be dismissed. This Board will send out annually not over twenty-one teachers.

Sect. 13. Students who have not taken the Normal course at the Massachusetts Metaphysical College, nor passed examination by the Board of Education, are not properly prepared for teaching Christian Science.

Sect. 14. This Church shall elect annually a Committee on the Church Manual, whose duty it shall be, when requisite, to have the Manual revised, corrected, and properly compiled. Any addition to this book shall be grammatically examined, punctuated uniformly with the other pages, and properly arranged in the copy. The Board of Directors, Committee on Bible Lessons, and Board of Trustees of this Church shall each keep a copy of the ninth edition of the Church Manual; and if a discrepancy shall appear in any revised edition, the ninth edition shall be cited as authority.

Sect. 15. In Article III. the Church Rules shall neither be amended, nor repealed, except by unanimous vote of the First Members, or the consent of the Pastor Emeritus.

NEW PAMPHLET.

CHRISTIAN SCIENCE *versus* PANTHEISM, by Mary Baker G. Eddy. This little booklet contains the Pastor Emeritus' Message delivered at the Communion season in the Mother Church in Boston, June, 1898, and is a clear and strong refutation of the charge that Christian Scientists are Pantheists.

Leatherette covers, 21 pages. Price, 25 cents per copy, by mail, 26 cents; $2.50 per dozen, prepaid.

Address all orders to Joseph Armstrong, 95 Falmouth St., Boston, Mass.

NOTICES.

HEREAFTER the Wednesday experience meeting will be made throughout the Field a meeting of interest on subjects pertaining to Christian Science, as well as personal experience, and will be called the *Wednesday Evening Meeting*. A member of the Board of Lectureship will lecture at these meetings as often as once in three months. The Christian Science Board of Directors of the Mother Church will select the lecturer, subject to the Pastor Emeritus' approval, and direct him where and when to deliver his lecture, within the bounds of his section or precincts in the United States, Canada, or Great Britain.

MARY BAKER G. EDDY.

PLEASANT VIEW, CONCORD, N. H., Sept. 15, 1898.

The next meeting of the First Members for the purpose of admitting candidates to membership in the Mother Church, will be held on the first Tuesday in November, 1898.

Applications for membership to be presented at that meeting must be in the hands of the clerk on or before the twentieth day of October, 1898. They should be sent to 95 Falmouth St., Boston, Mass.

WILLIAM B. JOHNSON, *Clerk*.

The above notice was published in the *Journal* for September, 1898.

When sending for the *Christian Science Weekly* for an unexpired term of the *Journal*, please be careful to send the correct amount. These subscriptions should be reckoned up to and include the month named on the address of the *Journal*.

HEREAFTER the Communion service in the Mother Church will be held once in each year; on the first Sunday in June, beginning in June, 1899.

VOL. 1 BOSTON, MASS., U.S.A., OCTOBER 6, 1898. NO. 6

THE AMERICAN AND SPANISH PEACE COMMISSIONERS.

Interesting Data.

JAMES CREELMAN thus cables from Paris under date of September 28:—

Although the United States and Spain have not met officially since the beginning of the war, both the American and Spanish peace commissioners will sit down at breakfast to-morrow with M. Delcasse, the French minister of foreign affairs.

They were received separately by M. Delcasse this afternoon, but the commissioners will not meet officially until Saturday, when they will assemble in the magnificent Salle des Ambassadeurs at the Ministry of Foreign Affairs. Nothing will be done at this meeting except to arrange for the first serious session on Monday or Tuesday. Meanwhile the members of the two commissions maintain a stony silence. Each commission is trying to find out the attitude and instructions of the other commission.

There could be no greater contrast between the two nations than that presented by the methods of the peace commissioners. The Hotel Continental, where the American commissioners live, swarms with Spanish spies. They steal about the corridor trying to interview the servants and tempt the American correspondents, by vague promises of inside news, to reveal what they can find out about the plans of the United States.

I am now in the position to make a revelation. I can say positively that Sagasta telegraphed yesterday from Madrid instructions to the Spanish commissioners that they must refuse to consent to American ownership of the Philippines, although, should necessity arise, they might concede the temporary American possession of Luzon. In no case were the commissioners to surrender absolutely territory in the Philippines. The extreme limit of Spanish concession would be the occupation of Luzon by the United States for a term of years. This is Sagasta's official attitude for the moment, but it is a mere trick, intended to serve his ultimate purpose, which is no less than the sale of the Philippines to the United States for $400,000,000.

The real object toward which the Spanish government is working is to be rid of the enormous Cuban debt and to fill its bankrupt treasury by selling the Philippines to the United States. Spain would not hesitate at any act of bribery or treachery to accomplish this end. The Spanish agents are organizing a regular lobby in Paris. They have been studying the peculiarities of the American commissioners, and seem to be discouraged when they see the unsentimental countenance of Judge Day.

The American commissioners have not yet finally adopted a plan of settlement. The four Republican members will, without doubt, carry out the instructions of President McKinley to demand the unconditional cession of Luzon. Gray, the Democratic member, is absolutely opposed to the extension of the American government to any part of the Philippines.

ITEMS OF INTEREST.

A Constitution has been adopted by the Filipinos. Following is a part of the preamble:—

"The object of this government is, first of all, to secure for the Philippine people the extermination with a strong hand of all vices, wrongs, injustice, and cruelties, which have resulted from Spanish administration, sustained in luxury and expense upon our people, with extravagance and ostentation, and to substitute a government of the people of the Philippine Islands, which shall be simple, modest, just, equitable, and quick in the execution of public service, and for the good of the people."

In the annual digest of appropriations for the support of the government for the fiscal year ending June 30, and on account of deficiencies for prior years, issued at the treasury department to-day, the total of appropriations made at the last session of Congress is given at $673,050,293. The appropriations for the current fiscal year, which began on July 1, are $553,778,949, of which about $314,000,000 is on account of the ordinary expenses of the peace establishment, and about $240,000,000 on account of the Spanish war.

A despatch to the *Standard* (London) from Moscow says United States Minister Hitchcock to-day communicated to the government the decision of the Washington government to be represented at the disarmament congress.

The despatch further says that the Moscow papers publish remarks credited to the American consul-general to the effect that "to the gratitude of the Americans felt for Russian sympathy in 1864, is now added the admiration of the President and the American people for the Czar's peace circular."

According to data compiled by the Boston Chamber of Commerce, the probable yield of apples in the New England states will be about one-half an average crop, while the same applies to New York, with quality mostly inferior. Virginia, Maryland, Pennsylvania, and Kentucky, about one-third of a crop. Missouri, Kansas, Arkansas, Illinois, and Indiana, considerably less than last year. Michigan, California, Colorado, and Oregon, many more than last year.

A vote on the question whether the manufacture and importation and sale of liquor shall be prohibited was taken in Canada, recently, and the returns go to show that the Prohibitionists have carried the Dominion by a comparatively small majority. The returns, which so far are very incomplete, give a majority of about eight thousand in favor of prohibition, and if expectations are fulfilled this majority will be swelled to about fifteen thousand.

American railway statistics have been brought down to June 30, 1897, by the statistician's department of the Inter-State Commerce Commission. It appears that the total railway mileage of the United States on that date was 184,428.47 miles, there being an increase of 1,651.84 miles, or 0.90 per cent during the year. *The Railway Master Mechanic.*

President Wattle has received a telegram from Major-General Nelson A. Miles, in which the General accepted the invitation of the exposition management to deliver an address on Army Day at the Peace Jubilee, at the Omaha Exposition, and said that he would be present if possible.

Secretary James Wilson, of the Department of Agriculture, has also accepted an invitation to be present.

The Barber's International Union will meet at Memphis early in October. The union is affiliated with the American Federation of Labor, and its aims are to shorten hours, abolish five-cent shops, and work for a general betterment of the barbers' conditions of employment.

Omaha Labor Bulletin.

P. T. Dodge has presented to Cornell University the original Page type-setting machine, the only one of its kind ever built. It was constructed at a cost of nearly $2,000,000, consists of over nineteen thousand parts, and is in every detail perfect in its work. It is considered the most expensive piece of machinery in the world.

It is reported from Santiago de Cuba that the system of civil government established by General Wood is practically complete and in good working order. Major McCleary, formerly attorney-general for Texas, has been appointed mayor of the city, and the Spanish officials are giving place to Cubans.

Rev. J. Q. A. Henry, pastor of the Lasalle Avenue Baptist Church of Chicago, has begun a war on crime in that city. He will enlist in the crusade an army of ten thousand young people, and a systematic attempt will be inaugurated to suppress the increase of profligacy of the Chicago youth.

The Italians in Boston and vicinity celebrated Garibaldi's triumphal entry into Rome, September 21, 1898, being the twenty-eighth anniversary of the fall of Rome or the capitulation of the Papal army, and the triumphal march of Garibaldi and his victorious army into the city.

Forest fires are raging in the mountains of Colorado. The timber in Garfield, Delta, Mesa, Root, and Rio Blanco Counties, is being rapidly consumed. Ranchmen are suffering and wild game is being driven before the flames. Fires are also raging in parts of Wisconsin.

There is to be no governor-general for Cuba. The provisional government will be strictly military, and probably under the title of "The Department of Cuba." Generals Wade, Lee, and Lawton will probably represent the military government of the United States.

The late Fanny Davenport came from a family of actors. Perhaps there has been no family so closely allied to the theatre as the Davenports. The elder Davenport was a familiar figure before the public thirty years before his daughter's time.

Lieutenant Hobson is authorized to raise the warship Christobal Colon, sunk at Santiago de Cuba. He is also instructed to begin work on the Mercedes. Lieutenant Hobson is confident he can raise the Colon with the use of air bags in a week.

The commission to investigate the conduct of the war held its first session September 26. The proceedings of this meeting were limited to outlining a joint policy and formulating letters of inquiry, which are to be made public.

In the passing away of the Hon. Thomas F. Bayard, the world loses one of its conspicuous characters, and the United States one of its ablest and purest statesmen. Mr. Bayard was pre-eminently a politician of high ideals.

It is reported from Washington that there will be no further promotions of navy officers as a reward for gallantry during the recent war. Instead, there will be given medals of honor and increase of pay.

Chang Yin Houan, by an imperial decree, was dismissed from all his offices in the Chinese government, and banished to Ili, a district of Chinese Turkestan. Li Hung Chang has become his successor.

Admiral Dewey recommends that the Island of Luzon be retained by the United States, and that the other islands should be returned to Spain. His report is now in the hands of the President.

Colonel Roosevelt is the Republican nominee for Governor of New York. Doubtless he will ride rough shod over the track. His Democratic opponent is Judge Augustus Van Wyck.

General Gomez, it is reported, will not resign from the Cuban army. He is ready to co-operate with the American officials, and offers his soldiers for duty wherever needed.

United States Consul Hanna, in answer to a thousand letters of inquiry, advises all Americans to keep away from Porto Rico until the United States laws are in force.

Hon. Theo. R. Hinsdale, a prominent Christian Scientist of this city, has been sent to Montana to locate some government land lines.—*Washington News Letter.*

The battleship Illinois has been launched. It will be ready for active duty in about a year. Its construction will embody all modern naval ideas.

The bones of Christopher Columbus have been removed from their niche in the cathedral at Havana preparatory to their shipment to Spain.

The Peace Commissioners are now in Paris, and are reported to be ready for business. The Spanish commissioners are also there.

It is reported that Spain is taking steps to build a new navy. The people are raising funds to build or buy eighty-five ships.

Paris is in a great uproar over the Dreyfus case. The streets are reported as being filled with angry and excited people.

It is reported from Samoa that Mataafa, the exile, may succeed the late Malietoa as king of the Samoan Islands.

Edward Marshall, the newspaper reporter, wounded at Santiago has so far recovered that he rides out daily.

It is now reported from Havana that the American flag will wave over Morro castle within three weeks.

Harmony is reported as prevailing in Santiago de Cuba. Americans and Cubans are working together.

The cruiser Baltimore has been ordered to Tien Tsin, China, on account of the disturbances there.

General Agoncillo, on behalf of the Filipinos, has made his first official call upon President McKinley.

The Congo Free State prohibits railway transportation of liquors to be sold to natives.

Now that the war is over interest in the Klondike gold operations is revived.

The United States cotton crop for 1898 is over 5,600,000,000 pounds.

MISCELLANY.

We extract the following from the *Troy Record* of August 29, 1898:—

On Friday evening, August 26, a representative audience gathered at the Theatre Saratoga, Saratoga Springs, to listen to a lecture on the Work and Scope of Christian Science. The lecturer, Mr. Carol Norton, is a member of the Board of Lectureship of the Mother Church of Christian Science in Boston, Mass. He spoke extemporaneously, and for an hour held the close attention of his hearers. Among the most attentive listeners were some of the best-known physicians of the city. The speaker was introduced by Dr. George D. Cochran of New York City. Dr. Cochran was graduated from two of the leading American Medical Colleges, one an Allopathic, and the other a Homœopathic school. He also had several years' experience in the hospitals of Paris, France. Mr. Norton, accompanied by Dr. Cochran, came upon the platform at half past eight o'clock. It was an interesting sight of this progressive age to witness a Christian Scientist introduced by a regular physician who candidly accepts the claims of the system as the result of his own convincing experience.

DR. COCHRAN'S INTRODUCTION.

One of the salient features of the present century has been the growth of materialism. Indeed, the scientific men of the day have turned their attention so fixedly toward physical cause and effect that matter in their eyes has assumed most of the prerogatives of Deity. Against this gross subversion of the fact, Mary Baker Eddy raised a voice of protest over thirty years ago, and announced to the world her discovery, which she named Christian Science. At first, little attention was paid to her metaphysical system. Then opposition of the most violent character was aroused. But she persevered, and to-day Christian Science has received such unqualified support as to justify the assertion that it will ultimately be universally accepted. So much misapprehension exists concerning the teachings of Christian Science that it was deemed wise by the properly constituted authority of the Mother Church in Boston, Mass., to establish a Board of Lectureship in order that the scope and work of the system might be properly presented to the people desirous of investigating it. One of the members of this Board is with us to-night and you can listen to his exposition of the subject with confidence. It gives me great pleasure to present to you Mr. Carol Norton of New York City.

A Christian Science dispensary and reading rooms have been opened in the Morrison Block in the rooms recently vacated by Dr. Losey which have been thrown open to the public and where every one is welcome to call and peruse Christian Science literature and obtain such information as they desire regarding it.

Mrs. Alfa Hatch is in charge and may be found at the rooms from 9 A.M. to 12 M., and from 2 to 6 P.M.

The society has furnished the rooms very nicely and made them very inviting, and leading members say that the attendance is increasing right along. The financial matters of the institution are sustained by free-will offerings and everything the society owns here is paid for and it is out of debt. Regular meetings are held in Morrison Hall.

The Daily Beacon, Ashtabula, Ohio.

The *Universalist Leader* has an article on the "Disarmament of Churches"—a proclamation for the "maintenance of general peace and reduction of the excessive extravagances which weigh upon all Christian churches." "Hundreds of millions of dollars are devoted to acquiring magnificent temples. In proportion as the extravagance of the churches increases, they less and less fulfil the objects Christ has set before them. To put an end to these is the supreme duty to-day imposed upon all Christian churches." The *Leader* "proposes to all the churches whose representatives are accredited to the imperial court of Christ, the assembling of a conference which shall occupy itself with this grave problem."

Do not flatter yourself that you are intelligent because you have graduated at some college or made a financial success in the present methods of robbery called business. Men followed the same course in the dark centuries of the past, each generation assuming itself the most intelligent. They and their works are forgotten, but the works of those who sought the why and wherefore of existence, and especially of society, have come down to all the ages, gathering truth as they descended. Those who learn not these truths are not possessed of wisdom—are not wise—are not intelligent.

Appeal to Reason.

How Adam was punished.—The other day, in a Sunday-school class of boys between the ages of six and ten, a question was asked as to how God punished Adam for disobeying him. There was a silence for a moment or so, and then one bright boy said, "Please, sir, God took away one of his ribs, and gave him a wife."—*Saturday Evening Post.*

Instead of a parliament of religions in Paris in 1900, it is now proposed to have a parliament of religious science. The Roman Catholics, though joining in the parliament of religions in Chicago as guests of the Protestants, decline to have anything to do with the parliament proposed for 1900 in Paris.

And now comes a Scotch medical authority with the assertion that riding a bicycle will cure insanity. The use of a wheel to cure "wheels" seems to be a clear triumph for the homœopathic school. *Similia similibus curantur.*

The Central City Democrat.

Rev. Mary Baker Eddy is more patriotic than many of her students. She keeps the stars and stripes waving over her residence at Concord. The flag also waves over the Concord church. It is likely that she sees more in this emblem of liberty than do her students.

The late Rev. A. J. Gordon once said, "He who begins by halving his heart between God and Mammon will end by being whole-hearted for the world and faint-hearted for God. We must be out-and-out for God or we shall be in-and-in for the world."

The *Golden Rule* says: "Major Jones of Toledo has nailed a strip to the wall of his factory bearing these words: 'The rule governing this factory—Therefore whatsoever ye would that men should do to you, do ye even so to them,' and he says the rule works well."

James Freeman Clarke once said: "One of the best things in the gospel of Jesus is the stress it lays on small things. It ascribes more value to quality than to quantity. It teaches that God does not ask how much we do, but how we do it."

You cannot always judge by appearances. A clock appears to be terribly modest, with its hands always before its face; but you'll find that there's a deal of brass in its composition.

Religion is not something that is fastened upon the outside of life, but is the awakening of the truth inside of life.

Phillips Brooks.

It is stated in court circles that Queen Victoria has declared that she will never sign another declaration of war. "May she live a hundred years," says the *Morning Star.*

Some one says: "God cannot open the windows of heaven very wide to the man with a shut-up Bible."

Emerson says: "When half-gods go, the gods arrive."

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

EDITORIAL.

WHEN the Experience or Testimony Meetings were inaugurated by our Leader, the word was this:—

"Make broader your bounds for blessing the people; tell what Christian Science has done for you and will do for others; be meek; let your mottoes for these meetings be, Who shall be last, and servant; and, little children, love one another."

For nearly four years these meetings have been held, and the good they have accomplished can be measured by no human estimate. They have done much toward bringing the practical phases of Christian Science to the notice of the public, and especially of inquirers. Not only have the healing benefits, in the physical sense, been presented, but the larger and more important spiritual blessings have also been brought into view; yet we doubt if the latter have had the prominent place to which they are justly entitled.

The healing of sickness, as commonly understood, is by no means to be ignored. It has a rightfully conspicuous place at our public services, in our meetings and lectures, and in our literature. It is among the most convincing "signs" to the non-Scientists. They have thereby evidence that Christian Science is more than theory or speculation, that it truly produces practical results, and proves to them that there is a method of curing the ills of the flesh above and beyond those practised by the schools of medicine, or the various other systems of cure. It is not strange, therefore, that this phase of the work should have received a large share of attention at the hands of those who have given their testimonies at the meetings. But our observation has led us to conclude that the testimonies, as a rule, have been confined within narrower boundaries than our Leader's message contemplated. Our borders were not enlarged as they might have been.

There was evidently considerable misapprehension on the subject. We have been told that in some of the smaller fields, where there were only few to carry the meetings, the same experiences were related over and over again, until they became stale and outworn, because it was feared that to go beyond this would be disobedience. Then, too, we have often heard the criticism that since personal preaching had been dispensed with, it was "error" to go beyond the relation of mere personal experience; and we are aware that many have been held from speaking because of this criticism. This, we say, was narrowing the spirit of the original purpose of the meetings, rather than carrying it into full effect. If there ever was room for doubt upon this point, it has been removed by our Leader's recent card. Therein we are told that the Wednesday evening meeting "will be made, throughout the Field, a meeting of *interest on subjects pertaining to Christian Science*, as well as personal experiences, and will be called the *Wednesday Evening Meeting*. Also that there shall be occasional lectures at these meetings. There surely is now no ground for further criticism of the kind we have referred to. Nor can there be any doubt as to the scope of the meetings. Our Leader, with her accustomed foresight, has met the need, and re-emphasized her original instruction to "enlarge the borders."

We see no reason why the smaller societies—or the larger if they wish—should not read articles and testimonies from our publications and authorized literature, as a part of the exercises.

The first lecture in New England by a member of the Board of Lecturers was delivered in the Mother Church in Boston by the Rev. Irving C. Tomlinson, Wednesday evening, September 28. Although no previous notice was given, the auditorium of the church was filled to overflowing, even the standing room being exhausted.

The lecture was an able presentation of some of the phases of Christian Science, was attentively listened to and deeply appreciated by the large audience.

We feel sure that had our beloved Leader been present, she would have been "abundantly satisfied" with this first demonstration under the new order.

WHAT IS SAID OF THE WEEKLY.

1. From St. Joseph, Mo.

It is just what we need, and with myself fills a long-felt want. Since coming into Science I have read the newspapers very little, and my old friends tell me I am becoming very rusty as regards current news; so now I can keep posted, and read only what I should care to know in our little paper, having no thought that I shall have to shut my eyes to some very disagreeable, unpleasant thoughts.

2. From Syracuse, N. Y.

I give you hearty greeting in the publishing of the *Weekly*. I saw in it at once a stepping-stone to purer and better newspapers; also it will be a good avenue for the gospel of healing as has already manifested itself.

3. From Utica, N. Y.

Accept my thanks for the several copies received, enjoyed, and loaned to non-Scientists. I refer, of course, to the *Weekly*. Christian Scientists find this paper a time-saver, keeping them in touch with the interesting news of the day. The poem of our Mother published in the first number of the *Weekly* is more than beautiful. Truly, we should be happy and obedient children, very grateful for the wise and loving guidance and instruction, leading and teaching us how to walk in the true Light.

4. From Salt Lake City, Utah.

My heart is full of gratitude for the *Weekly*. It seems so good to welcome into our homes a pure, clean newspaper. Our dear Mother is faithful in leading us through the "Red Sea" and out of the wilderness.

5. From Eureka, Cal.

All hail to the new-born babe, born of Christian Science parents, in the city of Boston, on September 1, 1898. May it be the means of bringing an innumerable host to realize that they are the sons and daughters of God. Christian Science has a goodly following in this far-away city of the West, and the demonstrations are numerous and good. At Pythian Castle Hall there were forty present last Wednesday

Digitized by Google

evening; fifty at the Sunday morning service and forty at the evening service. Count me as a supporter of the *Weekly*.

6. From San Rafael, Cal.

We are all heartily thankful for the *Weekly*. It gives us something adapted for distribution when we do not wish to part with our Journals. The Mother's poem-prayer seems more tender and helpful than anything we have received, and fills with blessing these closing months when sometimes the year's retrospect is not all we had hoped.

7. From Harvard, Ill.

A glad shout rose in my heart when I received the first *Christian Science Weekly*. Surely, "The Lord is my shepherd; I shall not want." "Divine Love always has met and always will meet every human need" (Science and Health).

8. From Grizzly Bluff, Cal.

I have for some time expected or hoped that there would be either an enlargement of the *Journal*, or a paper, and what was my joy last night when the *Christian Science Weekly* was laid on my desk. I seized it and eagerly devoured its contents. I am sure it will prove a speedy messenger of Truth, and will bring many longing, hungry ones to the Christ-Truth.

9. From one of our Mother's loyal students of New York City.

I have tried to get a moment to write you how the dear little paper is becoming so welcome to us, and to say it is such a help! I want to thank you for myself and my students for the good it brings us every week. It will be an aid to all who cannot get time to glean from the papers the current events.

10. From another worker in New York City.

Permit me to thank you most sincerely for the copies of the *Weekly*. For some time I have been in a state of hopeful expectation that something in this direction would be manifested, when lo! the supply is at hand; anticipated—as is every demand for the good of our beloved cause—by our dear Leader and her faithful co-workers. God speed you in the work of demonstrating a more lively faith and larger liberty in the Truth, according to the teachings of Christian Science.

11. From Pottsville, Pa.

How thankful the Field should be for such publications as the *Journal* and the *Weekly*. By the way, this latter publication is a long-felt want well filled, and should have a circulation up in the hundred thousands, as it deserves.

BLINDNESS PRONOUNCED INCURABLE, CURED.

For the benefit of those who do not seem to receive physical benefit when first coming to Christian Science for treatment, I wish to relate my case of healing pronounced incurable by several of the finest oculists in the United States.

When a child I had astigmatism of the eyes. I was placed under the care of an oculist, one who stood at the head of the profession in the United States; but as time progressed I grew worse, and was brought home from college, at the age of fourteen years, almost a total wreck, as straining my eyes had brought on severe nervous attacks.

First I had to give up my music, then my painting, then the languages. After recuperating for a few months, I would return to college, but always with the same result, having to leave before the close of the term on account of my eyes.

This went on for years. I was directed to wear glasses, and was told if I saw a ray of light without them it might produce total blindness. I traveled far and wide, having several of the most noted oculists in the United States treat me; finally, at the close of 1895, while traveling on the Pacific coast, I went totally blind. This so affected my general health, which had never been good, that the M. D.'s on the coast gave up my case. Later I came East under the care of a professional nurse. I could at times distinguish between light and darkness, but was still blind as far as the use of my eyes was concerned. Getting worse, I tried electricity, then a magnetic healer, still receiving no benefit. I visited celebrated springs, whose waters were said to be a sure cure for any affection of the eyes, but all to no avail.

At this time a friend wrote to me to try Christian Science. I knew nothing of it, and had no faith in it, but I went to a Scientist as soon as I reached Kansas City. I felt, indeed, like a second Job. A few weeks previously I had fallen and broken my ankle. I was also suffering from a severe nervous sick headache, and was almost totally blind. I suffered terrible pain in my eyes, and would be kept under the influence of opiates for two or three days at a time, wholly unconscious. All this time the prayers of a loving family were being offered daily for me, and I often wondered they were not answered, as all my family were devoted church members.

During my first conversation with my healer I said, "I do not expect to be cured, as I have no faith in Christian Science." Her only reply was, "You have a little faith, or you would not have come for treatment."

I boarded with her and was under treatment for a month, and at the end of the month I could not see that I was any better. I was almost ready to give up in despair, still I kept on. I employed a Scientist to read to me every day. At the end of eleven weeks I returned home, reading and seeing everything. I have never had on a pair of glasses since I took my first treatment. I returned in a few weeks and took class instruction, and I will now say that I can read and study eight or ten hours a day, and far into the night, when necessary, and never have a pain or darkness come over my eyes. I realize more and more each day that God will cure every case, no matter what the physical claim may be, if we will not weary in well doing and will "let patience have her perfect work."

Mrs. Fanny C. Brady, St. Louis, Mo.

A VICTORY OVER THE LAST ENEMY.

BY CLARA B. MACMILLAN.

A short time ago I was called to treat a little baby that had been given up by the attending physician with the remark, "No power on earth can save that child," and when I reached the house, it was very evident that, from his standpoint, he had made a true statement. The little one was reduced to a mere skeleton, its nails and the ends of its fingers were black, and its eyes rolled back and set, and the so-called death film covered them, making them appear sightless; the breath seemed nearly gone, and there is no doubt that another hour would have marked the termination of the little mortal life, had Science not been called to its aid.

Another student of Science was present when I arrived, but could not remain, and in a short time I was left alone with the baby. I worked without a shadow of fear or doubt for about an hour, but could see no change. I then sent for "Science and Health with Key to the Scriptures," and read to the entire family, consisting of father, mother, and two little boys. On opening the book, the first sentence on which my eye rested was on page 336, "Jesus acknowledged no ties of the flesh." I read about twenty pages, and every one was aglow with the thought of Life, and power of Truth to destroy error, and the last sentence was on page 356, "He knew that matter had no life, and that real Life is God; therefore he could no more be separated from Life, than God could be extinguished." While there was then no apparent change, I felt certain that all was well, and so left them.

On returning two or three hours later, there was everything to prove that the child was saved, and such rejoicing! That night the little one slept a sweet, restful sleep until five o'clock in the morning, and the mother said that never in her life, had she (the mother) had such a rest. The baby

Digitized by Google

improved visibly every hour, and the next night went to sleep at half past six in the evening, and did not waken until half past three the next afternoon. Think of it! Twenty-one hours! If she had been under medical treatment, we would all have been frightened, fearing that perhaps she had been given something to put her to sleep, and she might never wake; but when God watches over His little ones, there is nothing to fear, and we could see that she was gaining all the time, and in forty-eight hours from the time that she was given up to die, no one would have supposed from appearances that she had ever manifested anything but perfect health. One thing that impressed me very much, was the eagerness with which the mother turned to Truth—a stranger in the city, and her baby apparently dying, she thought she was utterly alone. She determined not to yield to the M. D.'s decree, but to make one heroic effort to save her child, and though she had had no experience with Christian Science, she had heard of it, and felt that it might help her, so without losing a moment, she started out to find some one, and said that the instant she entered the Scientist's house, the darkness began to disappear, and I thought of the woman to whom Jesus said, "Daughter, thy faith hath made thee whole." And the father said, "We not only have our baby back, but we have something that has changed our whole lives."

"WONDERFUL WORDS."

BY M. W. MACY.

Sing them over again to me,
Wonderful words of life;
Let me more of their beauty see,
Wonderful words of life.

THE familiar words of the hymn here quoted were highly prized in the old thought; how much more fully and understandingly may they be appreciated when applied to Christian Science! "Wonderful words" indeed they are that can set us free from the various forms of bondage to which we have been all our lives subject. The words,—the truth,—of Christian Science do bring freedom to each one who catches but a glimpse of their meaning. To each individual they may come with a different sense of life and love, according to whatever has been the greatest and most dominant fear in that consciousness, but each person who has experienced a single one of the many blessings given to us by Science can say from the heart: "Praise God from whom all blessings flow," for the wonderful words of life and love that have been revealed to us by the enlightenment, the teachings, and the practice of the Discoverer and Founder of Christian Science.

Among the many "wonderful words" of that blessed Truth, I have been impressed with the new meaning given to that Scripture, "For in Him we live, and move, and have our being," which quotation seems to me to be an epitomized statement of this new-old religion now made practical for the redemption and salvation of the world. If we can fully grasp that great truth, we have the essence of, and are now living, that eternal life which Christ Jesus promised to every one who should believe in him. What more can we ask for if we rightly understand those words and their limitless meaning? "In Him we have our being;" therefore our being is, must be, perfect, spiritual, immortal, reflecting the one and only Creator,—divine Spirit,—in whose image and likeness we are made, and whose perfect reflection we present; therefore we are perfect, therefore we are spiritual, for we are the idea, the creation, and express image of Spirit. When we attain to this it will be impossible for the so-called ills of the flesh, the various discords and troubles of materiality, to be real, for we learn that they have no place in the divine Mind which knows only perfection.

And what a power these words are bearing throughout the world as they are read every Sabbath from hundreds of churches—the gospel of peace, harmony, and salvation to a world so long in strife and suffering. Surely the Kingdom of God *is* come on earth, and His will is being done. Each person who has been set free is a God-appointed missionary to preach the gospel and heal the sick, for, "inasmuch as ye do it unto one of the least of these, My disciples, ye do it unto Me."

HE RECEIVED HIS ANSWER.

BY D. D. S.

IN the *Weekly* of September 15, a short article appeared in regard to the healing of a little child from the effects of a fall, and the reading of the twentieth chapter of Acts in connection with it. This recalled to me an incident which might be of some interest, as it impressed me at the time. While in Interlaken, Switzerland, in 1890, the writer and a friend were conversing with the pastor of the American church at that place. The subject of Christian Science came up, and some quotations from Science and Health were made, stating that Life is God, not to be found in the body, and that a realization of this great fact would save from death. The friend was interested, but the clergyman was incensed, declaring the age of miracles past, etc. After a lengthy and heated remonstrance on his part he pointed to some workmen at work on a wall about fifty feet from the ground and said excitedly, "Do you suppose that if one of those men should fall from that wall he wouldn't be instantly killed? and no Christian Scientist nor anybody else could help it." The writer being rather confused at his attitude thought best not to try to answer him, but to leave it to God. The next day was Sunday, and as the clergyman proceeded with the service he was required to read as the Scripture appointed for the day, the twentieth chapter of Acts. As he read of the demonstration, under like circumstances, of the great Christian Scientist, St. Paul, his voice faltered and his evident confusion was proof that he was receiving the answer to his question. Three years after, at the close of that session of the Parliament of Religion at Chicago at which Christian Science had been represented, the same clergyman unexpectedly appeared in the throng. Almost his first words of greeting were in regard to Christian Science. His attitude had changed, and among other friendly remarks he said, "I have read the works of your Leader, Mrs. Eddy," adding in effect that in these days one must do that to be abreast of the times.

The writer felt, with thankfulness, that the finger of Love which had directed this man to his striking answer on that Sunday morning, was pointing him still further to the door of Christian Science which God hath opened, "and no man shutteth."

"AND A LITTLE CHILD SHALL LEAD THEM."

ONE morning as I was out in the woods with my little boy he said, "Mamma, look here!" And taking hold of a vine he began pulling it through his hands, and winding it round and round both hands and wrists. "Oh!" I said, "why do you spoil that pretty vine?" He laughed and said, "Don't you know what this is? It's poison ivy; and some people *believe* if you touch it, it will poison you. But when we know God is All, we know it has no power."

If I had accidentally touched poison ivy, I would "meet the cause mentally and courageously" (Science and Health), but I would not have dared to handle it as fearlessly as the child had done, which shows how hard it is to rid ourselves of old superstitions.

We can smile now at the foolish credulity of past ages which believed a horseshoe over the door would keep out evil spirits, witches, etc., and that it was unlucky if thirteen sat at table, and that it was good luck to see the new moon over the right shoulder. The next century will wonderingly smile at many superstitions that to-day are accepted as facts.

Ellen L. Ash, Chicago, Ill.

CUT IT SHORT.

If you've got a thought that's happy
Boil it down;
Make it short and crisp and snappy—
Boil it down.
When your brain its coin has minted,
Down the page your pen has sprinted,
If you want your effort printed,
Boil it down.

Take out every surplus letter—
Boil it down;
Fewer syllables the better—
Boil it down.
Make your meaning plain—express it
So we'll know, not merely guess it—
Then, my friend, ere you address it
Boil it down.

Boil out all the extra trimmings—
Boil it down;
Skim it well, then skim the trimmings,
Boil it down.
When you're sure 'twould be a sin to
Cut another sentence in two,
Send it on—and we'll begin to
Boil it down.

L. A. W. Bulletin.

TESTIMONIES.

In July, 1897, I had a cough and sore throat which developed into pulmonary disease called quick consumption. I coughed violently and was very weak, and at times had a high fever, but being anxious to finish my school work before returning home, I stayed until the summer term closed.

One of my friends insisted upon calling a physician, but knowing what Christian Science had done for my mother who had consumption, and what it had previously done for me, I said, "No, God (Good) has all power, medicine has no power apart from belief."

On August 11, I started for home, a mere skeleton of my former self. I reached Clay Centre the next morning and called on a healer for treatment. September 1 my cough left me, being just three weeks after I began treatment.

September 6, I returned to Emporia again to take up my school work. I am gaining in flesh and am well. On my return, one of the members of the faculty wanted to know where my cough had gone, and said he had not expected to see me here again, but had expected to hear of my death in a short time, from consumption. Others say, "Is it not wonderful there could be such a change?" None of my friends here expected to see me again, except the Christian Science friends; their understanding of Truth brings out the clear realization that God is our Life, and in Life there is no death.—*Jennie Knowles, Emporia, Kan.*

(In reply to our letter of inquiry we received the following.—*Ed.*)

LASITA, KAN., September 19, 1898.

Dear Editors:—Regarding my case, I have had no return of the belief which I had. I am as well as I ever was, so well that I am now walking nearly two miles night and morning and teaching school.

I am still as loyal as I was a year ago and am gaining more of the Truth. Sincerely in Truth,

Jennie Knowles.

About noon one day our son of fifteen had a hole torn, wide and deep in the muscle of the upper part of his leg. He went to school in the afternoon, performing his accustomed tasks as usual, except his teacher excused him from marching as he could not keep from walking stiff and lame. The thought that it might leave his leg stiff for life had to be fought; but it was destroyed, and proof has once more been given us that Love heals perfectly, leaving no bad effects.

Then my husband was taken with chills and fever, which was overcome in a few hours. The next night another old fear was manifested upon the body, hemorrhage of the bowels; that too was quickly checked and he went to his work the next day. Still error would not let go but pulled him down with rheumatism in both legs, very painful and stubborn; but once more Good overcame evil and the patient is now rejoicing in renewed strength, the limbs being straightened out and pain all gone.

Anna M. Brown, Fort Dodge, Iowa.

Dear Weekly:—I am a little girl, twelve years old. I have had some beautiful demonstrations proving the power of Truth.

One evening I was riding to our Christian Science meeting with three ladies. We were just going down a hill when we met three men on bicycles. One man fell right in front of the horse, which of course scared her. She gave a jump, tipping the women out, but leaving me in.

The buggy went dashing along, and I expected any moment to be thrown out, so jumped, but in doing so I fell on my arm and broke it. I walked on down to the meeting, and there mamma and I saw a healer, who gave me treatment at once. He put splints on my arm to quiet the fears of those living with me, but, thanks to Christian Science, I only wore them three days, as my arm was all mended. Of course for a short time I did not use it much, but it was perfectly well in a *very* few weeks, while in the old thought I would have had to wear the splints about six weeks.

So, if we "seek the Truth it will make us free," as it did me.—*Amy Langworthy, Riverside, California.*

Dear Weekly:—We feel that we must acknowledge the help and encouragement we have received from Mr. Kimball's visit, and the lecture he delivered here last week. At the Wednesday night service following the lecture, there were two inquirers present. At last Sunday's service there were several more.

Our society numbers eight loyal workers. There are two others who work with us and will soon join our society.

We have great hopes from the knowledge of the Truth the people have gained from the lecture, and the personal work of the Scientists who went about asking their friends and neighbors to go to the lecture.

We must also express our fervent gratitude to the "Mother of Christian Science" for the gospel of healing which she has brought to this age. We are realizing its rich blessings more and more each day, and we hope ere long to grow "into the perfect stature of manhood in Christ Jesus."

Emma G. White, Leadville, Col.

NOTICES.

The next meeting of the First Members for the purpose of admitting candidates to membership in the Mother Church, will be held on the first Tuesday in November, 1898.

Applications for membership to be presented at that meeting must be in the hands of the clerk on or before the twentieth day of October, 1898. They should be sent to 95 Falmouth St., Boston, Mass.

WILLIAM B. JOHNSON, *Clerk.*

The above notice was published in the *Journal* for September, 1898.

ALL correspondence with the clerk of the Mother Church on matters pertaining to his office, should be addressed to William B. Johnson, C. S. B., 95 Falmouth St., Boston, Mass.

PER CAPITA TAXES and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Twelve or more to one address, each, Prepaid	3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid	6 00
Twelve or more to one address, each, Prepaid	5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid	$2 25
Twelve or more books to one address, each, Prepaid	2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

VOL. 1 BOSTON, MASS., U.S.A., OCTOBER 13, 1898. NO. 7

INDIANS AT THE OMAHA EXPOSITION.

An Interesting Feature.

ONE of the most interesting features of the Trans-Mississippi Exposition is said to be the encampments of the Indians. The Indians are there in their native costumes with all their native surroundings. It is said that the visitor sees them, to all intents and purposes, as if he visited their lodges or reservations.

A writer in the *Nebraska City Conservative*, whose article is republished in the *Review of Reviews* for October, thus speaks of some of the Indian chiefs:

Stately chiefs stroll up and down, great, imposing-looking men. Most striking countenances are seen among them, faces like bronze masks. They have blankets, feathers, beads, shells, and claws. Each costume is a picture and a study. The men are more picturesque than the women, most of them have large ear-rings. Some of them wear silver medals as big as stove-lids, many of the elders carry turkey-feather fans, and the most incomprehensible hats are found surmounting figures of old Roman senators. But the women are worth looking at. They wear most wonderful moccasins, and are sometimes covered with bracelets, brass rings, and other valuables.

The article concludes thus:—

This gathering of Indians at Omaha has a unique significance. As Octave Thanet remarks in the October *Cosmopolitan*, there is something dramatic in this idea of a great meeting of a vanishing race. Dr. Albert Shaw, writing in the *Century*, pronounces the so-called "congress" by far the most picturesque and distinctive feature of the exposition, though in his opinion the word "encampment" would have better described the fact than the word "congress."

We quote a few sentences from the *Century* article which set forth the serious purpose and bearings of this department of the exposition:—

"The managers of the exposition had perceived the desirability of bringing representative groups of Indians from all the principal tribes, and placing them on the exposition grounds in such wigwams or other habitations as were strictly characteristic of the particular tribe. In or near those habitations the Indians were to be occupied with the industries originally practised by them, whether weaving, carving, basket-making, arrow-shaping, or otherwise. This gathering of Indians was not to partake in any sense of the character of the Midway diversions or the Wild West shows. It was, on the contrary, to be carried out under the auspices of the government's Indian Bureau, with the aid of the ethnologists of the Smithsonian Institution. The greatest care was to be taken that every tribe should be costumed, not after the later manner in government blankets, blue calico, and the supplies furnished by the Indian Bureau, but in the fashion of the tribe in its previous state of independence. Characteristic dances and ceremonials of various sorts were to be given.

"Thus it happens that the Indian congress was to afford the last opportunity, presumably, to see the red man in his primitive glory and in his various tribal divisions, under correct conditions of dwelling, costume, industry, and ceremonial. It is entirely safe to predict that in the later weeks of the exposition period, particularly through the month of October, the assemblage of Indians will have attracted not only national, but world-wide attention as the most unusual feature of an exposition interesting for many other reasons."

ITEMS OF INTEREST.

The Peace Commissioners are reported as being hard at work in Paris. The American commissioners on October 4, had a conference with Major-General Merritt. The General detailed to the commissioners his personal views and those of Rear Admiral Dewey regarding the physical, geographical, moral, and political conditions prevailing in the Philippine Islands. President Faure, surrounded by a few members of his official household, received Ambassador Porter, who presented Judge Day and the other members of the United States Commission, in turn; after which Judge Day presented President Faure with a cable message from President McKinley. It was dated September 30, and read as follows:—

"On this occasion, when the Commissions of the United States and Spain are about to assemble at the capital of France to negotiate peace, and when the representatives of this government are receiving the hospitality and good will of the Republic, I beg to tender you my most friendly personal greeting, and the assurances of my grateful appreciation of your kind courtesies to the American commissioners."

The eighty-ninth annual session of the American Board of Foreign Missions was recently held at Grand Rapids, Michigan. The annual report of the home department was presented by its secretary, Rev. Charles H. Daniels, of Boston. It starts out with the following statement:—

"There has been one insistent problem concerning your committee all the year. From whatever point the business came it was always the same perplexing, resistless fact, namely: how to carry on the work which churches have entrusted to our hands when the means are totally inadequate." The report further says, "thirty-three hundred and thirty-three churches have shared in the support of the work during the fiscal year, and twenty-two hundred and eighty-one have not contributed. Of the over six thousand Sunday Schools connected with our denomination, but eight hundred and twenty-nine have made such contributions."

It is stated on good authority that a deal has been concluded by Delaware Indians for the purchase of five hundred and fifty thousand acres of land in Mexico, and that as soon as they secure settlement with the United States and the Cherokees they will remove there.

It is thought that many of the full-blood Cherokees will accompany them. The tract purchased is on the Yagin river, state of Sonora, and is said to be fine land. Representatives of Mexican land holders were recently among the Cherokees.

Copyrighted, 1898, by Mary Baker G. Eddy.

We are again compelled to say that "wars and rumors of wars" have not yet ended. This time it was an Indian skirmish. This skirmish occurred at Leech Lake, Bear Island, Minn., between General Bacon of the Third U. S. Infantry and a band of Pillager Indians. The fighting continued some hours and several of the U. S. soldiers were killed. Among those killed was Major Melville Wilkinson, and among the Indians reported to have been killed was chief Bug-ah-mah-go-shig. The Indians finally surrendered and peace is believed to be restored.

General Lee, in his testimony before the Dodge investigation committee, found no fault with the War Department. General Greene, Colonel Lee, and Major Hersey, gave testimony before this committee, and while each admitted the possibility of individual cases of suffering, all said that in the vast majority of cases complaints were exaggerated. They agreed in saying that no army was ever so abundantly and luxuriously supplied as was the American army in the Spanish war.

At a meeting recently of the trustees of the University of Pennsylvania it was announced that the late Colonel Joseph M. Bennett, merchant and philanthropist, had bequeathed to the institution a number of valuable properties, valued at over $400,000, to be devoted to the higher education of women. The properties include the Chestnut Street Opera House. Several years ago Colonel Bennett gave to the university properties at Thirty-fourth and Walnut Streets.

Omaha, Neb., Oct. 3.—Nearly eighteen hundred thousand people have passed the gates of the Exposition. Last week the attendance was 128,854. The official figures for yesterday are 21,255. Live stock entries number twenty-five hundred and fifty animals, nearly all of which are here, ready for the opening. Two hundred and fifty carloads of stock arrived Saturday, and as much more is billed to come.

Turkey is to be called upon to indemnify American missionaries for the damages sustained to their persons and property as the result of riots during the past three years. The Turkish government recently announced that it would pay none of the claims filed against it by foreign governments, for injuries sustained by their citizens during the riots which occurred in Armenia.

It is reported from Cleveland, Ohio, that one of the most gigantic projects for the combination of capital in the history of the country, is being engineered in that city. It is nothing less than to unite the warship-building business, and the armor-plate and gun-making interests of the world into one great syndicate, whose factories shall be near Cleveland.

It is reported from Berlin that there has been a great change in German public opinion on the subject of the retention of the Philippine Islands by the United States. The feeling towards America is much more favorable than it was a couple of months ago. The German press now comment upon the retention of the islands very dispassionately.

The Spaniards in Cuba have sent an agent to Washington for the purpose of asking the annexation of that island. He laid before the President a petition signed by more than one hundred of the Spaniards of Cuba, the majority of them planters owning large tracts of sugar lands, praying that Cuba be annexed to the United States.

The plan of re-organization of the present combined volunteer and regular army has been perfected by the War Department. It calls for the reduction of the number of army corps from eight to four, and involves a radical re-arrangement of the several regiments and brigades existing.

The first witness to appear before the "General Dodge Commission," was Major-General Wheeler. He spoke in favor of the War Department's work. He said there was some suffering at Santiago, but great care was taken for the protection of the men.

The Matanzas reconcentrados have had their hunger satisfied with American provisions from the Comal. The thanks of the people found vent in outbursts of "Viva Americanos" whenever Major Wiskern or Captain Niles appeared on the streets.

The Spaniards have been given until December 1 to complete the evacuation of the island of Cuba. The American commissioners on that date are to assume all governmental affairs. October 18 is the time limit in Porto Rico.

Word from Paris, France, seems to indicate the probability of an economic revolution there. The leaders of the movement are aiming at a general economic revolution which will change the position of the workers of France.

Admiral Cervera has accepted the nomination for the Spanish Senate. He has issued a letter saying that he has learned much. He speaks of Americans with generous candor and declares that Spain has lived too much in the past.

The Ancient and Honorables of Boston were welcomed to the Canadian Dominion on October 4. Lord Aberdeen addressed the corps at Quebec. They were welcomed and received in the name of Queen Victoria.

It is now reported that Colonel William Jennings Bryan may go to Cuba with his regiment. Also that the 6th Mass., 16th Penn., 3rd Ill., 1st Ky., 4th Ohio, and 3rd Wis., may be ordered home from Porto Rico.

Millions of brilliant and beautiful butterflies have been swarming over Wichita, Kan., the last few days. Kansas has been seeing more butterflies and rainbows than usual for the last year.

The collective note of Great Britain, France, Italy, and Russia demanding the withdrawal of Turkish troops in the Island of Crete, has been presented to the Turkish government.

Major-General Merritt has given his testimony before the Paris Peace Commission. It is reported that he declared himself to be in favor of keeping the Philippines.

The battleship Illinois, the largest, most powerful, and said to be the most effective battleship in the United States navy, was launched at 12.30 P.M. on October 4.

The Spanish troops are being removed from Porto Rico. The transport Isla de Panay has sailed for Spain with thirteen hundred troops on board.

A diamond valued at $4,000,000 has been presented to Pope Leo XIII. by President Krueger of the South Africa Republic.

General Wood has succeeded General Lawton in Santiago District. He is likely to be promoted to the rank of Major-General.

Ten thousand Knights Templar assembled in conclave at Pittsburgh, Pa., October 9.

The Hon. Thomas F. Bayard left an estate valued at only $75,000.

Minister Conger reports no serious danger at Pekin, China.

MISCELLANY.

The following is an editorial in a recent number of the *Denver Republican*, one of the leading dailies of the great West. We congratulate the cause of Christian Science on the stand taken by this staunch advocate of right.

CHRISTIAN SCIENCE.

In 1862 a New England woman, obscure and almost friendless, while suffering from an injury caused by an accident —an injury pronounced fatal by surgeons—was restored to complete health.

She attributed her healing to God, and has devoted the succeeding years of her life to the study of the Scriptures, in the hope of discovering the Principle of healing through divine Power. This woman, Mary Baker G. Eddy, is now known as the Mother of Christian Science, which its adherents assert is the religion of Jesus, pure and undefiled, and in support of their claims point to their works. They claim to have healed a million cases of chronic and acute disease, many of which they say were given up by the doctors. This faith has had a very rapid growth, and there are now nearly four hundred churches dedicated to its promulgation, and in nearly every case it is the boast that their buildings are free from debt.

The first pamphlet on Christian Science was published by Mrs. Eddy in 1876. Since then the thought has made either converts or opponents of large numbers of thinking people.

To meet a demand for more information about Christian Science, what it is and what it does, the *Republican*, always responsive to the wishes of the people, will this week begin the publication of a Christian Science department in the Saturday issue. Although the press of the country has given prominence to news of this remarkable movement of late, the *Republican* is the first great daily newspaper to give it the recognition it merits by the numerical strength of its following.

Oakland, Cal., Sept. 26.—The remains of Celophas Gregoire, who committed suicide on Friday night, will be shipped to-day to Quebec for interment. The abnormal conditions disclosed by the post-mortem examination of Gregoire are almost without parallel in medical history. There was a complete reversal of the normal conditions of the heart, lungs, and liver, and the stomach had been crowded out of its natural place. One of the chief arteries did not exist in this strangely constituted man, yet the evidence of his perfect health was manifest in his sound body. The marvelous displacement had not even affected the organs themselves, all being of normal development and healthy.

The above appearing in the Associated Press despatches, would seem to corroborate the statement of Science and Health that "life is not dependent on physical organization."

Ed.

"The Allopaths and Homœopaths follow Cullen. The physio-medicalists follow Rush. Cullen called fever a disease, and those who accept that doctrine believe in antiphlogistic treatment of fevers. The old treatment was to bleed and purge patients and starve them, until the vital heat fell to the normal standard, or below it. Now the doctors who adhere to Cullen's Nosology (and it is still a standard text-book in the Allopathic colleges), reduce the vital forces and subdue fever with aconite, antifebrin, and other depressing poisons."

The above bit of history is true, and yet there are many thousands of honest people who think that all such changes and vagaries belong to God's great plan.—*Ed.*

In his official letter of condolence to the Emperor of Austria, whose wife had been murdered by a lunatic, President McKinley correctly phrased American sentiment. He conveyed the sympathy of his countrymen to the head of a friendly nation overwhelmed with personal grief, without implying that his grief was essentially more important than that of the humblest man or woman in the empire. President McKinley thus exhibited an unusual sensitiveness to the spirit of democracy, which does, after all, animate American sentiment, in spite of the external snobbery that has of late years become so common.—*The Public*, Chicago, Sept. 17, 1898.

A Japanese writer in the Far East of Tokio says in an article on the possible closer relations in the future between Japan and the United States: "If platonic friendship is possible to nations, it must certainly exist between America and Japan. We have regarded and still regard the American nation in the light of leader and benefactor, and we believe it is not too much to say that the American people have reasons to be proud of the progress achieved by our countrymen. From a sentimental point of view, therefore, we may look with satisfaction upon the United States becoming a nearer neighbor to us."

Rev. Dr. Lorimer while preaching in London said that he "noticed in his work in Tremont Temple, that when the spiritual condition of the members of his church is good, when there is energy displayed in the highest interest of others, when they are anxious for conversions, there is very little sickness of body. But when spiritual life is at a low ebb he can hardly find time to visit all the cases of sickness which come before him."

The New York W. C. T. U. is not far off when it characterizes the raising of money for charitable purposes by progressive euchre as gambling. It took a long time to convince church-going folk that the grab-bag and kindred devices were at best only sugar-coated gambling. In process of time progressive euchre may follow the grab-bag out of the church back door never to return.

There seems to be a large and wholesome moral to be drawn from the capture of Manila. It is asserted that the Spanish general practically suggested the manner in which the American troops should advance to prevent loss of life on both sides.

This was an inspiration. Why not adopt it as a ruling principle in future warfare?—*Life.*

The *Christian Life* says that "the ancient Hebrews believed that health, wealth, long life, and happiness were the result of obedience to the laws of God. The experience of many centuries has shown no surer way than this to the attainment of these blessings."—*Evening Transcript.*

Those who are in authority in missionary work declare, and they ought to know, that "the doors of the pagan nations are wide open. No such opportunity for world-wide Christian conquest ever came to the church since the great commission fell from the hallowed lips of Jesus."

Like all Irishmen, the Lord Chief Justice of England is gifted with a very ready wit and spirit of repartee. Being asked by a friend what was the maximum penalty for a man convicted of bigamy, he replied, "two mothers-in-law."

A converted teamster said he knew there was power in the Gospel, for it had kept him, and he was a mule driver. "If," said he, "a man can live a Christian life and drive mules, he can live it anywhere."

Rev. Myron W. Reed says: "There has been but one man who could tell a true fish story. He was the disciple Peter, and Peter said, 'We toiled all night and caught nothing.'"

An hour's industry will do more to produce cheerfulness, suppress evil humors, and retrieve your affairs, than a month's moaning.

The seeds of knowledge may be planted in solitude, but must be cultivated in public.—*Dr. Johnson.*

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address. one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

TO WHOM IT MAY CONCERN.

WEEKS have passed since I forwarded to the Clerk of the Mother Church, integrals of this article. Changing currents moving the weather vane, Church meetings, amendment of Rules, items nameless, have delayed the publication of the following notice written last August:—

All true Christian Scientists, loyal in spirit and in Truth, whether they have become thus by studying my works on Christian Science or by class instruction, who bring with them the credentials required of a candidate for membership with the Mother Church, are eligible to apply to the Christian Science Board of Education for examination. After passing the process of examination specified in the Church Manual —and the Board has adjudged these candidates as qualified for the high responsibilities of teaching Christian Science— they shall receive a certificate thereof from the Board of Education.

Students of the Massachusetts Metaphysical College with certificates of the degree of C.S.B. and C.S.D. are not required to be examined, and do not apply to this Board.

Students of "Science and Health with Key to the Scriptures," and all of its author's writings, having good morals, and having demonstrated healing the sick according to the divine Principle and rules therein, can apply to the Board of Education for examination, and if found qualified to teach Christian Science, they shall receive a certificate accordingly from the Board.

The lecturers will be called for and sent out as specified in the By-law published in the Church Manual, edition 8, page 30, Article 12, section 1.

MARY BAKER EDDY.

PLEASANT VIEW, CONCORD, N. H., Oct. 7, 1898.

THE NEW PAMPHLET.

THE latest pamphlet of the Rev. Mary Baker Eddy, "Christian Science *versus* Pantheism," is among the most valuable of her recent contributions to our literature. It is her message to the Mother Church on the occasion of the June Communion, 1898. Mechanically this pamphlet is most tasteful and pleasing to the eye; printed on an excellent quality of paper in clear type, and enclosed in a substantial and chaste cover, it reflects much credit upon its publisher, the Rumford Press, of Concord, N. H.

This pamphlet fills an important niche in our literature, refuting as it does in clear, strong, and unmistakable terms the charges so frequently made, that Christian Science is Pantheism. This word "Pan-Theism" is often loosely used and superficially understood. Its place in theological terminology seems to be about as uncertain as it is in general literature. Whenever the words, "God is all" are used, many at once say, "That is Pantheism." Mrs. Eddy's great text-book, "Science and Health with Key to the Scriptures," clearly shows the error of this conclusion. A leading premise of Christian Science is that God is Spirit, and that Spirit is universal, that is to say, omnipotent, omnipresent, and omniscient. This conception of God is the direct opposite of the pantheistic conception, which declares for a matter-universe based upon wholly material premises, instead of a universe where Spirit is the real and the All, and matter but a delusion of the personal or material senses.

Our Leader's pamphlet clears up this question, re-emphasizing in this respect the statements of her text-book. It seems to us more difficult for the fair and logical mind to read her definition of God without becoming convinced that it is the only true Scriptural definition, than to reject it on the ground that it is pantheistic. It is as far removed from the Pagan conception of Pantheism as pole from pole. The pamphlet will be read with interest by all earnest investigators and will, doubtless, have the wide distribution to which it is entitled.

When those who so earnestly, and often bitterly, assail the teaching of Christian Science on the ground that it is pantheistic, shall be able to answer the following queries on page ten of this pamphlet, they will be in position to judge fairly as between Christian Science and Pantheism, and not before:—

"If God is *infinite* Good, what and where is evil? And if Spirit made all that was made, how can matter be an intelligent creator, or co-worker with God? Again: Did one Mind, or two minds, enter into the Scriptural allegory, in the colloquy between Good and evil, God and a serpent?— and if two minds, what becomes of theism in Christianity? For if God, Good, is Mind, and evil also is mind, the Christian religion has at least two Gods. If Spirit is sovereign, how can matter be force or law; and if God, Good, is omnipotent, what power hath evil?"

Also these queries on page twelve: "Does not the belief that Jesus, the man of Galilee, is God, imply two Gods, one the divine, infinite Person, the other a human finite personality? Does not the belief that Mary was the mother of God deny the self-existence of God?"

These questions are answered in Christian Science upon the only ground upon which the doctrine of Monotheism can stand. The admission of any power whatever apart from Spirit—the One, the only and the universal God—is destructive of the doctrine of Monotheism. For if there is more than one Power there must be more than one God.

The concluding prayer for country and Church must take its place among the gems of English religious literature. The pamphlet as a whole will favorably address itself to every unbiased, intelligent, thinking person into whose hands it may go.

WHAT IS SAID OF THE WEEKLY.

1. From Topeka, Kan.

The fourth number of the *Weekly* is before us, and we feel like saying, as we so often hear it said of our *Journal*, that it "grows better and better." To say that we value this addition to Christian Science literature, but feebly expresses our appreciation of this last demonstration of the fact that Love supplies all our needs, many times even before we feel the need. The first number of the *Weekly* was certainly a welcome surprise to the Field.

This new blessing reminds us that we now have another

Digitized by Google

duty to perform. The *Weekly* must have our hearty and unselfish support, not only in the matter of dollars and cents, but in other ways equally important.

2. From one of Mrs. Eddy's faithful students in Boston.

Dear Weekly:—Plainly we can see by the forthcoming of our weekly visitor, the rapid growth of Christian Science in our land. Again we can say, in the language of our text-book, "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, "Divine Love always has met, and always will meet every human need." This little visitor comes to us freighted with Love. It tells of God's goodness unto all mankind. We each should receive it with open arms, for it is one of God's ways to bless and save.

3. From one of Mrs. Eddy's faithful students in Washington, D. C.

Washington sends her thanks for the *Christian Science Weekly*. It is dignified, chaste in appearance as well as thought, and always full of good, Scientific, and helpful ideas. The editorial in the issue of September 29 is most valuable, and just what the hour needs.

4. From one of Mrs. Eddy's old and faithful students at Detroit, Mich.

Just a word of greeting for the new "nursling" and the earnest hope and prayer that over the whole world the doors may be opened wide to receive its inspiring messages of good cheer. No other literature than ours sets forth the allness and absoluteness of Good and the nothingness of evil, and for this reason it goes forth armed with irresistible divine power. It seems peculiarly adapted to the needs of the dear children, for it never tells them of evil except to show how the Christ-truth overcomes it all. It sounds a new call to all workers in the Field to give of their best for its support, as the beloved Mother has set us the example, and to use her own words let us "join the overture of angels" and send to the needy and expectant world, through its pages, the message of peace and good will to men.

5. From a faithful student of Kansas City, Mo.

The thought that presents itself to me upon receiving the *Christian Science Weekly* is "What infinite blessings are bestowed upon us through the Mother-love!" Truly her Mother-heart sees the needs of her children, and, as God's messenger, supplies them; thus leading us onward and upward "Out of self and into Thee." The intervals between the coming of our *Journal* have seemed longer each month, and now that we can hear weekly our joy is unbounded. We in the far West grow hungry for a word from the Mother Field, and feel that divine Love has indeed met our need.

6. From a student taking a vacation in the mountains.

Here among the glorious mountains of New Hampshire the *Christian Science Weekly* finds me. Need I say with what pleasure I read every word of the two copies that came? A paper containing leading news of the day with the error weeded out meets a long-felt want, and I thank you for this new effort in behalf of the Field.

POWER OF THOUGHT.

Editor Daily News:—Your able editorial on this subject in Wednesday's issue leads public thought in the right direction. The southern press has been slow to acknowledge the gigantic strides of metaphysical science during the past quarter century; still less has it been willing to accede to it the seal of "Science."

Hypnotism is now being recognized by many jurists and criminalogists as one of the causes leading to crime. In "effete" Europe its exhibitions are prohibited by law. In enlightened America it is taught by individuals, and "colleges" can be found where the art of telepathy is taught to any one who can pay the tuition fee. Strictly honorable persons are learning this insidious art, ignorant of the fact that the identical power they gain over others re-acts upon themselves. The power to transmit thought makes them keenly susceptible to *receive* thoughts they would not dream of inflicting upon others.

Your statement that in "spiritual power" alone are we safe from the wandering pollen of evil thoughts is absolutely and demonstratively true. Clad in the panoply of a spiritual mind, evil cannot harm us nor "lead us into temptation." Humanity must repudiate the theological fallacy of the omnipotence of evil and the impotence of good. "Is the Lord's arm shortened that it cannot save?" This wrong teaching of man's defenselessness has paralyzed the race with fear, and the demand of the hour is enlightenment, as you say, along the line of spiritual science.

Thirty years ago a woman wrote: "The march of mind and honest investigation will chain, with fetters of some sort, the growing occultism of this period. The present apathy as to the tendency of certain active yet unseen mental agencies will finally be shocked into another extreme, into human indignation, for one extreme follows another." To this same woman was accorded the privilege of discovering the antidote for the mental poison she discerned in the hidden recesses of the human mind. To-day, her system, set forth in the book she then published, is enabling over a million of her adherents to "hold crime in check," and send forth wave after wave of pure thought, cleansing and uplifting the minds in whom they find lodgment, and weakening the power of the mental bacteria sent out by the vicious. In spite of the combined and persistent antagonism of press, pulpit, and *materia medica*, Christian Science, as discovered and formulated by its gifted Founder, Rev. Mary Baker Eddy, of New Hampshire, has a hold upon the masses that no human power, seen or "unseen" can shake. The text-book, "Science and Health with Key to the Scriptures," by Mrs. Eddy, has steady and enormous sales in America and Europe. Its teachings inculcate the divine trinity of mental, moral, and physical soundness. It explains not only the operation of thought but the effect of mind upon matter. Spiritual rules (or laws) are laid down whereby mankind can resist and ultimately destroy all sin, and the most depraved become so pure as to come in touch with, and reflect the "same mind that was also in Christ." Too Utopian is it? No. In view of the plain fact that evil is assuming proportions and a garb that would "deceive, if possible, the very elect," the soul's eye must not lose sight of the highest ideal attainable. It would be unwise to point out a great and unknown danger unless one has the antidote at hand. Those who really desire the improvement of the race will not object when the light is turned on. Those who prefer the establishment of evil need neither be feared nor respected.

DE FUNIAK SPRINGS, Sept. 29.

The Daily News, Pensacola, Florida.

ASKING AMISS.

Ye ask and receive not because ye ask amiss.

Do we not ask amiss when we look wholly to the healing of the body not searching in the thought to find out the cause of the discord, and then striving to cast out the thought of error that holds the body in bondage?

The body can only be renewed by the renewing of the mind, and in renewing the mind we help the whole human family and glorify God.

Looking only for the healing of the body, is to me like a child working an example for the purpose of getting the answer, not for any love they have of proving the principle, but for the glory of self or self commendation; therefore we ask amiss, and what is the result? We receive not.

This came home to me in a very practical way a few mornings ago. I was trying to overcome a temptation, and was looking ahead for the answer, thereby not working for Principle but for self. My little daughter was working an example in mathematics. She also had the answer in view, so much so that she had it committed to memory, and could re-

Digitized by Google

peat it any moment when called upon; but she failed to get the answer, as she had lost sight of the rule or principle in thinking too much about the result.

She called upon her sister to help her, who immediately sat down, looked over the example and said, "Why, Flo, you must work from principle, and not so much for the answer. Don't pay any attention to the answer, but work from principle and you cannot help but get the right result." These words coming from the lips of a child I took as a voice from Heaven. My temptation vanished as I lifted my heart in thanks to the Giver of all good for this grand practical lesson. Jesus was our elder Brother. His work was to glorify his Father in Heaven. May our work also be for the glory of God. Declare Truth for the love of Truth, and work to glorify Principle, not to exalt self, and we shall not ask amiss, but shall surely receive according to our deserving. Then can we truly say as did Solomon, "There hath not failed *one word* of all his good promise He promised. *All* came to pass."—*Mrs. M. G. M., Oshkosh, Wis.*

MR. KIMBALL AT RIVERSIDE.

From the *Riverside Daily Press* we clip the following:—

Judging from the magnificent audience which greeted Edward A. Kimball at the Universalist church last evening, his reputation as a talented speaker must have been known throughout the valley, for it is remarkable that such a large gathering could be obtained with such a short notice. As is usual on occasions of this kind, the ladies of the society had transformed the auditorium into a scene of beauty with wreaths and garlands of flowers, and the pulpit was literally covered with them.

Dr. A. A. Sulcer, in introducing the speaker, made a few introductory remarks, in which he said:—

"Christian Science is not seen or heard so much as felt. It is expressed in inspired deeds and facts rather than in words. It makes no vain or ostentatious display, but rejoiceth in the Truth that makes free. But its meekness and gentleness are the elements of its greatness. It has no need to expend itself in order to be conscious of its power or certain of its wealth. And yet its voice, so still and small that it cannot be heard while listening to anything else, speaks to the attentive ear in clear tones, louder than the roar of cannon in battle. Eleven years ago the seed of Christian Science was first sown in Riverside, but as of old, some fell upon stony places and some fell among thorns, but wherever the seeds have fallen upon the receptive heart they have wreathed it with a fairer grace and beauty, and inspired it with a higher and holier aspiration after the truer and diviner light."

Mr. Kimball is an eloquent and forceful speaker, and kept the closest attention of his large audience for nearly two hours with a lucid and comprehensive presentation of the tenets and practices of the Science he represented.

EFFECT OF ANGER.

Medical men have now begun to affirm, what the Mental Healers and the Christian Scientists have long since claimed, that anger is as injurious to the body of the man who gives way to it as a poison would be. An English medical journal says that anger serves the unhappy mortal who indulges it much as the habitual use of intoxicants does the inebriate, growing finally into a disease which has various and terrible results. Sir Richard Quain is authority for saying that "he is a man very rich indeed in physical power who can afford to be angry." This is true. Every time a man becomes white or red with anger he is in danger of his life. The heart and brain are the organs mostly affected when fits of passion are indulged in. Not only does anger cause partial paralysis of the small blood-vessels, but the heart's action becomes intermittent—that is, every now and then it drops a beat, much the same as is experienced by excessive smokers. This is a proof of the evil results of an ugly passion which it well becomes one to heed. It is probably more easily demonstrable to the generality of men than the converse of the proposition—that the kindly, the gentle, and the beautiful emotions are all beneficial to the human frame. A good thought carries a cure in itself. Mr. James Lane Allen somewhere tells us that "Years upon years of true thoughts, like ceaseless music shut up within, will vibrate along the lines of expression until the lines of the living instrument are drawn into correspondence, and the harmonies of the living instrument match the harmonies of the mind."

Harper's Bazar.

THE CHURCH OF THE FUTURE.

Rev. B. Fay Mills, in the September *Church Union*, Boston, thus speaks of the Church of the future:—

The world will see a marvelous change when the Church confesses that she has a mission not only to the individual, but in behalf of the individual. Regarding, for instance, the great principles of health, where are we going to discover a cure-all for the world's disease? Some of it in our laboratories, possibly. I believe in laboratories, but I believe in something more. We are sick because we are incomplete, because we have not learned to control the things that are beneath us. I beg you not to sneer at people, even though they may seem to you to be filled with superstition, who believe that there is a spiritual remedy for the physical ills of man. There is such a remedy. How can a Christian minister denounce from his pulpit the people who believe that there is a spiritual remedy for physical ailments, when he believes the stories of the healing wrought by Jesus of Nazareth?

I believe it should be the part of religion not only to discover the secret of health, but also to discover the secret of material prosperity, and to banish poverty from the world. I believe the church ought to be a leader in everything. I can see reasons why she has lagged behind in the social procession. It has been because she had a theoretical basis instead of a practical basis.

"THOU SHALT NOT SEE EVIL ANY MORE."

T.

Know this, brother; note that in the Eternal Harmony you are one with the Principle of all Concord. Your citizenship is in that sweet home of peace. Its pure atmosphere of Spirit is your native air; its radiant Light you reflect; its holy calm you manifest. The divine Love, which is there enthroned, and which governs all its people, rules your own true self. This Love you live, and as the dew makes the meek grass bold, as the robin's note gives joy to the heart, as the summer's sun brings life and grace, so this Love refreshes, quickens, heals. With the inspired Seer, then, we may say, "Sing, O daughter of Zion; shout, O Israel; . . . The King of Israel, even the Lord, is in the midst of thee; thou shalt not see evil any more" (Zephaniah, 3 : 14, 15).

TESTIMONIES.

I cannot remember when I was not troubled with headache. Kidney disease, said to be hereditary, after years of drugging, was pronounced incurable. Dyspepsia, which each year grew more distressing, was caused by the kidney affection, and for it there was no remedy. Catarrh had advanced to a stage that seemed to be out of the reach of all remedies.

At this stage I heard the word Christian Science, and it struck me with such force that I resolved to investigate it. I took treatment, and from the first my dyspepsia ceased to trouble me. Soon the pains in my head and back were all gone, and a few days later all signs of catarrh had left me. At the end of two weeks I was pronounced healed, was much

Digitized by Google

rejoiced, but did not then realize the extent of my healing. A few days later I discovered that I was hearing out of my left ear, in which I had been deaf for twenty-three years. Then a neighbor took me by the hand and commenced feeling my pulse, well knowing that for over two years it had feebly beaten only fifty-eight to the minute; he found it beating seventy-two, good and strong.

No claim has since returned except to give me a much-needed lesson. Once on my return from Missouri with a pile-driver it became necessary for me to ride all night on a freight train; for this I was not prepared and could not sleep, and toward morning I grew despondent. I said: "This is not Christian Science, and I am not a Christian Scientist or I would not be leading this kind of a life." Every thought of gratitude seemed to have left me. All at once my nose commenced to bleed profusely, and oh, what a change came over me. From a child I had been troubled with nose-bleed, and now, after I had been free from the claim over a year, I had not returned to give God thanks. I no longer wanted to sleep, no longer felt the jolts of the freight train, I could feel nothing but a sense of my ingratitude.

This claim has never returned, and I have not forgotten the lesson of that night.

John P. Barnes, Cripple Creek, Col.

Christian Science has done a great deal for me. But one instance, which happened about three years ago, I will speak of in particular.

I had business down at Hennesy, O. T., and on Friday morning, passing from the hotel over to the main street, I fell to the sidewalk as if I had been shot, with a terrible pain in my right hip. I believe they called it sciatic rheumatism. I had to be helped back to the hotel. I knew a little about Christian Science and tried to realize the Truth for myself, but had to get some crutches. Saturday morning came and I was no better, but the thought of going home on crutches seemed awful to me, because my wife was a Christian Science healer, and I knew how people would think and talk; so, instead of coming home in daylight, I waited and took the night train, arriving early Sunday morning. My wife realized the Truth for me, and Monday morning I was as well as ever, and have had no more use for the crutches since that time.

How wonderful this power of Truth!

H. J. Hills, Wichita, Kan.

Now at the close of our summer vacation, comes to me an overwhelming sense of gratitude to our Leader for the Pastor and Teacher so wisely ordained to be ours. How grand it is, that no matter where we are, away from home, Church, and our brethren, if we have the Bible, Science and Health, and *Quarterly*, we have everything needed for holding a service.

With the two Bible lessons on the Sabbath, and the studying of the same during the week, my thought has been so clear, and the Truth so near and dear to me, that not in the six years since I have known the true way, have I realized so much Truth and Love.

And now, after this "Sabbath day's rest," as it were, I return to active service in my Master's vineyard, and if there is "no excellence without labor," then must we willingly, cheerfully, and patiently, give all our time and energy to the work before us, and look for full fruitage, for have we not the promise, that whatsoever we ask in His name will be given us?—*Mary C. Keedy, St. Joseph, Mo.*

I commenced using tobacco when nine years old, and used it until I came of age. Then I became disgusted with it, and made up my mind to quit. I laid it aside for a year at a time, but was never rid of the desire for it, and would finally go back to it again. This continued for five or six years until Christian Science came to my notice. My wife was healed of complaints which the M. D.'s could not cure. We took up Science and Health, and after studying it for a few months I was healed completely.

While I still had tobacco in my mouth I realized I had been healed, and told the men where I was working that I would never want any more tobacco because I had been healed by Science. This took place over six years ago, and I have never had the least desire to use it since.

J. G. States, Everett, Wash.

I was at Sioux City, Iowa, in the summer, and asked our healer to help me while I had my teeth extracted. She did so. It took the dentist about forty minutes to get all the roots. They broke off, and two came out together. I think it hurt the dentist more than it did me. I had no pain, and came home that afternoon. There were no ill effects, as is usually the case in taking material aids. The dentist wanted me to take something. I think he was alarmed when they came so hard.

I am all alone here in the Science thought. I want to reflect good so that others may be brought in.

M. L. B., Dixon, Nebraska.

I gave a *Christian Science Weekly* to a young business man, who, after reading it, asked me if I had that book written by Mrs. Eddy; I told him that I had one. He said he would like to read it. I said I would be glad to lend it to him, and did. He told me of a claim that troubled him. I talked with him about it, and left him. Two days afterwards, he said he was not troubled any more. A friend of his sitting by asked if I had treated him; I said no.

R. E. F., Syracuse, N. Y.

I was surprised to see in a recent number of the *Outlook*, this heading or caption to a review of some new book:—"Science of Religion."

It has not been many years since the idea was scouted that there could be any Science in religion or Christianity; but Christian Science is fast forcing both its language and laws, its terms and teachings, on the thought and literature of the age.—*M. C. S.*

NOTICES.

THE Wednesday experience meeting for subjects of general interest pertaining to Christian Science, as well as personal experience, is now called the *Wednesday Evening Meeting*.

A member of the Board of Lectureship will lecture at these meetings as often as once in three months. The Christian Science Board of Directors of the Mother Church, and the branch churches of Christ, Scientist, may apply to the Board of Lectureship for lecturers, within the bounds of their sections or precincts in the United States, Canada, or Great Britain.

MARY BAKER G. EDDY.

PLEASANT VIEW, CONCORD, N. H., Sept. 15, 1898.

The next meeting of the First Members for the purpose of admitting candidates to membership in the Mother Church, will be held on the first Tuesday in November, 1898.

Applications for membership to be presented at that meeting must be in the hands of the clerk on or before the twentieth day of October, 1898. They should be sent to 95 Falmouth St., Boston, Mass.

WILLIAM B. JOHNSON, *Clerk.*

The above notice was published in the *Journal* for September, 1898.

When sending for the *Christian Science Weekly* for an unexpired term of the *Journal*, please be careful to send the correct amount. These subscriptions should be reckoned up to and include the month named on the address of the *Journal*.

Works on Christian Science

WRITTEN BY

Rev. MARY BAKER G. EDDY.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid	$3 18
Two to Twelve books to one address, each, Prepaid	3 00
Twelve or more books to one address, each, Prepaid	2 75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid	6 00
Twelve or more to one address, each, Prepaid	5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid	$2 25
Twelve or more books to one address, each, Prepaid	2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

JOSEPH ARMSTRONG, C. S. D.,
PUBLISHER,
95 FALMOUTH STREET, BOSTON, MASS.

The Christian Science Journal,

Founded, APRIL, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REVEREND MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical Healing, as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscriptions:

Payable in advance, postage free, to any part of the United States and Canada. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents. Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

THE CHRISTIAN SCIENCE QUARTERLY,

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday Services in all the Christian Science Churches throughout the year.

Terms of Subscription:

One copy, one year, 50 cents; Fifty copies or more to one address, one year, each, 50 cents; Foreign subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States and Canada.

Terms of Sale:

One or more copies, each, postage paid, 15 cents; Fifty copies or more to one address, postage paid, each, 12½ cents.

CHURCH MANUAL. Containing Rules and By-Laws of the Mother Church, also list of members. Price, one copy, $1; six copies to one address, $5; twelve copies to one address, $9.

THE CHRISTIAN SCIENCE HYMNAL. Bound in two styles —Cloth and Leather. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00; Leather, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the building of the Mother Church, The First Church of Christ, Scientist, in Boston. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00.

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents; Cloth binding, 45 cents.

HEARINGS ON PROPOSED MEDICAL BILLS in Massachusetts and New York. 23 pp.

ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By EDWARD A. KIMBALL, 24 pp.

THE BUSWELL TRIAL. 24 pp.

REPLY TO SERMON. By SEPTIMUS J. HANNA, 30 pp.

THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.

HEALING THROUGH CHRISTIAN SCIENCE. By SEPTIMUS J. HANNA, 32 pp.

One copy or more, each, 10 cents; Twelve copies to one address, $1.00; Twenty-five copies to one address, $1.75; Fifty copies to one address, $3.00.

COMMUNION HYMN. "SAW YE MY SAVIOUR?"

Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

VOL. 1 BOSTON, MASS., U. S. A., OCTOBER 20, 1898. NO. 8

OUR DUTY TO NATIONALIZE.

Rev. Dr. Lamson on the War's Problems.

PRESIDENT LAMSON of the American Board of Commissioners for Foreign Missions, in his annual address, after reviewing the work of the Board, said:—

"In the three months' war patriotism declared itself a missionary by saying to its unnationalized, denationalized neighbors, We will aid you in becoming national. We pity a people among whom patriotism is impossible. They do not live half a life who are without patriotic imagination. The beginning of our war with Spain was the height of unreason. Judged by the standard of serious, conservative wisdom, it appeared as the insanity of jingoism, a pugilistic enthusiasm, a revenge for the loss of a battleship, a sympathy for suffering. But in all this confusion of motives there was a power and spirit that American political science had not made part of its system.

"We thought only of the neighbor, Cuba. Then came what seemed the accident of Manila, an accident luminous with heroism and made coronal by success. The question, Who is our neighbor? became, Who is not our neighbor? and Luzon, the island of an Oriental sea, comes into the field of view and is set beside Cuba, both neighbors, both in our world. What ought we to do with them? How shall we love our neighbors as ourselves? No President, nor party, nor commission, nor political economist can answer.

"But the fact that we cannot evade nor obscure is that we shall love these neighbors as ourselves. Neither can we evade or obscure the knowledge that we must achieve some great good for the Philippines and the West Indies. This has become an integral factor in the new national idea. The American nation has come to a new self-consciousness of its national life and of what it is to be both in conserving an old and in creating a new history. In a hundred days we have advanced a hundred years. We are more than ever to be United States, made one by the splendor of this sudden thought that a real union must be a union with a purpose. The youth grows; it is enough for its ambition, under the restraints and constraints of law, to become bigger, but when it becomes a man, and the physical expansion has reached its limits, its law is no longer growth, but duty. We may be hesitant or conservative, yet we cannot deny the fact nor the responsibilities of our majority. We are no longer provincial. We have become cosmopolitan. We have as a nation gone to the extremes of the world, and there is no retreat. The serious question of patriotism is, how shall it advance? What shall become of our foreign mission?

"Our statesmanship and citizenship will, through a philosophic study of the new self-consciousness, make some answer to these questions. The Peace Commissioners will answer, but the new national philosophy and the permanent reply is given by the American Board of Commissioners for Foreign Missions, and those whose purpose is to Christianize all races. How shall we, in a secure yet progressive spirit, nationalize Cuba, Porto Rico, the Philippines, China, Africa? —Christianize them. Piety to Christ is the mother of patriotism.

"We have not yet historically established the truth that our government is the best. We have not yet discovered or put in practice the art of governing. We have made and are making substantial contributions to the science of the perfect politics; but we have not settled the question of the best nor final form of government. We are not prepared to say to Japan or China, or Luzon or Cuba, become republics! We are not yet sure enough of our politics to teach them. But we are sure of our religion.

"The most serious question of the century is now before our nation: Shall we colonize, enlarge our territory? With or against our will, some real expansion is necessary. We have a mission, not to appropriate lands, but to create nations. It is a greater glory to Christianize the world than to make it American. Through the expansion of religion shall come the expansion of America. We shall become really great by giving the unnational races that Gospel that has been the source and power of our state.

ITEMS OF INTEREST.

The late Sherman Hoar was undoubtedly a man of extraordinary character. His independence of thought was well illustrated by this incident: He early became a free trader, while his father, the Hon. E. Rockwood Hoar, had, all of his life-time, been an ardent protectionist. The father, by way of rebuke to the son, said to him, he thought it was strange that one so young as he should know so much more about the tariff than one who had made it a life study. Quickly replied the son, "Father, I began where you left off."

His self-sacrifice in going to the care of the soldiers and personally nursing them, whereby he contracted the fever which resulted in his demise, indicates a high order of patriotism. Christian Scientists cannot but regret that he had not had sufficient understanding of the Science of health to have protected himself against such a result.

At a meeting of the main encampment, Knights Templar, recently held in Pittsburg, Pa., the following officers were elected: Grand Master, Reuben H. Lloyd of San Francisco; Deputy Grand Master, H. B. Stoddard of Texas; Grand Generalissimo, C. M. Moulton of Chicago, Grand Captain-General, H. W. Rugg of Providence; Grand Senior Warden, W. B. Mellish of Ohio; Grand Junior Warden, Joseph A. Locke of Portland, Me.; Grand Treasurer, Wales L. Lines of Meriden, Conn.; Grand Recorder, William H. Mayo of St. Louis. Louisville, Ky., was chosen as the place for holding the Conclave in 1901.

Great Britain, Russia, France, and Italy have decided to reject the Porte's suggested modification in the ultimatum to the Turkish government on the evacuation of the island of Crete, particularly the Sultan's proposal to hold three

Copyrighted, 1898, by Mary Baker G. Eddy.

Digitized by Google

fortified places, with garrisons sufficient to protect the Mohammedans and to defend the Ottoman flag. They are sending an identical note to this effect to Constantinople, reminding the Sultan that every Turkish soldier must leave Crete within the time specified in the ultimatum.

Secretary of State Hay, speaking recently of the attitude of Germany toward the United States, says, that the State Department had no fears whatever that Germany would lay any claim to territory in the Philippines in the event that the United States concluded to keep all the islands. If the United States withdrew, then Germany might, he thought, seek to gain a foothold. But of opposition to the United States there was none, as far as the Department was advised.

Major-General Chaffee, speaking of the charges against the War Department in a recent interview, has this to say: "Many of those people who come back from Cuba with complaints seem to forget that we were carrying on the war in a strange, fever-stricken country. They do not seem to make any allowances for that fact. As to the incompetent young officers, the sons of rich men, I can only say, as a regular army officer, that I heard very little fault found with them."

Reports indicate that the Indian troubles are about over. As an evidence of the loyalty of the Mississippi bands of the Chippewas, three chiefs of that branch of the tribe have sent to Washington the following despatch:—

"We hear with regret of the trouble at Leech Lake, and wish to assure the government of the continued friendship and loyalty of the Mississippi bands of the Chippewas at White Earth."

On October 12 President McKinley and party visited the Omaha Exposition. He received a very warm reception there, amounting to an ovation, and addressed a great throng on the Exposition grounds. Among the distinguished party were Generals Greeley and Wheeler, Secretaries Gage, Bliss, and Wilson; Postmaster-General Smith; members of diplomatic corps, secretaries of legations, and press representatives.

While kicking about some dirt at the city dump in Leadville, Col., recently, Frank Burkhart unearthed a cave in which he found some very rich ore. The officers were at once notified, and upon investigation found a cache from which they extracted fifty sacks of gold and silver ore, which had evidently been hidden away, and had been stolen from different mines. The ore is thought to be worth $110,000.

The American and Spanish Commissions finally adjourned October 13, and bade each other farewell. Thirty cannon captured at the forts and in the trenches at Santiago are now ready for shipment to the United States. A proposed plan is to give the fifteen principal cities in the United States two guns each as trophies, to be placed in positions of honor in the public parks.

Wednesday, October 5, the White Pass and Yukon Railway, the first railroad built in Alaska, broke ground on British soil. The work of construction will be prosecuted all winter and two thousand men will be kept at work. It is expected to have a through run to Log Cabin, a distance of thirty miles from Skaguay, by the middle of February.

It is reported from San Juan that the United States Commission has informed the Spanish Commission, that the United States expect to have complete possession of Porto Rico on October 18. The Spanish commissioners assent to this and say it is expected evacuation will be complete on or before that day, if not they will concede possession.

The Twenty-fifth Annual Convention of the Mass. W. C. T. U. opened in Tremont Temple October 12. The organization has three hundred unions. During the year there had been enrolled 1,136 new members, and 996 honorary members. Five hundred and fifty-six public meetings had been held. The occasion was a sort of silver jubilee.

The steamer Mohegan was wrecked on October 14, off the Lizard, between the Manacles and Lowlands in the English Channel. Of the passengers eleven have been saved and thirty-three are missing. Of the crew and cattlemen thirty-nine have been saved and fifty-one are missing.

Reports from Paris indicate that the efforts of the Spanish Commissioners are directed more toward obtaining relief from Spain's indebtedness, than the retention of territory. Their chief purpose seems to be to have the immense obligations in some way cared for.

The annual estimate of the wool clip of the United States for 1898, made by Secretary North of the National Session of Wool Manufacturers, shows the amount to have been 266,720,684 pounds against 259,153,251 pounds in 1897.

Word comes from London to the effect that on November 23—the birthday of the Empress Dowager of China—the Emperor will be formally deposed, and Prince Jun, a boy of thirteen will be nominated as his successor.

Emperor William of Germany and suite have gone on a journey through the Holy Land. The Sultan of Turkey bought thirty-six carriage horses in Berlin for the use of the Empress of Germany and her suite.

It is reported that a mountain twenty thousand feet high has been discovered by a geological surveying party in Alaska, situated on the right of the Sushita River. It is the highest mountain in North America.

The sum-total of the evidence thus far produced before the Dodge investigation commission would seem to be, that the hardships and sufferings of the Santiago campaign were unavoidable.

The Paris strike is becoming more and more menacing. The number involved is said to be over eighty thousand. The government has called out ten thousand troops.

The foreign ambassadors at Constantinople have refused to modify the terms of their ultimatum to the Porte, requiring that they withdraw the Turkish troops in Crete.

Another expedition for the Philippines is being made up. It will consist of nearly six thousand men. The Oregon and other ships will soon sail.

Secretary Long repudiates the idea that the Navy Department is in any sense blamable for the illness of the soldiers.

The strike of laborers employed by the building trades in Paris, France, is considered ended.

Work on the Spanish cruiser Vizcaya has been abandoned.

CONCORD ITEMS.

From the *Concord Evening Monitor*, we clip the following:—

The Epworth League editor of the Manchester *Mirror* writes: "We are sorry to know that the Rev. Elihu Snow of First Church, Concord, is obliged to give up his work on account of illness. Brother Snow is one of our most popular ministers with young people."

Mayor Woodworth is in receipt of a handsome invitation to the Peace Jubilee to be held in connection with the Omaha Exposition on October 15.

MISCELLANY.

Colonel Sabin, in the *Washington News Letter* has this to say about lawyers:—

Lawyers, friends that I have known for years, have met the new ideas with more consideration than those of any other profession. The lawyer naturally, from the practice of his profession, is imbued with the principles of justice, and he also becomes judicially inclined in his mind. He does not jump at rash conclusions without proper evidence and investigation, hence, if this new doctrine were presented to the lawyers of the United States they would, very many of them, embrace its truth, because they would investigate, and they would not allow their opinions to be made for them by anybody, but would be governed by facts. Such an investigation is all Christian Science requires to establish its truthfulness. Yet all the lawyers are not freed from superstition and prejudices. There is one I know who had an affection of the eyes; one eye was nearly blind, the other was rapidly becoming so. I wrote to him, sent him the name of a Scientist living in his town, asking him to try the Science. Prejudice and *materia medica* had too strong a hold upon him. He stuck to his prejudice, and to-day is blind.

I know of another lawyer who lost his voice, and physicians, specialists in New York, Boston, Paris, London, and Dresden failed to give him any relief. He was finally advised to try the warm temperature and dry climate of Arizona for a year, which he did. He came back to Chicago no better. Through a fortunate circumstance he was thrown in contact with some one who had heard of Christian Science; he applied to a Scientist, was healed, and to-day his voice is perfectly well. This gentleman is a man of national reputation and to-day one of the leading men in Chicago.

The cases of miraculous and wonderful healing that Christian Science has performed and is performing all through the United States are almost innumerable, and yet our friends will die around us immersed in their belief of *materia medica*, and let their fears and their prejudices drag them to death.

From the *San Diegan-Sun* of September 14, we extract the following:—

Edward A. Kimball, lecturer for the Christian Scientists of America, talked for nearly two hours last night to an audience of twelve hundred people at the Fisher Opera House, and although the subject is to a certain extent theoretical and might, in consequence, suffer from "dryness" at times, it is certainly to the credit of the lecturer and his treatment of the subject that the individual attention of every person in the house was held during the entire evening.

Mr. Kimball's subject was, "Christian Science: What it is and what it is not," and as a lecturer and a proselyter he is certainly refreshingly unique, for he indulged in no forensic flights of eloquence, made no attempts at word painting, used no imagery, good, bad, or indifferent, quoted from no authority, ancient or modern, save the Bible, abused no one, ridiculed no one, made no charges against the alleged enemies of Christian Science, and never once attempted to appeal to the passions or emotions of his hearers; but, on the contrary, talked calmly and steadily, nailing each proposition home before he went on to the next, in a way that carried conviction almost against one's will.

The English, happy people! have put a stop to compulsory vaccination.

Johnny Bull prefers to face the uncertain dangers of a distant epidemic to being immediately inoculated with other people's diseases. He is to be congratulated. In this country, too, there is a growing aversion to having unknown impurities injected into one's blood. Well, good-bye to it, and good riddance.

It is only one more glorious discovery passing to the grave. Koch's lymph, anti-toxin, Pasteur's immortal discovery, and vaccination, form a pathetic procession of "scientific" defeats —"defeated victors," we should say, as all have had their day of triumph, and each one counts its victims by thousands.

Apropos of vaccination, we quote the following from the New York *Farmer*:—

"A six-year-old schoolgirl, named Alice Dempsey, recently died in Germantown, Pa., from blood-poisoning, caused by vaccination. She was forced to be vaccinated in order to attend school, and thus lost her life—a legalized murder by the State of Pennsylvania."—*Life*.

Dear Weekly:—I only desire to shout "all hail," and God bless the *Christian Science Weekly*. It shows the masterhand of a great Leader. She knows that rapid-fire artillery of small calibre is as necessary at this time as the thirteen-inch *Journal*. See her encouraging the young *Washington News Letter*. See and hear the thunder of the "Big Dailies." Hear the clarion tones of our platforms. Listen to faltering shots from the pulpits. See how our Mother has proven that, "one with God is a majority." The Press, the Pulpit, the Platform, these arsenals of mortal man will soon be under army orders, forging thunder-bolts of public opinion for the facts of a Scientific sense of existence.

Then comes a time when human sentiment crystallizes into conviction, and conviction into action. The divine pressure of justice and wisdom does this. Truly the burden of the Lord is on us as on her. We are in for the war, and it is joy to overcome evil with Good, and know He is always for us, and we are all marching on to sure victory.

Truly in Love, *John F. Linscott.*

"Had a queer case the other day," said a popular surgeon of this city, "and I don't know yet whether to attribute it to some physical peculiarity, or to what the hypnotists call 'auto-suggestion.' It was like this: I was called in to perform a trifling, but usually very painful operation on a gentleman's eye, and before I began I used cocaine freely on the membrane. The job was done in a few minutes and the patient never winced. He said he felt nothing and was astonished when it was all over. When I returned to my office I discovered, to my great surprise, that the bottle I thought contained cocaine had nothing in it but distilled water. I had picked up the wrong vial by mistake, but somehow the water did the work just as well as the drug. How do I explain it? I don't explain it at all. There are the facts; you may draw your own conclusions."

New Orleans Times-Democrat.

The doctors and surgeons had a monopoly of the pews in the Tenth Avenue Baptist church Sunday evening, where Dr. D. J. Synder delivered the address on "Christianity in the Medical Profession."

Dr. Synder said he was a firm believer in evolution that recognized God as the Supreme Being. In many cases he showed that the physician had greater influence upon the character of his patient than the minister has over the members of his church. The physician, he said, enters the privacy of the home with a freedom which is allowed to no one else. The secret sins and vices of all the members of the family must be known to him.

One instance was cited where the lives of several young men were ruined by an atheistic physician.

Columbus, Ohio, Daily Despatch.

The ninth festival of the New Hampshire Music Teachers' Association was recently held at Weirs, N. H. Among those participating was Miss S. Marcia Craft, the solo singer of The First Church of Christ, Scientist, Boston. Of her performance the *News and Critic* of Laconia, N. H., has this to say: "Miss Craft sang 'Elsa's Dream' from Lohengrin, with a most perfect conception of the music and situation. In Miss Craft we predict the coming soprano of New England. She is quick to grasp a situation, thoroughly musical, and her phrasing is nearly perfect. She sings without affectation, and is very obliging."

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor.

CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address. one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

EDITORIAL.

THE following epitome of the remarks of the Rev. Samuel Eliot, upon the life and character of the late Sherman Hoar, are so aptly descriptive of the true man, that they are well worth the perusal and remembrance of every one who aspires to the best manhood. They indeed describe the type of manhood for which true Christian Scientists are striving.

"No one could come into relation with him without an impression of his resolute manhood, his mind, his heart, his conscience. He went straight to his point by the most sunlit road. His mind was straightforward because ruled by commanding ends. He revolted from all pretension. He turned from the way of self-aggrandizement to the way of service. He had put aside even his own ardent ambitions when higher duties seemed to claim him. He had the democratic spirit which makes light of artificial distinctions, and he held himself in natural friendly intercourse with all kinds and conditions of men. Devoted to his friends, generous to his enemies, he carried with him the atmosphere of optimism. He had the large, manly common sense that we Americans demand in the leaders we trust and follow. He was a man capable at once of righteous indignation against evil and of compassion for evil-doers. I think of this modern knight, panoplied not in the rusted harness of by-gone battles, but in that armor of God which the apostle describes, and in which the responsible battles of this day and generation are to be fought,—'The shield of faith, the breastplate of righteousness, the sword of the spirit.'"

These are the traits, surely, of the sincere, honest, faithful Christian warrior. Such traits should, and really do, distinguish the true Christian Science warrior. Dishonesty and craftiness, littleness of soul and purpose, the foibles of petty personality, the follies of gossip and idleness,—these have no place in Christian Science. Until they are effectually and radically overcome no one can be said to be a true disciple.

One of the important lessons we must learn is this,—whether we will be governed by the dictates of divine Principle in the application thereof to human affairs, or by the prejudices and narrowness of stickling personality. Will the professors of this great Truth be noble and large, or ignoble and petty?

CONSUMPTION CURED.

I AM the only one left of a family of ten children, having followed five sisters, four brothers, and my father to the grave; all swept away with consumption. In September, 1894, I was taken down with the same disease and was given up by one of the best doctors of the city. I tried another. He finally said he could do me no good; the only hope for me was to prepare to meet my God. A third said if I would go to Mexico I might last a few years longer, but really there was no cure for me. Within ten hours thereafter I was crossing the Rio Grande River, and I stayed in Mexico eight months; returning to San Antonio, Texas, in November, 1895, with very little improvement in my health.

The following January I went to Rockdale, Texas, to try coal mining. After one month's trial I saw that I was too weak to work at such labor, but I had no means to go home. I was writing to my mother to sell one of my horses and send me the money, that I might pay my board-bill and go home. While writing, the landlady said to me, "Why don't you take Christian Science treatment; maybe you would get well?" I had never heard of such treatment, so I asked her what it was. She only said, "Mrs. O. is a Christian Scientist, why don't you ask her to treat you?" Christian Scientist! I was startled to hear such a strange name. I did not finish my letter. I walked out in the field thinking, "What *is* Christian Science, and how can I get to see that Christian Scientist?"

When I returned to the house I was told that Mr. O. wanted some one to build a fence for him. My heart rejoiced, and I went at once to see him. I built the fence, and then Mr. O. gave me ten acres of land to clear. When I finished it he started me on another tract of land; then his farmer quit, and he at once hired me to work on his farm. I now felt that my chance had come to get Christian Science treatment. I had never said anything to Mrs. O. about wanting help; but she could see that I was suffering, and that night her son asked me if I thought I would like the place. I told him that if I could stand it I would, but I was very sickly. He said that I never need fear sickness while there, for they served a better God than sickness.

I noticed when I went in to my meals that Mrs. O. would be talking Christian Science, and my heart burned within me. At last I could stand it no longer. I asked a servant girl what manner of people they were, for they always seemed so happy, and she answered, "Christian Scientists." Then I wanted to know what Christian Science was, and she said, "Truth." Then I asked, "What *is* Truth?" And she told me to go and ask Mrs. O.; so I did. When that kind lady began to open the Scriptures to me I saw at once wherein I had been blind all my life. As she spoke I could not keep back the tears; it appeared as if she had awakened me out of a deep sleep, and I got out of her presence quickly, for I did not wish her to see me weep. I went by myself and sat alone, saying, "Surely, surely, God has led me to this place." Did she stop? No, she would come to the field when I was working near the house and lead me in the light of Christian Science.

In one week I was fast forgetting consumption. I felt as if I were being born again. I began writing to my mother and told her about the wonderful works of Christian Science; for she had never heard that name. Let me add that I was a Baptist preacher at that time, but I soon changed my mode of preaching. For two months that dear lady and her son read to me from "Science and Health with Key to the Scriptures," and from the *Journal* every night. I asked her to send for a copy of Science and Health, which I took home with me at the end of two months. When I stopped at the gate of my home my mother did not know me until I spoke. All my friends were greatly surprised to see the change in me. After being here one month I wrote to Mrs. O., and she told me where I could find the Scientists at this place. To my surprise I saw so many that I wondered

Digitized by Google

where I had been all my days that I had never heard of these dear people.

Being driven from among my own religious sect because I saw that Christian Science was All-in-all, I soon sought the Scientists and became one among them. I have had some noble demonstrations that have proved to me that Christian Science is the only right way. I have my Bible, Science and Health, "Miscellaneous Writings," the *Quarterly*, the *Journal*, and will soon have all of our dear Leader's writings.

My first case of healing was my mother. She had suffered twelve years and could not be cured; but under my treatment in Christian Science she is now a well woman.

Glory to God in the highest! without a struggle or a sigh I sincerely yield to Truth, and can now discern where I am being born again. As to Mrs. Eddy, I know not how to begin to give her thanks for this glorious light which she has brought to a sorrowing world; for I can now see, as never before, what John the Revelator saw in the fourteenth chapter of Revelation.—*George Bell, San Antonio, Tex.*

HOW A SMALL CHURCH IN THE WEST DEMONSTRATED A LECTURE.

In a small town in central Colorado, where Christian Science services have been held for some time past, Mr. Edward A. Kimball of the Christian Science Board of Lectureship, recently delivered his lecture by request. In view of a reference in a late number of the *Christian Science Weekly* to the fact that a large section of the Field has not yet awakened to the importance of these lectures, as evidenced by the few calls made, it may be of interest to know how a young group of Scientists in the West, realizing the good to be derived therefrom, secured a lecture by demonstration in face of serious obstacles.

The church in question was organized last March, has at present twelve members, with an average attendance of about thirty-five at each service. When the Board of Lectureship was established, the matter of securing a lecturer was quietly talked over among the members, and while all agreed as to its expediency, the difficulties in the way were so formidable as to make it seem out of the question. Nevertheless, all were advised to handle the matter wholly in Science, not to admit, even mentally, that it could not be done, but to leave it with Principle—Good—and to know that error could not hinder the voicing of Truth.

It was made plain to all that the lecture would be far reaching in its results, that it would not only bring more light to those already in Science, but that it would be the instrument of turning the thoughts of others to a consideration of the Truth, that it would correct wrong impressions, dispel prejudices, and place our religion on a firmer footing in the community. Unselfishness was made the controlling motive, and the thought prevailed that "this lecture will help others who are now indifferent, or perhaps antagonistic, to Science, and who need it as badly as any of us."

Sooner than expected the question had to be decided, as word came that Mr. Kimball would be in this vicinity in about two weeks, and was ready to arrange his dates. At a Wednesday evening meeting, the subject was brought up and an informal statement made, that about $90 would be required to meet all expenses, including fee, advertising, hall, etc., as of course the lecture would be free. In the old way a subscription paper would have been circulated, but wishing to avoid everything that savored of coercion or publicity, it was suggested that each one present write on a slip of paper (without signing name) the amount he or she had demonstrated for the lecture fund. The slips would then be gathered, counted, and destroyed, and if the amount thus indicated was deemed sufficient to warrant it, the lecturer would be engaged forthwith. This was done and the amount footed up $72. This was enough to start with. Mr. Kimball was engaged and notice was given to all that they could pay their contributions to the proper church officer any time before Mr. Kimball's arrival.

When the time came for settlement, it was found that exactly $90 had been quietly handed in, and that, too, without a single individual being asked for a penny of it. Bear in mind, if you will, that these people work hard for their daily bread, have urgent demands for every dollar they earn, and then draw your own conclusions as to the difference between giving because you want to and because you have to—between giving from love and giving from a less worthy motive. "And though I bestow all my goods to feed the poor, and though I give my body to be burned, and have not love, it profiteth me nothing."

W. R. R., Florence, Col.

THE BOARD OF LECTURESHIP.

The Christian Science Board of Lectureship of the Mother Church is authorized to announce to the Field that the recent notice requiring lectures to be given at Wednesday Evening Meetings "as often as once in three months" was not intended as a compulsory requirement resting upon all the branch churches, but rather upon the larger churches, which will be designated later. It is expected that the smaller churches will also recognize the valuable nature of this work, and carry out the intention of the notice to the extent of their ability.

Although it is desirable to follow the rule given, it is not intended as an absolute requirement that these lectures should all be held on Wednesday evenings. If the situation seems to require it, other nights may be selected.

These lectures are primarily to present Christian Science to the public, and should be given wherever possible in public auditoriums where large audiences may assemble.

In regard to applications for lectures the following notice has already been given by our Leader, the Rev. Mary Baker Eddy:—

"The Christian Science Board of Directors of the Mother Church, and the branch churches of Christ, Scientist, may apply to the Board of Lectureship for lecturers, within the bounds of their sections or precincts in the United States, Canada, or Great Britain."

Lecturers may not be able to respond to such calls immediately, because of other engagements, but will as soon as possible arrange for a date that shall be mutually convenient.

The lecturer shall receive a fee of fifty dollars, with traveling and incidental expenses, from the church for which the lecture is given.

On application the lecturers will send a circular containing suggestions as to modes of advertising and other details.

The churches are requested not to address correspondence concerning this subject to the Editor or the Publisher of the *Journal*, or to the Clerk of the Mother Church.

The lecturers for the New England States, Great Britain, the Maritime Provinces, the Province of Quebec, and the city of Ottawa, are:—

Irving C. Tomlinson, 8 Norway St., Boston, Mass.
William P. McKenzie, 2 Cumberland St., Boston, Mass.

For the Middle States and the Province of Ontario:—
Carol Norton, 170 Fifth Ave., New York, N. Y.
George Tomkins, 96 Fifth Ave., New York, N. Y.

For the Southern States, and District of Columbia:—
Edward H. Hammond, 1900 Bolton St., Baltimore, Md.
Mrs. Sue Harper Mims, 575 Peachtree St., Atlanta, Ga.

For the Western States:—
Edward A. Kimball, 5020 Woodlawn Ave., Chicago, Ill.
Mrs. Annie M. Knott, 759 Woodward Ave., Detroit, Mich.
Alfred Farlow, 430 N. Y. Life Building, Kansas City, Mo.

SCIENTISTS AND NEWSPAPERS.

BY HERBERT S. FULLER.

I HAVE heard many Scientists, and some whose life and work I have an admiration for, say in a tone that expressed more perhaps than was intended, that they never read the newspapers. I have felt at times that perhaps there was something wrong about it.

I can imagine that a Scientist whose entire time is given up to the demonstration of the great truths of Christian Science, might not get time to read the newspapers to any extent, and that there are such I do not doubt, but most of us find time to do many things that seem to me far more reprehensible than the reading of the daily or weekly newspaper.

The writings of the Rev. Mary Baker Eddy from time to time indicate plainly that she keeps pace with the great events of the day in the outside world, and evinces, often, a lively interest in them, as witness the grand words in the closing paragraphs of her message to our Mother Church last Communion Sunday. The information she possesses upon such topics must have been gained from reading the newspapers.

Our new and appreciated gift, the *Christian Science Weekly*, contains in each welcome issue an intelligently prepared epitome of the news of the day, which must have been made up by the careful editor from a perusal of the daily papers of the larger cities.

This would indicate that it is certainly not unscientific to read the newspapers, as some seem to think.

It seems to me that no class of persons should show greater interest in the affairs of the world than Scientists. They should keep pace with the progress in various lines, and in conversation show that they are familiar with matters that are occupying the mind of the peoples and nations. If a non-Scientist friend talked with a Scientist and found him to be totally ignorant of all that was going on outside of their own circle, would he not, with some reason, call them narrow?

I venture to say that the carefully edited news columns of the *Christian Science Weekly* are eagerly read in many small towns where, perhaps, the daily papers do not reach, and the local weekly does not cover the general news of the day. To those in remote localities this feature of the *Weekly* must be greatly appreciated, as it deserves to be.

The daily paper presents the world's thought along many lines, and mirrors the course of men and nations. What if it contains much that one does not want to read? It is easy, in this case, to sift the wheat from the chaff. Skip the portions that you do not want to read, but do not condemn the newspapers as a whole.

It seems to me that we ought, in this age, to uphold everything that tends to elevate thought and spread the "glad tidings of great joy," and the newspaper of to-day can be made to serve these ends.

ONLY A BELIEF.

BY REV. IRVING C. TOMLINSON.

"WHEN one is sick, why do you say, 'It is only a belief'?" This often-asked question has an answer in the following incident, told by a New York Scientist.

While playing lawn-tennis, a young woman was hit in the face by a tennis-ball. After recovering from her confusion, she found that her two front teeth, supplied to her by the dentist and set in gold, were gone. She quickly arrived at the conclusion that she had swallowed her teeth, and that her life was in danger.

Had she been a Christian Scientist, she would have known that the swallowing of her teeth was only a belief, and that, as God's child, she was all right. Not being a Christian Scientist, she sent for the family physician, who knew she had swallowed her teeth, and that she was all wrong. The usual grave announcement was made: "The case is very critical," followed by the frank avowal that "The teeth, with their gold prongs, cannot be pumped up or thrown up. The patient must be kept very quiet. She will grow weak, lose her appetite, take to her bed, suffer severe pain, have convulsions, and most likely die."

It is not said that the physician was a prophet nor the son of a prophet. That is not needful, for time-honored (?) custom decrees the fulfilment of medical prophecy. In a critical (?) case, to prophesy doleful disaster is very "regular," to declare that it is only a belief is very "irregular."

In this case the treatment was regular and the symptoms which followed were regular. The patient was kept quiet; she grew weak; she lost her appetite; she took to her bed; she suffered severe pain—but she did not have the convulsions. Before this symptom was due to manifest itself, the patient's sister found the teeth in the grass on the lawn and carried them to the patient, who was thereby convinced that the swallowing of her teeth was only a "belief." When she saw that the teeth in her stomach were only a belief, and not a reality, she saw there was no necessity for convulsions, in fact no necessity for her being in bed at all, or for that matter, being in any way ill. Then she knew she was all right, and she *was* all right.

Had Christian Science cared for the case, what was known last would have been known first, and several unnecessary illusions would have been avoided; for she would then have known that the swallowing of her teeth was *only a belief*, and that, as God's child, she was all right.

Moral.—Learn to *know* that your "beliefs" are in the grass and not in yourself, and *you* will be all right.

THE DOCTOR.

She.—Doctor, I've been guessing these conundrums. Do you ever——

He.—Madam, I have been guessing conundrums for thirty years—professionally!—*Punch.*

"I had supposed until yesterday, doctor, that the days of the bleeding of patients were past." "And so they are. But what changed your mind?" "The bill you sent me."

Harper's Weekly.

The eminent surgeon closed his pocketbook with a snap on the $100 fee a wealthy patient had just paid him for a successful operation for appendicitis. "Tell me the *appendix vermiformis* is a useless organ, will you!" he soliloquized.

Chicago Tribune.

They sawed off his arms and his legs,
  They took out his jugular vein;
They put fancy frills on his lungs,
  And they deftly extracted his brain.
'Twas a triumph of surgical skill
  Such as never was heard of till then;
'Twas the subject of lectures before
  Conventions of medical men.
The news of this wonderful thing
  Was heralded far and wide;
But as for the patient, there's nothing to say,
  Except, of course, that he died.

Cleveland Leader.

TESTIMONIES.

In August, 1897, Muriel, aged four years, received an invitation to her little cousin's birthday party. Muriel lives in Illinois, and the little cousin lives in Connecticut.

Muriel is a Scientist, while her little cousin is not. Muriel could not go so far to a party, but she wished to send her cousin some little token of remembrance and love.

Mamma suggested that she take some pennies out of her bank and buy something for her cousin, but the suggestion did not please Muriel, and so she set to work to make some-

Digitized by Google

thing very choice and beautiful, but her little fingers could not turn out what she had in thought. Time passed and Muriel was still trying to decide what to send. Mamma said nothing, but watched pretty closely. Five days had gone by since the invitation came. Muriel was wandering around in the yard. Soon mamma heard her bounding up the steps, "Mamma, I know what to send cousin. You give me a nice card and a pencil and tell me how to spell the words and I'll print my little prayer for her." (Meaning Mrs. Eddy's "New Year Gift to the Little Children"). "'Cause you know, mamma, that prayer cures *anything*." Muriel's eyes shone like stars, so happy was she with her beautiful thought, and how glad was her mamma's heart that the child should choose, above all else, the dear Prayer that means so much to Scientists.

Mamma suggested that she ask papa to do the printing for her. So at night Muriel repeated the Prayer to papa, and he put it on a card with our dear Mother's name as author, and it was mailed to little cousin. Soon there came a letter from cousin's mamma, saying, "Bless the darling, it was a beautiful thought that prompted her to send Norma the dear little Prayer, and Norma had me teach it to her right away."

Muriel has a baby sister who has chimed in with her each night to say the Children's Prayer, and now baby says it all alone. Whenever anything about baby is inharmonious, even a kettle boiling over, she says, "Dod is 'ove." "No harm tan tome to Baby."

I could fill pages telling of the demonstrations which we as a family, have had, but cannot find words to express my gratitude to the faithful Mother who has labored so unselfishly for us all.

I found Science at last after looking for God twenty-four years, although I was brought up by the best of parents, and never knew of any other than a Christian life. Then when I did find something better (?) it was false Science. I was three years floundering in that before I ever knew that there was a true Science.

Louise Sherwood Andrews, Galesburg, Ill.

Always delicate from childhood and subject to frequent illness, I found myself at an early age, after a season of severe mental work, a victim of nervous prostration, combined with insomnia and dyspepsia. So much did I suffer that it seemed sometimes as if my mind would give way.

After several years I improved somewhat, with the use of medicine, but any extra exertion brought on the same trouble. Then came a severe illness, a surgical operation, and an accident which made me a cripple and partially paralyzed for several months.

As inability to sleep became unendurable, and as I stoutly refused morphine, my physician recommended a prescription which he called harmless, and its use was continued for a term of years without increasing the dose. But in time I became extremely nervous, irritable, thin, and haggard, and loathed the thought of being dependent on drugs for rest.

During the next two years I was treated in Christian Science two or three times for a short period by a faithful student of our Mother, who has since become my teacher; but household cares seemed to prevent my persevering until the error was overcome. Finally, three years ago, I came to a point where Science was my only hope, and it then seemed a forlorn one. For two weeks I struggled with weakness and delirium, but held fast to the Truth made manifest through the self-sacrificing efforts of the lady who treated me, and at last came up out of Egypt.

My weight then was ninety pounds, now it is one hundred and fifty pounds, and I am stronger than ever before. Since then the Truth has conquered a case of diphtheria and two cases of la grippe in my own family, and a case of cancer of the stomach, in a patient not of our household, as well as many lesser claims.—*H. M. W., Denver, Col.*

In this little town of Montrose, Col., Christian Science has been lived and taught for ten years. Many have been led into the Light, but our population is a shifting one, and so our steady membership seems to grow slowly. About eighteen months ago we organized into a church. We rent a large room, centrally located, and have a good attendance. Through steady adherence to our beloved Leader's teachings so far as we understand and assimilate them, we have gained the decided respect of a town that once bitterly opposed Christian Science. We also have many demonstrations of the realization of God's power.

A father who was healed from chronic invalidism, brought his infant through a severe attack of membranous croup.

A little girl of two summers was almost covered with bee stings. Her grandmother, a Scientist, treated the child, and the little one responded immediately to Truth, nothing but the black specks remaining to tell the story.

One dear old lady of seventy-six years brought herself out of a stroke of paralysis through her realization of the One Power, and another of the same age has overcome bitter opposition at her son's home and now sees her grandchildren coming to our Sunday School.

The healing of sin in some of our now most regular attendants is our greatest reward, and is acknowledged by the town.

May we live more and more up to our glorious lessons in Christ's teachings,—the "Diamond Sermon."

Margaret E. Halley, Montrose, Col.

NOTICES.

THE Wednesday experience meeting for subjects of general interest pertaining to Christian Science, as well as personal experience, is now called the *Wednesday Evening Meeting*.

A member of the Board of Lectureship will lecture at these meetings as often as once in three months. The Christian Science Board of Directors of the Mother Church, and the branch churches of Christ, Scientist, may apply to the Board of Lectureship for lecturers, within the bounds of their sections or precincts in the United States, Canada, or Great Britain.

MARY BAKER G. EDDY.

PLEASANT VIEW, CONCORD, N. H., Sept. 15, 1898.

The next meeting of the First Members for the purpose of admitting candidates to membership in the Mother Church, will be held on the first Tuesday in November, 1898.

Applications for membership to be presented at that meeting must be in the hands of the clerk on or before the twentieth day of October, 1898. They should be sent to 95 Falmouth St., Boston, Mass.

WILLIAM B. JOHNSON, *Clerk*.

The above notice was published in the *Journal* for September, 1898.

When sending for the *Christian Science Weekly* for an unexpired term of the *Journal*, please be careful to send the correct amount. These subscriptions should be reckoned up to and include the month named on the address of the *Journal*.

ALL correspondence with the clerk of the Mother Church on matters pertaining to his office, should be addressed to William B. Johnson, C. S. B., 95 Falmouth St., Boston, Mass.

PER CAPITA TAXES and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Please read the above card of the Rev. Mary Baker Eddy, as it contains changes since its former publication (excepting last week).—*Ed.*

Works on Christian Science

WRITTEN BY

Rev. MARY BAKER G. EDDY.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid	$3 18
Two to Twelve books to one address, each, Prepaid	3 00
Twelve or more books to one address, each, Prepaid	2 75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid	6 00
Twelve or more to one address, each, Prepaid	5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid	$2 25
Twelve or more books to one address, each, Prepaid	2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

VOL. 1 BOSTON, MASS., U.S.A., OCTOBER 27, 1898. NO. 9

PRESIDENT McKINLEY AT THE OMAHA EXPOSITION.

A great Ovation and interesting Remarks.

THE following is an extract of the remarks of President McKinley at the Trans-Mississippi Exposition, Omaha, Neb., on "President's Day," October 12, 1898:—

"The faith of a Christian nation recognizes the hand of Almighty God in the ordeal through which we have passed. Divine favor seemed manifest everywhere. In fighting for humanity's sake we have been signally blessed. We did not seek war. To avoid it, if this could be done in justice and honor to the rights of our neighbors and ourselves, was our constant prayer. The war was no more invited by us than were the questions which are laid at our door by its results.

"Now, as then, we will do our duty. The problems will not be solved in a day. Patience will be required; patience combined with sincerity of purpose and unshaken resolution to do right, seeking only the highest good of the nation and recognizing no other obligation, pursuing no other path but that of duty.

"Right action follows right purpose. We may not at all times be able to divine the future, the way may not always seem clear; but if our aims are high and unselfish, somehow and in some way the right end will be reached. The genius of the nation; its freedom, its wisdom, its humanity, its courage, its justice, favored by Divine Providence, will make it equal to every task and the master of every emergency."

The following account of the President's departure from Omaha, and his remarks there and at other points, will also be found of interest:—

The ride to the depot was a repetition of the scenes of yesterday, cheering people lining the streets to obtain a glimpse of the President. About the depot were gathered thousands of persons. They called for the President after he entered his car, and he went out on the platform. He shook hands with some of them, had a trainman open the gate, and going down on the bottom step, shook hands with all who could get near him. Still the crowd was not satisfied and called for a speech. He said:—

"I thank you more than words can tell for your many kindnesses to me during my visit to your city and your magnificent Exposition. What has pleased me more than anything else on my entire trip is to witness the exhibitions of patriotism throughout the country. I am glad to see that in Nebraska, as through the whole land, the people ever love good government, and dearly love the old flag. It is very hard for me to say good-bye to Omaha, you have all made my trip so delightful. But I must say good-bye now. Again I thank you."

Each sentence was marked with applause and vociferous cheering. The signal to start was given, and the train pulled out, with President McKinley standing on the rear platform, bowing and waving his handkerchief.

At Council Bluffs Mr. McKinley again responded to the cheers of a great crowd, and said: "Nothing has given me greater satisfaction as I have journeyed through the country than to look into the cheerful faces of the people and to be assured from their appearance that despair no longer hangs over the West, but that you are having . fair share of prosperity, and not only that, but you are having a baptism of patriotism in which we all rejoice."

At Hastings President McKinley spoke as follows:—

"We have pretty much everything in this country to make it happy. We have good money, we have ample revenues, we have unquestioned national credit, but what we want is new markets, and as trade follows the flag, it looks very much as if we were going to have new markets."

ITEMS OF INTEREST.

On October 20, the Supreme Commandery of the Knights of Malta elected the following named officers: Supreme Commander, E. W. Samuel, M. D., Pennsylvania, re-elected; Supreme Generalissimo, John W. Hicks, Massachusetts; Supreme Captain-General, J. H. Hoffman, Pennsylvania; Supreme Prelate, Edwin S. McGill, Minnesota; Supreme Recorder, Frank Gray, Pennsylvania, re-elected; Supreme Treasurer, W. J. Rugh, Pennsylvania, re-elected; Supreme Senior Warden, Frank M. Williams, Pennsylvania; Supreme Junior Warden, James B. Bell, New Jersey; Supreme Sentinel, A. B. Jones, Pennsylvania, re-elected; Supreme First Guard, Moses B. Bullock, Delaware; Supreme Second Guard, J. P. Kinney, Pennsylvania; Supreme Standard Bearer, George S. Jones, Massachusetts, re-elected; Supreme Sword Bearer, J. D. Ellenberg, New Jersey, re-elected; Supreme Trustee, elected for three years, Charles W. Bassler, Pennsylvania.

Philadelphia, the headquarters of the Supreme Grand Commandery, was chosen as the next place of meeting of the body.

The Peace Jubilee recently held at Chicago was a brilliant success. President McKinley was there. In response to enthusiastic calls he made a brief speech, from which we quote the following:—

"It is gratifying to all of us to know that this has never ceased to be a war of humanity. The last ship that came out of the harbor of Havana before war was declared was an American ship which had taken to the suffering people of Cuba the supplies furnished by American charity. And the first ship to sail into the harbor of Santiago was another American ship bearing food supplies to the suffering Cubans. And I am sure it is the universal prayer of American citizens that justice and humanity and civilization shall characterize the final settlement of peace as they have distinguished the progress of the war."

The Hon. Walter Hazell, M. P., Treasurer of the London Peace Society, and widely known as a philanthropist, in answer to a question as to how the peace movement was progressing in England, recently said, "There is a strong and steady trend of feeling toward international arbitration. Only the predominance of this feeling in my city could have

Copyrighted, 1898, by Mary Baker G. Eddy.

Digitized by Google

elected me to Parliament. There are few 'peace at any price' men in England, but there are plenty of us who will declare for peace at almost any price, and I think that the majority of our intelligent people now take this position. My interviews with high officials of your government have been pleasant and satisfactory, especially my meeting with the Secretary of State."

A Walker (Minn.) special to the *Dispatch* says:—

Indian Commissioner Jones and John Bassett, an interpreter, left here to-day (October 19) on the steamer Flora for Black Duck Point, to bring in the Indians who promised to surrender.

In a letter to General Bacon, it was stated that the chiefs and head men of the Pillager band of Chippewas desired to express to him personally their gratitude for his forbearance toward them in their trouble.

Commissioner Jones, in a speech, said it was due to General Bacon's battle and his subsequent conduct of affairs that a peaceful solution of the trouble with the Indians was brought about promptly.

A London news agency has a dispatch from Shanghai, which says:—

"Reports from Japanese sources are in circulation here to the effect that Sir Claude MacDonald, British minister at Pekin, has informed the Chinese government that sovereignty appertains solely to the Emperor, who has been forcibly abducted and deposed, and that he must be restored to his position, while Kang-Yu-Wei and the other reformers must be pardoned. Failing compliance, Great Britain will enforce these demands."

Word comes from Philadelphia that all previous records of exports of grain from that port to foreign shores have been broken, the engagement aggregating something about two million bushels last week, and a like amount for the two weeks preceding. Those familiar with the foreign trade say the buying would have assumed larger proportions had it not been for the ocean rates, which now rule higher than during the corresponding period a year ago. Grain exporters there say that this unusual demand may continue for some months.

Secretary Long favors a new naval militia. His plan, as it will be presented to Congress, contemplates the amalgamation of all the state reservations under one body, to be placed under the direct management and control of the government. Also a complete re-organization of the present system, so that all the officers of the state militia are to be commissioned by the President instead of by the governors, as at present.

At Chicago, on October 17, the University of Chicago conferred upon President McKinley the degree of Doctor of Laws. The large audience which filled Kent's Theatre to overflowing applauded to the echo as President Harper placed around the shoulders of the nation's executive the hood of purple—purple to indicate that the recipient of the degree "had surpassed other men in native genius and devotion to it."

Four additional denominations in internal revenue stamps have been issued by the government, and some of them are now for sale at the several offices. They are 1½-cents and 3¾-cents proprietary stamps, 40-cents and 80-cents stamps. The two latter denominations have not yet been received at the Boston office, but they have been sent out by the Treasury Department.

The White Star line steamship Majestic, with the British colonial secretary, Joseph Chamberlain, on board, arrived at Queenstown, October 19. In a speech to the passengers he said that an Anglo-American alliance was a matter to be settled in the near future. He returned to England, he said, with that object in mind, firmly believing that such an alliance would be consummated.

There can no longer be any doubt as to the attitude of the United States toward the Cuban debt. The American commissioners have declined to assume any part of it. They also decline to accept a cession of sovereignty to the United States, for if it should accept it, Spain would claim that such a cession would impose an obligation for the debt.

The China trade report for 1897, recently received by the Treasury Bureau of Statistics, indicates that American exports into China are increasing, while those of other foreign countries are diminishing. There has been a surprising gain in kerosene, and American cottons are displacing the English.

Reports from San Juan, Porto Rico, are to the effect that all is quiet there. Major-General Brooke is installed in the palace, and Brigadier-General Henry remains as commander of the District of Ponce. Brigadier-General Grant has been appointed commander of the District of San Juan.

The oath of allegiance to the United States has been taken by five judges of the Superior Court in Porto Rico, who later will administer the same oath to their subordinates. Spanish judges who do not desire to forswear their allegiance to Spain will be returned to the peninsula.

A feat in telephony was recently accomplished by talking over the wire from Boston to Kansas City, a distance of about 1,560 miles, the longest ever covered by a single telephonic circuit, and which a few years ago was supposed to be impossible.

A dominant feature of the business situation during the last week was the foreign demand for wheat, wheat flour, and nearly all of our cereal products. The volume of business in this respect ranks higher than at any corresponding period.

The American flag was raised at Porto Rico, October 18, just thirty years after it went up at Sitka in token of the establishment of our sovereignty over Alaska.

Newspapers recently received at Vancouver, British Columbia, by the Empress of Japan, contain the somewhat startling information that Li Hung Chang and the Dowager Empress of China have been secretly married.

It is reported that great activity prevails at the navy yard at Toulon. France is said to be getting rapidly into fighting trim. The embarkation of war materials continues, and naval officers are to return.

Upon the occasion of the dedication of the three Free Homes for Consumptives in Dorchester, Mass., recently, his Holiness, the Pope, sent his congratulations and blessing upon the institution.

The National Council of Women of the United States will meet at Omaha, October 24 to 29, under the auspices of the Women's Department of the Trans-Mississippi Exposition.

Rear-Admiral Dewey has seized all of Aguinaldo's steamers. This act on the part of the Americans has made the natives indignant and their attitude is threatening.

President McKinley was cheered by thronging thousands at all important points on his return trip from the Omaha Exposition.

A severe snowstorm in Washington, D. C., on October 18, is certainly not an every-day occurrence.

The United States of America now consists of forty-five states, six territories, and one colony.

MISCELLANY.

An earnest worker writes us a letter relative to her local society, from which we extract the following:—

"Most of us have been tried as by fire in many ways. We are few and poor in this world's goods, but all are earnest seekers for the whole Truth, as taught by the Master and our Leader. The contributions to the support of the work are small indeed, but I am sure it is all the members can pay. As an example of about all of our members, I will mention one man, Mr. C. of Bellefonte. His wages are ninety-five cents per day. He has to pay house rent and support his family of seven. He pays twenty cents per month towards the support of the church. It is all that he can pay, but that man, poor as he is, has nearly all of the Mother's books, takes the *Journal* and *Quarterly*, has 'The Journeyings of Jesus,' and Cruden's Concordance. At first he seemed less promising than others, but his growth in grace and in spiritual knowledge is a surprise, and his family too have been transformed by the blessed teaching of Christian Science."

EXTRACT FROM A LETTER:—"As to the *Weekly*, I cannot tell you what I think of that, only I feel all that has been said or written about it. For a year I have felt a lack somewhere that I could not define until this came, and at once I knew, for this filled it.

"I feel a strength and solidity between the lines of the *Journal* that makes me straighten up every time it comes, and the new Quarterlies are marvelous. That the committee can know and meet my weekly needs can be explained in only one way,—the realization of the ever-present Truth. The study of these lessons is what keeps my courage up whenever it begins to ebb a little.

"The Mother-heart that can reach so far into the Field, and see and meet the needs of her little ones, and never fail in supplying them to such a marvelous fulness, proves itself more and more to proceed from but one Source."

One after another our beliefs are knocked in the head. Now it is laughter that is dangerous and to be avoided. Goodness knows the world is none too jolly, but if laughing produces nervous exhaustion what can be done to preserve our nerves except we pull long faces and look more melancholy than we are. What becomes of the injunction to laugh and grow fat, if the British *Medical Journal* is right about it being injurious to hysterical girls and boys? It strikes a sane person that medical science must be languishing for lack of something to discuss, when it attacks the very thing that conduces to the general cheerfulness of mankind. Because some weakling may suffer from immoderate hilarity, shall the dangers of laughing be brought to the consideration of normal, wholesome-minded people? Perish the thought! Laugh if you can, and don't think what the cachinnation may be doing to your heart.—*Boston Herald.*

The annual Chicago day celebration of the Hamilton Club was held October 10, in the Auditorium Theatre, Chicago. Chauncey M. Depew, as guest of the club, was the principal speaker. He said in part,—

"Certainly what has transpired since November, 1896, astonished even the American people. From industrial paralysis has come industrial activity; from an isolated nation, living within itself, seeking only the development of its own resources, we have become a great world power.

"The political atmosphere was cleared of clouds, the financial atmosphere of distrust, the business atmosphere of despair, and the American mind of dreams by the election of William McKinley. To-day we are not only becoming dangerous competitors of the nations of Europe within their own boundaries, but we are to follow them across the Pacific and enter the Orient."

The other day a distracted mother brought her daughter to see a physician. The girl was suffering from "general lowness." The doctor prescribed for her a glass of claret three times a day with her meals. The mother was somewhat deaf but apparently heard all he said, and bore off her daughter. In ten days time they were back again, and the girl was rosy-cheeked, smiling, and the picture of health. The doctor congratulated himself upon the keen insight he had displayed in his diagnosis of the case. "I am glad to see that your daughter is so much better," he said. "Yes," exclaimed the grateful mother; "thanks to you, doctor! She has had just what you ordered. She has eaten carrots three times a day since we were here, and sometimes oftener—and once or twice uncooked—and now look at her!"—*Argonaut.*

The doctrine of eternal punishment is discussed in this week's *Congregationalist*, and the editor states that "the more logical method is that of deciding the question independently of Christ's teaching about it, and thus showing that if he was as well informed concerning the future world as intelligent men now are, he could not have taught that future punishment is eternal. This method appears to be growing in favor. We think it is the most convincing form of argument yet advanced against a doom which many Christians cannot bring themselves to believe has ever been or ever will be authoritatively pronounced against any one."

Boston Evening Transcript.

The Rt. Hon. Charles Adolphus Murray, Earl of Dunmore, Scotland, was present with his wife, Lady Dunmore, and two daughters, at the Christian Science experience meeting of this week, in the "Mother Church," and stated that he had been healed of an internal injury through Christian Science, and referred to the spiritual light which Christian Science had brought to him and his family. He alluded, in closing, to the increasing friendship between England and this country, and predicted an alliance based on the broad principles of Christianity.—*Boston Evening Transcript.*

First Church of Christ, Scientist, at Pana, Ill., moved into its new room in the Y. M. C. A. Building, the finest in the city, October 2. Among the guests attending the services from out of the city were Mrs. Elizabeth Harris, First Reader at Springfield, Ill.; Mr. and Mrs. William Camp, earnest Christian Science workers of Clinton, Ill.; Mr. William Tice, the only Scientist known to be at Shelbyville, Ill., and Mrs. Lolo Wall, a Scientist of Chicago.

A MODERN DRUG STORE AD.

Just drop into our store to-day
And see the prices fall.
Our peerless bargains bring disease
Within the reach of all!

Life.

The *British Weekly* says: "American preachers in London are outspoken in declaring their country's good feeling towards England. Few, however, have gone so far as Dr. Gladden in the selection of a text from the words of Ruth to Naomi—'Thy people shall be my people.'"

At the thanksgiving services in Chicago on Sunday, which President McKinley attended, he listened to addresses by a Jewish rabbi, a Roman Catholic priest, a Presbyterian clergyman, and a noted colored orator.—*Boston Herald.*

Joaquin Miller has got back from the Klondike and built himself a granite boulder tomb. He has been getting ready to die for years, but will probably outlive all the young poets who are just beginning to read his works.

Dr. Joseph Parker of London says: "We want a speaking church. We want a church of testimony."

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

EDITORIAL.

ABOUT two years since there was organized in Chicago a movement for the comparative study of religions and religious sects, under the general head of The University Association and World's Congress Extension. It is said that this educational movement was the outgrowth of the World's Congress held in Chicago during the Columbian Exposition. The Association publishes a monthly magazine called *Progress*, in each issue of which are published a number of articles or papers setting forth the religious tenets of the various religions. The principal object of the movement is said to be to carry on the work of self-culture by individual effort, or in local centers, or organizations, along the line of Normal School and University Extension; thus bringing our public schools and the higher institutions of learning into close relationship, and in turn stimulating the attendance of students upon them, and to aid the teachers of public and private schools in thorough and systematic preparation for their duties. These objects are being carried out by carefully prepared lessons by college and university professors; with side-lights, incidents, biographies, etc. Each paper or lesson is accompanied with questions, which are to be answered by the students where Association centers are formed. A resident instructor has been selected by the center, who will meet the members at stated times to discuss and review the subject studied. Quarterly examinations are held by the local instructor. At the close of each course of study an examination is held on questions furnished by the instructors. These questions are sent from the central office of the University Association to local deputy examiners, who conduct such examinations after the manner of the London University examiners, or after that followed by examiners for State Teachers' Certificates. Papers are then sent to the home office, where they are passed upon by the Educational Committee. On passing the stated examination at the close of each study, members receive a diploma, setting forth the work accomplished.

The tenth number of *Progress*, the monthly magazine of this Association, contains, among other interesting papers, an article on Christian Science, briefly biographical, historical, definitional, and statistical. It also contains a copy of the Church Tenets of The First Church of Christ, Scientist, in Boston, Mass. It is accompanied with a very fair portrait of the Rev. Mary Baker G. Eddy.

At the close of the lesson,—for as such it is treated by the editor of the magazine,—the following questions are submitted for answer:—

Sketch the early life of Mary Baker Eddy.
What occasioned the discovery of Metaphysical healing?
In what book was the explanation sought and found?
Define God, man, sense, soul, and the real.
What is God?
What does communion with Him confer?
How is prayer properly understood?
How did Jesus heal the sick?
How can we?
What evidence of this doctrine has been given?
Sketch the distinctive features of the service.
State the six Church Tenets.
Give the present statistics.

Under the head of subjects for special study is the following:—

"Read and estimate 'Science and Health with Key to the Scriptures.'"

Mr. Edmund Buckley, Ph.D., of Chicago, is the editor of this monthly magazine.

These questions were formulated by the authorities of the Association, not by the author of the article. Copies of this number can be had of the Christian Science Publishing Society. Price, 35 cents.

THREE CASES OF HEALING.

BY WILLIAM J. KLIPP.

A YOUNG man, the son of a Scientist, but who was not interested in Science himself, fell from an excursion train while it was yet in motion, landing on his head and becoming unconscious for a time. His scalp was torn from his head and hung down over his cheek; there were bruises about the face and one eye was in a very bad condition. With the aid of a companion he made his way to his home a mile distant through back streets, fearing that, if he encountered a policeman, he would be taken to a hospital, of which he had a horror. He wished to go home and have his mother treat him.

When he reached home, his mother and sister immediately put down their sense of fear and realized the ever-present Good. I was then asked to take the case. A doctor who was summoned for the surgical part, sewed up the scalp, taking twenty-one stitches. He wished to have the young man taken to a hospital, but the mother would not consent. During his visit he picked up the Christian Science Hymnal and smiled in a knowing way; then turning to the mother he tried to impress her with the seriousness of the case, and cautioned her to watch for signs of twitching during the night, assuring her that such signs would develop into convulsions and result in a speedy death if he were not immediately summoned.

Next morning the young man was about the house well, and absolutely without pain. The doctor was astonished and dazed, and declared that when he first saw the patient the evening before he thought he would not live more than fifteen minutes. In less than a week the stitches were removed, and in two weeks the young man went to work. I treated the case one week and two days. The last time I called I saw him in the yard cutting grass. Did I treat that case more than others? No, not so much; for I felt that man had very little to do with it. All sense of responsibility is eliminated from my thought at such times, because I realize that God is all, in whom "all being is painless and permanent" (Science and Health).

Another case: A young boy seven years old was taken with some ailment which resulted in all sorts of complications. After months of sickness, pneumonia was developed,

Digitized by Google

which became so serious that the attending physician called in three others in consultation, and it was decided to cut a piece of rib from the boy's side, and through the aperture to insert a silver tube, thus making an outlet for the pus which had accumulated, and which they said would very shortly deprive the child of breath and life, if not relieved in the manner above described.

The child's life was despaired of, and the mother, as a last resort, came to me. She told me about the case, and said that one doctor had made one hundred and four calls, and that others had assisted in the operation. I went, knowing that God was the only healer. The boy was much bent to the side where the tube was inserted, and seemed to be in a bad way physically. The next day I called and found him sitting up in bed playing, and in three days the tube was removed. In ten days the boy walked over half a mile, and in two weeks was entirely well.

At the same time I was treating the above case, realizing God as the only power and the only healer, another case came to me which seemed very dangerous. It was that of a boy, also seven years old, who had pneumonia and paralysis of the lower limbs. He had been doctored by a prominent physician, who finally gave him up to die. The mother desired me to take charge of the case. I found the patient in bed, and the mother, to show me how utterly helpless he was, attempted to stand him on his feet on the floor. His legs collapsed under him and were utterly without feeling. Pills and medicine were immediately destroyed, and the mother's reliance placed entirely upon Truth. The boy had not eaten anything for some days, but two hours after my call, he ate two eggs, besides other food, and also drank. The next day he was sensible of feeling when his legs were pinched, and on the following day I found him standing against a chair. After that he learned to walk as a child would learn; first standing against a chair, after a while venturing to take a step or two, and then going from one chair to another, and finally walking and running as well as ever. In two weeks from my first visit he was well.

Do not let any one imagine that all my cases respond as readily to Truth's ministrations as the above; far from it. I have had many slow cases. Man is simply an humble instrument in God's hand, and can only *reflect* the Truth, and Truth will do its perfect work. Never doubt God's power to destroy sickness and sin, and you will surely go on from demonstration to demonstration, ascending the mount of Revelation, and finally gaining for yourself the approbation and benediction of the Master, "Well done, thou good and faithful servant, enter thou into the joy of thy Lord."

MENTAL SURGERY.

In the middle of last summer (1897), a young lady, who attends our church and is much interested in Christian Science, was riding her bicycle. Coming near a corner where a large boulder had been placed to keep people off the boulevard, she saw a lady in a heavy "spider" phaeton coming, and saw that she had not room to turn to the right and pass between the stone and phaeton, so started to turn to the left. Just as she did this the lady touched her horse with the whip. The horse was so close that the young lady put her hand on its shoulder, but her wheel turned under the horse's feet and both the horse and the phaeton passed over the wheel and one of her limbs. The bicycle was crushed, simply ruined. Those who saw it called a carriage and sent for a physician to be at her home upon her arrival. The physician, after examination, declared it to be a breakage of two bones, and that she was dreadfully bruised. This was Saturday night; Sunday morning the doctor called, but said the leg was too badly swollen to set; and again stated that two bones were broken. Monday and Tuesday he came and confirmed his first statement, but said he would come Wednesday and bandage it any way. After his Tuesday morning call a Scientist called, just having heard of the affair. The young lady asked for Christian Science treatment.

The practitioner did not reach her until noon on Tuesday, gave a treatment, combatted the medical statement that the patient would have to sit with her foot on a chair for six weeks and would not be able to walk for three months.

The next morning (Wednesday) the doctor came and examined the limb preparatory to bandaging it. Then re-examining it, he said, "I was sure the bones were broken, but they are not. It is a dreadful sprain, however, and I will bandage it." The patient demurred, but he insisted, saying that if the bandages hurt her too much she could remove them. She permitted him to do it, and a short time after he went away she took them off.

She told him he need not come longer. Still he told her she was to sit with her foot on a chair for six weeks, as a sprain is considered more difficult to overcome than a broken bone, according to medical belief. In three weeks she was able to walk around the house, and not long afterwards walked twelve blocks.

At the expiration of the "six weeks she was to sit with her foot up on a chair," she was at the State Fair in Des Moines, Iowa, as an expert sewing machine operator in charge of the Singer Sewing Machine exhibit, and afterwards in Springfield at the Illinois State Fair in the same position, either standing, or running the machine all day. In the interval of the three weeks, public thought flowed strongly towards her, as well as the church thought, for the family were members of a Protestant church, as indeed she is yet, but the family were very lovely and without antagonistic thought towards the treatment.

All sorts of calamities were foretold for her, but, thanks be to the supreme power of Truth, none have been verified and she does not walk at all unevenly.

Sarah A. Durfee, Decatur, Ill.

THE TRUE AND THE FALSE.

A few months ago the editor of the *News Letter* sent a copy of his paper to a friend, who was not a Scientist, with the hope that his interest might be aroused on the subject of Christian Science. A week or so after, this friend met the editor on the streets of Washington, when the following conversation occurred:—

Friend. Wife and I have been thinking about these Christian Scientists considerably. The truth is, she has an ailment, which the doctors say will keep her in bed from eighteen months to three years, and maybe always. Now I would like to know what you know about these Scientists.

Editor. I know all about them.

Friend. Can they cure the sick?

Editor. They are curing the sick every day in this city. They have cured me, several members of my family, and many others I know of.

Friend. Do you suppose they could cure my wife?

Editor. Certainly God can cure her; nothing is impossible for God. Christian Science is truly God's method of curing the sick.

The foregoing conversation was supplemented with the information of where a Scientist lived, the friend saying he would call that night.

He did call at the lady's house that night, but she was not in. He went home and found in his house a lady who advised him to employ another healer. The one she advised had been a student of Mrs. Eddy, but had left the faith laid out by that great Leader and was practising healing in the name of "practical Christianity," along his own path. He was sent for and attended the lady some few weeks but did no good.

About that time the editor and wife were visiting in that part of the city, and called upon "friend" and wife. She was still in bed, and said she was no better and had lost faith

Digitized by Google

in this God-healing. The editor asked if the lady he recommended had been called, when he was informed of the facts as they were. He told him at once that there were the TRUE and the FALSE in this field the same as all others. That if his wife was to be cured, he must discharge the practitioner he had and go for the one first recommended.

This course was followed, the genuine Scientist visited the patient three times, then the patient visited her two or three times, then left the city on a pleasure tour to the Thousand Isles in the St. Lawrence River.

The editor saw her son this week who said his mother was in splendid health.

Christian Science is often discredited by the acts and conduct of those who are not following the laws and rules of Christian Science.

In selecting be certain that you know the TRUE from the FALSE.—*Washington News Letter.*

EXTRACT FROM A LETTER.

I AM pleased to be able to report to you how divine Love has placed seed, soil, and sower in this field. Ten weeks ago, when we first came here, we found from six to twelve Scientists attending services. We immediately took hold of the work and procured a suitable place, with the result that at one of our recent Wednesday evening meetings we had out to hear the Truth from eighty to ninety individuals. Only forty or forty-five of these are regulars, the rest being investigators, the result being that the tone against Christian Science has changed very much in this field.

One minister, who had preached two sermons against the healing of Christian Science, told some friends of ours that since we had come here, he had seen enough practical results to know that it was along the line of Apostolic work, and that he would never again say anything against Christian Science healing so long as they stuck to Apostolic teachings.

Another minister said that he believed God to be divine Principle, and has been to see a patient who is now under our charge, saying he was glad to note the improvement in that patient, and when the patient recovered he would like to talk with him further.—*W. B. D., South Bend., Indiana.*

THE BOARD OF EDUCATION.

THE Board of Education has prepared printed application blanks to be used by those who desire to appear before it for examination.

These blanks are now ready, and can be procured by written application addressed to the Board of Education, 95 Falmouth St., Boston, Mass. No other form of application will be received.

This Board is authorized to send out twenty-one teachers annually. Although the examination will not be at all competitive, the Board will be obliged, all things being equal, to bestow the certificates with reference to the necessity for teachers in certain localities. The failure on the part of an applicant to receive a certificate will not necessarily imply any unworthiness.

Information as to the charge for examination will accompany the application blank.

The applications heretofore sent in will not answer. The printed forms must be used. All desiring to appear before the Board will have to apply again.

TESTIMONIES.

I am, by profession, a lawyer.

A boy of eighteen, I came home from the Confederate army a cripple, as I supposed, for life, scarcely able to write my own name and as ignorant generally as it is easy to conceive. I entirely withdrew from the world until I was twenty-five, and devoted all there was of me to school and the study of my chosen profession. I came to Texas in 1872 and commenced practising law in this state. I rose rapidly and accumulated money very fast and soon had quite a handsome little fortune, only, however, to learn that all in the world I knew was law and its practice; but not one thing about men or business, and no financial common sense whatever. The result was, that my property was swept away much more easily and rapidly than I had accumulated it; leaving me very much soured against the world in general and the people in particular.

I changed location, commenced again, soon had a large practice and again made money. I invested considerable in land, owing a debt on it of about four thousand dollars. I invested thirty-five or forty thousand dollars stocking and improving it. I could have paid all my debts, but again listened to men, and when the financial crash of that time came, I did not have business common sense enough to save more than a few hundred dollars out of the wreck. The balance all went, and with it my respect for men, very greatly my courage as a man, and my hopes of life.

In this broken-hearted condition I sought the consolation of Orthodox religion. The Bible appeared a confused jumble of mythological fables, all out of harmony with mortal mind, and that was what it then addressed. I found religion a dead and cold formalism. I, however, joined a church with promise and hope that peace would come in the line of so-called duty.

At this time I gathered up my little remnant, a few hundred dollars, came to Fort Worth, invested my last dollar in a comfortable little home, just out of town, located my large and helpless family there, opened an office to commence again a struggle against the future. Just then, before I had time to become acquainted or could command business, a cyclone came dashing down the dark channels of night, striking our little home, utterly destroying everything we had upon earth, not even leaving clothing to cover my family the next morning. The ruin was complete and awful. I tried to pray, with a crushing sense of a monstrous wrong and cruelty somewhere, I did not know where. Then came two ministers of the gospel of Christ (?)—think of it! and told me that God had ridden in that storm to destroy me and mine, to chastise me for my sins, and to make me better. In a word, had turned my loved ones, who had done no sin, out to the tender mercies of the world, beggars, for my sin. I shudder to think of that hour. I could hardly wait for the preachers to retire; when they did, I went out. I must have been insane then. I raved, I swore, I tore my very hair out, and O, how bitterly and deeply did I curse the God that had wrought wreck and ruin upon the helpless and innocent.

So hopeless and helpless I became from that hour, that the very day seemed blackness. For months I saw myself (and fully realized it), drifting into insanity and was powerless to help it. Indeed, I took a kind of frantic pleasure in contemplating the approaching ruin. Often I was almost overborne with an impulse to destroy myself. I had one dear friend to whom I talked of my condition. He saw it all, but could not help me. Many times the hideous shapes of insanity arose before me, grinning in my face and creaking in my ears. I hated humanity, despised human sympathy, and shunned human society. All I had known of Christian Science was from garbled newspaper reports. This was my condition, when a young man (I think his name was Norton) was announced to lecture in the Opera House. I went that I might hear some new fanaticism to laugh at and despise. I sat near the speaker and he had not talked long before I became perfectly calm, and then deeply interested. I went in believing that there was no Truth; I came out believing that there was Truth and Good, and that the speaker had an experimental knowledge of it. I said to my wife as we walked home, "If there is Truth, that man has it." We attended the next experience meeting on the following Friday night. Everybody was full of health, every heart

Digitized by Google

was full of peace, every face was full of light, and every act was full of love. I told my wife, as we walked home, that I saw more love, kindly attention, and interest in that short hour than I had seen in all my life before. A kind friend lent me "Science and Health with Key to the Scriptures," and with that magic key I unlocked the sacred volume. It drove away a legion of evils. Truth flashed its shining shafts of living light along the King's highway, grass-carpeted and flower-canopied, where I now walk, clothed and in my right mind, Hope my companion, ever sweetly singing of Good, and Truth, and Love. Thanks be to God, you friends who meet in the hall on Fourth Street and our Mother.—*J. L. C., Fort Worth, Tex.*

Although it is about three years since I first became interested in Christian Science, I have never taken the privilege of stating my experience through the columns of our publications.

I had been troubled for several years with a most severe and distressing form of dyspepsia, which caused me to be very exacting in my diet, and kept me from eating with my family, as I do at the present time. I also had liver trouble. My condition became worse and worse until finally my disease developed in a tumor of the stomach. I was constantly under the care of a doctor, who gave me this and that medicine, and finding no relief, the doctor, after consulting his colleagues, decided that the only means of relief would be an operation to remove the tumor. I had always had great fear of operations, and I am sure if one had been attempted it would have resulted in death.

About the time I was considering the operation, of course not favorably, a friend called my attention to Christian Science, and suggested a trial. I was ready to try anything but surgery if it would afford relief, and gladly gave my consent. After consulting Mrs. C. M., a Christian Scientist of this city, I made arrangements for treatment.

When my friend called to assist me to the house of Mrs. C. M. for the first treatment I was confined to my bed, but after a few moments conversation about Christian Science I arose and dressed to accompany her there; under any other circumstances I would not have attempted to walk.

After receiving the first treatment I felt better than I had for years, and on arriving at home it seemed to be almost a miracle that I had been out. After taking treatment for two weeks I was completely cured, and then became deeply interested in Christian Science. I have since then received many blessings through the Scriptures as taught in Science and Health, and have also been able to demonstrate the power of Truth over error in my family, and have since attended a class of instruction in Christian Science.

My son has also received a great blessing from Science. He was troubled for years with chronic astigmatism of the eyes and compelled to wear glasses, but was healed by one treatment.—*Mrs. E. Neubauer, Scranton, Pa.*

So few from this side of the water ever seem to write to the Christian Science publications to recount the many and marvelous releases from sin and sickness which have been wrought in this country, that one would almost think that America alone had benefited by the glorious Truths of Christian Science. I feel I should like to give my very small experience in token of my gratitude for all that Mrs. Eddy has done for us, and perhaps it may be a help to some of those who are still weighed down by sickness.

For ten years I was more or less of an invalid, quite unable to walk, and frequently in pain. I spent my life in consulting doctors all over Europe, nine of whom sent me to watering places, but all of no avail. Finally an eminent London doctor frankly told me I would never be well, so it was useless to waste my money on doctors. I was resigning myself to my fate when a friend told me of Christian Science, and of all the wonderful cures it had wrought.

At first I was sceptical, but on hearing more about it, I determined at least to go to a healer, and give it a trial, though I did not at all believe in it. After six weeks' treatment I was nearly well, and then I had the great privilege of going through a class and my cure was completed. I have never had any return of the old claim since.

This is only one of the many cases that have obtained similar relief. Indeed, if all on this side of the ocean wrote their experiences of freedom from sin and pain through Christian Science it would go far to outweigh our American brethren.—*E. T. Cunliffe, London, England.*

Everything mortal and material sinks into insignificance under the radiant light of the Truth of Christian Science. By many a bitter experience we learn that we cannot serve two masters, and our reward is rich when we rely entirely on Spirit to guide us. The way seems difficult, sometimes impossible, and temptation to give in to error of every kind seems to assail us the most when apparently we are trying our hardest to keep in a spiritual line of thought and action, but clinging closely enough and long enough to the Truth, divine Love opens the way of escape and urges us on to fresh endeavor and further victories.

It takes time to know exactly how to put on the whole armor of God, and we are apt to leave undefended our weakest point; but clad in that armor we are proof against all attack and can rest securely. I am beginning to realize that one cannot do everything at once, and that it takes time to pull up the weeds of character; that one must not be disheartened if at first it is one step forward, only to fall back shortly afterwards; patience must have her perfect work; and after tasting of the safety of Truth we cannot choose to be anything else than a student of a Science which leads into still waters, nor would we take anything else in exchange for this knowledge of God,—this pearl of great price. In our hearts is thankfulness unspeakable, and round about us angels whisper, "Be not weary in well doing."

Maud Donaldson, London, Eng.

CONCORD ITEMS.

The following items have been clipped from the *Concord Evening Monitor*, Concord, N. H.:—

The Earl and Countess of Dunmore, England, with their two daughters, Ladies Mildred and Victoria Murray, were the guests of Rev. Mary Baker Eddy at Pleasant View yesterday. Her driver took them over to see the St. Paul School. They are all staunch advocates of Christian Science, two of them having been healed by it of cases pronounced incurable by their physicians.

The recent meeting of the Grand Lodge, I. O. O. F., closed with the installation of officers. The following appointive officers were announced: Grand Marshall, James A. Leet, Enfield; Grand Conductor, George V. Moulton, Lancaster; Grand Guardian, George E. Chadwick, Enfield; Grand Herald, Frank H. Bown, Lebanon.

At the twenty-fifth annual meeting of the New Hampshire branch, Woman's Board of Missions, in Keene, Wednesday, Mrs. M. W. Nims of this city read the report of the home secretary.

W. D. Hutchin of this city has been appointed district deputy great sachem of the Red Men's Order in this state.

Henry Barrett Huntington, the new instructor in English at Dartmouth College, is a St. Paul's School boy.

NOTICES.

Per capita taxes and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Hereafter the Communion service in the Mother Church will be held once in each year; on the first Sunday in June, beginning in June, 1899.

Works on Christian Science

WRITTEN BY

Rev. MARY BAKER G. EDDY.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid	$3 18
Two to Twelve books to one address, each, Prepaid	3 00
Twelve or more books to one address, each, Prepaid	2 75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid	6 00
Twelve or more to one address, each, Prepaid	5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid	$2 25
Twelve or more books to one address, each, Prepaid	2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Cnurch in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

VOL. 1 BOSTON, MASS., U.S.A., NOVEMBER 3, 1898. NO. 10

AGAINST IMPERIALISM.

Dr. Lorimer Opposes Expansion.

DR. LORIMER declared against "imperialism" in his lecture at Tremont Temple, in the Boston Star Course.

He lectured on "Aristocracy in America." After tracing the permanence of aristocracies in republics, Dr. Lorimer said, "It is of the greatest importance that the rich in America should be in touch with our national life and institutions. Now that our borders are expanding, our aristocracy will become a more distinctive feature of our social existence. We cannot afford to permit it to develop in such a way as to endanger individual liberty."

In an effort to define American aristocracy, Dr. Lorimer examined the aristocracy of birth, of idleness, and of privilege, and the absurdity of their claims. "We have seen," he continued, "the gradual extinction of the old European families and the abolition in this country of the privileged class created by slavery. The daring assumptions of monopolies have brought wealth to those who naturally use it unscrupulously. This was demonstrated during the war, when many sons of prominent families were given commissions, which resulted disastrously to army organization. There were others who did honor to their family names. It has been truly said that humanity never had a chance till it reached America, and no country, certainly, ever had a line of monarchs that can compare with our chief magistrates. The real aristocrat is the servant of mankind. The knight must go forth again in quest of the Holy Grail, and 'who would not brave champions be in this, the lordlier chivalry?' This we did in the war with Spain; the college boys did it; and Helen Gould has won the queenly title of a devoted woman. I do not think we want the Philippines. The true 'imperialism' of America means the regeneration of this land as it is and the shedding of light upon the dark places of the earth. Those who stand for that are the true American aristocrates."

President Jordan Speaks against Imperialism at Omaha.

AN argument against imperialism was made by President David Starr Jordan of Stanford University at a session of the Liberal Congress of Religion at Omaha, and it was listened to by a crowded church.

Summed up, it was to the effect that a policy of expansion would make incumbent upon this country an expensive colonial system, with all that implies of a costly army and navy; that our government system would have to be largely changed from American republicanism to British imperialism; that the pursuits of war would take the place of pursuits of peace; that it is not suited to this country; that the effect of living in the tropics is to degenerate the Anglo-Saxon character; that a better way is to preserve the friendship between this country and Great Britain, and, finally, that this nation stands for an ideal of individual citizenship, which is a higher purpose for humanity than national aggrandizement.

Professor Jordan's paper was entitled, "Lest we forget," from Rudyard Kipling's hymn, "The Recessional."

ITEMS OF INTEREST.

About one hundred and fifty persons assembled in the banquet hall of the Hotel Vendome, Boston, Tuesday evening, October 25, at a reception given by the Massachusetts Single Tax League to the representatives of the State Y. M. C. A. The Rev. S. S. Craig, of Toronto, read a paper as did Mr. Wm. Lloyd Garrison. Mr. Garrison in his opening remarks said,—

"It is my pleasant duty to welcome you in behalf of the Massachusetts Single Tax League, and to ask your earnest consideration of the subject to be presented. Especially should the Young Men's Christian Associations feel interested in the ethical side of our contention, which embodies the essence of Christianity. Land monopoly is a distinct violation of the injunction, 'Do unto others as you would that others should do unto you.'"

The great Peace Jubilee at Philadelphia opened October 25 with a fine naval review. The Texas, Gloucester, Winslow, and six other warships took part in the marine pageant. The government was represented by the Hon. John D. Long, Secretary of the Navy. Throngs of spectators filled every bit of timber on either shore of the Delaware River, and jammed every available craft to the point of danger. The yacht May, with Secretary Long and the Washington party aboard, led the naval parade; the ships of the navy being anchored in single file in mid-stream,—a line extending a distance of three miles. Naval-Constructor Hobson and four of his Merrimac heroes, reached the city at 2.30 P.M. of that day. President McKinley and his party arrived on the 26th.

October 26, President McKinley was tendered a dinner and reception at the Union League Club in Philadelphia. President C. Stewart Patterson of the League welcomed the President. The latter responded briefly, extending a word of thanks. The following were present: Vice-President Hobart, Postmaster-General Smith, Secretary Wilson, Secretary Alger, General Miles, Commodore Philip, Captain Robley Evans, Captain Sigsbee, Generals Shafter, Wheeler, Chaffee, Patterson, Sumner, Lawson, Young, and Sickles; Private Secretary Porter, Captain A. Paget of the Royal British navy, Governor Hastings, and Mayor Warwick.

The Supreme Court of Illinois recently decided that the Pullman Car Company was holding $10,000,000 worth of lands and improvements in several cities illegally, and in violation of its charter. The real estate interests of the company comprise 476 acres of land in Pullman, car works, and workingmen's houses, aggregating $8,500,000. The income from these holdings last year was $1,132,086. The income from car manufacturing and earnings was $10,368,256. The company now have a surplus of $18,000,000.

The leading Spanish merchants of Buenos Ayres, Argentine Republic, have started a movement which they intend shall be made general throughout all the Spanish-American

Copyrighted, 1898, by Mary Baker G. Eddy.

Digitized by Google

republics, by which it is hoped to aid Spain by conducting practically all their trade relations with the mother country as against the United States and European countries. A meeting of all the principal importers of Buenos Ayres was recently held for the purpose of discussing plans to carry out their project.

Acting Attorney-General John K. Richards has rendered an opinion in relation to the status of the Chinese in the Hawaiian Islands, to the effect that the provisions of the treaty between the United States and China, providing for the departure and return to this country of registered Chinese laborers, are applicable to Chinese persons applying for admission to the Hawaiian Islands, or to such persons residing there as may wish to depart with the intention of returning.

There is a new cure for disease. Musical vibrations are the latest "pills" for the human sufferer, according to a Chicago authority. But if tone vibrations have the effect on the body that James Lowth says they have, what a pleasant operation for insomniac and neuralgic to be laid out on an organ, and then let some Boston organist pull the stops for all he is worth. It strikes musical people that this remedy would be worse than any possible disease.

Boston Herald.

The Bureau of Statistics of the Treasury Department has compiled data on the exportation of wire nails from the United States, from which it shows that this line of export has grown from 1,547,078 pounds in the fiscal year of 1888 to 22,894,099 pounds in the fiscal year of 1898. The annual increase has been phenomenal ever since the business of exporting began, and has been especially rapid within the last two or three years.

The national executive committee of the Society of the Spanish-American War, which was organized the day the peace protocol was signed, met at Baltimore, Md., October 28. The society is the growth of relief work done by patriotic women during the late war. It is proposed to provide memorials for the heroic dead, and the society is raising funds to carry out its projects. Miss Clara Barton was chosen president.

It is reported from Washington that President McKinley is convinced that there is no way in which the United States can escape the responsibility of taking all the Philippines. He has arrived at this conclusion after mature deliberation. He at first favored keeping nothing more than a military and naval post, and thought that the United States should in no event retain more than the island of Luzon.

The Acme Wrecking Company of San Francisco has made a request to the navy department for authority to raise the battleship Maine. The company has had experience in raising vessels on the Pacific coast, and representations have been made to the department as to its ability to accomplish the task in Havana harbor.

Minister Buck has informed the State Department that the Japanese government has appointed Mr. Jutaro Komura, vice minister of foreign affairs, to be minister of Japan to the United States. Mr. Komura was born in 1853 and studied law at Harvard University.

Postmaster-General Smith has issued an order directing that Hawaiian postage stamps shall be recognized at their face value for the prepayment of postage on all articles mailed in Hawaii, whether addressed for delivery in the United States or elsewhere.

Dwight L. Moody recently said in Denver, Col., that there never has been so much interest taken in the Bible since the world began, as now. During the last three years there have been more Bibles sold than in all the other 1893 years.

Latest reports from Japan tell of the marvelous development of ship building in that country. There has just been delivered at Nagasaki the largest steamer ever launched outside of American and European waters—the Hitachi Maru.

France is reported to be sobering down. The peril of engaging in war with England is becoming better understood by the French statesmen and journalists. On the whole, the war cloud seems to be dispersing over there.

The Omaha Exposition seems to have been a financial success. It is claimed that after paying all bills the stock holders will receive from seventy-five to ninety-five cents for every dollar they put into the enterprise.

The National Council of Jewish women recently held a session in the First Congregational Church at Omaha. Among those present were Mrs. Susan B. Anthony, Rev. Anna B. Shaw, and May Wright Sewell.

Reports from Paris indicate that France is willing conditionally to evacuate Fashoda. She seeks compensation to be arranged hereafter. The claims of Great Britain are therefore deemed just.

President McKinley has told Prime Minister Sagasta that the disposal by Spain of cannon from fortifications in the surrendered Spanish territory must cease; that they are regarded as immovable property.

Word comes from Paris, France, that the peace negotiations are progressing rapidly. Rumors of trouble at Paris are denied at Washington. Madrid thinks the treaty terms are almost reached.

The officials of the treasury department estimate that the war with Spain cost at the rate of $1,000,000 per day. The war of the Rebellion cost an average of $1,685,156 per day.

The official title of General Kitchener, whose elevation to the peerage was announced September 26, is "Lord Kitchener of Khartoum and Aspall, in the County of Suffolk."

The Sultan of Turkey extended a cordial welcome to the Emperor and Empress of Germany on the occasion of their recent visit to him.

General Stewart L. Woodford, late United States minister at Madrid, announces it as his opinion that the United States must hold Cuba.

All of Aguinaldo's men have withdrawn from Manila excepting from one suburb, and no trouble is expected from that quarter.

Admiral Dewey reports a condition of anarchy in the Philippines, although the situation is said not to be very serious.

The court of cassation has decided to grant a revision of the Dreyfus case, and will institute a supplementary investigation.

The entire French Cabinet resigned on October 25, amidst tumultuous scenes in the Chamber of Deputies.

General Lord Herbert Kitchener and Captain Baratier received an ovation in Paris upon their arrival there.

General Wood has gone to Manazillo to establish a civil government there on the Santiago plan.

The time for the evacuation of Cuba by the Spanish has been extended to January 1, 1899.

MISCELLANY.

TOTTEN'S WARNING.

"Prepare ye for the second coming of Christ; the twelfth hour is about to strike."

Captain Charles A. L. Totten, West Pointer, mathematician, writer, inventor, and savant, says the human race stands upon "an ominous threshold and that March next will witness the second advent of the Lord, which, to ordinary intellects, means the end of the world. "In the fulness of truth," he continues, "it means the end of man's haphazard, irresponsible methods and system. The 'iron crown' will be knocked off mortal brows and with an 'iron rod' immortal hands will thenceforth direct such human affairs as may survive the crisis. If this be not plain, God help the English understanding."

Captain Charles A. L. Totten, who predicts the second advent of Christ in the year 1899¼, is called by the world a dreamer, a man of fine, but in one line of misdirected, intellect. Yet as a matter of fact, Captain Totten is one of the few men whose prophecies, wild as they appear, are studied carefully and approached with respect by the scientific men of the age. They are read and studied perhaps not with any shade of belief in them, but because of the depth of the research which they display and of the mathematical mind, analytical almost beyond precedent, of which they give evidence. Totten's name is respected all over Europe.

This artillery officer bases his predictions on the Bible and mathematics. Some have said that "Totten makes a Bible of his calculus." He made a prophecy seven years ago and said that just before the end there would be a military era. The Spanish-American war, he now says, is the fulfilment of the prediction. There was a strong hint in the foretelling that Anglo-Saxon people would be arrayed against another race in war. Behold fulfilment the second! Russia and England are to dispute and perhaps go to war over the Eastern question. Lo, fulfilment, in part, the third. Will fulfilment the fourth come with the second advent?

Totten says of himself, his prophecy, and his work: "I am a Christian and am orthodox on the apostolic basis. I have studied the Bible with searching scrutiny. Before the bar of whatever mathematical and logical ability I possess, I have weighed, measured, and numbered much of its historical prophetical chronology, and find it to be without possible flaw. It is a perfect and stupendous system; a consecutive one, and its evolution cannot have been other than supernatural. The year 1899¼—March, 1899—is the end of the age and the beginning of the millennium, that is, of the seventh, or Sabbatic, thousand years."

W. L. Low, son of Colonel Low of Galveston, Texas, at the Wednesday evening Christian Science meeting last week, gave an account of his being healed of a complication of fevers which the doctor pronounced typhoid, yellow, and malarial, contracted in Cuba. He was landed at the Washington Hospital in such a condition that it was thought he could live but a short time, and through the intercessions of some kind friends he was taken to the house of a lady in this city, who chanced to be a Scientist. This lady prevailed upon the young man to try Christian Science for the healing of his complaint.

The father, Colonel R. G. Low, general manager of the Galveston-Dallas *News*, who had been telegraphed the condition of his son, hastened on to Washington to see him, if possible, before he died, and to convey the remains back to Texas for burial. One can imagine the father's surprise upon his arrival in this city to find that this, as he thought dying, son had been completely healed by Christian Science treatment.

Colonel Low visited President McKinley and told him of the wonderful cure which had been wrought upon his son. The President took a red carnation from his coat and gave it to the Colonel for his son with his kind respects and congratulations that he had been so marvelously and wonderfully cured.

Young Low's account of his healing and of the gratitude he feels towards God for this manifest blessing given to him was very beautiful to hear; and the gratitude of his father and family, he informs us, is equal to his, they all realizing the bountiful and beautiful love which God is showing to His children in every-day life.

Washington News Letter, October 19, 1898.

The death of Harold Frederic gives the regular doctors a chance at the Christian Scientists in England. Two regular doctors testified that they thought he would have recovered if he had had proper treatment; by "proper" they unquestionably meant their own treatment. It is altogether improbable that Harold Frederic was a believer in Christian Science; or in any system of medicine. His health and physique were magnificent in early life; and he was always ready to draw drafts upon his strength with a lavish hand. So true was this that when he went to France to write up the cholera-infected districts, we doubt if the thought ever occurred to him that he was exposing himself to the danger of disease and death. The fact is that Mr. Frederic expended his large patrimony of good health with prodigality, and when it was gone he turned to the doctors with the cheerful information that he didn't believe in them, and had not followed their directions. Beyond doubt he told the Christian Scientists the same thing. But they appear to be better natured over it than the regular physicians.

Utica Observer.

SOLOMON IN ALL HIS GLORY.

A donation party was given to a good country clergyman in part payment of his small salary, the principal result being twenty-seven bushels of beans and a large variety of second-hand clothing for his five children.

The patience of the clergyman's wife finally gave out. On the next Sunday she dressed all her five children in the donated second-hand clothing, and under her direction they marched up the aisle just as the good pastor was reading that beautiful passage, "Yet Solomon, in all his glory, was not arrayed like one of these." The next donation party was of a different character.—*Saturday Evening Post.*

Mr. Albert Metcalf of West Newton was recently elected president of the First Church of Christ, Scientist, in this city. He was the donor of the organ in that church, which has the reputation of being one of the best in Boston. Some years ago Mr. Metcalf's wife, through Christian Science, was healed of a severe illness of many years' duration, and he donated the organ in remembrance of the healing.

Boston Evening Transcript.

The *Leader* declares: "We are not commanded to believe in the devil; we are commanded to believe in God and the Lord Jesus Christ. We judge a man may be a very good Christian and yet repudiate utterly the notion of a personal devil. There is no ground for the superstition—clearly of pagan origin—that the devil mentioned in the New Testament is a personal being."

Brimstone Corner is true to its name in refusing to give up the sulphurous underworld. If the people who attend the ministrations at Park Street Church take any comfort in the thought that the major part of mankind was born to be damned, who shall begrudge it to them?

Boston Evening Transcript.

And now the Consumptives Home in Boston has been destroyed by fire. A sad case of quick consumption.

Central City Democrat.

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

EDITORIAL.

The following letter is published for reasons which are obvious.

Editor Christian Science Journal,

Dear Sir:—In the *Christian Science Weekly* of October 6, if I am not mistaken, I read an article that I think was written by you, saying that in small places where the numbers were few you saw no objection to one's reading an article from the *Journal* or the authorized Christian Science publications. It had been a privilege we had often wished for here (several of us), so I supposed, if your advice or opinion was given, it would be sanctioned by our Teacher, and as our meeting last week was very quiet, and there were strangers with us, and no one seemed able to give any experiences or make any remarks, I read an article by Mary E. Crawford published in our *Journal*. Several said after the meeting that they enjoyed it, and thought it much better than having nothing said; but at this week's meeting our First Reader rebuked me publicly, and said I was going beyond the limit, and there must be no reading done again. I said, "If I have gone beyond the limit I make a public apology, but I took for granted the *Weekly* would not have so stated it if it was going beyond the limit;" but he said Mrs. Eddy had not stated in her communication to the *Journal* that there was to be any reading, and it was not to be repeated, but we must keep to the words she gave, to give testimony or remarks. I think rather than have strangers sit there and hear only one or two speak the entire evening, I may read something; but if you feel that you were not authorized to give this permission, I will be very careful not to do so again. I hope I read the article correctly, and was not wrong in giving you as the author of the article. O for more freedom from mortal mind's criticism! it takes away, or rather interferes with, the very object for which the meetings are intended. Please let me hear from you by letter on this subject if not taking too much of your valuable time. I do not want to go beyond the limit in any way in our meetings.

Sincerely in Truth,

M. C. G.

The above letter corroborates what we had frequently heard concerning the impression prevailing over the Field with reference to the method of conducting the weekly meetings. We will say for the information of the writer of this letter, and all others, that the editorial appearing in the *Christian Science Weekly* of October 6, was written by the editor of the *Journal* and of the *Weekly*, and to that extent was official. We felt entirely warranted in saying what we did, both by the original order of our Leader establishing weekly meetings, and her latest card in reference to the manner of conducting them. We have thus far received no word of disapproval from her.

The criticism referred to in the above letter, while no doubt well meant, corroborates what we said in our editorial with reference to the narrowing of our Leader's purposes concerning the weekly meetings. It is well to be obedient, but there has often been too much of a tendency to so strictly follow the letter, that all understanding of the spirit has been lost sight of. We trust that a larger view will prevail in the future, and that our co-workers in the Field will give at least fair credence to the utterances of the editors of our publications, and not expect our Leader, the Rev. Mary Baker Eddy, to direct their action in express words as to every minute detail. This is impossible. She, no doubt, expects her students and those who are aiding her in carrying on the work, to exercise some measure of discretion and common sense.

It will be distinctly remembered, and we wish to re-emphasize our former statement, that in the editorial in question we stated, that only articles and testimonies from our publications and authorized literature, should be read. By this we mean that no literature purporting to relate to the subject of Christian Science, but which is unauthorized and false, should be read.

At a recent medical convention held at New York City, Dr. J. M. Farrington read a paper entitled, "The passing of Alcohol." He quoted the commendations formerly bestowed on alcohol by standard medical authors, and noted a great many changes within forty years. He declared that those of the profession who believed in the general use of alcohol as a remedy are now in the minority; and said that "with the light which has been thrown upon this subject during the past few years a physician subjects himself to adverse criticism, and has need of apologizing for using alcohol in cases in which but a few years ago he would have been censured had he refrained from using it." He further said: "Churches have likewise learned that the use of alcohol as a beverage is the greatest barrier toward the progress of religious truth. Therefore, the majority of Christian societies have banished intoxicating wine in their communion rites, and use only the unfermented juice of the grape."

The above is gratifying evidence of progress on the part of the medical profession and of the churches. It is useful also as tending to show the radical changes of human opinion. In the face of such frequent changes, is it not well to stop and ask the question, whether medical profession and religious profession, based upon such unstable ground, is worthy the name of Science? Does it not emphasize the necessity for getting over onto solid Scientific ground, both in the matter of healing disease and curing *sin?*

The uncertain bases of human opinion must inevitably give way to that Science which has for its base the supremacy of Spirit, instead of the supremacy of matter.

We wish it understood that we do not reflect our own views in the promiscuous articles appearing in the *Weekly*. They are a reflex only of the general views of writers and thinkers.

Christian Science literature is not intended so much to afford opportunity for fine writing, as to give out words of "Truth and soberness" for "the healing of the nations."

THE RELIGION OF THE FUTURE.

WRITTEN BY A BAPTIST CLERGYMAN FOR THE SATURDAY CRITIC.

THE religion of the future will be a larger, nobler, more sensible thing than the religion of the past. Like some glorious landscape, rich in all that can delight the eye or supply the needs of man, but hidden long by mists and clouds and darkness, gradually emerging into the full sunlight, so is the religion of Christ, or rather what has been called the religion of Christ, coming forth from the mists and clouds and darkness of the past into the clear sunlight of truth.

A large part of the religion of the past, and most of the religion of to-day is a mixture of dogma, ignorance, superstition, selfishness, and form. Churches and so-called Christian people hesitate at the genuine kind which goes deep enough to make altruism a necessity. The majority of the members of the church of Christ are as much steeped in selfishness, and as completely given over to much of the deviltry which selfishness creates, as any follower of Confucius or Buddha could be—yes, even more so. For the sharp tricks by which one man gains an unfair advantage of another, and for that cruelty which insists on retaining that which methods worse than robbery have gained, where shall we find such towering examples as in Christian countries, yes, even in the very church itself? Worst of all, the religion of the day does not want the truth. The churches are afraid of the truth. Its logic is too severe. The churches, as a rule, hire men to preach for them who will agree never to preach anything but what has been already preached and taught. Dogma clanking the chains of a cruel and superstitious and ignorant age, a theology mouldy with the dry rot of dead centuries, formalism clad in the winding sheet of a dead heathenism, these have furnished the chief ingredients of that food which the "teachers" of religion have been pledged to feed to their flocks.

When here and there one has had a heavenly vision and has dared to be true to the truth within him, off has come his head. When one has here and there as teacher or preacher had the grace from heaven to lead his flocks from out the bone-yards of the past into green fields, in other words, when he has dared to think or has had the brains to think, the finger of the holy church has been pointed at him and he has been branded as "heretic," "higher critic," "unsound in his theology" or something else equally ruinous. The religion of the future is going to be free. Men are drifting out of the apostate church, but they are as surely drifting into the new church, the true church. The church of the future will leave men free to think. The scientist, the poet, the man of activity will be encouraged to give his thought free range as teacher and pupil. Churches will demand that the preacher shall tell them something they did not know, and that their grandfathers did not know, or step down and out. No man shall be pledged to any creed but that written by the finger of truth on his own enlightened soul.

The church of the future shall count creed of less value than deed. It will be a practical church, with a practical religion and a practical theology. It will dare to tell the man who calls himself a disciple of Christ, but who robs the widows and the fatherless, that he is a liar and a hypocrite. The religion of the future will count selfishness as one of the seven deadly sins, and will refuse to consider the ethics of Jesus so spiritual as to be ruled out of the economics of the day. The church of the future will be made up of brothers and sisters, not of masters and slaves. It will watch over the weak, it will shield the young, it will be the true parent to the fatherless, it will establish brotherhood and judgment and equity throughout the land, and will proclaim liberty unto all the inhabitants thereof. It will bury savagery and formalism, and intolerance and polite robbery in the grave of a dead past.

For this religion let all true souls think, and speak, and act, regardless of the cost. The truth must prevail. We may sit in cushioned churches, subscribe to soulless creeds, have our names upon the meaningless roll of some church, rob our neighbor, have a good time in life and be reckoned among the elect saints at death, but "if we suffer" with the Christ who taught self-denial and who died for the doctrine he held, "we shall also reign with him."

C. C. PIERCE, Chelsea, Mass.

MALIGNANT CANCER CURED.

WHEN Christian Science first came to me, I was suffering intense pain from what our family physician called a malignant cancer; he said also that it was deep-seated. My acquaintances advised me to try Christian Science, but as I had never before heard of it, I classed it with clairvoyance, and would have nothing to do with it for some time. Finally one day when my misery seemed unbearable, a friend sent word that the healer of whom she had told me was at her home and she (my friend) wished me to call and talk with her. I did not think any doctor could cure me, and I had planned to go to my old home in New York, and wait for the end. However, to please my friend, I called to see the healer. She kindly asked me what she could do for me. I felt sure she could not do anything, and was very impatient, for the pain was excruciating, so I abruptly asked if she could cure a cancer. Her reply was, "I never treat with a doubt." She talked with me a few minutes, and told me as much of the Truth as I was then able to comprehend. Her beautiful explanation of a few passages from the Bible, and the love with which she seemed to be filled, won me. I knew that Christian Science was neither clairvoyance nor anything else of which I had ever heard.

I felt impressed to take a treatment, and did so. A great weight was lifted during those few moments of silence. I somewhat reluctantly promised not to take any medicine for two weeks, and she continued the treatment. Long before the two weeks ended, I was healed, and every Scientist knows what became of the medicine. That was several years ago, and I have never had a return of a single symptom. My fear in that direction was entirely destroyed.

Since then my family and I have been benefited in many ways, including the healing of inflammatory rheumatism; and in the years that have followed my class instruction, I have been enabled, through the teachings of Science and Health, to overcome, to a great extent, a most resentful disposition. How thankful I am for this wonderful Truth which does indeed make free, none know but those who have actually felt its blessed influence.

Mrs. Mary H. Putnam, Canon City, Col.

LOVE THE ONLY CAUSE.

BY ALFRED E. BAKER.

LET every dear sister and brother in the one family of the Father and Mother Love, *know* that the apostolic days have never *gone;* for all is God's perfect day. Let us *know*, that wherever the "lecturers," or apostles of to-day, go, healing will result from the "spoken Word." Let us remember these are "sent forth" (original meaning of apostle) by our "Mother" in "Israel" to "publish Peace," and proclaim the kingdom of God on earth, to spread the "gospel" of Life, Truth, and Love Eternal, the kingdom of Heaven at hand. Then we shall see again the fulfilment of the Law of Love, in the words of our "Master," "Maiden, I say unto thee, arise;" for, as the "Mother" says in her wonderful poem, "Christ and Christmas," "Sharon's rose must bud and bloom in every heart," which she explains, "God manifest in the flesh." Let these "gospels" (good tidings) be "works" not "words" only. Let us cast out such unscientific remarks and thoughts as accompany popular "lecturers," "very nice," "very pretty," "very instructive," "very entertaining," "very clear," "nothing new," and then do nothing but go to sleep again. Rather let us all "work" and "demonstrate" that this is the

Digitized by Google

word of God to His people. We do not want common opinion, but the baptism of the Pentecostal feast to rest upon these meetings. (Acts, 2 : 1–4.) Also see Science and Health, p. 340, one page, and p. 348, lines 4–12, which might well be read and pondered by every one in the audience before each lecture: "The field is white for the harvest," and these are the reapers, sent by Love, and we must realize with our beloved Shepherdess, who is feeding His lambs, "The laborers are few in this vineyard of Mind-sowing and reaping; but let them apply to the waiting grain the curving sickle of Mind's eternal circle, and bind it with bands of Soul;" then this will be true and manifest: "Look unto me, and be ye saved, all the ends of the earth: for I *am* God, and there is none else."

OUR FLAG.

BY EMILIE W. GILBERT.

On September 10, a beautiful flag (the gift of the school children) was to be raised to its staff on top of our Court House, the highest point in the city. Its upward flight was to be accompanied by the ringing of bells, the booming of cannon, and the singing by the school children of "The Star-Spangled Banner." Never before was I so impressed with our nation's symbol of freedom. As it neared the top, it spread its folds out gracefully over the waiting mass of expectant faces below, and as it waved exultantly, it spoke to me as never before of man's love for his brother man, for in the love of a great cause, man forgets himself, and sacrifices all for his brother. And I thought, happy the day when from every turret and tower, in every land and clime, its folds shall wave, and so clasp all nations in a close embrace.

When I came in I found the first copy of the *Weekly* awaiting me. Then I knew why I had felt so thankful. In a silence far more impressive than the shout of many voices, another banner was unfurling its folds to a waiting world, and all over the land, a great symphony of gladness was going up from every Christian Scientist as this banner of Truth brought its tidings of a larger Freedom, "the liberty of the sons of God." Hail, gentle banner of peace and of progress! May your folds float out on the breeze from east to west, across the sea in sunny climes, until the globe is encircled by the Truth you bear, and all humanity through their devotion to the greatest of all Causes (Christian Science) are moved by one mighty thought, and that thought—Love.

NOVEL POWDERS.

A LADY in Boston has conceived the idea of preparing a novel kind of "Comfort Powders." They are neatly wrapped in vari-colored papers, much as ordinary medical powders are wrapped, and enclosed in a neat paper box tied with ribbon. Accompanying each box is a little card with the following printed thereon:—

"COMFORT POWDERS.

"Helpful in cases of Discouragement, Discontentment, Loss of Patience, Disappointment, Heart Trouble, etc.

"Take one powder each morning, or as often as needful, thoroughly mixed with equal parts of Confidence and Thanksgiving.

"Prepared from the Medicine Chest of the GREAT PHYSICIAN."

Contained in each bit of vari-colored paper is a Scriptural text. The two following furnish a fair idea of the kind of "powders" to be administered.

"The Eternal God is thy refuge, and underneath are the everlasting arms" (Deuteronomy, 33 : 27).

"Let not your heart be troubled: ye believe in God, believe also in me. In my Father's house are many mansions: if it were not so I would have told you. I go to prepare a place for you" (St. John, 14 : 1, 2).

This lady, be it known, is not a Christian Scientist.

BELIEFS NOT TO BE BELIEVED.

THE article in the *Christian Science Weekly* of October 20, under the title of "Only a Belief," has its counterpart in the experience of a man who had suffered most intensely—in belief—by spells each year since his boyhood days, with the "belief" that he had fallen on a stub and caused an injury to a nerve. After the man had sought in vain for relief, through a long list of material methods, he was advised to try Christian Science. In this method he found relief, not only from that "belief" but also from other beliefs of long standing. The idea that a nerve had become so intelligent as to appear periodically in the role of "injured innocence," would hardly gain credence in Christian Science circles. Suffice it to say that the man declared in the midst of the treatment that it—the belief—was gone, not to the "grass," but probably below the grass.

John O. Bartlett, Hartford, Conn.

TESTIMONIES.

Hon. Nat Ward Fitz-Gerald, of Salt Lake City, gave a history of his wonderful healing by Christian Science at the last Wednesday evening meeting in this city. Colonel Fitz-Gerald was educated for the ministry, and preached about two years and became impressed with the belief that orthodox religion was "sounding brass, or a tinkling cymbal," or, to use his expression, the spirituality of the Church was lost to him. He was of the opinion that the Church which could not heal the sick was a fraud, and he became disgusted and threw up the ministry and became a devout believer in the doctrines of Mr. Ingersoll.

In this belief he remained for something like twenty years. He became very much afflicted and went to Southern California to obtain the benefit of the change of climate in order to regain his health. After arriving there he employed the best physician he could obtain, who, in consultation with others, decided that the Colonel, before he could recover, must be tabled, or in other words, be cut open. In order to "build him up," as they term it, a private house was obtained where he might be cared for and nursed after going through the surgical operation. This family happened to be Christian Scientists, and there being but few other members of that society in the little town, the meetings were held in this house. The Colonel had his doors padded so as to prevent his even hearing anything from this, to him, hated sect. The doctors performed their operation, and gave out the encouraging report that it would take at least three months for him to be able to go around, but gave as their opinion that he never would recover. The day the operation was performed the Colonel lay in a stupor until near two o'clock in the afternoon, and when he became conscious, he heard the Christian Scientists holding their meeting in the next room, the padding of the doors, etc., not being sufficient to prevent. He said that from the first word he heard, his attention became riveted and interested in the subject, and the more he heard the more he wished to hear, until finally through his system he felt a radical change, and that God was healing him. Suffice it to say that the Colonel that afternoon was perfectly cured, and the next morning got up, dressed himself, and visited the doctors at their office.

When they saw him they were certain it was his disembodied spirit that had appeared to them.

Those who had the privilege of listening to this wonderful experience told in the eloquent manner of the Colonel, had reason to thank God for the hearing of such an experience.

Here is the case of a man who was healed, a man of character and of responsibility, known in many states and cities of the nation, and yet, notwithstanding the country is filled with such testimonies, the blind continue to lead the blind, and poor prejudiced, bigoted humanity is filling every ditch of despondency, disease, and sin, shutting their eyes to the

Digitized by Google

redeeming Love of God Almighty. To use the beautiful expression of the Colonel, he said in closing that his condition was like those "who came to scoff, but remained to pray."

Washington News Letter.

What a pleasant surprise it was to know that we could now have a weekly visitor which would bring us glad tidings from other fields of Science. Mortal sense would tell us that we are so far from others who are interested in our Cause, that sometimes it would delude us, if possible, into a seeming coldness in our work; but we try to press on, knowing that others have trod the thorn-road and we must follow in their footsteps if we would gain the demonstrations which it is ours, as followers of Truth, to make.

When we came to this place five years ago, Christian Science was unknown. Now we have a little band of earnest workers, and our regular services every Sunday. Although we live so far apart that we cannot get together but once each Sunday, we feel that we cannot miss either of the lessons in the *Christian Science Quarterly*, so we have both lessons at one meeting.

We have started a Christian Science Fund, and although opposition seems to scorn us and deride our Cause, we have gained ground ever since we began our meetings. At first it seemed quite a difficult thing to secure a place in which to meet, as this country was so new and all the houses so very small; but Truth is omnipotent and it was again proven to us. A gentleman who had seen some demonstrations and recognized the good in Christian Science purchased Science and Health, and after reading it a short time, offered us his parlor for our meetings. His wife presides at the organ, and we are far better provided for than we could have planned for ourselves.

Although forsaken by earthly relatives, and, according to their view of things, some of us are "eternally lost," we have found that peace which the world cannot give.

Julia Hitt, Pondercek, Okla. Ter.

I would like to tell what the reading aloud of Science and Health did for my boy, seven years of age, at a time when croup manifested itself. He came in from his play one evening in a serious condition,—a high fever, and coughing in such a way that I realized that something must be done at once. I was alone and had no one to whom I could turn for assistance; but I did have my book, Science and Health.

I put the little one to bed and had seated myself to read and realize the Truth when the bell rang. The caller proved to be a physician, who had come to see my father on business. My son was coughing very badly, and the physician remarked, "That is croup. You must use hot applications immediately, and if he is not better before midnight, something else must be done."

I said nothing but realized that mortal mind could make no laws for that child, for God's law was the only law, and God the only law-giver, and His laws were good.

The physician took his departure and I went back to the child, opened my Science and Health, and read aloud. In an hour he was fast asleep, slept all night and did not cough again. That was five years ago, and there has never been a claim of croup since.

Science and Health is our constant companion, and our love and gratitude to its author, Mary Baker Eddy, is more than can be expressed.—*Mary P. Marble, Chicago, Ill.*

Seeing the wonderful healing of a horse by Christian Science about ten years ago, I procured a copy of "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy. I began reading and studying it, and it seemed just what I had been wanting for years. My wife took treatment and was healed of trouble of many years' standing. I am fifty-six years old, and had been an excessive user of tobacco and an occasional drinker. I asked for treatment in December, 1888, and have not tasted tobacco from that day, and have never even had a desire to use it; and I have no use for any intoxicants whatever. I was also healed of catarrh. We soon discarded all medicines, and Christian Science answers every need. We wanted to be obedient and loyal to Truth, and while our growth has been slow, we have grown firm and strong in the Truth. We have a nice society and still growing, and there have been so many "signs following" that our audience comprises the most prominent citizens of the city.

John Davenport Carle, Watertown, S. Dak.

One year ago, while stopping in the mountains of North Carolina, the only place it seemed where I could live during the summer, I met a lady who was interested in Christian Science. After hearing her read one page of Science and Health I felt that I was at the fountain, drinking something that satisfied the thirst of years. I bought a copy from her, and in one month I came home a well woman, and have remained so, to the surprise of all my friends. I can work all day and not feel tired. Although for twenty years I had many claims, they are all gone,—every one.

Octavia Wallace, Paducah, Ky.

THE BOARD OF EDUCATION.

The Board of Education has prepared printed application blanks to be used by those who desire to appear before it for examination.

These blanks are now ready, and can be procured by written application addressed to the Board of Education, 95 Falmouth St., Boston, Mass. No other form of application will be received.

This Board is authorized to send out twenty-one teachers annually. Although the examination will not be at all competitive, the Board will be obliged, all things being equal, to bestow the certificates with reference to the necessity for teachers in certain localities. The failure on the part of an applicant to receive a certificate will not necessarily imply any unworthiness.

Information as to the charge for examination will accompany the application blank.

The applications heretofore sent in will not answer. The printed forms must be used. All desiring to appear before the Board will have to apply again.

CHURCH RULES.

Section 3, of Article II of Church By-Laws, is amended as follows:—

The First Readers in the Churches of Christian Science shall read the correlative texts in "Science and Health with Key to the Scriptures;" and the Second Reader shall read the Bible texts. The reading of the Scriptural texts shall precede the readings from Science and Health, as heretofore. The remainder of the office of First Reader is unchanged.

The following Church Rule will be added to the Church Manual as a new section of Article III.:—

A student of the books of Mary Baker G. Eddy shall not take lessons of another student, but is eligible to examination by the Christian Science Board of Education.

NOTICES.

Per capita taxes and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Hereafter the Communion service in the Mother Church will be held once in each year; on the first Sunday in June, beginning in June, 1899.

All correspondence with the clerk of the Mother Church on matters pertaining to his office, should be addressed to William B. Johnson, C. S. B., 95 Falmouth St., Boston, Mass.

Works on Christian Science

WRITTEN BY

Rev. MARY BAKER G. EDDY.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid $3 18
Two to Twelve books to one address, each, Prepaid . . 3 00
Twelve or more books to one address, each, Prepaid . . 2 75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid 4 00
Twelve or more to one address, each, Prepaid 3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid 5 00
Twelve or more to one address, each, Prepaid 4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid 6 00
Twelve or more to one address, each, Prepaid 5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid $2 25
Twelve or more books to one address, each, Prepaid . . 2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid 4 00
Twelve or more to one address, each, Prepaid 3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid 5 00
Twelve or more to one address, each, Prepaid 4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid $3 00
Twelve or more books to one address, each, Prepaid . 2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

JOSEPH ARMSTRONG, C. S. D.,
PUBLISHER,
95 FALMOUTH STREET, BOSTON, MASS.

The Christian Science Journal,

Founded, APRIL, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REVEREND MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical Healing, as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscriptions:

Payable in advance, postage free, to any part of the United States and Canada. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents. Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

THE CHRISTIAN SCIENCE QUARTERLY,

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday Services in all the Christian Science Churches throughout the year.

Terms of Subscription:

One copy, one year, 50 cents; Fifty copies or more to one address, one year, each, 50 cents; Foreign subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States and Canada.

Terms of Sale:

One or more copies, each, postage paid, 15 cents; Fifty copies or more to one address, postage paid, each, 12½ cents.

CHURCH MANUAL. Containing Rules and By-Laws of the Mother Church, also list of members. Price, one copy, $1; six copies to one address, $5; twelve copies to one address, $9.

THE CHRISTIAN SCIENCE HYMNAL. Bound in two styles — Cloth and Leather. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00; Leather, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the building of the Mother Church, The First Church of Christ, Scientist, in Boston. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00.

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents; Cloth binding, 45 cents.

HEARINGS ON PROPOSED MEDICAL BILLS in Massachusetts and New York. 23 pp.

ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By EDWARD A. KIMBALL, 24 pp.

THE BUSWELL TRIAL. 24 pp.

REPLY TO SERMON. By SEPTIMUS J. HANNA, 30 pp.

THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.

HEALING THROUGH CHRISTIAN SCIENCE. By SEPTIMUS J. HANNA, 32 pp.

One copy or more, each, 10 cents; Twelve copies to one address, $1.00; Twenty-five copies to one address, $1.75; Fifty copies to one address, $3.00.

COMMUNION HYMN. "SAW YE MY SAVIOUR?"

Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

The Christian Science Weekly

Published By The Christian Science Publishing Society Thursday

VOL. 1 BOSTON, MASS., U.S.A., NOVEMBER 10, 1898. NO. 11

CALLS ANTI-TOXINE A HUMBUG.

DR. MORRISON, an eminent physician of Washington, D. C., writes the following article to the editor of the *Washington Post*.

The views of eminent physicians and surgeons,—given out of their own experience extending over many years, in opposition to some of the methods so long in vogue, and so vigorously upheld by a part of the profession,—are entitled to great weight and serious consideration. Surely, the world must in time become convinced that the entire *materia medica* is a thing of mere human opinion, rather than an exact science, or any science at all.—*Ed. Weekly.*

Editor Post:—According to a recent report in the New York *Journal* and other newspapers, a case of general tetanus has been cured by injecting anti-toxine into the brain, an opening having been made in the frontal region of the skull for that purpose. Any treatment which will cure or even relieve this formidable malady will be a great boon to society, but I deny *in toto* the efficacy of anti-toxine or any other similar septic poison in such cases.

It is amazing how some people appear to be completely bereft of common sense as regards this substance. Anti-toxine has been productive of more evil than perhaps any other known remedy, and the physician who injects it into an individual with fatal results, as is most frequently the case, ought to be prosecuted for malpractice. We know nothing about the actual chemical composition of anti-toxine, and if we did it would not in the least assist or guide us in its administration. In the report referred to diagrams are given showing the shape of the tetanus bacilli, so-called. If such bacilli exist, how do we know whether they are the cause or the result of the disease? We know nothing whatever about them; as to their being the cause is mere assumption. We have no proof, and until this is supplied we have no right to risk human life by an indiscriminate use of this abominable compound.

It appears to me that the anti-toxine treatment is employed only by those who are downright failures in other and more legitimate modes of practice. During a professional career of more than a quarter of a century many cases of tetanus have come under my notice, and for the benefit of the public, and especially of the bacteriologists, I will briefly refer to two or three typical cases.

A young man in sound health received a punctured wound in the sole of his foot by jumping on a rusty nail. This was in winter, when the temperature was far below freezing. He was soon seized with tetanus, and notwithstanding all that could be done by his physicians, he died in tetanic convulsions. Were the tetanus bacilli on that rusty nail, lying in wait to destroy their victim? The bacteriologists and the anti-toxine men will please answer.

A waiter at a hotel pricked his hand with an ordinary table fork; he was also soon seized with tetanic spasms and died in spite of everything that could be done for him. Are bacilli found on every table fork? If so, we are daily using a very dangerous instrument.

Another man received a slight lacerated wound in the hand from a circular saw. Trismus, the mildest form of tetanus, followed, but under appropriate treatment he recovered. Another case—and the only other one to which I will now refer—was that of a large, robust man who received a punctured wound, the most frequent cause of this disease. General tetanus soon developed, which proved refractory to all known remedies.

The case was treated in the Ottawa general hospital, and when the attending physicians had exhausted their medical skill a consulting physician was summoned. His treatment was as novel as it was successful. He took a common cork —an inch or more in diameter—pushed a dozen or more fine sewing-needles through it, leaving them projecting about an eighth of an inch or thereabouts, and with this instrument he punctured the spine throughout its whole length, pushing in the needles as far as the cork would allow. The muscles at once began to relax, and in less time than I have taken to write this, the patient was not only able to speak, but was as flexible as a wet rag, and under appropriate measures finally recovered.

Will the bacteriologists and anti-toxine practitioners please tell us how this treatment killed the tetanus bacilli?

Tetanus is as amenable to successful treatment as most other diseases, and, indeed, more so than smallpox, hydrophobia, etc.

The use of anti-toxine should be prohibited by legal enactment.

Vaccination is another delusion which has been overestimated. It is no protection against smallpox. The anti-vaccinationists in England have been successful in having the compulsory vaccination laws repealed. A re-action has already set in, in the right direction.

Koch's bacilli treatment for consumption has also proved to be a downright failure—the veriest kind of a humbug. Consumption is claiming its victims by the hundreds of thousands as heretofore. The alleged bacilli found in this disease are doubtless the result and not, as Koch and his followers would have us believe, the cause.

I trust that the time is not far distant when the existence of smallpox, diphtheria, typhoid fever, and other zymotic diseases will be made the cause for judicial inquiry and punishable for neglect of proper sanitary measures. These diseases are engendered and propagated by filth, and the households in which they are found should be held accountable.

Europe, and perhaps America, too, is now threatened with a visitation of the bubonic plague, which has already appeared in Vienna. It is doubtless the result of experimentation by the anti-toxine empirics.

J. MORRISON, M. D., Ph. D., 1757 P Street.

ITEMS OF INTEREST.

It is reported from Washington that Porto Rico and Guam Island and the island of Luzon, with Manila Bay and the city of Manila, are looked upon as indemnity for the war, and the administration is inclined to the opinion that, as it

Copyrighted, 1898, by Mary Baker G. Eddy.

has now been determined that all the Philippines must be held by the United States, it would only be fair to Spain to pay a monetary consideration for the remainder of the group. The amount to be paid in some form or other that is now talked of is $40,000,000, this being practically the amount of the Philippine debt. Among officials of the administration it is now generally believed that the final agreement will be on the basis of a definite cash payment to the Spanish treasury, with the express stipulation that Spain remains responsible for all debts contracted by that government and charged to the colony.

Dispatches from Yokohama, Japan, say that on November 7 a new ministry was formed by Field Marshal Marquis Yamagata Aritomo to succeed the cabinet of Count Okuma Stagaki, the first party cabinet in the history of Japan, which took office on June 28 last, and resigned October 31, owing to differences upon the question of filling the portfolio of public instruction.

The new cabinet, which contains no member who is connected with the political parties, is constituted as follows:—

President of the council and premier, Marquis Yamagata Aritomo. Minister of foreign affairs, Viscount Aoki, formerly Japanese ambassador to Germany. Minister of the interior, Marquis Saigo Tsugumichi. Minister of finance, Count Matsoukata. Minister of war, Lieutenant-General Katsura. Minister of marine, Admiral Yamameto. Minister of justice, M. Kiyouri Keigo.

The Nicaragua Canal Commission appointed by the President under an act of Congress directing a complete inquiry into this project, with particular reference to its practicability and cost, will report in about a month. The conclusions reached by the commission will not be announced until the report is submitted. It is known, however, that on the two salient features, "practicability and cost," the commission will report, first, that the project of a canal joining the Atlantic and Pacific by what is commonly known as the Nicaragua route, is entirely feasible and practical, presenting no engineering problems which cannot be met; and, second, that the cost can be presented with a fair degree of exactness. Admiral Walker has already expressed the opinion before a congressional committee that the cost would be within $125,000,000.

The Trans-Mississippi and International Exposition, at Omaha, closed at midnight, October 31. It is estimated that seventy-five thousand people crowded the grounds the last day, as it was Omaha day.

The grand total registered at the turnstiles since the exhibition opened, five months ago, exceeds 2,600,000. The exposition was a financial success, something over $400,000 remaining to be divided among the stockholders. A fraction less than $2,000,000 has been received, and $1,500,000 expended. The highest number of people in any one day was the opening day of the Peace Jubilee, when President McKinley spoke, 98,785 persons being present.

It is estimated that the subscribers should receive back about eighty per cent of their subscriptions.

It is reported from Washington, D. C., that in General Miles's opinion the Cuban army—a part of it at least—has been unfairly treated by newspaper writers, as a rule. The records will show that General Miles's experiences with General Garcia were very satisfactory. Before the Santiago campaign began he opened communication with General Garcia, who followed instructions to the letter, and with a promptness which ought to take him out of the "manana" class.

Lord Aberdeen, at a farewell banquet given him by the citizens of Ottawa, Ont., recently, referred to the increase of friendly understanding between the United States, Great Britain, and Canada. Among other things he said, "The custom, for instance, of conventions of various organizations in the United States being held in Canada, and *vice versa*, may have a real helpful influence in the direction referred to."

The Sioux Indians are preparing formal charges against Major Clapp and Clark Pugh of the Pine Ridge agency. A large council was held recently, and a disposition to act ugly is manifested among the young Sioux. While there is little fear of an uprising, timid white settlers near the agency are preparing to move unless the trouble with the Indians is soon settled. Agent Clapp has always been regarded as a capable official.

Carl Schurz submits the following questions, relative to the acquisition of new territory: "Can we not get the markets of those islands unless we annex them? Do we not sell nearly a thousand millions' worth of goods a year to countries we have not annexed? And is not one European customer worth much more than twenty Asiatics?"

Dispatches from Tien-Tsin say that forty Russian sailors, an admiral, and M. Pavloff, the Russian charge d'affaires at Paris, have been detained there, permission to proceed to Pekin not being forthcoming, and there being strong opposition to their going to the capital. This, it is stated, is a forerunner of a probable affront to Russia.

The war cloud on the other side of the ocean seems to have changed its base from France to Russia. It is now said that Russia intends to seize New-Chwang, a valuable treaty port of the Chinese. Great Britain, of course, objects, and is preparing to make good her objections by clearing her warships for action.

It is reported from Chicago that trolley cars will soon be in operation in Tokio, Yokohama, Osaka, and other large cities of Japan, a $10,000,000 company composed of Chicago and Philadelphia capitalists having been formed for the purpose of constructing lines of electric railway in Japan.

A dispatch to the London *Daily News* from Berlin says that a telegram from St. Petersburg announces that all the powers have accepted the czar's invitation to take part in a conference looking to the disarmament of the nations. Each power will be represented by three delegates.

The cruiser Infanta Maria Teresa, formerly Admiral Cervera's flagship, which was raised by Lieutenant Hobson at great expense, foundered in a storm November 4, and now lies in three hundred fathoms of water thirty miles north of San Salvador.

The Emperor and Empress of Germany are curtailing their visit to the Holy Land. They have abandoned their trip to Jericho owing to the European complications, and it is also believed they will not go to Syria.

It is reported from New York that a sugar trust has concluded negotiations with the Hawaiian sugar planters to control the entire sugar crop of the islands, amounting to 250,000 tons annually.

Shall it be Speaker Reed of Maine or Speaker Bailey of Texas? That is really the burning question that confronts us.—*Boston Herald.*

The latest word from Paris, France, is that France will retire from Fashoda unconditionally, and without asking compensation.

A new French cabinet has been formed, with M. Dupuy as premier and minister of the interior.

Dispatches from Madrid, via London, say that Spain will sign the Peace Treaty under protest.

The first electric cab was run in Paris, September 10.

MISCELLANY.

Editor of the Herald:—After reading the article in yesterday's *Herald*, entitled, "Voice of the People," in which the writer either ignorantly or wilfully confounds Christian Science with Faith Cure, it is plain to be seen that such an attack on Christian Science, and insult to a large and increasing element of respectable and intelligent people, is not the sentiment of the people, by any means, or from "a parent," but is at the instigation of the M. D.'s, but it is not surprising that they should set up a howl when eleven cases of diphtheria die under the hands of the "regulars," and the people are taught to say "Amen," and not one out of seventeen cases treated by Christian Science has been lost; and thus all over our land, and in foreign lands, hundreds of people are being healed where *materia medica* has failed; but if one case in a hundred is lost by a Christian Scientist, a great ado is made, and a large and intelligent class of people (who are seeking to lead honest, pure lives and to be law-abiding citizens; loving the neighbor, and keeping the Golden Rule, and proving daily the power of Truth and Love to keep themselves well and heal others without the use of drugs; claiming the right to worship God according to the dictates of their own conscience, and not interfering with others, and also claiming the right to use any means they see fit with themselves or their families in case of sickness) are denounced as murderers, criminals, deluded cranks, lunatics, etc., and charged with being the cause of epidemics by a medical monopoly which thinks it has things in its own hands, claiming to control the board of public schools, closing the schools against the protest of the school board, and then seeking to force people to employ them and denouncing those who will not employ them, and drawing exaggerated pictures of the suffering of those who are under any other treatment. But the people are awakening to see this injustice and imposition, and will declare their God-given rights. There are multitudes of intelligent, sensible people who to-day are rejoicing in their deliverance not only from disease and suffering, but from appetites and passions, hatred, revenge, and evil thought, and are now living pure and happy lives, depending wholly upon Christian Science for health and success in everything that is right and legitimate. These people are not fools or deluded, but they know "whereof they speak," and in this our beloved country, America, the land of the free and the home of the brave, oppressive class legislation, medical trusts, or monopolies, or any other combine against human rights will not be tolerated; the time is at hand when her citizens will declare their freedom in the "name of Almighty God," both morally and physically. Yours for liberty and freedom,

C. M Howe.

St. Joseph Herald.

A man at the Christian Science church last Wednesday evening, in closing his testimony of what his experience had been in his search for relief from chronic malarial fever said, in substance: "I have been a sort of Methodist for years, but I have seen a good deal of other churches, too. I have been in St. Peter's at Rome during Easter service, where thousands upon thousands were gathered to worship. I attended an English Episcopal church for a time in Hamburg, Germany; I visited Lutheran churches all over Germany; I have been in St. Paul's, London; I have sat in the congregation at Spurgeon's church in London; I have been in Talmage's church in Brooklyn, in Beecher's church, and in many others, and in all my experience as a strange visitor among church people I never had a man or woman come up and take me by the hand until I visited this church. I have been here three or four times and every time I have been greeted kindly and your members have given me a cordial hand shake. Friends, I cannot tell you how deeply this mark of brotherly love has touched me. The first time I came here I studied the faces of the people and said to myself, 'Well, this is the happiest looking set of people I ever saw.' I thank God that I was directed to Christian Science, for I believe I am in the right place."

Denver Republican.

On Wednesday evening, October 26, by the invitation of the church authorities, the first quarterly lecture in New York City was delivered in First Church of Christ, Scientist, in that city, by Mr. Carol Norton, of the Board of Lectureship. Although a severe rain storm prevailed during the evening, the house was nearly filled—upwards of a thousand being present. A large percentage of visitors and strangers was conspicuous, and the interest in all that was said was marked throughout. Mr. Norton was gracefully introduced by the First Reader of the Church, Rev. Augusta E. Stetson, as the former Second Reader of that Church and a member of the Board of Lectureship of the denomination.

Mr. Norton's lecture was delivered extemporaneously. He stated the truths of Christian Science, and then briefly considered systems that were often confounded with it. He showed in a very clear way, that Christian Scientists were not hero-worshipers, but that their loyalty to the Rev. Mary Baker Eddy, the Discoverer and Founder of Christian Science, was born of gratitude and the rational recognition of her spiritual as well as scientific authority, and the Science which she has founded and interpreted to this age.

For some time the theories of Christian Science have been agitating the public mind in and around South Bend, and the ideas involved in the theory are seemingly growing stronger every day, and spreading beyond the understanding of most people. For several days past the fact has been made known that the principles of Christian Science would be set before the public in a free lecture by Edward A. Kimball, of Chicago, at the Auditorium, and when that gentleman appeared on the stage he faced an audience that taxed the building to its utmost, every seat being occupied from pit to dome, overrunning into the boxes, while the outer aisles afforded standing room for the listeners, all of whom remained until the close of the lecture, which occupied nearly two hours in its delivery.

The speaker was fittingly introduced by William Bradford Dickson.—*South Bend (Ind.) Tribune.*

Few in this generation know more than a tradition of the "long prayer" which was an indispensable feature of the earlier New England service. It was a weariness of the flesh to those who stood in the pews through its long delivery. But we have at least fragmentary reminders of it in prayers big with systems of theology, in philosophic disquisitions presented for divine consideration—and incidentally for review by human listeners—or in edifying rehearsal of current history, with notes and comments indorsing or condemnatory.

Zion's Herald.

The contention of the French medical experts that guillotining does not cause the death of the victim for several hours is interesting, though to the lay mind it would seem that decapitation ought to end all with great celerity. The discussion simply shows that almost any absurd proposition can be proven with the assistance of medical expert testimony.—*Boston Herald.*

All of the American troops destined for Manila were vaccinated before starting; wherefore, then, these fatal cases of smallpox? Did the vaccine give out, or didn't the thing take?—*Boston Herald.*

November 1, 1898, there were admitted 952 new members into the "Mother Church," The First Church of Christ, Scientist, in Boston. The total membership is now upwards of twelve thousand.

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

EARLY CHIMES.

BEFORE the Christmas Bells shall ring, allow me to improvise some new notes, not specially musical, to be sure, but admirably adapted to the key of my feeling, and emphatically phrasing strict observance, or note well.

This year, my beloved Christian Scientists, you must grant me my request, namely, that I be permitted total exemption from Christmas gifts. Also I beg to send to you all a deep-drawn, heart-felt breath of thanks for those things of beauty and use forming themselves in your thoughts to send to Mother. Thus may I close the door of mind on this subject, and open the volume of Life on the pure pages of impersonal presents, pleasures, achievements, and *aid*.

Of the inquiry prevalent as to whether it is proper to read interesting newspaper articles at our Wednesday Evening meetings, let me say: It is right to do this if the articles are properly selected. But to guard the possibility of unwise selection is quite as requisite as to avoid the mischances of personal sermons, which has been our endeavor. To secure perfect safety on this subject the Readers at these meetings shall examine beforehand whatever is sent to be read on this occasion, and accept only the right authors, and such articles as elucidate Truth. Since the opening of these meetings in Concord newspaper matter, and even interesting letters from the Field, have been read at intervals, but *I* have selected them.

MARY BAKER EDDY.

A WORD.

ACCORDING to Solomon words fitly spoken are prolific of silver and gold. Mr. James T. White, publisher of "The National Cyclopedia of American Biography," and author of "Captive Memories," for conscience' sake if you please, complied with the business terms of the Christian Science Publishing Society, and put into market a new edition of "Captive Memories" that was considered even better than the preceding ones, with the expectation that it would be liberally patronized because of its high merit. Will my beloved Christian Scientists give a helping hand to the sale of "Captive Memories," by purchasing this rare book for a gift to their friends on the ensuing holidays? It is on sale by the Christian Science Publishing Society, 95 Falmouth St., Boston, Mass.

MARY BAKER EDDY.

THE HAROLD FREDERIC CASE.

ALTHOUGH the "yellow Journals" on both sides of the Atlantic have not seen fit to adopt the advice of Captain Sigsbee, concerning the sinking of the Maine, to "suspend judgment" in relation to the case of Harold Frederic, the conservative, unbiased better judgment of the people has done so, and will continue to do so.

If the hot-headed, one-sided writers of inflammatory editorials had stopped to think just a little, they would not have given vent to such unreasoning and nonsensical philippics.

To illustrate: If, before pouring forth their flamboyant volleys they had thoughtfully perused the able article of Dr. Morrison, published in this issue, on the direful effects of the anti-toxine remedy, and then learned that the physicians attending Mr. Frederic had administered this remedy to him, would they have declared he was "murdered" by the physicians? Or if, not having read of the dangers of this remedy, they had been informed that anti-toxine was "duly and regularly" administered, and a Christian Scientist had not been called, would they have had a word to say about Mr. Frederic having been murdered? If the attending physicians, had given Mr. Frederic a bread pill, and there had been no Christian Scientist around, our learned editorial friends, and all who sympathize with them, would have been entirely satisfied, the physicians exempt from all blame, and Harold Frederic's death, in true orthodox fashion, charged to the age-long list of casualties already "booked" against an inscrutable but all-wise Providence. But, at the sick man's request, a sincere Christian woman is called in, after the physicians have shown their inability to cope with the case, to pray for the dying man; and although his suffering ceased, at the instance of his friends who trusted the wisdom of the physicians rather than the efficacy of prayer, Harold Frederic was again turned over to the physicians and *died in their hands*, and then the inane cry goes out through the press that Mr. Frederic was "murdered."

Suppose Christian Scientists and all the myriads of thinking people who have lost confidence in drug physicians should turn the tables on that profession and cry "murder" whenever a person dies in the physicians' hands, how would the record stand, and what a daily and endless theme the editors of "yellow Journals" would have!!

We are glad to say that by no means are all newspapers of the "yellow Journal" order. We published last week the sensible and conservative remarks of the *Utica Observer* in reference to this case. Harold Frederic, by the way, was a citizen of Utica, and a well-known journalist there. The *Observer*, therefore, had more cause for regret at Mr. Frederic's death than the majority of those newspaper men who emptied their phials of venom against Christian Science, caring only enough about Mr. Frederic's death to make it a text for their malicious attacks upon a system which they have never investigated and concerning which they have the foolish misapprehension that is the invariable accompaniment of ignorance and prejudice.

Apropos of this case we append the following from the *St. Louis Post-Dispatch*:—

"A great fight was made over Harold Frederic. It was a fight for a life.

"On one hand were the men of pills and potions, backed up by the believers among his friends.

"On the other, the believers in mental cure, aided for a time by the sick man himself.

"The advocates of medicine held up as a trump card the fact that a noted English officer, Major Lester, had just died in spite of the efforts of the 'mental healers.'

"Frederic appeared unmoved by this and was extremely anxious to try for himself the power of mind against disease.

"But the pressure was too strong. Thirty hours before his death the advocates of medicine prevailed and the mental healers were driven out.

Digitized by Google

"And now the doctors and their followers claim, of course, that Frederic is another victim to a craze. On the opposite side, the mental healers will certainly point to the fact that they were not permitted to carry the experiment to a conclusion."

THANKSGIVING PROCLAMATION.

THE President, after the cabinet meeting of October 28, issued the following Thanksgiving proclamation:—

The approaching November brings to mind the custom of our ancestors, hallowed by time and rooted in our most sacred traditions, of giving thanks to Almighty God for all the blessings he has vouchsafed to us during the past year.

Few years in our history have afforded such cause for thanksgiving. We have been blessed by abundant harvests, our trade and commerce have been wonderfully increased, our public credit has been improved and strengthened, all sections of our common country have been brought together and knitted into closer bonds of national purpose and unity.

The skies have been for a time darkened by the cloud of war; but as we were compelled to take up the sword in the cause of humanity, we are permitted to rejoice that the conflict has been of so brief a duration; and the losses we have had to mourn, though grievous and important, have been so few, considering the great results accomplished, as to inspire us with gratitude and praise to the Lord of Hosts.

We may laud and magnify His holy name that the cessation of hostilities came so soon as to spare both sides the countless sorrows and disasters that attend protracted war.

I do, therefore, invite all my fellow-citizens—as well those at home as those who may be at sea or sojourning in foreign lands—to set apart and observe Thursday, the 24th day of November, as a day of national thanksgiving; to come together in their several places of worship for a service of praise and of thanks to Almighty God for all blessings of the year, for the mildness of the seasons and the fruitfulness of the soil, for the continued prosperity of the people, for the devotion and valor of our countrymen, for the glory of our victory and the hope of a righteous peace, and to pray that the Divine guidance which has brought us heretofore to safety and honor may be graciously continued in the years to come.

In witness whereof, etc.,

WILLIAM MCKINLEY.

By the President, John Hay, Secretary of State.

EXPERIENCES.

THREE years ago I had my attention called to the subject of Christian Science through the healing of my wife, who "had suffered many things of many physicians." At the hotel where we were boarding a Christian Scientist had presented the subject to us, but we were not quite ready to give up our false gods; our extremity was not great enough.

One night my wife was taken with an attack so severe that she seemed not likely to survive the night. I went to the above-mentioned Scientist and she gave her absent treatment. The improvement was immediate; she had not been able for months to sleep without an opiate, but she slept naturally all that night. She had been living on beef-tea, milk, and seltzer water, then she was enabled to eat anything. She had been taking seven kinds of medicine; these she threw away, and within six weeks was completely healed. Diseases that had been life-long were canceled; and, greatest of all, her eyes were opened to see the Christ, Truth. It was very difficult for me to believe that she was really healed; and still more difficult to believe that she had been healed by Christian Science.

At that time I was suffering from varicose veins. My wife asked me this question: "If you were healed would you give Christian Science the credit?" I replied that I certainly would; for I knew I could never be healed by *materia medica*. She called on a loyal student of Mrs. Eddy, with my consent placed me under treatment, and I was healed before I saw my healer.

All my life I have wanted to know *how* and *why*, so I began to study and attend the meetings. Attempts were made to turn us into by-paths of so-called Divine Science; but, thank God, without success. I was told it was all the same, but I took nothing for granted. I went to my healer with my questionings, and had them answered scientifically. In a year after my healing we took class instruction. During the year I overcame the smoking habit that I had indulged in for forty years; also nervous headaches that had been with me for twenty-five years; a badly sprained wrist and ankle, each healed in twenty-four hours, both swelling and pain overcome; also an attack of la grippe which was healed in two days.

About fourteen months ago, there seemed a mental call for me to make Christian Science healing my life work. For six months I resisted, but Good finally led me so plainly, that I followed in the pathway of Truth. At that time I was part owner in a foundry and machine shop, a mechanical engineer by profession, and liked the business; but I disposed of it, and for the last ten months I have given all my time and thought to the healing work.

Acting on the advice of my teacher, I divided my time between San Francisco, Cal., which is my home, and the city of Stockton, about ninety miles distant. I held my first meeting in Stockton on Sunday, May 23, 1897, with an attendance of six persons. The interest has grown so that on January 3, 1898, there was an attendance of forty. There has been a society organized with seventeen members, and a Sunday School of from eight to twelve; a hall rented in the center of the city; hymn-books purchased, and a fund started for free literature. They are now organizing a church.

The work in both places became too great for me to carry it on successfully, and after seeing that there was an earnest worker in Stockton, in January, 1898, I withdrew to confine my work to San Francisco.

A great deal of my work has been absent treatment. One lady living three thousand miles from here was healed of numerous diseases, both organic and functional, some of them life-long.

I can never in words express my gratitude to our Mother, I can only strive to let my life express that which I feel.

Wm. T. Kilgrove, San Francisco, Cal.

CHURCH AT CINCINNATI.

SEVERAL hundred gathered October 23, at the Auditorium, Odd Fellows Temple, to listen to the presentation of the doctrine of "everlasting punishment," which was the theme of the morning sermon, as taught in the Scriptures and interpreted in the text-book, Science and Health.

Christian Science claims that a radical change is gaining ground with regard to the stereotyped teachings of the doctrine of future punishment, under the rays of full-orbed truth as now revealed. Sin must be punished; sin punishes itself and excludes itself from harmony; without punishment sin would increase and men would be annihilated in a common ruin; hence the eternal justice of the heaven-ordained law, "Whatsoever a man soweth, that shall he also reap." This is the law of harmony. "With what measure ye mete, it shall be measured to you again," said our master, Christ. In order to ascend in the scale of being proper restitution is required of mortals. The very suffering we so much dread is often the way of progress. Suffering will only cease when sin ceases. Christian Science teaches that "sin makes its own hell and goodness its own heaven."

As we progress, we find that God is the only law-giver and his universal presence banishes all discord, all suffering, all

Digitized by Google

pain and sorrow, all crying, and all dying. The material sense of existence and the spiritual sense are the tares and wheat, which must be separated in the progress of events. Not that persons will be burned in a lake of fire, but the impersonal evil, the error that, indulged in, brings the fires of hell. The unrighteous will be still unrighteous, until through the understanding of being, as taught in divine Science, all ignorance and sin are destroyed and the true, real, God-made man, the image and likeness of God, appears. God so made man, in his own image and likeness; and God's work, like himself, is unchangeable. But the debris of mortal existence has hidden this spiritual man, and mortal eyes see only the counterfeit of God's perfect thought, God's idea. It is impossible for man to lose his individuality. It is the false material sense which must be lost in order to bring in the spiritual sense, which is the only fact of existence.

It is noteworthy that the word "all" is used over and over again. All includes all. The mortal belief of sin, disease, and death, of life in matter, is all that will ever be lost, and this loss reveals the spiritual man, the same yesterday, to-day, and forever. This statement is based on proof and is not a fabulous assertion. A belief in the change called death has no power to exalt man to a higher spiritual condition, which can only be effected by the understanding of man's oneness with God, and the teachings of Jesus Christ made practical in the life.—*Cincinnati Commercial Tribune.*

FROM SHARON, PA.

THE opening services in the new room of First Church of Christ, Scientist, on South Water Street, were beautiful and interesting. The morning and evening services were largely attended, which shows that the Christian Science movement in Sharon is gaining a strong foothold.

The room where the services will hereafter be held has been richly laid in red velvet carpet. The walls have been papered with light green paper, which harmonizes nicely with the rest of the furnishings. The interior has a cosey and inviting appearance. The handsomely polished pulpit which is used by the Readers was a gift from the scholars of the Sabbath School. The church room was tastefully decorated with palms and exotics and cut flowers.

A unique and interesting feature in the public services of the churches of this denomination throughout the world is the fact that every church, each Sunday in the year, has the same sermon. The sermons are arranged by the Bible Lesson Committee, appointed by the Christian Science Publishing Society, of Boston, Mass. The subjects of these sermons have followed the International Series of Bible lessons, and consist of extracts from the Bible and the Christian Science text-book, "Science and Health with Key to the Scriptures," by Rev. Mary Baker G. Eddy, which are read in each pulpit by two Readers, known as the First Reader and Second Reader. In the First Church of Christ, Scientist, Sharon, Mrs. Sara Irene Budd is First Reader and Miss Gertrude Ramsay is Second Reader.

The office of the Church Reader is a revival of an ancient Christian Church office. The references elucidate the subject and text of the day's sermon, and are read alternately without comment by the Readers.

A most beautiful, instructive, and interesting discourse is thus evolved, and the practical and spiritual import of the Scriptural texts is given the audience. Simplicity and impersonal instruction are thus secured, and the dangers of listening to mere opinion and personal deductions averted. At the Sunday morning services the First Reader spoke as follows:—

"The assembling together to-day in this beautifully fitted up room, of the body of people known as Christian Scientists, is an epoch in the history of the Christian Science movement in Sharon, and is a further proof to those who are observing with a critical eye the onward march of the cause that there is a foundation, an underlying principle, which has stood the test of time. There is a willingness upon the part of those who have espoused the cause to 'give a reason for the hope that is in them.' "—*The Daily Telegraph.*

TESTIMONIES.

Two years ago I was sick both in body and mind, and was on the verge of insanity. I had tried the doctors and they did not seem to do me any good. Previous to this I had been in the insane asylum twice and only got temporary relief. The first time was when I was sixteen years old. I stayed a year and came home no better than when I went. In two years I went again and stayed six months with the same result. I then gave up all hope of ever being any better.

My aunt from Iowa was at our house visiting. She said that her daughter was a Christian Scientist and told us of the wonderful healing she was doing, and so we sent for her to come and heal me.

I was confined to my room. I did not want to see any one, not even my own people. She treated me and I began to improve. After a while I began to go out and see people. I kept on improving and to-day am a well, rugged young man.

I worked in the hay field all through the haying season and could do as much work as any of the men, while before I took treatment I could not work more than half a day at a time without getting tired out. This year I worked in poison ivy. It used to poison me and now it does not affect me at all.

I know that Christian Science has done for me what nothing else could do, and I cannot feel half thankful enough to God and my dear healer. I want to tell what it has done for me, so that it can help some other poor suffering mortal.

I thank our dear Mother for Science and Health and all her precious gifts to us.—*Joseph W. Hale, Conway, N. H.*

Two years ago I was making arrangements to leave Ohio for some climate better suited to one who was troubled with heart disease and asthma. A friend came to my home and told me of some of the workings of Christian Science in the far West. I wrote to a Christian Scientist in Nebraska and received an answer, O, so kind! directing me to get a copy of "Science and Health with Key to the Scriptures," by Rev. Mary Baker G. Eddy. That letter had such a weight of conviction that I sent for the "little book" and I ate it as a hungry boy eats his dinner. I had not quite read it through when I looked up from my reading and said to my wife, "I am healed of asthma." She said, "Go to yonder hill-top and find the colts in this snow-storm, and if you come back without asthma I will believe you." I went and returned in thirty-five minutes, whereas before it took me from an hour to an hour and a half to make the trip. So my asthma was gone, except that occasionally fear would take hold of me, and I appealed to a Scientist in Boston, who gave me a few treatments. I continued to study Science and Health, and all my diseases have disappeared under the hallowed influence of Christian Science, and I am beginning to see the nothingness of error.—*L. S. Reasoner, Byesville, O.*

I had been an invalid for over ten years. During the last year I had two operations performed by the best doctors in the northwest, but received neither help nor encouragement. About this time I heard of Christian Science, turned to it, and found instantaneous relief. I immediately took a course of instruction, and for eleven years I have found Science to be "an ever-present help in time of trouble."

Jenny A. Farnum, McGregor, Ia.

Extract from a Letter.—"I had a beautiful demonstration for myself about three weeks ago over a fall. Also yesterday over sore throat which was very painful to sense, but while reading our new *Christian Science Weekly*, for which I subscribed, the claim left me in the light of what this little newspaper can do."

C. M. F., Biloxi, Miss.

THE BOARD OF LECTURESHIP.

THE following notice has already been given by our Leader, the Rev. Mary Baker Eddy:—

"The Christian Science Board of Directors of the Mother Church, and the branch churches of Christ, Scientist, may apply to the Board of Lectureship for lecturers, within the bounds of their sections or precincts in the United States, Canada, or Great Britain."

Applications from branch churches to the lecturers should be made through their clerks.

Lecturers may not be able to respond to such calls immediately, because of other engagements, but will as soon as possible arrange for a date that shall be mutually convenient.

Sections and Lecturers.—The churches are requested not to address correspondence concerning this subject to the Editor or the Publisher of the *Journal* or *Weekly*, or to the Clerk of the Mother Church, but to lecturers in their sections.

Eastern Section.—The lecturers for the New England States, Great Britain, the Maritime Provinces, the Province of Quebec, and the city of Ottawa, are, Irving C. Tomlinson, 8 Norway St., Boston, Mass.; William P. McKenzie, 2 Cumberland St., Boston, Mass.

Middle Section.—For the states of New York, Pennsylvania, New Jersey, and Delaware, and the Province of Ontario, Carol Norton, 170 Fifth Ave., New York, N. Y.; George Tomkins, 96 Fifth Ave., New York, N. Y.

Southern Section.—For the District of Columbia and the Southern States east of the Mississippi River, Edward H. Hammond, 1900 Bolton St., Baltimore, Md.; Mrs. Sue Harper Mims, 575 Peachtree St., Atlanta, Ga.

Western Section.—For the Western States and all Southern States west of the Mississippi River, Edward A. Kimball, 5020 Woodlawn Ave., Chicago, Ill.; Mrs. Annie M. Knott, 759 Woodward Ave., Detroit, Mich.; Alfred Farlow, 430 N. Y. Life Building, Kansas City, Mo.

Pacific Coast Section.—F. J. Fluno, 1319 Grove Street, Oakland, Cal.; A. A. Sulcer, 1062 Ninth Street, Riverside, Cal.

THE BOARD OF EDUCATION.

THE Board of Education has prepared printed application blanks to be used by those who desire to appear before it for examination.

These blanks are now ready, and can be procured by written application addressed to the Board of Education, 95 Falmouth St., Boston, Mass. No other form of application will be received.

This Board is authorized to send out twenty-one teachers annually. Although the examination will not be at all competitive, the Board will be obliged, all things being equal, to bestow the certificates with reference to the necessity for teachers in certain localities. The failure on the part of an applicant to receive a certificate will not necessarily imply any unworthiness.

Information as to the charge for examination will accompany the application blank.

The applications heretofore sent in will not answer. The printed forms must be used. All desiring to appear before the Board will have to apply again.

CHURCH RULES.

SINCE their publication, Section 1 of Article III. of Church Rules, has been amended as follows:—

Students who have taken the degree of C.S.B., or C.S.D., at the Massachusetts Metaphysical College, are not required to be examined by the Board of Education, but all Christian Science teachers must be loyal to God and the Christian Science text-book. Students who have taken a regular course in Christian Science under the instruction of loyal Christian Scientists authorized to teach, and bring with them such credentials as are required of a candidate for membership of the Mother Church, can become public teachers after passing a thorough examination before the Board of Education, of not less than three days, in Science and Health, chapter on "Recapitulation," the platform of Christian Science; page 403 of "Christian Science Practice," from line second to the second paragraph of page 405, and page 488, second and third paragraphs.

The following new Rule has been adopted:—

Applications from students of the Massachusetts Metaphysical College for membership with the Mother Church shall be signed by the Christian Science Board of Directors vouching for the loyalty of the applicant.

Also Section 1 of Article XII. of the By-Laws has been amended to read as follows:—

This Board shall consist of not less than three members nor more than twelve members.

We also re-publish section 14 of Article III. of Church Rules as changed:—

Sect. 14. This Church shall elect annually a Committee on the Church Manual, whose duty it shall be, when requisite, to have the Manual revised, corrected, and properly compiled. Any addition to this book shall be grammatically examined, punctuated uniformly with the other pages, and properly arranged in the book. The Board of Directors, Committee on Bible Lessons, and Board of Trustees of this Church shall each keep a copy of the tenth edition of the Church Manual; and if a discrepancy shall appear in any revised edition, the tenth edition shall be cited as authority.

Section 3, of Article II. of Church By-Laws, is amended as follows:—

The First Readers in the Churches of Christian Science shall read the correlative texts in "Science and Health with Key to the Scriptures;" and the Second Reader shall read the Bible texts. The reading of the Scriptural texts shall precede the readings from Science and Health, as heretofore. The remainder of the office of First Reader is unchanged.

The following Church Rule will be added to the Church Manual as a new section of Article III.:—

A student of the books of Mary Baker G. Eddy shall not take lessons of another student, but is eligible to examination by the Christian Science Board of Education.

NOTICES.

THE Wednesday experience meeting for subjects of general interest pertaining to Christian Science, as well as personal experience, is now called the *Wednesday Evening Meeting.*

A member of the Board of Lectureship may lecture at these meetings as often as once in three months. The Christian Science Board of Directors of the Mother Church, and the branch churches of Christ, Scientist, may apply to the Board of Lectureship for lecturers, within the bounds of their sections or precincts in the United States, Canada, or Great Britain.

MARY BAKER G. EDDY.

PLEASANT VIEW, CONCORD, N. H., Sept. 15, 1898.

It will be observed that the word "will" which occurred in the fourth line from the top of the above, now reads "may." —*Ed.*

We are authorized to say that the lesson-texts of the Expository Notes are to be read by the First Reader as formerly. The First Reader recites the spiritual interpretation of the Lord's Prayer; the Second Reader leads with the Lord's Prayer as was formerly done by the First Reader.

ALL correspondence with the clerk of the Mother Church on matters pertaining to his office, should be addressed to William B. Johnson, C. S. B., 95 Falmouth St., Boston, Mass.

We again announce that there will be no Communion service in the Mother Church until the first Sunday in June, 1899.

Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

VOL. 1 BOSTON, MASS., U.S.A., NOVEMBER 17, 1898. NO. 12

THE NOVEMBER ELECTIONS.

We herewith give the general result of the November elections. The latest information received of the elections held in forty-two states on Tuesday, November 8, shows that twenty-four of the states were carried by Republicans, fourteen by the Democrats, and four by Fusionists. This statement is based in most cases on the vote of the head of the ticket. The four states apparently carried by the Fusionists are Colorado, Idaho, Minnesota, and Montana. Those carried by the Republicans, California, Connecticut, Delaware, Illinois, Indiana, Iowa, Kansas, Maryland, Massachusetts, Michigan, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Rhode Island, South Dakota, Washington, West Virginia, Wisconsin, Wyoming. Of these, however, Nevada and Nebraska are in doubt.

Those going Democratic were Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas, Utah, Virginia.

The United States Senate is Republican by a good majority, and the House of Representatives by a small majority. It now seems that the Senate will contain fifty-five Republicans, twenty-six Democrats, four Populists, and four Silverites. Two states are in doubt.

Theodore Roosevelt's plurality for Governor of New York State now seems to be from seventeen to twenty thousand. The legislature will probably have a Republican majority of thirty on joint ballot.

Republican victories in the Western States have considerably increased the party strength in the Senate of 1899–1901 over the figures first given.

Indiana, Delaware, Wyoming, Washington have elected Republican legislatures, and in West Virginia and Nebraska there is also a prospect of having two seats now held by a Democrat and a Populist.

So far the Republican party has gained seats distributed among the following states: California, North Dakota, Wisconsin, Indiana, Delaware, Maryland, New Jersey, and New York.

In Colorado the entire Fusionist ticket was elected. The fusion was of Democrats, Populists, and Silver Republicans, headed by Charles S. Thomas, Democrat, for governor, who was elected by a majority approximating fifty thousand. It is a victory for Senator Teller, silver Republican.

In Utah, Roberts, Democrat and polygamist, was elected to Congress by a small plurality. The Democrats will have a large majority in the legislature. A successor to Senator Camden will be elected.

In Oklahoma Territory, Dennis F. Flynn, Republican, was elected delegate to Congress by about six thousand plurality. Both branches of the territorial legislature are Republican.

In New Mexico, Pedro Perea, Republican, was elected delegate to Congress by about two thousand majority over Ferguson, Democrat. Both houses of the legislature are Republican by two-thirds or more.

In Arizona, Wilson, Democrat, was elected delegate to Congress by about three hundred majority.

President McKinley is said to consider the general result of Tuesday's election as a popular endorsement of his conduct of the war, and of his policy in dealing with its results, and especially the demand made at Paris for the entire Philippine archipelago.

The election of Poynter, Fusionist, for governor of Nebraska, is now conceded by the Republicans. The majority is small, probably about one thousand. The Republicans will have a majority in the legislature on joint ballot.

ITEMS OF INTEREST.

Mr. Nikola Tesla is reported to have recently said: "War will cease to be possible when all the world knows that the most feeble of the nations can supply itself immediately with a weapon which will render its coasts secure, and its ports impregnable to the assaults of the united armadas of the world. Battleships will cease to be built, and the mightiest armor clads and the most tremendous repeller plates will be of no more use than so much scrap iron."

Mr. Tesla bases his statement upon his recent discovery of an electrical engine of destruction, which he claims to be almost unlimited in power. He claims that his scheme operates torpedo boats at any distance without intervening mechanism. From his American workshop he will control a boat at the Paris Exposition in 1900.

Mr. Tesla's claims of course yet remain to be verified. It will be gratifying to all good people to have wars cease, even as the result of the power of electricity. It would be much more gratifying if this result might be produced through the power of divine Love. But that wars and rumors of wars are nearing their end is one of the unmistakable signs of the times. May the happy day be speedily ushered in.

Christian Science has been in the courts before now, though not in exactly the same shape that it is in the Harold Frederic case. In a case brought in a Maine court some time ago the plaintiff, who was a Christian Scientist, sued the administrator of an estate for compensation for having treated its late possessor in accordance with the Christian Science tenets. The plaintiff prescribed nothing, nor did he administer any medicines. He trusted solely in what he called Christian Science to effect a cure, and he trusted in vain. Nevertheless, the Supreme Court of Maine held that the estate of the deceased patient must pay for his services, on the ground that there was nothing unlawful in the contract. Its wisdom or folly was something to be determined by the patient, and not by the court.—*Boston Herald.*

A verdict of manslaughter was returned by a coroner's jury, November 8, against Miss Kate Lyon, a member of the household of Mr. Harold Frederic, the late correspondent of the *Boston Herald*, who died October 19 at Kenley, and Mrs. Athalie Mills, the Christian Scientist who attended

Copyrighted, 1898, by Mary Baker G. Eddy.

Digitized by Google

Mr. Frederic. Miss Lyon and Mrs. Mills were arraigned in the Police Court at Kenley on the charge November 9, and were remanded for a week. They were admitted to bail.

New designs for the one dollar silver certificates have been completed at the bureau of engraving and printing, and the notes bearing them will soon be issued. Clearness, simplicity, and protection against counterfeiting have been the results chiefly aimed at.

The new design is somewhat less artistic than some of the present silver certificates, but will probably be more popular among those who handle money.

The government of Madrid has made arrangements to vest Senor Pedro Perez with the powers of consul-general at San Juan, Porto Rico, pending the ratification of the peace treaty at Paris. He will look after the interests of Spain in the island until the United States recognizes his appointment as consul at that point. This is the first instance where Spain has appointed a representative in American territory since the suspension of hostilities.

Boston now has an additional water supply for fire protection in the "conflagration district," limited only by the capacity of the Atlantic Ocean. This has been accomplished by means of a system of salt water mains and a series of hydrants three hundred feet apart, placed in Congress and Central Streets and Central Wharf, where, at the water front, connection is made with the fireboat which furnishes the power.

Advices from Managua, Nicaragua, are that the federal government of the united republic has been organized at Amapala. The cabinet is: Secretary for foreign affairs, Dr. Joaquin Sanson of Nicaragua; minister of the interior and public works, Senor Jose Maria Reina of Honduras; minister of finance, Dr. Camilo Arvelo of Salvador; minister of war and justice, Senor Severo Lopez of Salvador.

Lord Salisbury's speech at the Lord Mayor's banquet recently, especially his reference to America, is said to be making a stir throughout Europe. The press comments are profuse. *La Liberte* of Paris says, "It is a question of an Anglo-American agreement respecting the Philippines, directed against Germany." The *Journal des Debats* regards the speech as "an invitation to America to make an alliance against Europe."

Lord George Hamilton, secretary of state for India, speaking recently in London, said he agreed with Lord Salisbury that it was quite impossible to overestimate the importance of America's entrance upon a colonizing policy. "England and America," he said, "whose ideas and interests are identical, should stand side by side in the promotion of good government in the dark places of the earth."

Word comes from Cuba that President Maso and the senators representing the so-called Cuban Republic since October, 1898, presented their resignation to the Cuban Assembly on November 10, and they were accepted. The government of their republic is now in the hands of the Assembly. The attitude of the Assembly toward the United States is very friendly.

The consolidation of the tin plate interests of America is now said to be an accomplished fact. This is one of the largest consolidation movements of the year, and its ramifications are more far reaching than is apparent to the average business man or capitalist. The capitalization is said to be $50,000,000, and even this figure may be considerably increased.

The loss of the Maria Teresa, if it is lost, is compensated in a measure by the gains to our navy through the ships captured by Admiral Dewey at the time of the battle of Manila Bay, and those afterwards seized at other ports in the Philippines. There are five of these ships which are in condition for use. Two are already in commission.

From present indications it looks as if the constitutional amendment on equal suffrage, initiative, referendum, and state dispensary had carried in South Dakota. Nothing positive is likely to be known, though, until later, as only half the counties have thus far reported on these features of the election. This provides for female suffrage.

The President has made the following appointments:—

Richard Guenther of Wisconsin to be consul-general of the United States at Frankfort, Germany; Frank H. Mason of Ohio, to be consul-general of the United States at Berlin, Germany; Curtis Hoyt Dickens of New Hampshire, to be a chaplain in the navy.

Astronomers predict a display of meteoric showers, or "shooting stars," to be visible about November 14 and 29 or 30. This display is called the November "Leonids," and appears in the earth's orbit but once in thirty-three years. A brilliant exhibition may be seen in the northern skies for several nights.

The London *Times*, in an editorial on the Hispano-American situation, repeats its conviction that "no power will attempt to hinder the transfer of the Philippines," adding that "their loss cannot be great to Spain, who had practically lost the entire archipelago before the United States interfered."

A race war of a political nature seems to be again on in some parts of the South. On election day at Wilmington, N. C., a battle occurred between whites and negroes, resulting in the killing of eight negroes. And yet this is said to be a Christian country!!!

It seems to be now settled that the Maria Teresa was not sunk. Word comes from Nassau, N. P., that the British admiralty authorities there are going to take possession of this vessel as a derelict. The American consul has protested against this course.

It is reported from Washington, that instead of paying Spain $40,000,000 as an indemnity for the cession of the Philippine Islands to the United States, President McKinley favors a re-imbursement of only about $1,000,000.

The Cuban Assembly has voted for peace. A commission is coming to see President McKinley. General Garcia is to figure as chief member. The islanders feel confident that their rights will be protected by this country.

Reports from Manila are to the effect that the natives of the Philippines favor annexation to this country. The proceedings of the Paris Peace Commission are watched with great interest by the insurgents.

The battleships Oregon and Iowa have arrived at Rio Janeiro to participate in the anniversary celebration of the creation of the Brazilian republic. The supply ship Celtic was with the warships.

Two notable events in Boston recently, were the readings of Hall Caine, the great English novelist, at Tremont Theatre, and James Whitcomb Riley, the Hoosier poet, at Tremont Temple.

It is said at the war department that the 8th cavalry have left Savannah for Nuevitas and Puerto Principe, Cuba, the cities which will be garrisoned immediately by United States troops.

Senator Quay of Pennsylvania claims that there is no doubt of his re-election. On the other hand, Mr. Wanamaker claims that an anti-Quay legislature has been elected.

MISCELLANY.

In an able address recently published in the *Weekly News* of Seneca, Kansas, the Rev. Leon P. Jones, in part, said:—

Public speakers are but men, as every one of you has long since learned, and when they show the attitude of hostility toward institutions that have proven their good influence on the earth, they should be met with a rebuke in the very manner of Jesus when he said to his own disciples, "Ye know not what manner of spirit ye are."

It will not answer in this day and age of the world to say of the able and devout Christian scholars who are making a critical study of the Scriptures to learn their true meaning that they are aiding the infidels; nor will it do to say that the Bible critics, and the Christian Scientists, and the Unitarians, are a modern embodiment of Satan. Such sayings savor too much of the venom of the very worst class of political editorials.

So far as the churches and the people against whom these sayings have been directed are concerned, they are having free advertising for their faith, and they know that they are not in the least injured thereby. But not so those who approve of such sayings—they are injured by their own actions and should be rebuked for their own good.

We Universalists are a little like our Unitarian and our Science friends, we are not much concerned about the evil one—we do not even keep ambassadors at the court of Satan—we have long since severed diplomatic relations between us and Satan, or rather denied that such relations have ever existed.

It may be that some other denominations have such familiar relations with this personage that they can tell in what forms he now appears; if they believe that he is, and that he is the rewarder of them that believe in him, we shall not dispute them touching their own knowledge, but we want the public to understand that we eschew Satan and all his works so completely, that we deny to him the very personality that has been attributed to him, and we believe that the evil works charged to him have been done only by those who have believed in him or manifested the spirit attributed to him.

And inasmuch as the uninformed public might be led to believe that we as a church approved the declaration, that the before-named individuals and churches represent the modern embodiment of Satan, I hasten to disavow any such approval.

I remember that there is a prophecy made in Paul's writings touching the false teachers who should appear in the latter times, and now that I come to think of it, the Bible tells us the manner of teachings that shall proceed from them, though it does not say that the people themselves will be the embodiment of his Satanic majesty.

As I read the prophecy it goes like this, "some shall depart from the faith, giving heed to seducing spirits, and doctrines of devils; speaking lies in hypocrisy, forbidding to marry," and so on, so it seems that "doctrines of devils" were the staple articles of the false teachers that were to come, and of course we members of the Liberal churches cannot be accused with justice, of teaching any doctrines of devils—that offence rests only with such as have more familiar relations with Satan. We claim to have heeded the exhortation of Paul, to "refuse profane and old wives' fables and exercise thyself rather unto godliness."

I say so much in behalf of our Christian Science friends, and our Unitarian neighbors, as well as ourselves, for I am sure of our common ground here.

REV. LYMAN ABBOTT'S NEW GOD.

The Rev. Lyman Abbott, in a late sermon at Plymouth Church, Brooklyn, took as his subject the change in religious thought and theological conceptions in the last thirty or forty years. From a report of it, in the New York *Sun*, we glean the following conjectures about God:—

"Nobody can deny that in the last thirty or forty years there has been a change in religious conceptions. Many men have changed their views. I know that I have, and, although we cannot attack those who hold to the views which we think we have outgrown, the change must be illustrated by our own experience.

"God, I now think, is not apart from nature but dwells in nature. That he made this world and is now the engineer of it I cannot now believe. There are no forces; there is but one force, God. There are no causes, for there is but one great underlying cause. Natural and supernatural are the same.

"I have come to think that creation is a continuous process, with God himself in the process always. Every spring, every year, every day, every hour is a new creation. Imagine him gone and the Universe is gone. He is the ruler, not over the Universe, but in it. Is not that pantheism? you ask. No, for there is a difference between 'the all' and 'in all.'

"I can no longer believe in special Providences, unless all are special. He did no more in guiding Moses than in guiding Gladstone. He was no more the leader at the Red Sea of old, than our emancipation leader in the red sea of blood.

"Revelation is a continual process, with God showing himself to man more and more as the years go by. He is disclosing just as fast as we are able to comprehend. God rules the human race from within, as does the teacher, or the father, or the pastor.

"I no longer look forward to a great day of resurrection. The resurrection is as continuous as that of the plant from the seed."—*Philosophical Journal.*

A MILLIONAIRE SPEAKS THE TRUTH.

Tom Johnson—if you wish to hear him use language, call him Thomas—is a unique character among millionaires. He is a great money-maker and a man of advanced views—an iron manufacturer and a radical free trader, the owner of no end of street car lines and city property, and "unearned increment," and a pronounced single-taxer. Johnson is a man who sees things as they are, and who is frank to tell how he sees them. Recently he delivered himself of this statement:—

"I don't believe in charity. It is merely another drink to a shaky man. What the world needs is justice and not benevolence. I shall continue to decline to give checks to eleemosynary institutions, and I shall leave no money to build churches and found libraries. My family will be well provided for, but the rest of my fortune, after my death as well as before, will be spent in trying to teach people how to stop me, and men like me, from robbing them. So long as it is permitted to any man to take what doesn't belong to him through monopolizing nature's resources and the private ownership of public utilities, plenty of men of my kind will always be ready to jump in and do the stealing. My mission is to show the people how it is done, to take what they are stupid enough to let me take, and to show them how they can put an end to the system which enriches me and impoverishes them."—*Ex.*

Dear Weekly:—A week ago to-day it was proposed that we request Mr. Kimball to come here and deliver a lecture, and of course the money had to be raised. It was agreed that we adopt the method used in Florence, Col., as described in an article in the issue of the *Christian Science Weekly* of October 20; so to-day the test came off. After the slips had all been made out and returned it was stated that about seventy dollars would be required. You can well imagine our joy when the slips were added and found to foot up $69.75.

The fact of only nine enrolled members being present will prove to the Field that we can do what the Mother invites us to do if we allow divine Love to lead us.

Yours in Truth,

Isai T. Kahn. Chilicothe, Ill.

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

EDITORIAL.

COLONEL INGERSOLL, in his recent lecture in Boston on the subject of Superstition, among many other brilliant things, said: "Superstition is to believe without evidence, to explain one mystery with another, to disregard the real relation between cause and effect, to believe that matter was created by mind, to trust in miracles, charms, and dreams. Superstition is the child of ignorance and the mother of mystery." He further said: "At Chicago they erected arches and arranged a great thanksgiving to God, and there came a great storm and blew down the triumphal arches, and drenched the earth with rain. Is that the way a gentleman does when you try to do him honor? When you approach his house, does he turn the hose on you?"

Mr. Ingersoll's remarks are no doubt pithy and pointed, but not always strictly reverent. Yet, in so far as he assails the old and erroneous beliefs of God, there is much truth in what he says. If Mr. Ingersoll would study the Scriptures more with reference to their spiritual and allegorical meaning, and less with reference to the literalism of the old schools of theology, he would find no occasion for opposing and ridiculing them. For instance, if he were to unravel the deep meaning of the following Scripture,—"And he said, Go forth, and stand upon the mount before the Lord. And, behold, the Lord passed by, and a great and strong wind rent the mountains, and brake in pieces the rocks before the Lord; but the Lord was not in the wind: and after the wind an earthquake; but the Lord was not in the earthquake: and after the earthquake a fire; but the Lord was not in the fire: and after the fire a still small voice" (1 Kings, 19 : 11, 12). Also Matthew, 8 : 24–27: "And, behold, there arose a great tempest in the sea, insomuch that the ship was covered with the waves; but he was asleep. And his disciples came to him, and awoke him, saying, Lord, save us: we perish. And he saith unto them, Why are ye fearful, O ye of little faith? Then he arose, and rebuked the winds and the sea; and there was a great calm. But the men marveled, saying, What manner of man is this, that even the winds and sea obey him!"—he might become convinced that God did not send the rain upon the Peace Jubilee at Chicago, and that He is not in the storms and whirlwinds; and he might become satisfied that when Jesus rebuked and stilled the waves and the earthquake, he did it, not in violation of, but in obedience to, divine Law. Jesus expressly said that he did not come to destroy the works of the Law, but to fulfil the same. Was he not fulfilling the divine Law when he calmed the waves and stopped the earthquake? If the earthquake and the storm are of divine origin, surely Jesus would have been overturning instead of fulfilling God's Law in such act.

THE historic church located at Dearborn Avenue and Walton Place on the North Side, Chicago, has been purchased by Christian Scientists, and will be occupied by the Second Church of Christ, Scientist, of Chicago. The purchase price is said to be $60,000. This church was built to accommodate the immense audiences which came to hear Rev. Robert Collyer some twenty years ago. Since his departure to New York the audiences have fallen away, until the average attendance was from one hundred and fifty to two hundred. The auditorium is capable of holding twelve hundred. Speaking of this change, the Chicago *Journal* says, "On the other hand, the First Church of Christ, Scientist, edifice on Drexel Boulevard, the only one of the denomination in the city, is being filled to overflowing every Sunday, and the members are desirous of branching out."

The above is an additional evidence of the phenomenal growth of Christian Science in the great metropolis of the West. Such growth and evidence of increasing strength are gratifying and encouraging. No inflammatory newspaper articles, based entirely upon misapprehension and prejudice, either on this side of the Atlantic or the other, will have much effect to stay the onward march of a Christianity that is producing the marvelous results, of a practical and every-day kind, that Christian Science is doing.

IS IT IMAGINARY?

BY F. J. RYAN.

THE sermon of Rev. J. E. Roberts, published in the October *Journal*, recalls what has been said here by opponents of Christian Science concerning several remarkable cases of healing through Science. First they say the illness was largely or wholly imaginary, and next that the cures are imaginary. In this little city (Stockton, Cal.) of twenty thousand inhabitants, at least forty persons who had suffered several years have been restored to health within a couple of years. Of this number about half were regarded as incurable, and many had spent large sums for doctors' services and medicines.

Take the arguments, or rather the assumptions, of these people as they are stated, and what is the logical deduction? It must be either that Christian Science so operates upon a diseased imagination as to dispel the delusion that its victim is ill, or that it operates to the converse, and supplants a reality of disease with a delusion of health. The first position seems much like unconsciously granting the claim of Science. The grant is not well made, and does not benefit the cause of Science much, but if examined by the thoughtful must be regarded as an admission that "there is something in it"—a phrase very often employed to express half belief.

Now if Christian Science can delude a person into the belief that he is in good health when he is really ill, if it can render him capable of resuming work at his regular occupation; restore his appetite; bring the color of youth to the cheek of middle age; put roundness upon the form reduced almost to a skeleton, and bring cheerfulness and happiness to "hearts bowed down with weight of woe," is it not a blessed delusion? If the ailments are imaginary and yet have defied medical science, as practised by some of the most progressive physicians, to discover their unreality, is not Christian Science a great boon to have dispelled the delusions?

But there is another and a more important view of these

Digitized by Google

assertions of sceptics. It is, when reduced to its essence, that the human mind can accomplish, by delusion and by dispelling delusion, what the sceptics virtually assume is beyond the power of divine Mind. This is, in effect, attributing more power to man than to God; but those who employ these ostensible arguments do not perceive it until that view is turned upon them, when some take refuge in "offended dignity."

While I am not entitled to call myself a Christian Scientist, I have seen so many evidences of the efficacy of Science in healing disease that I cannot resist evidence that would have convinced even Thomas.

REV. IRVING C. TOMLINSON AT LOWELL, MASS., AND AT GARDINER, ME.

On Thursday, November 10, Rev. Irving C. Tomlinson delivered a lecture at Odd Fellows Hall, Lowell, Mass., to a full house. This is the first lecture delivered at Lowell under the new order relating to quarterly lectures by members of the Board of Lectureship. Mr. Tomlinson's lecture was entitled "Christian Science, What it is and What it is not," and was published in full in the Lowell *Morning Mail.*

From the Lawrence *Telegram* we extract the following relating to Mr. Tomlinson's lecture:—

"About fifty of the members of the First Church of Christ, Scientist, and friends, attended the lecture on Christian Science, last evening, in Odd Fellows Hall, Lowell, delivered by the Rev. Irving C. Tomlinson of Boston. Mr. Tomlinson has an excellent delivery and his logic in presenting Christian Science could not fail to convince his hearers that it was the Truth which he was expounding.

"Thinking persons do not change their philosophical or religious views hastily or without serious consideration. It is safe to say that they change only as the result of sincere and profound conviction."

At Gardiner, Maine, Mr. Tomlinson also lectured on the same subject, on November 8, 1898. Of this lecture the *Daily Reporter-Journal*, of Gardiner, has this to say:—

"The Opera House contained not only a large crowd, but also one composed of Gardiner's best citizens, last evening, to listen to the lecture by Rev. Irving Tomlinson. He was introduced in a graceful manner by Dr. J. P. Dorr, and spoke for over an hour, commanding the closest attention of his many hearers to the close. We publish below the lecture in full, and our readers should peruse every word of it."

That Mr. Tomlinson's able lectures are doing much good and arousing renewed interest in Christian Science where they are delivered, is already manifest. The lectures by the New England members of the Board which are to follow in regular series will also accomplish great good. They afford the public a means of learning of Christian Science, of distinguishing between genuine Christian Science and that which simulates it, that is not only effective, but which reaches many persons whose attention otherwise is not attracted thereto. That many misapprehensions concerning Christian Science will be removed and many abuses corrected through this system, is already quite apparent.

NEW CHURCH AT DULUTH.

The First Church of Christ, Scientist, dedicated its new church building at 924 East Superior Street, November 6 at 11 o'clock, and two hundred and fifty people, about the seating capacity of the church, gathered to hear the dedication services, which were performed in accordance with the forms of the Christian Science belief.

Addresses were delivered by the First and Second Readers of the church, Mr. and Mrs. J. G. Owen. A telegram was read from Mary Baker Eddy, the founder of the faith and the author of its remarkable text-book, Science and Health. The telegram was as follows:—

"First Church of Christ, Scientist, Duluth, Minn.:—May our God make this church the fold of flocks and those that plant the vineyard eat the fruit thereof. Here let his promise be verified: Before they call I will answer; while they are yet speaking I will hear. Lovingly Mother,

"MARY BAKER EDDY."

The First Church of Christ, Scientist, was organized in February, 1890, under a charter from the state of Minnesota. Services have been held continuously since that time, and the society has steadily grown until at present its active membership numbers about one hundred and fifty. The list is constantly growing, and there are a large number of people not directly associated with the society who have accepted its principles. Nearly all the members of the church are those who have been healed of various ills by its service. This is the first church home the society has had, services heretofore having been held in various halls that have made temporary resting places for the society. Now it is in a church of its own, and a pretty little church it is.

The church is in the colonial style of architecture, and both within and without it is pleasant to look upon. It is simple, but its very simplicity is a beauty in itself. There are three large half round windows with leaded glass, and the walls are a delicate tint of pink with inscriptions in gold leaf. Over the choir, which is a recess formed by an arch, is the inscription, "God is love." On the wall to the right of the arch is the following inscription: "As ye go, preach, saying, The Kingdom of Heaven is at hand. Heal the sick. —Jesus." On the opposite side of the arch is a quotation from Science and Health, which follows: "Divine Love always has met and always will meet every human need.—Mary Baker Eddy."—*Duluth Evening Herald.*

MR. KIMBALL AT SALT LAKE CITY.

Mr. Kimball recently lectured to a crowded house in the Theatre at Salt Lake City. The following is the introduction to the large audience by Mr. Lewis B. Coates:—

Friends, Ladies, and Gentlemen:—This is the first time in the history and growth of Christian Science in Salt Lake City, that we have had the pleasure of presenting to a public audience, in an official way, some of the facts about Christian Science as well as correcting some of the prejudices and misconceptions on this subject.

All nations agree that the sick should be healed and that the sinful should be saved; but how is disease healed and how are the sinful to be saved? Is not sin largely the cause of disease, and is not disease of a mental and not of a material origin? These are some of the vital questions of this age; and as Christian Science has cured thousands of the so-called "incurables," and has reclaimed other thousands of the hopelessly sinful, we feel that Christian Science is answering these questions—not by lectures upon public platforms nor by sermons from the pulpit, but by the demonstration of Truth and the silent cultivation of its virtues in the daily lives of those who are accepting Christianity as Science. As Christian Science is thus demonstrating its way into general recognition, we feel that we have not forgotten the necessary modesty and truthfulness of statement when we say that Christianity is Science and that Christian Science is before the world to-day as the most effective curative agent known to humanity. Inasmuch as there have been so many misconceptions upon this subject, it has been thought best by those in authority in our denomination to establish a Board of Lectureship, whose privilege it is to give some of the facts, as well as to correct some of the fictions, on this subject. For this purpose we have the pleasure of introducing to you Mr. Edward A. Kimball of Chicago, who speaks, not for the church in Salt Lake City, but for the entire denomination.

Digitized by Google

FROM DETROIT, MICHIGAN.

To the Editor Christian Science Weekly:—A lecture was given here by Mr. Kimball on the 24th of October, and the Theatre which had been secured for the occasion was not only crowded, but hundreds went away who were unable to find standing room.

The attention and interest manifested were such as we never see called out by anything less than this blessed Truth.

The following Sunday a local preacher was unwise enough to attack Christian Science—and as the papers gave this some attention, it was deemed proper to reply, and this was no difficult task, for we have the Bible on our side beyond all dispute. One charge was that so many delusions were started by women, but in an editorial in one of the daily papers the inconsistency of such a statement was shown and the remark made that the Christianity which the preacher himself professed began with the Magnificat.

With it all there is an ever-increasing interest in Christian Science, and attendance at the services.

The resident Scientists were both pleased and inspired by the grand lecture, and those who are not yet Scientists acknowledged themselves to be greatly benefited as well as enlightened by it.

So rolls on this mighty wave of resistless Truth, sweeping before it pride, prejudice and intolerance, error of every sort, and its Heaven-directed energies will also bring, are bringing now, all the good we seek when we pray, "Thy Kingdom come."—*Annie M. Knott.*

TESTIMONIES.

I AM of Norwegian parentage and was raised a Lutheran of the strictest kind, and lived in a large Norwegian settlement where the English language was spoken very rarely. From childhood to the time of confirmation, I was kept studying the Scriptures and Lutheran comments on the Scriptures, and at the time of rehearsals with the pastor I had the Bible's contents pretty well committed to memory along with the Catechism, Bible History, the Lutheran books of explanation, and the Psalm book. These books we had to learn so as to answer correctly any question they saw fit to ask, and that before the whole audience. Then we were to kneel before the altar, resume the covenant of baptism, and acknowledge this teaching to be our firm and sincere belief and only way to salvation.

There was where my struggle began. I compared passages of the Bible as I had learned them, and it appeared very dark to me. I believed in a God, but could not comprehend a God of logic and Principle from this teaching, and to go and testify to a lie was a horrible thing to do; and to go to rehearsals until I believed this, I knew would make me a worse liar, and I would be pointed out as a heathen, infidel, etc. I dared not approach our pastor on these subjects, and the only one to whom I could speak was my mother. After explaining what she thought was the meaning she told me to do as Jesus said, "Enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly."

I went behind our big wood-pile, and if a little boy ever offered God a solemn prayer, I did; but I received not the light. Confirmation day came and, with my parents, I walked into the church where I would either have to tell a horrible lie or be hooted by all. With a heart like a piece of lead and with tears in my eyes, I told the lie.

From this time I searched everything and anything that could offer truth. I studied phrenology and thought it was science and good reasoning. I also studied astronomy and physiology, and read a few other works on material sciences. It all led me to a precipice, and beyond this I could have my choice,—guess and believe, or drop the subjects.

I married and went with my family to northern Minnesota. Our family increased and our health decreased, and our home was visited with all the maladies in the neighborhood and I was not excepted. I coughed about one-fourth of my time. I could not lie on my right side and very frequently had hemorrhage of the lungs. I sought help of our physicians and they recommended me to a lung specialist. There I received what I then thought my doom, "You cannot live over six years at the best, and to stay in northern Minnesota is sure death, sell out and go to the coast," was the firm command. "Your heart is in bad shape, drink a lot of cod-liver oil." I tried the oil, but had to give it up, and I was fast failing. I then tried another institution in the east, and they gave me some encouragement and did me some good, but this was temporary.

During this time our oldest child was taken with hysteric fits when she was about five years old. I tried twelve different M. D.'s but no relief; some of them said, "She will outgrow this trouble when she arrives at the age of womanhood," but she went nearly two years past that time and still she would drop at the least excitement. My wife suffered with backache and had to have help, at times, to turn in bed, and the M. D.'s failed to give relief. She tried hard to be a Christian, and was a regular church attendant, whilst I would be at home or in my office reading material science works, also Thomas Payne, Robert Ingersoll, and some of Darwin. The Bible I had little use for since my confirmation day. I firmly believed in a Supreme Being but not a tyrannical one and one of no principle; but we were both hungering for Truth.

In 1894, while meditating over our sad condition, a thought came to me to go to see one of my neighbors. On approaching his dwelling I saw Mr. C. sitting outdoors reading a book. He seemed to be deeply interested and did not observe my presence. I looked into the open book and saw the name of what I had been searching for, Science and Health, and, as if some one had said it, the thought came, "That is what I want." This silent messenger told the truth.

In January, 1895, I borrowed the book. I was worse than ever before, but the precious words of that book had power enough to make me well before spring by following its teaching. The next winter I had no cough and looked healthy, which was noticed by our neighbors. I talked about this wonderful Science to my friends, and some of them accepted it. We sent for more of Mrs. Eddy's works and found them all logically the same.

Through the *Journal* we found the address of a Scientist. My daughter was instantaneously healed and never showed the least sign of her disease afterwards. My wife was treated and her claim disappeared, and I was cured without any other healer than "Science and Health with Key to the Scriptures."

This was more than two years ago, and I am well and have increased forty-eight pounds in weight. It is not my family alone in this little burg that have been helped, but also the dear neighbor C. and many others have received benefits and are living witnesses and workers in our Father's vineyard.

There are now twelve families meeting together and holding church services every Sunday. We have an average attendance of twelve children at our Sunday School. Our week night meetings are well attended.

I have only told a small part of the benefits received through Christian Science. I have tested it in business problems as well as in sickness, and it did not fail: It is a Science that has no precipices for us to fall over; it is no guess work or blind faith. I found it to be the demonstrable Truth.

C. K. Stockland, Stephen, Minn.

Recently an old claim of sciatica which had been healed in Science five years before, seemed to return. For two days I kept up earnest and persistent efforts to destroy the error, but the situation remained unchanged.

Digitized by Google

The third morning, taking my three treasures, the Bible, Science and Health, and "Miscellaneous Writings," I sat alone and quietly said, "I will stay right here now until this error yields." To help me stand "porter at the door of thought" (Science and Health), I decided to learn one of our Leader's poems, and at once opened to the one entitled, "Love," page 387, "Miscellaneous Writings," which heretofore I had considered difficult to commit to memory.

With interruptions it took me about three hours to complete the work. When I had reached the last verse, I was surprised to find myself perfectly healed, and have had no return of the error. Truth and Love gained dominion.

A. H. K., Cincinnati, Ohio.

It is hardly necessary for me to say that the *Weekly* has been a great benefit to me already. I look forward to Monday, when mine comes, as to a visit from a dear friend.

"How far that little candle throws his beams" we have no conception. Every day we hear of how the *Journal* or *Weekly* has helped or healed some one. I love them both.

Eleanor Troxell, Evanston, Ill.

THE BOARD OF LECTURESHIP.

THE following notice has already been given by our Leader, the Rev. Mary Baker Eddy:—

"The Christian Science Board of Directors of the Mother Church, and the branch churches of Christ, Scientist, may apply to the Board of Lectureship for lecturers, within the bounds of their sections or precincts in the United States, Canada, or Great Britain."

Applications from branch churches to the lecturers should be made through their clerks.

Lecturers may not be able to respond to such calls immediately, because of other engagements, but will as soon as possible arrange for a date that shall be mutually convenient.

Sections and Lecturers.—The churches are requested not to address correspondence concerning this subject to the Editor or the Publisher of the *Journal* or *Weekly*, or to the Clerk of the Mother Church, but to lecturers in their sections.

Eastern Section.—The lecturers for the New England States, Great Britain, the Maritime Provinces, the Province of Quebec, and the city of Ottawa, are, Irving C. Tomlinson, 8 Norway St., Boston, Mass.; William P. McKenzie, 2 Cumberland St., Boston, Mass.

Middle Section.—For the states of New York, Pennsylvania, New Jersey, and Delaware, and the Province of Ontario, Carol Norton, 170 Fifth Ave., New York, N. Y.; George Tomkins, 96 Fifth Ave., New York, N. Y.

Southern Section.—For the District of Columbia and the Southern States east of the Mississippi River, Edward H. Hammond, 1900 Bolton St., Baltimore, Md.; Mrs. Sue Harper Mims, 575 Peachtree St., Atlanta, Ga.

Western Section.—For the Western States and all Southern States west of the Mississippi River, Edward A. Kimball, 5020 Woodlawn Ave., Chicago, Ill.; Mrs. Annie M. Knott, 759 Woodward Ave., Detroit, Mich.; Alfred Farlow, 430 N. Y. Life Building, Kansas City, Mo.

Pacific Coast Section.—F. J. Fluno, 1319 Grove Street, Oakland, Cal.; A. A. Sulcer, 1062 Ninth Street, Riverside, Cal.

THE BOARD OF EDUCATION.

THE Board of Education has prepared printed application blanks to be used by those who desire to appear before it for examination.

These blanks are now ready, and can be procured by written application addressed to the Board of Education, 95 Falmouth St., Boston, Mass. No other form of application will be received.

This Board is authorized to send out twenty-one teachers annually. Although the examination will not be at all competitive, the Board will be obliged, all things being equal, to bestow the certificates with reference to the necessity for teachers in certain localities. The failure on the part of an applicant to receive a certificate will not necessarily imply any unworthiness.

Information as to the charge for examination will accompany the application blank.

The applications heretofore sent in will not answer. The printed forms must be used. All desiring to appear before the Board will have to apply again.

BOARD OF LECTURESHIP.

As has been before stated, let it be distinctly borne in mind that all correspondence relative to lectures, should be sent directly to one of the lecturers in the section where the branch church is located, as is clearly provided for in the Manual.

THE BIBLE LESSONS.

BECAUSE of recent inquires, we are led to say that the Responsive Reading for the Sunday morning lesson is not to be considered the basis for the sermon. As is stated in the *Quarterly*, "The following citations (*i.e.*, the correlative passages from the Bible and from Science and Health) comprise our sermon."

BOARD OF EDUCATION.

NOTICE is hereby given that all applications for examination by the Board of Education must be presented before December 20, 1898, unless for special reasons it is impossible to present them earlier.

NOTICES.

THE Wednesday experience meeting for subjects of general interest pertaining to Christian Science, as well as personal experience, is now called the *Wednesday Evening Meeting.*

A member of the Board of Lectureship may lecture at these meetings as often as once in three months. The Christian Science Board of Directors of the Mother Church, and the branch churches of Christ, Scientist, may apply to the Board of Lectureship for lecturers, within the bounds of their sections or precincts in the United States, Canada, or Great Britain.

MARY BAKER G. EDDY.

PLEASANT VIEW, CONCORD, N. H., Sept. 15, 1898.

It will be observed that the word "will" which occurred in the fourth line from the top of the above, now reads "may." —*Ed.*

We are authorized to say that the lesson-texts of the Expository Notes are to be read by the First Reader as formerly. The First Reader recites the spiritual interpretation of the Lord's Prayer; the Second Reader leads with the Lord's Prayer as was formerly done by the First Reader.

ALL correspondence with the clerk of the Mother Church on matters pertaining to his office, should be addressed to William B. Johnson, C. S. B., 95 Falmouth St., Boston, Mass.

PER CAPITA TAXES and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

HEREAFTER the Communion service in the Mother Church will be held once in each year, on the first Sunday in June, beginning in June, 1899.

We again announce that there will be no Communion service in the Mother Church until the first Sunday in June, 1899.

Works on Christian Science

WRITTEN BY

Rev. MARY BAKER G. EDDY.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid	$3 18
Two to Twelve books to one address, each, Prepaid	3 00
Twelve or more books to one address, each, Prepaid	2 75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid	6 00
Twelve or more to one address, each, Prepaid	5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid	$2 25
Twelve or more books to one address, each, Prepaid	2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

JOSEPH ARMSTRONG, C. S. D.,
PUBLISHER,
95 FALMOUTH STREET, BOSTON, MASS.

The Christian Science Journal,

Founded, APRIL, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REVEREND MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical Healing, as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscriptions:

Payable in advance, postage free, to any part of the United States and Canada. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents. Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

THE CHRISTIAN SCIENCE QUARTERLY,

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday Services in all the Christian Science Churches throughout the year.

Terms of Subscription:

One copy, one year, 50 cents; Fifty copies or more to one address, one year, each, 50 cents; Foreign subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States and Canada.

Terms of Sale:

One or more copies, each, postage paid, 15 cents; Fifty copies or more to one address, postage paid, each, 12½ cents.

CHURCH MANUAL. Containing Rules and By-Laws of the Mother Church, also list of members. Price, one copy, $1; six copies to one address, $5; twelve copies to one address, $9.

THE CHRISTIAN SCIENCE HYMNAL. Bound in two styles — Cloth and Leather. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00; Leather, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the building of the Mother Church, The First Church of Christ, Scientist, in Boston. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00.

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents; Cloth binding, 45 cents.

HEARINGS ON PROPOSED MEDICAL BILLS in Massachusetts and New York. 23 pp.

ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By EDWARD A. KIMBALL, 24 pp.

THE BUSWELL TRIAL. 24 pp.

REPLY TO SERMON. By SEPTIMUS J. HANNA, 30 pp.

THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.

HEALING THROUGH CHRISTIAN SCIENCE. By SEPTIMUS J. HANNA, 32 pp.

One copy or more, each, 10 cents; Twelve copies to one address, $1.00; Twenty-five copies to one address, $1.75; Fifty copies to one address, $3.00.

COMMUNION HYMN. "SAW YE MY SAVIOUR?"

Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

VOL. 1 BOSTON, MASS., U.S.A., NOVEMBER 24, 1898. NO. 13

THE BANQUET TO GENERAL MILES.

Major-General Nelson A. Miles was given a banquet at the Waldorf-Astoria on the evening of November 11. Seven hundred and fifty guests were present, prominent among whom was Governor-elect Roosevelt.

In the course of his able speech General Miles said:—

> Joyfully dear is the homeward track,
> If we are but sure of a welcome back.

Such a generous reception has been extended to me to-night as few are permitted to enjoy, and I should be wanting in gratitude did I not appreciate the sentiment expressed in this cordial greeting. I should be vain, indeed, to ascribe it to myself, or for a moment to accept it solely as a personal tribute.

As an expression of appreciation of the gallant troops which I have the honor to command, it is accepted in behalf of the living, and for them I thank you, as well as for those whose lips are forever silent, and whose heroism and sacrifice I know are here remembered and revered.

The wars of the past have had their objects, their achievements, and glorious results. This last was in the interest of humanity and in behalf of a heroic people, who for many years have been struggling against the cruel atrocities, oppression, and despotism of a decaying monarchy. It has been most remarkable in many respects. It has presented one series of victories, without a single disaster or a single defeat. The flag of the United States has not been lowered in a single instance. Not a foot of ground has been surrendered; not a soldier, gun, or rifle has been captured by the enemy.

The American soldiers and sailors have been true to the principles and traditions of their fathers and maintained the honor and glory of the American arms.

One great blessing to the country in this brief but decisive war has been firmly to unite in bonds of imperishable union all sections of the United States—North, South, East, and West. Still more, it has given us reason and opportunity to appreciate our obligation to the mother country for the dignified and powerful influence of the British empire in the maintenance of our principles and rights.

There are other fields to conquer. The past has gone and the future opens the doors to greater responsibilities, and I trust to greater progress and prosperity.

We are ascending to a clearer atmosphere, up to a higher Mecca, where we should take a stronger position than ever before occupied by our government and people. We can no longer confine ourselves to the narrow limits that governed us in the past. Much has been said of what has been the ruling policy of the past. This much I think is apparent to all, that the grave responsibilities of the nation are too great to be contaminated by personal, partisan, or sectional interests. Our interests are national in the highest degree. They embrace two hemispheres. They involve the welfare of a hundred millions of the human race. We are getting to that time when we shall require not only the ablest men, but many of them, in every department, to protect and administer the affairs of the nation.

In those impressive lines of Holland, we might exclaim:—

> God give us men! A time like this demands
> Strong minds, great hearts, true faith and ready hands;
> Men whom the lust of office does not kill,
> Men whom the spoils of office cannot buy;
> Men who possess opinions and a will;
> Men who have honor; men who will not lie.

The important and great questions that had to be met and that have been decided during the last few months have had a broadening influence upon the great mass of our people. It has been uplifting to every community and every phase of society. It has turned the attention of our people to the great power and responsibility of our republican institutions and true interests as a people and a nation, not only at home, but throughout every part of the globe. We have been enabled to give freedom to millions of oppressed, and I believe that we shall be able to extend to them the hand of support and secure for them a full measure of justice and enlightened government.

ITEMS OF INTEREST.

Lord and Lady Curzon of Kendleston went to Southampton November 14, and their visit was the occasion of a remarkable demonstration of good will for his lordship, who has represented this division in Parliament since 1895.

All the city functionaries and the county bodies participated in the celebration. The streets were decorated with flags and crowded with people, and at the railroad depot the public officials, in their robes of office, presented an address of congratulation to his lordship on his appointment to the viceroyship of India.

The lady-mayoress presented Lady Curzon with a bouquet of orchids in a silver holder, with a ribbon attached to it, inscribed in gold letters: "Presented to Lady Curzon by the lady-mayoress, in behalf of the Southport division."

A procession was formed, and Lord and Lady Curzon proceeded to the municipal buildings, amid the cheers of the people and pealing of bells.

At the reception which followed, the decorations included trophies representing the union jack, the stars and stripes, and the star of India entwined.

Mr. Joseph Chamberlain, Secretary of State for the Colonies of Great Britain, on November 15, made his first public speech since his return from this country, at the National Liberal Unionist Conference. In the course of his remarks he said: "What is of equal importance, our American kinfolk (loud cheers) have begun to understand us better. If we have had differences in the past, I believe they have arisen entirely from the want of the proper mutual understanding, but now the American people know that in the late trouble our hearts went out to them (cheers), and they heartily reciprocate our good feelings. I shall not attempt to predict what may follow this better feeling; but I may at least hope that, in the future, the understanding of which I have spoken may be perfected, and that in the face of that understanding we two may be able to guarantee peace and civilization to the world."

Copyrighted, 1898, by Mary Baker G. Eddy.

Digitized by Google

At the Knights of Labor convention, November 16, the reports of committees and of General Master Workman Hicks were presented. The report of Mr. Hicks took strong grounds in opposition to the anti-expansion policy of President Gompers of the American Federation of Labor.

"No part of the territory where our nation's blood was lost or the flag raised," said Mr. Hicks, "should, under any pretext, be allowed to go out of our possession. Still, we should not, under the guise of humanity, either take for our own or turn back to Spain any portion of the scenes of our various battles, but make them all free and independent. Let us not fear the importation of their cheap labor, but rather let us educate them to our standard."

An interesting session of the National Grange was recently held in Concord, N. H. The Hon. N. J. Batchelder, Master of the State Grange of New Hampshire, welcomed the members of the National Grange on the part of his organization. Governor Ramsdell extended a welcome to the state, and Mayor Woodworth extended the greetings of the city of Concord. Responses were made by the Hon. Aaron Jones of Indiana, Hon. J. J. Woodman of Michigan, and the Hon. Alpha Wilson of Illinois, and T. C. Atkeson of West Virginia. President Charles S. Messer of Vermont responded for the national body.

The *London Times* of November 18, editorially hails Mr. Joseph Chamberlain as the "apostle of better understandings with the United States and Germany," adding that it rejoices that, in view of the part the United States are likely to play in the far East, a cause of possible irritation has been removed by Emperor William's change of plans as to his homeward journey. With regard to Anglo-American co-operation in the far East, the *Times* says: "Its effectiveness will largely depend upon our ability to do our own share of the work and to protect our own interests without calling upon our friends."

Lord Herschel, at the 130th banquet of the New York Chamber of Commerce, held at Delmonico's on November 15, referring to the future relations between Great Britain and the United States, said that there were involved priceless blessings to both countries. He said: "Generations to come will rise and call those blessed who put America and Great Britain upon a closer and more fraternal plane. Nations should n t settle their differences in any other way than individuals. There should be a willingness to make concessions, and events of the past few months mark an epoch in history."

Negotiations on the proposed new reciprocity treaty between this government and Great Britain relative to the British West Indies have come to a halt, with no present indication that the treaty will be concluded in the near future. The negotiations had proceeded to an advanced stage last spring, it being hoped that the signatures would be appended before Congress adjourned, in order that the senate might have an opportunity to ratify. Since then, however, obstacles have developed, and the negotiations which were so far along have lapsed into a condition of inaction.

Dr. Campos Salles, President-elect of Brazil, was installed in the presidential chair November 15. In his inaugural address he eulogized his predecessor, Dr. J. De Moraes Barrios, and declared that now the republic is firmly established the time had arrived to initiate a national policy of tolerance, harmonizing the different elements of the country. The bulk of the address was devoted to finance, and urged "a most careful cultivation of friendly relations abroad, as Brazil needs foreign capital and immigrants."

The new Cunarder Ultonia took on her maiden cargo at Boston last week. Captain Potter brought her to Boston direct from the English shipyard where she was built. The Ultonia is the largest steamer ever built in England, with the exception of the Great Eastern. She is intended mainly for a freight carrier, although when she reaches Liverpool she will be fitted to accommodate about two hundred steerage passengers. She will carry no other class.

Admiral Schley was the guest of honor at a dinner of twenty-six covers at the Metropolitan Club, New York, November 17. The participants were members of the club exclusively, and included Secretary of State Hay, Special Commissioner Kasson, Assistant Secretary of the Navy Allen, Judge John Day, Colonel Schuyler Croftby, Generals Breckinridge and Baird, Admiral Selfridge, Commander Clover, and Senator-elect McComas.

The aspirations of Mr. Joseph Chamberlain, the British colonial secretary, for an Anglo-German entente, to which he gave utterance in his speech at Manchester November 16, are well received by the press of Berlin, which, however, contends that the relations between the two countries would never have been otherwise than friendly but for Great Britain's determined opposition to German colonial development.

The *London Daily Mail* of November 18, says, "An important result of Emperor William's tour is an agreement on the part of the sultan to give his sanction to the Zionist movement. This agreement between the Ottoman ruler and the German emperor is still more important, as indicating the friendly intimacy of the two monarchs and its probable influence upon general politics."

Not the least remarkable of the political mix-ups on account of war is that Governor Pingree of Michigan, who will appoint Alger to the Senate, if he can, had to fight as he says, not only the corporations and tax-dodgers in securing a re-election, but "the whole federal machine," with the result of one of the biggest Republican majorities ever cast in the state.—*Boston Evening Transcript.*

The United States navy will soon possess more than a sprinkling of foreign-built warships. Admiral Dewey has informed the navy department that he has contracted with a Hong Kong firm of wreckers to raise three of the Spanish war vessels sunk in the battle of Manila Bay last May. The cost of raising the ships and putting them in thorough repair will be $500,000.

A delegation of prominent members of the order of Free Masons recently invited President McKinley to participate in the memorial services to be held under Masonic auspices at Mt. Vernon on December 14, 1899, the centenary of the death of George Washington. The President accepted the invitation.

The members of the joint high commission are hopeful that by the time Congress meets they will have agreed upon a settlement, temporarily or permanently, of each of the Canadian questions, which are all that is now left to vex the peaceful relations of the United States and Great Britain.

A high official of the German Foreign Office asserts that no communications or negotiations have occurred between the powers regarding the Philippines. Germany, he says, has "only commercial interests to protect there."

The Court of Cassation has informed the minister of the colonies, M. Guillain, that it has decided that Dreyfus be informed by telegraph that the revision proceedings have commenced, and that he prepare his defense.

It is reported from Washington, that the President thinks there is no need of an extra session of Congress in March, 1899. He thinks the short session will be sufficient.

President Dwight of Yale College has resigned.

MISCELLANY.

A THANKSGIVING TITHE.

BY FRANK WALCOTT HUTT.

Because I sought and knew Love's kind bestowing,
All in the May-time sowing;
Because I trusted to the season's keeper,
And Love as well as reaper—
I stand within the year's slow-closing door,
And view with thanks at last my garnered store.

Thanks for the hours of toil that ever hallow
The rolling fields of fallow;
Thanks for the noontime drouth, the cool of morning,
The evening storm's low warning,
Thanks for the twilight and harvest moon,
Thanks for the starry calm that reigneth soon.

Because Love sowed, and Love and Hope together,
Sang in the summer weather;
Because God's lovingkindness still is keeper,
And death was not the reaper—
Accept, O Lord, of all my store a part,
A meet tithe-offering—my grateful heart.

On November 9, 1898, Mrs. Livingston Mims of Atlanta, Ga., delivered a lecture on Christian Science at Jacksonville, Fla., the first delivered under the new order at any southern point. Mrs. Mims was felicitously introduced to the audience by Professor Davenport Kerrison, director of the Conservatory of Music. He is said to be a man of broad and bright intellect and liberal views. The *Florida Times Union and Citizen* published a synopsis, and the *Metropolis* of Jacksonville, Fla., published Mrs. Mims' lecture in full. It is almost needless to say that it was a very wise, able, and forcible presentation of certain phases of Christian Science. The *Florida Times Union and Citizen* thus speaks of the lecture:—

The Board of Trade rooms were crowded even to standing room last evening to listen to an address by Mrs. Livingston Mims on the subject of Christian Science: "Is it Christian?"

Mrs. Mims is the wife of one of Atlanta's most prominent citizens, and is a lady of rare culture and refinement. The address, which occupied more than an hour in delivery, was listened to with great attention, Mrs. Mims reading from manuscript in a clear voice and with great distinctness.

Editor Christian Science Weekly:—The following is copied from the September number of the *Humane Alliance:*

"In proof of the statement made in the May number of the *Humane Alliance*, that people bitten by dogs seldom suffer from anything more than the ordinary pain of a wound, and that what is supposed to be hydrophobia in the patient is rarely more than a condition brought about by fear, is the case of a young woman of Lyons, N. J., suffering from 'lyssophobia.' She was never bitten, but her glove was torn by a dog which snapped at her. She afterwards read up on hydrophobia and worked herself into a nervous state resembling hydrophobia, which is also liable to end in death."

And yet medical men tell us that *matter* suffers! In its regard for a noble animal, the *National Humane Alliance*, is doing a good work by exposing the medical hallucination named hydrophobia, and so bringing to the surface the fundamental point of Christian Science healing, viz.: that fear is the foundation of every known and unknown disease, whether named hydrophobia or tooth-ache.

Clara Dreyer, De Funiak Springs, Fla.

The Christian Scientists of Utica have a well organized and steadily growing society, known as First Church of Christ, Scientist, with a congregation of nearly two hundred. Services are held every Sunday at 10.45 A.M. in the New Century Auditorium; and on Wednesday evenings at eight o'clock in the New Century Building, public meetings for the presentation of the practical reform and healing work of the system are held. Public reading rooms at 11 Rutger Street are open daily from ten until five. All the writings of Rev. Mary Baker G. Eddy, the Discoverer and Founder of Christian Science, are on sale at the rooms; also all publications of the denominational publishing society of Boston, Mass.

The Utica Church expects to erect its own church edifice in the near future.—*Utica Observer.*

SAYINGS OF MOODY.

"I can tell a good Samaritan forty rods off by his looks."

"The promises of God have no discount; all are good."

"If there was a back door to heaven there would be an awful rush for it."

"I was reading a paper which said I was not sent out here by authority. Authority! If God sent me, what greater authority do I need?"

"Carry oil around with you, not vinegar."

"A woman got her husband to go to one of my meetings and afterwards for a week he would not speak to her. He thought she had gone beforehand to me and told me all about him."

GOOD DOCTORS TO HAVE AROUND.

"I see they have had smallpox in a certain Ohio town for six months, the doctors thinking it was merely an eruption of some kind, and only one person has died from the effects of it."

"That settles it. I'm going to be a Christian Scientist hereafter."

"What's that got to do with Christian Science?"

"Everything. Do you suppose those people would have pulled through as they did if they had known they were having smallpox? Not by a long shot! They'd have died off by the dozens! Those doctors ought to be handsomely rewarded for what they didn't know."—*Cleveland Leader.*

In his work, "Literature and Dogma," Matthew Arnold writes, "Medical Science has never gauged,—never, perhaps, enough set itself to gauge,—the intimate connection between moral fault and disease. To what extent, or in how many cases what is called illness is due to moral springs having been used amiss, whether by being overused, or by not being used sufficiently, we hardly at all know, and we too little inquire. Certainly it is due to this, very much more than we commonly think, and the more it is due to this, the more do moral therapeutics rise in possibility and importance."

To the Editor of the Transcript:—Harold Frederic is dead, and it is said that he was a "victim of Christian Science." Is every decedent, who does not die of old age a "victim" of the system under which he makes his departure? If such a judicial standard is set up, heaven save the M. D.'s.

NOT A C. S.

About four hundred persons attended Rev. Irving C. Tomlinson's lecture in Odd Fellows Hall last evening, the subject of the lecture being "Christian Science." Professor Brierly of this city introduced the speaker, who talked in a pleasing manner.—*The Morning Mercury*, New Bedford, Mass., November 16.

Edwin D. Mead, in the *New England Magazine*, says that instead of spending millions in fighting Spain America should have founded colleges in Cuba to educate the natives. Mr. Mead evidently forgets that it is too hot in Cuba to play football.—*Denver Republican.*

Benjamin Franklin once emphasized the importance of a single letter by setting up a verse from the fifteenth chapter of First Corinthians thus:—

"In a moment, in the twinkling of an eye, we shall be *hanged.*"

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

MALICIOUS FALSEHOODS.

WE herewith republish from the *Denver Republican* of November 9, the following letter which is self-explanatory. We may add that the source from which the malicious stories therein referred to emanate, is well known. The authorship of the letters written to the postmaster at Concord, N. H., and to other persons, is also known. Unless these reprehensible methods cease we shall have somewhat more to say upon this subject.

To the Editor of the Republican:—In your very interesting editorial recently published, relating to Christian Science and its Discoverer and Founder, the Rev. Mary Baker Eddy, you make this statement:—

"In 1866 a New England woman, obscure and almost friendless, while suffering from an injury caused by an accident—an injury pronounced fatal by surgeons—was restored to complete health."

Most of this statement is strictly true, but that part of it which says Mrs. Eddy was "obscure and almost friendless," cannot truthfully be said to be so. In our land of liberty there is no stigma attaching to obscurity and friendlessness in the early life of the citizen, and no objection is raised to your statement on that ground. My purpose in taking notice of it is for the reason that certain enemies of Mrs. Eddy have long been circulating stories to the effect that in her early life and before she began her career as a metaphysician or Christian Scientist, she was an "obscure and ragged" woman, and that they, through their influence, had lifted her to fame, etc.

While this method of attack is so palpably malevolent as to be almost unworthy of notice, yet I am aware that occasionally a well-meaning person is misled thereby, unjustly prejudiced against Mrs. Eddy and her followers and consequently the cause of Christian Science, and thereby held from investigating it, where otherwise he might do so.

The truth is, Mrs. Eddy, long before she began the investigation of the subject of mind-healing and while yet an active and consistent member of an Orthodox church, into whose membership she was admitted at the age of twelve years, and in which she had a large list of friends, had attained no small prominence as a writer for magazines, and also as a lecturer. Her merit as a writer was recognized by the publishers of the magazines to which she contributed, not only by their unquestioned publication, but by the fact of a liberal remuneration therefor. Her career as a writer began at the age of sixteen. She was also, during times of political campaigns, employed to write for the newspapers upon the leading issues of the day. When the Civil War broke out Mrs. Eddy took a public stand for the abolition of slavery, obtaining a long list of female petitioners to General Benjamin F. Butler, then in command at New Orleans, La., beseeching him to make loyal slaves contraband of war. In a letter acknowledging the receipt of this petition, General Butler wrote Mrs. Eddy: "If we had many more women like yourself the war would soon close."

In 1844, after the death of her husband, Colonel G. W. Glover, when Mrs. Eddy bade adieu to her friends at the South, the governor and his staff, at Wilmington, N. C., where her husband was when attacked with yellow fever, together with a retinue of Free Masons, accompanied her to the depot and tenderly saw her leave for her Northern home.

In 1862 Mrs. Eddy delivered a lecture in what was then Waterville College, Me., and Professor Sheldon, in an article in the local newspapers, pronounced it one of the most able lectures ever delivered before that institution on the subject of the North and the South.

Mrs. Eddy's parents were well known and respected citizens of Bow, N. H. Her brother, the Hon. Albert Baker, was a prominent lawyer, and at the time of his death, at thirty years of age, he was about to take his seat as a member of Congress from New Hampshire. He was a graduate of Dartmouth College.

I make mention of the above facts simply by way of refutation of the falsehoods that have been circulated, as I have stated. Mrs. Eddy's firm refusal to allow the continuance of the profuse praise and tender friendship, and to accept liberal offers from the hands of hosts of her friends, at the cost of resigning what she conscientiously regarded as her mission to establish the cause of Christian Science—caused the years of privation and desertion which followed her discovery of Christian Science. Her marvelous career, her long years of self-sacrificing labors, her exalted Christian character, and her present work of promulgating the Christian gospel of healing, need no defence at my hands.

With very great respect,

S. J. HANNA.

CHRISTIAN SCIENTISTS AND THE PRACTICE OF MEDICINE.

[AN article under the above title was published in the November, 1898, number of *Law Notes*, a legal periodical of high standing, published in Northport, N. Y.

The rational, impartial, and able handling of the questions involved reflects credit upon its author, and will be read with interest by fair-minded people, regardless of creed or school of medicine.—*Ed.*]

THE courts are called upon to deal with a question of some delicacy in determining the status of the religious sect known as Christian Scientists. In a general way every one has, during the past few years, become more or less acquainted with the doctrines of this body. The distinguishing tenet of Christian Science, so far as it forces itself on outsiders, appears to be a belief in the pre-eminence of the mental over the physical in man, whence flows the doctrine that what seem to be bodily ailments are in reality affections of the mind, which may be cured or overcome by a regulation of the mental state. This is accomplished by prayer, and by bringing the sufferer "into harmony with God by right thinking and a fixed determination to look on the bright side of things." Christian Science is, then, at once a religious belief and a system for the cure of diseases. It is this double aspect of the sect which involves the courts in difficulty. So far as Christian Scientists constitute a religious body they are entitled to be treated with perfect toleration and to have entire freedom to hold and teach their peculiar doctrines. But when the

Digitized by Google

professors of these doctrines hold themselves out as able to heal physical ailments the question arises whether they render themselves amenable to the laws regulating the practice of medicine.

The practice of medicine directly affects the lives and health of the people, and its regulation falls within the police power of the State. To effect this regulation and to prevent the imposition of quacks, adventurers, and charlatans upon the ignorant and credulous, legislation exists in most if not in all of the States, prescribing the qualifications of those whom the State permits to practise medicine, and making it a penal offence to practise without these qualifications.

In at least two States Christian Scientists have been prosecuted under these statutes. The last of these cases is State *v.* Mylod (R. I. 1898), 40 Atl. Rep. 753. Here it appeared that the defendant was the pastor of the Providence Church of Christ, Scientist, a church belonging to the sect known as Christian Scientists, in whose belief God and Jesus Christ and the Bible hold a supreme place. "The principal distinguishing difference between Christian Scientists and other sects," Mylod testified, "consists in the belief of the former regarding disease, which they believe can be reduced to a minimum through the power of prayer." It was proved by witnesses who visited the defendant and requested to be treated by him that on such occasions he engaged in silent prayer and gave to the sufferer a book explaining the principles of Christian Science. This was the whole of his treatment. He did not recommend or administer drugs or medicines, nor take the patient's pulse or temperature, "nor do any of the things usually done by physicians." One witness who visited him to be relieved of the grippe was told "to look, not on the dark side of things, but on the bright side, and to think of God, and it would do him good, since thought governs all things." Each of these witnesses testified that he gave to the defendant a dollar, but whether this was demanded as a condition of treatment did not appear. The defendant was not a registered physician having authority to practise medicine under the statutes of Rhode Island. The court held, however, that his acts did not constitute the practice of medicine as that phrase is used in the statutes. It was said: "Medicine, in the popular sense, is a remedial substance. The practice of medicine, as ordinarily or popularly understood, has relation to the art of preventing, curing, or alleviating disease or pain. It rests largely in the sciences of anatomy, physiology, and hygiene. It requires a knowledge of disease, its origin, its anatomical and physiological features, and its causative relations; and, further, it requires a knowledge of drugs, their preparation and action. Popularly it consists in the discovery of the cause and nature of disease and the administration of remedies or the prescribing of treatment therefor. Prayer for those suffering from disease, or words of encouragement, or the teaching that disease will disappear and physical perfection be attained as a result of prayer, or that humanity will be brought into harmony with God by right thinking and a fixed determination to look on the bright side of life, does not constitute the practice of medicine in the popular sense." The court held, also, that the words "practice of medicine" in the statutes must be understood in their ordinary or popular sense, and it was not permissible to import into them a more comprehensive meaning.

If, however, Christian Science can be considered as a school of medicine it was said that it "is entitled to recognition by the State Board of Health to the same extent as other schools or systems of medicine. Under said chapter 165 [Gen. Laws R. I., c. 165] it cannot be discriminated against, and its members are entitled to certificates to practise medicine provided they possess the statutory qualifications. The statute, in conferring upon the State Board of Health authority to pass upon the qualification of applicants for such certificates, does not confer upon said board arbitrary power. The board cannot determine which school or system of medicine, in its theories and practices, is right; it can only determine whether the applicant possesses the statutory qualification to practise in accordance with the recognized theories of a particular school or system. It would be absurd to hold that under said chapter 165, which provides against discrimination, the requirements necessary to entitle an applicant to a certificate were such that the members of a particular school or system could not comply with them, thus adopting a construction which would operate, not as a discrimination only, but as a prohibition. On the other hand to hold that a person who does not know or pretend to know anything about disease, or about the method of ascertaining the presence or the nature of disease, or about the nature, preparation, or use of drugs or remedies, and who never administers them, may obtain a certificate to practise medicine, is to hold that the operation of the statute is to defeat the beneficial purposes for which it was enacted."

The last sentence presents forcibly the difficulty of the situation, for the beneficial purposes of the statute seem equally defeated if charlatans are allowed to hold themselves out as curing disease whether or not they are to be considered as practising medicine.

It cannot safely be asserted, however, that Christian Scientists are charlatans. If human testimony is worthy of any credit real cures have been accomplished by them, and at the very least substantial peace of mind has been brought through their agency to sufferers pronounced beyond the powers of ordinary physicians. The positive worth of the results achieved by Christian Science is not to be set aside dogmatically or contemptuously, but, even if the doctrine is pronounced a groundless superstition, its believers have a constitutional right to hold and follow what seems to them a system of truth. The law cannot afford to approach the subject in a narrow or intolerant spirit. No one has a right to judge another's beliefs. It is believed, therefore, that the result which the Rhode Island court was able to reach was a most fortunate one, and more in harmony with the spirit of our institutions and of the age than that which the Supreme Court of Nebraska felt compelled to adopt under the statutes of that state.

In State *v.* Buswell, 40 Neb. 158, the defendant, a Christian Scientist, was indicted for practising medicine contrary to the laws of the state. It was held that the Nebraska statute was directed as much against any person who, without complying with its provisions, should operate on, profess to heal, or prescribe for or otherwise treat any mental or physical ailment of another as against one who practises "medicine, surgery, or obstetrics," as those terms are usually and generally understood. The counsel for the defendant contended that "to hold that the practices of the defendant are a violation of the law would be to abrogate section 4, article 1, of the constitution of this State, which provides that all persons have the natural and indefeasible right to worship Almighty God according to the dictates of their own conscience, and also the second provision of section 4 of the Enabling Act, which provides that perfect toleration of religious sentiment shall be secured, and no inhabitant of said state shall ever be molested in person or property on account of his or her mode of religious worship." In examining this contention the court turned to certain passages in the Bible—the account of Peter and the sorcerer Simon given in the eighth chapter of Acts, and the story of the prophet Elisha and the leper Naaman contained in the fifth chapter of the second book of Kings. The result of the court's understanding of these passages is thus stated: "In the light of these instances, cited from defendant's own authority, it is confidently believed that the exercise of the art of healing for compensation, whether exacted as a fee or expected as a gratuity, cannot be classed as an act of worship. Neither is it the performance of a religious duty, as was claimed in the District Court."

The court's reasoning seems dangerous and fallacious. To prove that healing as practised by the defendant was not an act of worship or the performance of a religious duty it quotes and puts its own construction on passages from a book recognized by the defendant as supreme authority. But

Digitized by Google

neither the defendant nor any one else would be likely to recognize the court's interpretation as of authority. Indeed, the exegesis of the court in regard to the passages quoted is anything but re-assuring. The passages are demonstrably utterly beside the mark. But this is by the way, for the real point is that the defendant had the right to understand his chosen book as he pleased, and to decide for himself what constituted an act of worship according to the sect he professed to follow. The only point for the court was whether that act was or was not one permitted by the laws of the land, for "a party's religious belief cannot be accepted as a justification for his committing an overt act made criminal by the law of the land." Reynolds *v.* U. S., 98 U. S. 145. This seems to be the real opinion of the court, as appears by the following passage: "There is no claim in this case that compensation in one or the other of these methods was not accepted when tendered. The evidence affirmatively shows the contrary. Not only is this true, but we find a very considerable part of defendant's brief devoted to an argument as to the inefficiency of the established and recognized modes of treatment in the cure of diseases as compared with defendant's method, as tested by the results attained. The evidence upon which the case was tried convinces us that the defendant was engaged in treating physical ailments of others for compensation. He was within none of the exceptions provided by statute. The instruction which required that, to a conviction, he should be found guilty of practising medicine, surgery, or obstetrics, as generally or usually understood, was erroneous. The object of the statute is to protect the afflicted from the pretensions of the ignorant and avaricious, and its provisions are not limited to those who attempt to follow beaten paths and established usages. . . . The statute does not merely give a new definition to language having already a given and fixed meaning. It rather creates a new class of offences in clear and unambiguous language, which should be interpreted and enforced according to its terms. Under the indictment the sole question presented upon the evidence was whether or not the defendant within the time charged had operated on, or professed to heal, or prescribed for or otherwise treated any physical or mental ailment of another. There was involved no question of sentiment nor of religious practice or duty. If the defendant was guilty as charged neither pretence of worship nor of the performance of any other duty should have exonerated him from the punishment which an infraction of the statute involved."

It would appear desirable to avoid such a conclusion, if possible. The proper purpose of the statutes seems to be accomplished if those who profess to cure or treat diseases according to a particular system are thoroughly instructed in the methods recommended and adopted by that system. A person who wishes treatment for a disease according to the systems of medicine in vogue may be deceived if he is brought to a physician who tries to apply the remedies and methods of such systems without a knowledge of the principles upon which they are based, but one who applies to a Christian Scientist for treatment knows what he is going to receive. He does not expect medicines or surgical operations. He runs no risk of being imposed upon in this sense.

The most difficult aspect of the question is presented in the case of young children who, without a will of their own, are carried by their parents to Christian Scientists instead of to recognized practitioners. The newspapers now and then tell of such cases, and they evoke pity and indignation. But parental authority, like every other authority in the state, is subject to occasional abuse, and the general rules regulating the social structure cannot be framed to meet all individual abuses.

It has recently been held by an English judge, however, that parents who fail to provide medical aid for a child when sick become criminally liable for the death of the child resulting from the failure to summon a physician. In the case of Reg. *v.* Cook, decided by Darling, J., in September last, it appeared that the defendants, a father and mother, who were indicted for the manslaughter of their infant daughter, belonged to a sect known as the "Peculiar People," and that, under the doctrines of this body, a physician was not to be called in in the case of sickness. When one of the "Peculiar People" became ill an elder prayed over the patient and anointed him with oil. In the case of the defendants' little daughter this treatment proved ineffective in a case of whooping-cough, and the child died. Darling, J., in charging the jury, said: "It is the duty of parents to provide medical aid for their children. A child does not know anything about the tenets of the 'Peculiar People.' While a child is of tender years and cannot choose for itself the law protects it. If the defendants neglect a duty which the law imposed upon them—the duty of calling in medical aid for the child—and death is thereby caused or accelerated, they are guilty of the charge made against them."

The only other reported case wherein the status of Christian Science healers has been before the courts is Wheeler *v.* Sawyer (Me. 1888), 15 Atl. Rep. 67. A Maine statute declares that "no person who has not received a medical degree at a public medical institution in the United States, or a license from the Maine Medical Association, shall recover compensation for medical or surgical services unless, prior to such service, he had obtained a certificate of good moral character from the municipal officers of the town where he then resided." The plaintiff was a Christian Scientist, and brought this action to recover compensation for medical services rendered by him. He had obtained the required certificate to his good moral character. The court held him entitled to recover, saying: "[The plaintiff] did not prescribe nor furnish any medicines, but depended altogether upon what he called 'Christian Science.' The defendant contends that the so-called 'Christian Science' is a delusion; that its principles and methods are absurd; that its professors are charlatans; that no patient can possibly be benefited by their treatment. We think this all immaterial. We are not required here to investigate 'Christian Science.' The defendant's intestate chose that treatment and received it, and promised to pay for it. There is nothing unlawful or immoral in such a contract. Its wisdom or folly is for the parties, not the court, to determine."

A NARRATIVE.

BY MARY BAKER G. EDDY.

When I was a girl Mr. Lane, editor of the *Belknap Gazette*, would ask me to write for his newspaper during political campaigns. When in my twenties the editor of the *New Hampshire Patriot*, Hon. Isaac Hill, did the same—and my goose-quill would wag, however weely, for Pierce and King.

During my residence in the South my politics were changed—I lost my fun, and gained a higher hope for humanity. Remembering the spot where they said I was born, I returned to it to worship the God of my fathers. The omnipotent arm moving men and nations, governing sublunary events, giving chance direction and discord harmony, to-day, demands all my attention and occupies my life.

In the minutiæ of living, whether it be on the field or forum—on the battle-ground or at the ballot-box—men are known by their works, and every day honesty outruns and outweighs human policy. Any attempt to trample on divine Law, to break down state laws or municipal government, to infringe or to abrogate individual rights, reveals the man and his motives; it labels him a dishonest moralist and religionist, a dishonest politician, and an unfit teacher. Parents should beware of entrusting the education of their children to teachers of this sort. The world was not made for a clique or a class of men. God has given to all men equal rights and privileges. Tyranny, monopoly, dishonesty, and religion do not mate well, they are never found together,

Digitized by Google

and they are dangerous guardians of youth. Here let me narrate an incident in my travels.

On visiting a quaint, flourishing old town that was once quite familiar to me I was awe-struck with the change that had gone over it. It was literally dead and plucked up by the roots. One horse car moved solemnly through one street at intervals of one hour. The city was wrapt as with a pall in cold decadence. The churchyard was full, and the chief activity manifested was the rumbling of carts with granite through the principal streets. What was the matter? what plague spot, or bacilli were gnawing at the heart of this metropolis, paralyzing its energies and industries, and bringing it on bended knee? Why, it was an institute that had entered its vitals—that, among other things, taught games, and perhaps the quoit players had said within themselves: "We will absorb this city, appropriate its beauty, gather to ourselves its strength—and grow thereby. Then we will shut it out from us, but it shall not shut us out, for we are unscrupulous at the polls and will control the municipality. By donning the robes and making broad our phylacteries we may extend our boundaries *ad libitum*, and the oldest inhabitant shall acknowledge our prestige and power."

Again I visited that city—a change came over the spirit of its dream, and it rose from its deadness! What caused this metamorphose? Why, there was injected into its very heart the elixir of life, even the spirit of the words of our Master: "As ye would that men should do to you, do ye also to them likewise." And what was the result? That Christian rule obeyed, disinfected the community. It bought lands, demolished huts, "built a vineyard and set a hedge round about it." Parks sprang up, houses were built in modern style, electric street cars run merrily through several streets, concrete sidewalks and macadamized roads dotted the place,—progress had spread its white wings over the city.

Again the scenes shift and the curtain rises in this unfortunate city. Said institute having appropriated this city's last gem, a picturesque forest, its chief beauty was gone and the proud old place presented the spectacle of a woesome human trunk dismembered of arms and limbs. No wonder that stranger stared and said: "Alas, for the forest city." Shorn of its suburbs it had indeed little left to admire, save to such as fancy a skeleton above ground breathing slowly through a barren breast!

I am told that said institute still goes on, and the quoit players play. That its officials still beg for funds to support the children they have scooped up, and cooped up, to train creedward, while these poor children need to supplicate for pure Christianity, and the preservation of their limbs, their eyes, and their lives! God grant that the nice young gentlemen, who go to said institute, may live to go away uncontaminated.

Here endeth my story of travels; but of the institute whereof I write (in the words of a couplet borrowed from a riddle on the squirrel):—

Bid Chloe then and Myra tell
What's my name and where I dwell.

Independent Statesman, Concord, N. H.

REV. WILLIAM P. McKENZIE AT ST. JOHNSBURY.

From the *St. Johnsbury Caledonian* we extract the following:—

St. Johnsbury people had the opportunity to hear on Monday evening a clear statement of the belief of Christian Scientists by a member of the official board of lecturers. The hall was fairly well filled with an appreciative audience. In the audience were many from the surrounding towns, some driving clear from Lisbon to hear the lecturer.

The lecturer was gracefully introduced by George P. Moore. In introducing the speaker Mr. Moore said that for several years there had existed in St. Johnsbury a small band of Christian Scientists and that less than a year ago a branch was organized here of the Mother Church of Boston. "The members of the local church, for whom I speak, have invited you here to-night to hear one of the board of official lecturers, and I take great pleasure in introducing Rev. William P. McKenzie of Boston."

Mr. McKenzie spoke for over an hour in a calm and convincing manner and held the closest attention of his audience until the close. Mr. McKenzie's address is published in full in the *Caledonian*.

TESTIMONIES.

On November 14, 1897, our little daughter, then seven years old, was taken with St. Vitus' dance. She reeled when she walked, her speech was impaired, and she had no control of her left side.

In less than three months she was entirely healed, and under very trying circumstances. Error seemed to have the upper hand of everything; but we kept on, never doubting that Truth would triumph. Oh, how thankful we are for Christian Science! It not only healed the child but sustained us through it all. I am glad to testify to this glorious Truth. It has brought light where there was darkness, and has taught me that God is really All-in-all.

Amelia S. Korfhage, Louisville, Ky.

I was healed by Christian Science more than thirteen years ago. Before that time I had consulted two physicians who did not know of any remedy for me, though one gave a long name to what she called the cause of my trouble. I always sang in church and was often carried out in a fainting condition when the weather was very warm.

I had other troubles that made life a burden, and I am thankful that I never gave up searching till I found the only remedy. I consulted an oculist who told me I must wear glasses, must have a variety of occupation, and must never use a lexicon. After I knew of Science I threw away my glasses and have used my eyes as it was necessary and with perfect ease.

Christian Science has also been a great help to me in singing, destroying fear and enabling me to sing with a freedom otherwise impossible. There is but One Voice and our Mother hears but One and echoes it as clearly to our understanding. How can we but respond in obedience?

Only as we "listen" as she listens and "follow" as she follows can we "rejoice."—*S. L. S., Belmont, Mass.*

BOARD OF LECTURESHIP.

As has been before stated, let it be distinctly borne in mind that all correspondence relative to lectures, should be sent directly to one of the lecturers in the section where the branch church is located, as is clearly provided for in the Manual.

THE BIBLE LESSONS.

Because of recent inquires, we are led to say that the Responsive Reading for the Sunday morning lesson is not to be considered the basis for the sermon. As is stated in the *Quarterly*, "The following citations (*i.e.*, the correlative passages from the Bible and from Science and Health) comprise our sermon."

BOARD OF EDUCATION.

Notice is hereby given that all applications for examination by the Board of Education must be presented before December 20, 1898, unless for special reasons it is impossible to present them earlier.

Works on Christian Science

WRITTEN BY

Rev. MARY BAKER G. EDDY.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid	$3 18
Two to Twelve books to one address, each, Prepaid	3 00
Twelve or more books to one address, each, Prepaid	2 75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid	6 00
Twelve or more to one address, each, Prepaid	5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid	$2 25
Twelve or more books to one address, each, Prepaid	2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

SENATOR HOAR ON THE NATION'S GREAT DANGER.

Extract from a Recent Speech.

In a recent speech Senator Hoar, of Massachusetts, thus descanted upon the question of our national policy in the acquisition of territory:—

But yet the first duty of the American people is to themselves. And when I say this, it is in no spirit of selfishness or of indifference to the welfare of mankind. On the contrary, I believe that the highest service the American people can render to mankind and to liberty is to preserve unstained and unchanged the republic as it came to us from the fathers. It is by example and not by our guns or by bayonets that the great work of America for humanity is to be accomplished. And, in my opinion, we are to-day in a great danger—a greater danger than we have encountered since the Pilgrims landed at Plymouth, save only the danger that the slave-holding rebellion might succeed.

The danger is that we are to be transformed from a republic founded on the Declaration of Independence, guided by the counsels of Washington—the hope of the poor, the refuge of the oppressed—into a vulgar, commonplace empire founded upon physical force, controlling subject races and vassal states, in which inevitably one class must forever rule and other classes must forever obey.

I for one am not dazzled by the example of England. The institutions of England which have enabled her to govern successfully distant colonies and subject states are founded, as Mr. Gladstone pointed out, on the doctrine of inequality. Our institutions are founded on the doctrine of equality. If we are to outstrip England in national power, it must be by pursuing our own path, and not by following in hers.

Why, fellow-citizens, already we are hearing utterances from the platform, and from the press, and, I am sorry to say, from the pulpit, which show how already our old constitutional restraints and our old doctrines of freedom are being forgotten.

It is said that Porto Rico is already ours. It may be that Porto Rico is to become ours. But there is no authority, under the constitution of the United States, to acquire any foreign territory save by a treaty approved by the Senate by a two-thirds vote, or by an act of legislation in which the President, the House of Representatives, and the Senate must unite. We are told that it is proposed to purchase ten millions of people and a thousand islands, ten thousand miles away from this spot where we are gathered.

But under what doctrine ever yet heard on the soil of America are peoples—men, women, and children—to be bought and sold like sheep? It is said that the Philippine Islands are already ours by right of conquest. We hold, so far, but a single port in that group of islands, containing, it is said, ten millions of people—I suppose nobody knows what their numbers are, or whether there are not fifteen million instead of ten million. For one I deny this alleged right of conquest. Human beings—men, women, children, peoples—are not to be won as spoils of war or prizes in battle. It may be that such a doctrine finds a place in the ancient and barbarous laws of war. But it has no place under the American Constitution. It has no place where the Declaration of Independence is a living reality. It has no place in the code of morals of the people of the United States.

ITEMS OF INTEREST.

There is a great peril to labor interests in this country in the ultimatum which the United States treaty commissioners at Paris, under orders from Washington, are forcing upon Spain. It is not an imaginary danger, such as that over which Senator Lodge makes merry, of the emigration of the Philippine Malays *en masse* to our shores. It is not the introduction of this cheap labor in our shops and factories here in the United States. But it is the opportunity, of which the great trusts and combinations will not be slow to avail themselves, of exploiting this cheap labor in competition with labor on this continent.—*Boston Post.*

Saturday, November 19, the battleships Oregon and Iowa resumed their voyage to Honolulu, Captain Barker, commanding the Oregon, and the senior officer of the expedition, having notified the navy department that his little squadron sailed that day from Rio for Montevideo, where another stop will be made for coal.

After leaving that port, the ships will head for Punta Arenas, in the Straits of Magellan, almost at the extremity of South America, which will mark the accomplishment of about one-half of their voyage, unless they are ordered to proceed to Manila from Honolulu.

An interesting comparison of the trade of Canada in certain articles with this country and Great Britain is furnished by Consul General Bittinger of Montreal, in a communication to the Treasury Department. As this official points out, the course of the trade of the United States with Canada has for some years been one of expansion. Variations in its amount have occurred, due to tariff changes, and the lower or higher capacity of the Canadian people to purchase foreign goods, but these variations have been only temporary in their effect, when they restricted the imports into Canada of goods from the United States.

A committee of Civil War veterans has been appointed in the interests of the public by the Massachusetts Reform Club to investigate the conduct of the recent war with Spain, and to receive and to put in proper shape testimony from the New England States as to the management of said war. This committee includes Colonel C. R. Codman of Boston, Forty-Fifth Massachusetts, U. S. V., Civil War, chairman; Corporal J. B. Gardner of Boston, Forty-Fourth Massachusetts, U. S. V., Civil War; Samuel Bowles of Springfield,

R. S. Gorham of Newton, and Charles Warren of Dedham, secretary.

A Danbury, Conn., dentist is engaged in making a set of false teeth which are jet black. He explains that they are being made for a Japanese woman living in New York City who has lost her husband, and, according to the custom of that nation, must go into mourning by staining her teeth black. Her teeth are artificial, so she is having a special set made which she can wear until her period of mourning is over and then lay aside for future use.

Is the difference between wearing black teeth and black clothes in memory of the dead, after all so very great?

General Wood, commanding the department of Santiago, has sent an official report to the war department, of which the following is an abstract:—

"I have sent rations all along the sea-coast and by pack trains into the interior, using every effort to scatter rations about in such a way as to enable the people desiring to return to their farms in the interior to do so with reasonable assurance that they can obtain food, while waiting the development of their first crop.

General Carpenter with seven hundred United States cavalry took possession of Puerto Principe November 22. The city was formally surrendered to him by General March, the Spanish commander. General Carpenter was well received by the Cubans. It is stated that General Lope Recio Loynaz of the Cuban army will enter the city with his troops, who will surrender their arms and disband.

In the last fiscal year, the gross revenue of the postal business, in all its branches, was $89,012,618 against $33,315,479 in 1880, and the gross expenditures were $98,033,523, against $36,542,804; the number of postoffices, seventy-three thousand, against forty-three thousand. Within this period the population has increased about fifty per cent while postal business has multiplied nearly three-fold.

Saturday evening, November 26, there suddenly broke upon New England one of the severest snowstorms known for years. It played havoc with the railroads and street cars, and caused a general suspension of traffic in the cities. It also did great damage along the coast. In view of the earliness of the season, there was a general lack of preparation for such an event.

The first step toward our technical occupation of Cuba is about to be taken. Orders have just been issued to General S. M. B. Young, commanding the Second Army Corps, to send the First Brigade, Third Division, to Cuba as fast as transports can be procured. The brigades to be fully equipped for field service, and to take rations and supplies for thirty days.

Domingo Mendez Capote, late vice-president of the Cuban republic, and now president of the executive committee representing the general assembly of the army, has expressed his belief that the future of Cuba would inevitably be annexation to the United States. This, he said, was the natural outcome of recent events, but he denied that Cuban leaders have that aspiration.

Miss Daisy Fearing, a young negro woman who was graduated from the State Normal School, has waited patiently two years for an appointment as a teacher in the schools of New Jersey City. She has at last achieved her ambition through the personal efforts of prominent citizens, including Rev. Dr. Stoddard of St. John's Episcopal Church.

At Havana, General Greene is rapidly bringing order out of the chaos into which matters connected with the American military affairs had fallen. As a result of his energetic efforts and intelligent grasp of the situation, ten days will probably see everything ready for the reception of the American troops in this province.

The first battalion of the Second United States Volunteer Engineers left Savannah, Ga., November 23, for Port Tampa, and will sail from there by the steamer Florida for Havana. These will be the first troops sent from the United States to Havana. The battalion is commanded by Major Richard H. Savage.

The Commissary Department, November 22, despatched the steamer Bratton from Savannah, with seven hundred tons of provisions for the starving people of Cuba. The Bratton will leave a portion of the cargo at Havana, and then will sail to Matanzas and other points.

On the authority of the Venezuela Legation in Washington, it is said that ex-President Harrison has been retained as counsel for the Venezuelan Government before the tribunal of arbitration in Paris, next year, and that he receives a fee of $100,000 for his services.

It is the belief of Hon. Robert P. Porter, Commissioner of the United States to Cuba and Porto Rico, that the building up of the industrial future of Cuba is the work that must be performed before any thought should be given to her political destiny.

Claims for pensions on account of the Spanish war are coming in rapidly. The total on file up to date is 1,947 for war service and 178 for naval service, exclusive of the claims of the battleship Maine victims.

The government receipts, November 23, from customs were $715,603; from internal revenue were $683,349, and from miscellaneous were $42,626. The expenditures were $1,683,000.

November 26, there was launched at the Union Iron Works, San Francisco, the great battleship Wisconsin. It was christened by Miss Stephenson of the state of Wisconsin.

The American flag now flies in Havana. November 25 all four companies of the second regiment Volunteer Engineers landed at Havana, at 9.20 o'clock with colors flying.

Signor Bacardi, an old resident of Santiago, has been appointed Mayor of that city by General Wood, to succeed Major McLeary.

A banquet was tendered Rear Admiral Schley, on the evening of November 25, by the members of the Brooklyn Club, New York.

Dr. Lyman Abbott resigned the pastorate of the Plymouth Church, Brooklyn, N. Y., November 27.

Thanksgiving Day was observed throughout New England in the good old-fashioned New England style.

CONCORD ITEMS.

From the *Evening Monitor* we clip the following:—

So far Manchester has announced two candidates for the United States Senate in 1900, Hon. Henry E. Burnham and Congressman Cyrus A. Sulloway. The *Union* says, "In the mean time, Senator Chandler glances over the field and smiles, and smiles, and smiles."

Rev. F. L. Phalen completed six years of service as pastor of the Unitarian church, Sunday, November 20. In recognition of the day he preached a sermon upon "Six Years of Our Ministry Together."

Grand Commander Elmer E. Hill of Milford visited the Golden Cross Lodge at Penacook Wednesday evening.

MISCELLANY.

SELF IS OUR GOLIATH.

To make Christianity helpful, we've got to quit judging others and get down and lift. There is no load of sin or sickness too heavy for Christian Science—the lever of Love—to pry off our shoulders.

There is a good deal said about unselfishness, but practically there is very little of it. Self is the giant of these days, but the undersized David met and slew Goliath, and that is what every one must do with his giant of self if he shall attain the freedom of doing right.

If it were not that every one seems to feel bound to appear better than he is, self would not be so hard to overcome. Self rides us, booted and spurred, because we are too proud to call for help. We do not like to let our fellow men know that we are secretly pandering to self, and so we keep up a righteous appearance at the expense of slow progress toward the realization of true manhood.

The Christian Science Church is not a fellowship of saints, but of mortals who are trying to help one another to be saints. When a man tries to make himself good he is attempting an impossibility. Self cannot be good. Goodness appears only in the measure that self is forgotten. If it were not for self—properly speaking, the false sense of self—we would not be unjust, malicious, jealous, envious, covetous, and we would not suffer from the envy, malice, injustice, or criticism of others.

Selfishness will hide under a thousand masks of seeming goodness, but self is the one Devil, though his name is Legion. A selfish sin so well covered up that we are not conscious of its presence, may sting us unexpectedly. It is like a revolver concealed in the pocket. You never know when the trigger may catch in the lining and cause it to go off.

An electric light in a bad neighborhood is a better protection than ten policemen would be without the light. Christian Science is a bright light in the human consciousness which searches out all the lurking-places of error. It will finally drive them all out, even selfishness.

Denver Republican.

ALPHABET OF PROVERBS.

A grain of prudence far outweighs a pound of cunning craft.
Boasters, sometimes liars called, have bragged till angels laughed.
Denying faults will double them, without a gain of pelf.
Envy shoots at others, but she only wounds herself.
Foolish fear a danger dreads when there's none in sight.
God in our poor, feeble hands puts His temple's light.
He has hard work who has naught in his hands to do.
It costs more to right one wrong than to suffer two.
Knavery is a poor trade for a youth to learn.
Learning journeys with a man wherever he may turn.
Modesty will guard a soul better than a sword.
Ne'er forget to listen well to your heart's first word.
One swift hour caught to-day is worth two to-morrow.
Proud looks, sometimes, are a mask worn to cover sorrow.
Quiet conscience is the saint that giveth quiet sleep.
Richest he who from poor fields crops of good can reap.
Small faults left long enough grow up to giant foes.
The bough that bears the weight of fruit, lowest bends and grows.
Upright walking is most sure on the way of sin.
Virtue is to Happiness very closest kin.
Wise men make their chances; for they are seldom found.
You will never hurt the world spreading kindness 'round.
Zeal that is misdirected will crumble to the ground.

The Central City Democrat.

THE FIRST AMERICAN BIBLE.

The recent sale in Philadelphia of a copy of what is believed to be the first Bible printed in this country in the English language—Robert Aitken's, Philadelphia, 1872—has brought up again for fresh discussion the old unanswered question, Was Aitken's Bible the first printed here in English? William Bradford endeavored to issue a Bible under the auspices of the Society of Friends in 1688; Cotton Mather's Bible (the "Biblia Americana"), upon the preparation of which he spent fifteen years, was never published, though he tried to find printers in 1710, 1713, and 1728, and exists to-day in manuscript in the library of the Massachusetts Historical Society; and in 1770 John Fleming, a Scotch printer in Boston, circulated the prospectus of a proposed edition of the Bible ("This Work will be put to the Press as soon as Three Hundred are subscribed for"), but the project failed through want of encouragement. Finally, in 1781, Robert Aitken of Philadelphia printed the "New Testament" in English, and the year following issued the whole Bible in that language—the first so issued in this country of which copies are known, says the *New York Sun*. Thus, one apparently has to come down to the era of American independence without meeting a Bible printed here in English, though editions of the Scriptures had been published for the use of the Indians in 1661, 1663, and 1685, and for the use of the Germans in 1743, 1763, and 1776.

Dr. J. E. Roberts, formerly pastor of All Souls' Church, Kansas City, and regarded as one of the leading Unitarian clergymen of the West, who transferred his allegiance to the recently organized Church of the World, announces that hereafter prayer will form no part of the services. He believes that praying in public "has become a purely perfunctory performance that had better be abandoned."

He says: "It lacks the spontaneousness which should characterize the effort. Sincerity also is absent. The minister in the regular programme at due intervals arrives at the stage where a prayer is prescribed. He may or may not feel like it, but his instructions are plain and he prays. It is sentiment without reason, and he talks to the crowd more than to the Great Unknown. If we have prayers they will be free and rational. I would as soon make a prayer anywhere else as in church. Did you ever take shorthand notes on the average prayer in church? No? Well, try it and you will be surprised at the collection of words you obtain. All these prayers at the opening of Congress, at political meetings, and other public gatherings are a travesty."

Marlboro Enterprise.

Professor G. W. Ferguson, formerly of Sheboygan, Wis., who created such a furore by the practice of hypnotism on pupils of the public schools a year ago, has denounced hypnotism. A year ago Ferguson was instructor of art in the city schools. It was discovered he was practising the art of control on his pupils. Children were made actors in hypnotic entertainments. The Board of Education was compelled to ask for his resignation. He left Sheboygan and located at Milwaukee, and then went to Chicago. In opening his condemnation of hypnotism he asks forgiveness of God for teaching and practising it. He used to think it was a good means of leading people from sinful habits. Now he is convinced it is an abominable practice, a species of witchcraft, that only the devil and his hosts would practise. He pleads with those engaged in its practice to stop it at once.

A lecture on Christian Science was delivered in the City Hall, Lawrence, Thursday evening, November 17, by Rev. William P. McKenzie of Boston, a former Presbyterian minister.

Although the weather was stormy, yet a large number were present. Thirty-two of the Lowell Scientists chartered an electric car and attended the meeting. Twenty Scientists from Boston were also in attendance.—*Lowell Mail.*

If we could read the secret history of our enemies, we should find in each man's life, sorrow and suffering enough to disarm all hostility.—*Longfellow.*

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address. one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

EDITORIAL.

"I DO not want this class to be an affair of money at all."

These were the words of the Rev. Mary Baker Eddy to the class recently taught by her at Concord, N. H. There were in the class sixty-seven members. They were taught by our Leader in her capacity as President of the Massachusetts Metaphysical College. The established charge for such teaching would, under the rules of said college, have yielded the Teacher a handsome sum, and all would joyously have paid the maximum charge, and have felt that they were returning *nothing* for the benefit received and the privilege conferred. Indeed, some insisted upon paying notwithstanding the announcement at the outset that no charge would be made; but came the answer: "I do not want this class to be an affair of money at all."

Mrs. Eddy, if she chose, could teach as many as she desired, and then would be obliged to turn thousands away annually. She could command her own price for her services. She could amass great wealth, if money were her object. So far from this, however, she not only taught gratuitously, but has given away for charitable purposes and in the interests of the Cause, large sums of money. She has conveyed to the Mother Church valuable real estate, and the entire property of the Christian Science Publishing Society, —a rapidly growing and valuable business. She has donated to the erection of church edifices most liberal sums; and these acts are of frequent occurrence.

Such a record as this, surely, with all fair-minded people will be a sufficient answer to the recent thunderings from the pulpit, as well as the "profane and vain babblings" of some other persons, charging that Mrs. Eddy is sordid and mercenary.

"Let justice"—simple and common—"be done, though the heavens fall."

WE were in error in saying, in the *Weekly* of November 17, that the old Robert Collyer church edifice at Dearborn Avenue and Walton Place, Chicago, had been purchased by Christian Scientists. We published what we did upon the strength of the statements of the Chicago newspapers, and also private advices, but it seems both were mistaken.

Another letter now informs us that the transaction failed because the necessary four-fifths of the adult members of the congregation worshiping in the old Collyer church would not consent to the sale, except for a sum considerably in excess of the amount originally named, and thereupon negotiations ceased.

We regret the mistake.

THE following extract from a private letter recently received by a Scientist here from a Scientist in London, will be read with much interest:—

"We are in the midst of stirring times. The Press, the doctors, and the clergy are doing all they can to put Christian Science out of Great Britain. No one is moved in the least by it. The students are brave and loyal to Truth. Good healing is being done on every side.

"Yesterday the church was filled both morning and evening, and appearances would indicate that there is too little room for all who want to come. Everybody is busy with patients and inquirers.

"Malice is overdoing itself and reaction is setting in. The Frederic case still hangs on but will probably be decided to-morrow. There is no law in England to make a criminal case out of it, but the coroner's jury is absolute and can render any verdict it chooses, but the Sessions promptly throw an illegal verdict out, so it all ends in what the jury thinks is annoyance and inconvenience to Christian Scientists. How little they realize how perfectly undisturbed we all are. Dear Mrs. Mills is brave and Scientific all the time. Good alone can come out of it if we are all faithful to Truth."

THE HARVEST.

BY CLAUDE M. SPAULDING.

WE are told in Matthew, 13th chapter, 39th verse, that the harvest is the end of the world and that the reapers are the angels. Is not the generally accepted interpretation of this Scripture wholly material? The thought that this planet is to be suddenly destroyed is one tending to arouse fear in the individual, and it is associated with the sensational and superstitious teachings of certain sects to-day. How much better it is to read our Bible in the light of Christian Science and understand the passage to mean that the necessity is laid upon each and every one to spiritually interpret the Bible; thus bringing to an end the false, as the individual's thoughts and actions become leavened with Truth. The world that has persistently mocked our best efforts, still withholding that which the heart asked; the world that has beguiled us into sin and chained us cruelly; the world that has dealt out to us sickness, and pointed to naught but the grave, this world is to pass away.

Men are being emancipated to-day through the teachings of the Comforter—Christ-Truth—and the world that was made for Adam (we might more properly say *by* Adam) has no longer power to make these men sin, nor to make them sick, nor to kill them. Why? Because it has been proven false. And with the proof that it is false comes the key to unlock the treasures of Truth. We find in the teachings of the Comforter that man is spiritual and does not encounter these evils of materiality—sin and sickness. We readily perceive that the Scripture is true which says, "All things were made by him [God—Spirit]; and without him was not anything made that was made." Then, while we invite you, dear reader, to partake of the bountiful repast which the Father has prepared for us, we would ask, what has become of the erring world? It is the eternal purpose of Christianly Scientific laws that it come to an end. With its ending comes the harvest.

That seed (the word of Truth) which has been planted, has developed, through prayer and faithfulness, into a goodly crop. We are rising "unto the measure of the stature of the fulness of Christ." We grow strong and sturdy by living a righteous life: and at the right time the reapers enter the field.

Digitized by Google

"Angels. God's thoughts passing to man; spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, giving the lie to evil, sensuality, and mortality."—Science and Health, p. 572.

What will these reapers do?

"Him that overcometh will I make a pillar in the temple of my God, and he shall go no more out" (Revelation, 3 : 12).

We may study another passage of Scripture on this subject, and learn something of the patient, untiring efforts which true Christians must make in following the Master.

"But when he saw the multitudes, he was moved with compassion on them, because they fainted, and were scattered abroad, as sheep having no shepherd. Then saith he unto his disciples, The harvest truly is plenteous, but the laborers *are* few; Pray ye therefore the Lord of the harvest, that he will send forth laborers into his harvest" (Matthew, 9 : 36, 37, 38).

This is a call for each of us to come out from the sensuous world and labor for the advancement of the cause of Truth. Our teaching is to be by example: letting our light so shine before men, that they may see our good works, and glorify God. We are to overcome error in ourselves; remove the thought of a power in evil, and know that to be unreal which denies the ever-present control of Good. Our work is, in fact, to lead others to help themselves, to join us in following the example of the Master. We may each enter this field of work, and while we labor and wait we will not mind the burning sun nor threatening cloud, because we shall be ever mindful that our Master is with us, and that we cannot but serve him, for He is Lord of All. If an error seems formidable and difficult to cast out we will be none the less sure that it is unreal. We will name it unreal and remember that God left it out of His creation: then, lo! the Divine hand will subdue it for us, and we shall have learned more of the Father's presence. We could not have expected to do great things at will, for the Scripture plainly says, "it is God which worketh in you both to will and to do of *his* good pleasure" (Philippians, 2 : 13).

Oh, weak and worldly mortal! a sweet presence calls you to a higher existence. You are not unworthy of divine grace; you have not forfeited health and peace; but you may remove the evil and love Good. God has withheld no good thing from you. "He will have all men to be saved, and to come unto the knowledge of the truth."

CHRISTIAN SCIENCE HELPFUL IN MUSIC.

BY S. C. H.

Let every man abide in the same calling wherein he was called.—1 Corinthians, 7: 20.

THAT Christian Science is a practical religion to be carried into our every-day work, demonstrating its Truth in every line of business, is being proved by thousands of its honest followers to-day. We learn in Science that "the good of one is the good of all," and having received so many helpful thoughts myself through our publications, which we all so eagerly watch for and devour, I feel that perhaps I may also be able to send a few helpful thoughts to some who, like myself, may be abiding "in the same calling wherein he was called," when he came into Christian Science.

I will not dwell in detail upon the bondage of fear I was under, as a public singer,—the almost chronic condition of my throat, aggravated, of course, by the anxious thought that my voice was my only source of maintenance. Suffice it to say, however, that this bondage was so great that I dared not remove my veil in winter for fear of taking cold. Words can never convey my gratitude for the freedom which came to me through Christian Science, in this direction. I began to realize through the understanding and demonstration of this blessed Truth, that the many laws that mortal mind has made for singers, could be annulled. Only to think of actually being able to sit in a draught without experiencing any serious results therefrom! and above all to know that what God has given us is eternal and indestructible, and therefore cannot be taken from us or lost. This, together with the comforting assurance in our text-book, Science and Health, p. 154, l. 16, that God has "expressed in man the infinite idea, forever developing itself, broadening, and rising higher and higher from a boundless basis," banishes the old thoughts of limitation and loss, and despair gives place to hope and joy as we look out upon the wonderful possibilities revealed to us. Not only does Christian Science make us better singers but better teachers also.

The thought that all action proceeds from Mind, and that man reflects this harmonious and unlabored action, which brings forth perfect results, does away with the old thought of years of physical labor. Now, while I cannot always explain this to my pupils, I can, through "reason rightly directed," illustrate to them the wonderful effects which a thought of peace and receptivity will have upon good tone production.

Science and Health tells us, p. 131, l. 13, "The pure and uplifting thoughts of the teacher, constantly imparted to pupils, will reach higher than the heavens of astronomy."

One pupil, who knew a little of Science, asked me when she came for her third lesson if I had been treating her. "For," said she, "since I began taking lessons I have been able to eat anything I like without suffering any inconvenience from it, and before that there were very few things I could eat with any comfort."

Another said, "I felt so badly when I came that I did not think I could sing; but I am all right now and have enjoyed my lesson very much." Thus unconsciously the good seed is sowed and brings forth fruit after its kind.

It is my greatest desire so to *love* and *live* this Truth that my songs may lift the burdens from weary hearts, and that in my teaching I may as naturally impart or reflect it to others as the rose exhales its perfume, for only in this way can we properly express our gratitude to the dear one whom God appointed to reveal to us this wonderful Truth and teach us how to demonstrate it in our daily lives.

CHRISTIAN SCIENCE BEFORE THE LAW.

[From the *New York Law Journal*, the official law paper of New York city, we republish the following, under the above title.]

The death of Mr. Harold Frederic, in London, and the arraignment of persons attending him during his last illness upon a charge of manslaughter, have served to direct universal attention to the subject of Christian Science. Some of the newspapers have contained articles, not only approving of the criminal charge preferred in the present case, but also advocating legislation specifically prohibiting the practice of real or supposed therapeutic arts by Christian Scientists. We doubt whether the latter suggestion would be practicable or just. Christian Science has already been brought into court in this country several times. Probably the most recent American case touching the subject is State *v.* Mylod, in the Supreme Court of Rhode Island (July, 1898, 40 Atl. R., 15). It was therein held that the use of Christian Science teachings and principles for the healing of disease did not constitute the "practice of medicine" within the statute of that State, prohibiting the practice of medicine without a license. By way of argument, the court makes the remark that, "if the practice of Christian Science is the practice of medicine, Christian Science is a school or system of medicine, and is entitled to recognition by the State Board of Health to the same extent as other schools or systems of medicine." This is substantially the legal position claimed by the Christian Scientists themselves.

In State *v.* Buswell, in the Supreme Court of Nebraska (40 Neb., 158), the indictment of a Christian Scientist for the unlawful practice of medicine was sustained, the statute in

Digitized by Google

question, however, containing the special provision that "any person shall be regarded as practising medicine within the meaning of this act who shall operate on, profess to heal, or prescribe for or otherwise treat any physical or mental ailment of another." The question of policy involved is, whether to rely upon ordinary statutes—perhaps a little extended—defining manslaughter, or to follow the example of the State of Nebraska and inhibit the practice of all real or supposed healing arts outside of the schools that are scientifically classified. We have intimated that we are opposed to the latter course. In the first place, Christian Science numbers its adherents by the thousands in America, and we do not believe that any law against the practice of its professed therapeutics could be enforced. The devotees of the system quite uniformly evince the fanatical, self-sacrificing, temperament, and many of them would even welcome legal prosecution, regarding it as persecution for conscience' sake. In the second place, it is hardly conceivable that the alleged therapeutic power of Christian Scientists is an utter delusion. Certainly, a large percentage of the adherents of the sect consist of persons who either have been cured, or think they have been cured, of very serious diseases. We doubt whether the system could have gained its great numerical strength without some element of reality in this respect.

Therefore, it seems to us, that it would not be fair or just to absolutely prohibit Christian Scientists from attempting to exercise the healing art.

CASE OF BONE HEALING.

BY SARAH A. DURFEE.

In the summer of 1888 I received a telephone message to come quickly to the residence of one who had been a patient, and who lived over a mile from us. It was not on the street-car line, so I had to walk. Not knowing the illusion for which I was called, I declared the absolute statements of Christian Science all the way.

On my arrival I found the call was on account of a compound fracture between the elbow and wrist of a very restless, active boy, between two and three years of age. When it occurred two of our most skilful surgeons and medical practitioners were passing, and were called in. They put his arm in splints and bandages, and said he would have a high fever that night, and made the usual decrees of continued inharmony to the mother. When I reached the house the child was quietly asleep, and passed the night *without fever*, either then or afterwards.

He fretted much that he could not use his hand for the splints, but the doctors ordered them kept on for five or six weeks at the least, but he fretted so that the mother came to me at the end of two weeks and asked what she should do. I told her to take off the splints and bandages, that it was only a law *materia medica* had made, and that his arm was well. However, without saying anything to me, she took the child to their old family physician, and stating the case (without the Christian Science part), asked what to do. He said, "By no means must you remove the splints or bandages for three or four weeks yet." She went home and the boy worried her so that in two or three days she took them off, and the boy was happy. Feeling very much elated, but saying nothing to me, she took him to the old family physician, who examined his arm and laughing said: "My dear woman, it was never broken or it could not have been healed in so short a time."

Six years later the same boy fell and broke the other arm and they sent immediately for me, but I was out of the city and they called in a surgeon. Notwithstanding the boy was older, and although it was but a simple fracture this time, the whole neighborhood was kept awake at night and distressed in the day for weeks by his screams and sufferings. At this time they sent and asked me to take the case, and, thanks be to the healing power of omnipotent Truth and Love, he received immediate relief and was well in a week.

AN OLD NEWSPAPER.

Through the kindness of a Christian Scientist, we are in possession of a copy of the *Massachusetts Centinel*, dated Wednesday, July 30, 1788. It presents all the quaint characteristics of the newspapers of that time. From it we quote the following very beautiful poem:—

AN ODE TO FORTITUDE.

Vain fears, and idle doubts, be gone!
Unjust suspicions, false alarms,
Delusive hope, that smiles, and cheats,
And subtle pleasure's dangerous charms.
When Virtue calls, and points the way,
'Tis mad, 'tis impious, to delay.

Not all the force of all mankind,
His stedfast soul can ever bend
Who owns fair Virtue for his guide,
Who claims her as his constant friend;
Fix'd as a rock, he stands secure,
And laughs at all their fruitless power.

In vain Ambition all her arts,
Her toys, her tinsel charms, displays,
In vain seducing wealth conspires
To brighten the illustrious blaze,
The wise and good he loves alone,
And scorns the tyrant on his throne.

In it we also find this bit of humor:—

A tradesman, whose love of money made him prescribe, as beneficial to his servants' health, or his own profit, the practice of early rising, one morning gave a poor black man a severe scolding for suffering the sun to shine on him while in bed, concluding his lecture with a fervent threat if he should after not find him up at sunrise. "At sunrise, masser?" asked the honest African, in the native simplicity of his soul—it was worth a casket of diamonds to him—"At sunrise, masser? But suppose, masser, the sun rises before daylight—what shall I do then?" The master made no reply, and Sambo was dismissed.

MRS. ANNIE M. KNOTT AT GRAND RAPIDS.

From the *Grand Rapids* (Mich.) *Democrat* we extract the following:—

Mrs. Annie M. Knott of Detroit, last evening gave the Christian Scientists of this city and their friends the clearest epitome of the tenets of the sect that has ever been given in this city. It was at the Ladies' Literary Club house, which was crowded, in spite of the rain. Mrs. Knott has been a Christian Science student for the past fifteen years and is one of the accredited lecturers, for this part of the country. She is a plump woman of medium height, with wavy gray hair, an earnest expression, pleasing face, and a clear, yet soothing voice. There was nothing dramatic or oratorical about her. She was simply in earnest. She spoke about the difficulty of meeting the popular misconceptions of Christian Science, and of her desire to help all to overcome those misconceptions. "Christian Science," she said, "is no longer an unknown wanderer. It is recognized as the angel that comes, with power to heal, and thousands who do not now see it will see it ere long, because of its never-ceasing ministry in cures effected. It is now thirty years since Mrs. Eddy, the Founder of Christian Science, who had long been seeking for something in the Christian churches which they failed to give her, met with a serious accident. The doctors gave her up, but one day after weeks of weary suffering, the light came to her. She rose from her bed, not only cured, but declaring the truth that Christ, the healer, had never left us; was with us still. She could not explain all she meant by this, and after a time was forced to seek seclusion, which converts the poet into a prophet and the prophet into a Seer. She remained in seclusion for three

Digitized by Google

years, studying Christ and the principles of Christ's healing. She was deserted by her friends, was misunderstood and maligned, but she toiled on, and her work brought cures. She demonstrated that the omnipotence of God—Good—and the consequent impotence of evil was the watchword of development and life. Then she began to teach students and wrote "Science and Health with Key to the Scriptures," —to me the most important event in history. Copies of the first edition of that work are now worth $150.

TRUTH'S SEARCHLIGHT.

BY MARION PINCKNEY HATCH.

THE Christian Scientist regards his text-book, "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, as a mighty Searchlight, for it illumines his pathway and helps him to *see* God by showing what God is, and why He is All in All.

Then, too, when he throws this Searchlight, this Heaven-given Key to the Scriptures, on the Bible, it clothes many of its hitherto dark sayings with a radiance which he recognizes as the dawn of his Spiritual day, and the beginning of his resurrection.

As an example: Paul instructs Timothy in his second letter that "The servant of the Lord must not strive; but be gentle unto all men, apt to teach, patient, in meekness instructing those that oppose themselves; if God peradventure will give them repentance to the acknowledging of the truth; and that they may recover themselves out of the snare of the devil, . . . that the man of God may be perfect."

Before the coming of Christian Science, repentance, the pivotal, the vital word in this part of the Apostle's letter, was not comprehended, not because men did not know that the Greek word Paul used for repentance meant "to think differently" and "to reverse another's decision," but because they did not know whose decision to reverse, or how to reverse another's decision, so that they would thereby "recover themselves out of the snare of the devil." But now, through Christian Science, Paul is understood, and the scientific repentance which he preached is, for all who will, practical and effective.

TESTIMONIES.

I am a little girl eight years old, and I want to tell you what I have done for God. I was at grandma's house and I went out in the kitchen and Annie, the girl, had a headache, and she asked me to treat her, because I had treated her once before. I went into the dining-room and declared that God was Good, and didn't make headaches, therefore Annie did not have any headache, and mortal mind couldn't say she had any. After five or ten minutes' treatment I went out and asked her how she was; she said she was very much better but not all healed. Then I realized Truth a little more and went out to play, and after dinner I went again into the kitchen and she said she was all well.

One night while I was at grandma's I had a claim of sore throat, and grandma is not a Christian Scientist, and mamma was here in Boston, and so I began to cry. Just as soon as I began to cry I thought of God and stopped right off, and began to demonstrate. I thought God was all, for Life was all Good, and matter had no place, it didn't exist, and I said, "Get behind me, Satan," and then in a few minutes I felt all well and haven't had any sore throat since.

While I was up in the mountains this summer I was walking up a hill bare-footed, there was some poison ivy around, and I stepped on some and the next day I had a claim of it on my hands and feet, and papa said it would last two weeks; but I said it wouldn't, and so mamma and I read Science and Health and demonstrated that the power of Good was all there is, much powerfuller than mortal mind, for there is no mortal mind. There is only God's Mind that is Love, and that is all there is, there is no other mind. We said God never made poison, and therefore it didn't exist, and a few days afterward it was all gone.

One day my brother Stuart and I were playing, and he took something of mine to look at and I began to whine, and mamma heard me and asked me not to do it—to try to demonstrate over it. She had asked me two or three times before, and I didn't seem to do it, but I did this time, because I thought it wasn't nice to fret and bother mamma, and I began treating myself. I said, "Error, you don't exist, and you can't make me whine and fret, for God governs me." And mamma says that she hasn't heard me whine and fret since. I am so glad that our dear Mother, Mrs. Eddy, is so good and kind to give us this beautiful Truth, that helps us to manifest God—Good.

Adelaide Chase, Boston, Mass.

Were I to longer withhold my testimony of gratitude to Christian Science and our Dear Mother in Israel who has shown us the way out of sense, I should deserve the sentence of the man who buried his talent.

The *Weekly* is indeed a welcome and helpful addition to our work, and with this week's issue my cup of blessing seems full. The editorial letter regarding the "Wednesday Evening Meetings" assures us that we have been led by Principle. At our first meeting the directors of the church agreed to give a testimony at every meeting, or read a *short* article from the Bible or Mrs. Eddy's writings that had been a special help to them during the week past. Members of the church followed in this line, and although small in number, our meetings have proved helpful and interesting, and many testimonials of healing during the meeting have been given.

M. E. G., Wausau, Wis.

Extract from a Letter.

THERE is a noticeable change in our home. While looking over the contents of an old trunk, with the aid of Stanton, my four-year-old son, I came across an old hot water bag.

Quickly taking it up, he said, "Look, mamma! I want to tell you something. Long time ago, when you didn't know God, you used to have this awful hot and put your head on it when you had error."

Mrs. M. Florence Eustis, Chelsea, Mass.

Dear Editor:—We read in Revelation, 22 : 4, "And they shall see his face: and his name shall be in their foreheads." The contentment Christian Science brings is plainly written in the foreheads of those who have seen His face. He has dispelled the brow of care and lit it with the ray of peace.

Sincerely Yours,
V. B.

BOARD OF LECTURESHIP.

THE following apportionment has been made of the Branch churches in Canada. Their clerks will write the lecturer assigned to their section.

Maritime Provinces, William P. McKenzie, 2 Cumberland St., Boston, Mass.

The Province of Quebec, the city of Ottawa and Kingston, Irving C. Tomlinson, 8 Norway St., Boston, Mass.

Province of Ontario, Carol Norton, 170 Fifth Ave., New York, N. Y.

NOTICES.

ALL correspondence with the clerk of the Mother Church on matters pertaining to his office, should be addressed to William B. Johnson, C. S. B., 95 Falmouth St., Boston, Mass.

PER CAPITA TAXES and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Works on Christian Science

WRITTEN BY

Rev. MARY BAKER G. EDDY.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid	$3 18
Two to Twelve books to one address, each, Prepaid	3 00
Twelve or more books to one address, each, Prepaid	2 75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid	6 00
Twelve or more to one address, each, Prepaid	5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid	$2 25
Twelve or more books to one address, each, Prepaid	2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

PUBLISHER,
95 FALMOUTH STREET, BOSTON, MASS.

The Christian Science Journal,

Founded, APRIL, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REVEREND MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical Healing, as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscriptions:

Payable in advance, postage free, to any part of the United States and Canada. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents. Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

THE CHRISTIAN SCIENCE QUARTERLY,

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday Services in all the Christian Science Churches throughout the year.

Terms of Subscription:

One copy, one year, 50 cents; Fifty copies or more to one address, one year, each, 50 cents; Foreign subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States and Canada.

Terms of Sale:

One or more copies, each, postage paid, 15 cents; Fifty copies or more to one address, postage paid, each, 12½ cents.

CHURCH MANUAL. Containing Rules and By-Laws of the Mother Church, also list of members. Price, one copy, $1; six copies to one address, $5; twelve copies to one address, $9.

THE CHRISTIAN SCIENCE HYMNAL. Bound in two styles —Cloth and Leather. Cloth, per copy, prepaid, $1.15 each; per dozen, $9.00; per half dozen, $5.00; Leather, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen, $6.50.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the building of the Mother Church, The First Church of Christ, Scientist, in Boston. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00.

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents; Cloth binding, 45 cents.

HEARINGS ON PROPOSED MEDICAL BILLS in Massachusetts and New York. 23 pp.

ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By EDWARD A. KIMBALL, 24 pp.

THE BUSWELL TRIAL. 24 pp.

REPLY TO SERMON. By SEPTIMUS J. HANNA, 30 pp.

THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.

HEALING THROUGH CHRISTIAN SCIENCE. By SEPTIMUS J. HANNA, 32 pp.

One copy or more, each, 10 cents; Twelve copies to one address, $1.00; Twenty-five copies to one address, $1.75; Fifty copies to one address, $3.00.

COMMUNION HYMN. "SAW YE MY SAVIOUR?"

Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price, 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

VOL. 1 BOSTON, MASS., U. S. A., DECEMBER 8, 1898. NO. 15

THE SPANISH TREATY.

PARIS, December 6, 1898.—The peace of Paris is practically an accomplished fact. To-day's session disposed of the essential features of the treaty, which will be embodied in the following eight articles:—

First, the customary preface of treaties, in the nature of an expression of amity and of hope for perpetual peace.

Second, the relinquishment by Spain of her sovereignty over Cuba.

Third, the withdrawal of the Spanish troops.

Fourth, relinquishment of Spain of sovereignty over Porto Rico.

Fifth, Spain's cession of the Philippines.

Sixth, the withdrawal of the Spanish troops there.

Seventh, payment by the United States of $20,000,000 for the Philippines.

Eighth, the provision for the "open door" commercial policy in the Philippines.

The rough draft of the treaty, which may be considerably changed, covers these proposals. It makes a long document, which Senator Cushman K. Davis of the United States peace commission says will be found to be one of the most interesting papers of its character ever written.

So completely are the details of the evacuation of the Philippines stipulated that a commission such as arranged for the Spanish withdrawal from the West Indies will be unnecessary. The Americans have agreed to transport the Spanish prisoners home, including the garrison and sailors at Manila captured by Admiral Dewey and General Merritt, as well as the soldiers and civilians held by the Filipinos, whose return the Americans have guaranteed. As compensation Spain promises to liberate all Cuban, Porto Rican, and Philippine political prisoners.

When the commissioners emerged from the foreign office this evening Judge Day, president of the American commission, announced that all the big questions had been settled, and that the treaty would be signed in three or four days. The work remaining consists largely in drafting into language the conclusions reached.

Among the questions not yet settled, however, are the coaling stations and religious freedom in the Carolines, the Spanish commissioners not having replied to the American offers.

Although the Americans have rejected Spain's request for free shipping for ten years in Cuban and Porto Rican waters, they have given the Spanish commissioners such poor consolation as the latter may derive from the permission to reapply when diplomatic relations have been renewed for shipping concessions under the reciprocity scheme of the Dingley law, for which Senor Dupuy de Lome was negotiating in Washington when the war broke out.

There are still under discussion eight secondary subjects which the Spanish commissioners broached last week, including the status of patents and copyrights. The American commissioners to-day handed Senor Montero Rios a written reply covering these questions.

ITEMS OF INTEREST.

The blizzard that swept over the New England coast on November 27 and 28 proves to have been the most disastrous of any in the history of the country. Many hundreds of vessels were wrecked and scores of houses and cottages along the seashore were destroyed. Many lives were lost. The most distressing casualty was the sinking of the steamer Portland, which left the Boston dock the evening of the storm. As nearly as has been ascertained, there were 186 passengers on board, and it is believed all were lost. Thus far there is no evidence that any survived.

There will be but one colored man in the next House of Representatives, and he is White—the Hon. George H. White of North Carolina.

MISCELLANY.

The following letter was written to the Rev. Mary Baker Eddy:—

Chicago, November 22, 1898.

Dear Mother and Leader:—From some of our church members who are with you now, no doubt you have already heard that we have organized a Second Church of Christ, Scientist, here on the North Side of our city. But I feel, and many others with me, that we also would like to tell you the glad news. The conference committee, which is composed of church members from the South, West, and North Sides, decided that the North Side members should be called to meet and organize. We met at our dispensary, one hundred and thirty in number, organized, and elected our officers. We felt like children going away from home, but were encouraged with the assurance of the blessing of our dear Mother and Leader, and the lovingkindness and advice of our older brethren and sisters, the trustees and directors of the First Church, who were all present. The chairman of the trustees of the First Church presented us, in the name of the Church, with a Bible, Science and Health, and a check for $175 to pay our rent for the first month in the Jewish Temple, on the corner of Goethe Street and Lasalle Avenue, which we shall occupy until we have our own edifice. There was a sweet sense of harmony and love prevailing among us all, mingled with a seeming sense of separation, which we of course did not admit; gladly rejoicing over the new step of progress we are taking for the good of our cause. We all pray for wisdom and love, that we may fill our places, wherever and whatever they may be, following your example of self-abnegation and tender affection for all mankind. We shall have our first service on next Sunday, November 27, and ask your blessing for it. We pledged ourselves when we built the First Church of Christ, Scientist, to work together as one until we have built three churches, and we will do it, Divine Principle governing us in every step. We all send our sincerest love to you. Your loving student,

IDA SCHAFFNER.

Chairman of the Board of Directors of the Second Church of Christ, Scientist.

Telegram from Chicago, Ill.:—

November 27, 1898.

To the Editor:—Second Church of Christ, Scientist, Chicago, held its first services to-day, with large congregation.

W. TREESE SMITH.

From a publication entitled Book Notes, published in Providence, R. I., we extract the following, concerning the Harold Frederic case:—

A person dwelling in England, by name Harold Frederic, died; he believing in the curative theory of Christian Science employed two persons who practised that theory, to assist him; he died; and thus comes from London this despatch:—

"London, Wednesday.—Miss Kate Lyon, a member of the household of Mr. Harold Frederic, who died October 19, at Kenley, and Mrs. Athalie Mills, the Christian Scientist who attended Mr. Frederic and against whom a verdict of manslaughter was returned by a coroner's jury yesterday, were arraigned in the Police Court at Kenley to-day on this charge, and were remanded for a week. They were admitted to bail."

Things are coming to a pretty pass. I am sick; I employ Dr. Knight; he "practises" upon me; I die; he is arrested for manslaughter because he is a Homœopath, and Dr. Swarts, vicegerent of God on earth, knows exactly what (in his pharmacopœia) would have ended my troubles, Iopomœa, Batatas, taken catapotium. In this city within a year have died two persons. Eighteen "regular" physicians "practised" upon one of these persons, without ever having discovered the actual disease; the nineteenth acknowledged that he could not tell, without a surgical exploration: in the other case the person was treated for years for a disease which the person never had; the knife at last disclosed the fatal nature of the disease, and the folly of all the regular practice upon the patient. Now, if you purpose punishing Christian Scientists when they fail to cure, you shall apply the same law to yourselves; let every "regular" be hanged who fails to diagnose truly, and to apply what all other "regulars" regard as the "specific" remedies. It is time that the medical profession was brought to a sense of its absurdities. Cornering by trusts seems sufficiently vile to suit any poor man. It robs him of his food, his home, and his clothes; but the cornering of the right to endeavor to restore the sick to health, kicks the beam. It takes all that the other trusts have left—*life itself.*

From the Buffalo Express of November 23, we extract the following:—

The Rev. George Tomkins, D.D., C.S., of New York, delivered a lecture on "Christian Science: its Practical Excellence," last evening at Music Hall, under the joint auspices of the First and Second Christian Scientist Churches. The spacious hall was filled to the doors.

The lecturer was introduced by the Rev. Dr. Gifford, pastor of the Delaware Avenue Baptist Church. Dr. Gifford said that in the old days of chivalry it was the office of the herald to blow a trumpet announcing the approach of the champion. It was not a part of the herald's duty to defend the champion. He stated that in the present instance, in introducing the Rev. Mr. Tomkins, he was acting the part of the herald. Dr. Gifford continued, saying that given Man, the Universe, the Bible, and God there must needs be many interpretations of the same; that in the struggle for the survival of the fittest, the interpretation that contained the most truth deserved to wear the crown. In the realm of truth, asserted Dr. Gifford, he believed in free trade and open courts. The subject of the evening demanded honest and sincere attention. The Rev. Dr. Gifford then presented the lecturer as "once a Baptist minister and now a lecturer and healer in the cause of Christian Science."

The following is from the Lawrence (Mass.) Telegram of November 18, 1898.

A large audience gathered at the city hall last night and listened to an excellent exposition of the doctrines of Christian Science by Rev. William P. McKenzie of Boston. The lecture was under the auspices of the First Church of Christ, Scientist, of this city, and by a member of the Christian Science Board of Lectureship of the Mother Church.

On the platform with Mr. McKenzie were the Board of Trustees of the First Church of Christ, Scientist, of this city; Mr. Albert S. Lang, chairman; C. H. Closson, D. H. Magoon, Lewis Prescott, Jr., H. G. Arnold, and C. L. Magoon.

The following extract is taken from the East Orange (N. J.) Gazette.

Mr. Carol Norton, member of the Board of Lectureship of the Mother Church in Boston, lectured on Christian Science, in Union Hall, on Monday evening. The lecture was delivered under the auspices of the First Church of Christ, Scientist, of Orange, and the hall was filled with a large and representative audience. The platform was prettily decorated with palms and ferns. Mr. John E. Knapp, of Arlington Avenue, introduced the speaker, who spoke entirely without notes, and held the closest attention of his hearers for more than an hour.

From the Appeal to Reason (Girard, Kan.), we publish the following:—

James Mooney, a well-to-do farmer of Macon, Mo., in excellent health except neuralgia, while in Chicago was induced to have an "operation" performed. Twelve doctors performed the "scientific" treatment and Mr. Mooney expired under the operation; was that murder or not? Had that been some poor Christian Scientist or other unorthodox practitioners, they would be arrested and the "regulars" would be demanding their blood. It is different, you know, who does the killing, and whether the law looks upon it as regular. It strikes me that the public needs some protection from the doctors instead of from those without diplomas, which are simply a cover for fleecing the people and evading the law in too many cases.

Despatches from London say that Mrs. Mills, the Christian Scientist who attended Harold Frederic and who was charged with manslaughter, has been discharged. The prosecution was also withdrawn against Miss Lyon. Thus endeth the celebrated Harold Frederic case, so far as the courts are concerned.

A THIRTY YEARS' SEARCH REWARDED.

BY JOHN T. DEE.

I WILL add my testimony for Christian Science. For thirty-five years I had so-called inherited muscular rheumatism, suffering at intervals all the tortures which that disease brings. I could get no relief through medicine, having tried many doctors and even read medical works, but only succeeded in imbibing some of the diseases therein described. I suffered with hemorrhoids for sixteen years, chills and fever for many years during the warm season, and colds and coughs every winter as far back as my memory reaches; and about six years ago I began to have spells of deafness which recurred at irregular intervals, until finally I became totally deaf in one ear and about half deaf in the other.

Such was my condition one year ago, when Christian Science was first presented to me,—or rather it was presented to another but he rejected it, and happily it came to me. I immediately began the investigation of this, to me, strange doctrine. I went to the evening experience meeting and was much impressed with all that I saw and heard there. I was completely healed or cured of the drink habit, or taste for intoxicating liquors, at this meeting, though there was not a word said on the subject. On my way home I met an acquaintance in front of a saloon who asked me to

Digitized by Google

step inside, as there were more of the boys in there. He detained me quite a while, but I could not endure the idea of stepping out of what seemed to be heaven, right into what I knew to be hell. Nor have I ever had the least desire to taste strong drink since that night. I read Christian Science literature, and studied "Science and Health with Key to the Scriptures," every moment that I could spare, and attended the meetings whenever possible. My health began to improve from the beginning, and at the end of three months all my ailments had disappeared, deafness being the last to go. I feel impelled to state the manner of its disappearance, as it hung on for some time after the departure of all other claims.

My stumbling-block was the unreality of evil or personality of the devil. I believed the teachings of Christian Science in regard to it, but it was a kind of blind faith, the "help-thou-mine-unbelief" faith. I did not have the understanding. I had struggled with the problem time after time, but was unable to demonstrate the truth. But success came at last. I awoke near the hour of midnight, and here is the demonstration: God is all-in-all, what or who is the devil? The devil is the ape of God; whatever God does, the devil apes or pretends to do. God created the good. God is Spirit, Spirit is Mind, Mind is the ever-present, the Creator. Now what is the ape of Mind? why, the human or mortal mind, and there was my devil—mortal mind.

All at once there was a crash in my head, something like the bursting of a dam, or the breaking loose of pent-up force. My ears began to itch and tingle, and while picking out of them pieces of hard scale, I heard my watch ticking on the wall near by. In the morning I finished cleaning out the scales, and have never been troubled about hearing since.

The physical benefits which I have received are enough to make me forever grateful to Christian Science and every one connected with it. Yet I prize the spiritual far higher, for I have received through it control over all the physical senses and passions, and power to overcome all my bad habits, swearing among the rest, and our heavenly Father has blessed some of my demonstrations through it, for the healing of others.

I was raised in the Catholic faith, and practised its teachings for some years after I reached manhood; but found it powerless to restrain man from sin.

For the last thirty years I have been seeking a religion that has the spiritual power to aid man in his conflict with evil; and most heartily do I thank the great God, the giver of all good, that I have found it at last.

ACCIDENTS.

BY SCHUYLER S. CLARK.

Within four months I have demonstrated three times that the above word has no place in the vocabulary of a Christian Scientist.

1. While trimming the stems of some daisies last June the knife slipped and cut deeply into my right thumb, which began to bleed freely. I tore off a bit of wrapping paper, pressed it against the cut, and then turned my thought from it by realizing the Truth. The bleeding stopped almost at once. The next day there was not a particle of the inevitable soreness which used to follow such wounds, and I was neither prevented from, nor inconvenienced in writing, of which I have considerable to do. All false appearances disappeared *in a* week, leaving no scar.

2. On an errand one day in July I was riding rapidly on a wheel when my knee intercepted a tin pail I was carrying and I was thrown violently to the ground. I got up instantly and declared that nothing could interfere with what I was going to do, because it was right. With this understanding I brushed off the dust, walked a few feet to where the wheel had landed, found it uninjured, and proceeded on the errand. A claim of sprained wrist tried to assert itself but did not succeed.

3. A party sitting out on the grass one evening had just indulged in a refreshing drink of ginger ale and the glasses were set down on the veranda. A caller arrived and one coming out of the house to greet him stumbled on the glasses shattering them to bits. A few minutes later the little sister, who had gone in to bed, came running out to kiss us good-night and stepped with bare feet at least two steps on the broken glass. Those present were not all Scientists and some exclamations of fear broke forth; but Love was ahead of it, and taking the child in my arms I said to her: "You know you are all right and nothing can hurt you." After the kiss all 'around she tripped off to bed without a scratch. Said the guest: "Why, she might have cut herself badly."

The above experiences prove the importance and efficacy of instantly knowing the Truth whenever and wherever any false sense presumes to force itself upon our consciousness. Love is always present everywhere, and if Love is recognized first, malice has no place. "Those that seek me early [instantly] shall find me." Surely our God is "a very present help in trouble."

NOT POISONED.

BY ADELLA E. SEMPLE.

An article appeared in the Pittsburg daily papers about the pupils in the Normal School at Indiana, Pa., being poisoned through the food in some way. My daughter attends this school, and was the only one who ate of the food and was not ill. I felt that this demonstration of the true education in Science being a protection would be interesting to the Field. My daughter was five years old when we first came into Science. She is now seventeen. Was it not a fulfilment of the promise, "If they drink any deadly thing, it shall not hurt them"? I will give her own words as written to me.

"Now I shall tell you all about the poisoning business. Two weeks ago, a great many of the girls were very sick, and last Sunday the same thing happened again. Of course all of the girls said it was poison, but they did not know. Then Dr. W. thought it was time to do something, and the faculty appointed three men from town to examine into things, and they had all the girls and boys who had been sick come to the office, and asked them just what they ate both times. As my room-mate had been ill she went down. They asked her if she knew any one who had eaten everything, and still was not sick. She said she did, and named me. They asked her if she knew why I was not sick and she told them I was a Christian Scientist. They then sent for me, asked me the same questions, and I gave the same answers. They concluded the poisoning must have been caused from the cooking utensils, but were not sure. The reason I was all right, was because *I knew* nothing could hurt me, and I *did* know it, but some of the girls were really sick (in belief), a great many fainted."

We publish in this issue a symposium on the Harold Frederic case, which we think will be of general interest. We recommend that this number be given a wide circulation.

Parson and doctor joined in one
  Most suitably we find;
The one the suffering body treats,
  The other soothes the mind.
The parson shows the way to Heaven;
  And then, with tender care,
The doctor consummates the work,
  And gets the patient there.—*Selected.*

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

THE HAROLD FREDERIC CASE AGAIN.

THE general fermentation over the Harold Frederic case, although subsiding, has not yet entirely ceased to attract public attention and discussion. Many newspapers are still active in publishing opinions for and against, and it is still made the text of many newspaper editorials. So far as Christian Science itself is concerned, with some notable exceptions, it cannot find fault with the average of newspaper comment. If Christian Scientists were to view this question solely from the standpoint of the individuals themselves, they would be obliged to say that any agitation which calls attention to Christian Science must redound to its ultimate advantage. When opinion on any subject goes out into general thought, in such a way as to cause discussion, whether it be talked up or talked down, the subject is nevertheless becoming established. The Discoverer and Founder of Christian Science and the author of its text-book, "Science and Health with Key to the Scriptures," the Rev. Mary Baker G. Eddy, of Concord, N. H., in that book clearly foretells just such conditions in connection with the history and growth of the Christian Science movement as we now witness.

Christian Scientists have never expected that views so radically different from those generally prevailing as are the teachings of Christian Science, would be accepted without more or less resistance, doubts, and questionings, which at times would manifest themselves in general upheavals. The agitation growing out of the Harold Frederic case, therefore, is neither surprising nor dismaying to Christian Scientists. They look calmly on, knowing that Christian Science is divine Truth, and that out of the seeming fermentation and chaos will come clearer, better, more healthful conditions, which shall be but the forerunners of that ultimate harmony foretold in Scripture by prophet and apostle, and by Jesus of Nazareth in his repeated declarations. In other words, the present upheaval is among those signs of the times which Jesus plainly foretold, and which the sincere religious thinker construes to be among the conditions preceding the millennial dawn. Knowing this, and feeling sure that God's hand is moving and controlling, Christian Scientists can afford to and do look on with the calmness and dispassionate judgment, born of faith and hope.

We have already published in the Journal and Weekly much upon the Frederic case, and we trust that we shall be pardoned for devoting some additional space to it, not so much because of any peculiar features of the case itself, but because, involved in it, is a great lesson for the future.

Among the many interesting newspaper results of this case, is a symposium published in the Sunday Chronicle of Chicago, of November 20, 1898, under the heading of "Briefs for and against Christian Science—its advocates and its opponents talk."

SCIENTISTS' OPINIONS.

Among the Scientists interviewed was Mr. Edward A. Kimball, First Reader of the First Church of Christ, Scientist, Chicago, of whom the Chronicle thus speaks: —

"Few people who knew E. A. Kimball twelve or fourteen years ago, when he was compelled by disease to terminate his business career, would recognize the same man now in the E. A. Kimball who has attained to great prominence in this city as standing for what he holds to be the truth of Christian Science. Many men who are still in active business will remember this same Mr. Kimball as having been arrested in his highly successful career in consequence of an ailment which brought him near to the brink of the grave, but for which the physicians had no certain name and no remedies that seemed to be applicable in the particular case. So much, at all events, many persons in Chicago will remember, and also that he traveled extensively in this country and in foreign countries, seeking health and apparently not finding it. At last, however—some ten or twelve years since—he appeared in this city again, a changed man, in perfect health and buoyant spirits. It is not for the Sunday Chronicle to say, as known truth, how he was healed, but it may be allowed to report Mr. Kimball as saying that he was healed by mental influence exerted upon him by Christian Scientists. Anyhow, he was cured, and to-day he is to every appearance a well, strong, and forceful man. The last time the present writer saw him until a few days ago was when he had known him well for a number of years, and then he seemed doomed to early death. Seen now, he is a picture of health, and hence, as just now said, it is hard to realize that he is the same E. A. Kimball who formerly was so well known as a business man in this community, and known then to be a hopeless invalid. He is an excellent subject for the Christian Scientists to talk upon, for once he was as good almost as dead and now he is very much alive. And besides, he, by his candor, forces upon one the conviction that he is entirely sincere in his belief in the actuality and practicability of Christian Science.

"Mr. Kimball has, in fact, ever since his restoration to health, devoted his best energies and all his available time and very considerable sums of money to the cause of Christian Science. He was one of the organizers of the First Church of Christ, Scientist, now occupying its large new edifice on Drexel Boulevard near Fortieth Street. He is First Reader to the congregation there, which is the largest Protestant congregation in the United States. The leader of Christian Scientists hereabouts was seen at his home at Woodlawn and asked to give for publication his views of the case of Harold Frederic, whose recent death has caused great excitement in England and America.

"Now, said Mr. Kimball, after referring to certain phases of the case, take another view of the case. Suppose that Christian Scientists had been in charge of Harold Frederic all the time he was sick and had not been interfered with by the doctors—suppose that, and that just the same the case ended disastrously, still the Christian Science doctrine would not be in the least invalidated, unless it should appear that both the patient and the operator were the one in perfect condition to direct the mental influence of healing and the other in perfect condition to receive it. Then, indeed, there might be a question, but the facts in this case would appear to prove that such perfect conditions did not exist, and that not even favorable conditions existed. Christian

Digitized by Google

Scientists do not pretend that they have reached a point of excellence such as will exclude the possibility now and then of a failure. And while the point of excellence reached is very high, yet if the patient is not willing to assist by improving his normal thought and purpose the case is not always hopeful. For example, a man has serious trouble of the stomach caused by excessive use of alcoholic drinks. He tries all that the doctors can do to his exterior nature and is not benefited, and then he goes to the Christian Scientist, who begins by operating on his interior, or moral, nature. He would prepare the sick body of the man for the coming into him of the healing influence, but he will not submit to being prepared. He will go on drinking as before. What chance has he or has the Christian Scientist, in view of man's wicked obstinacy, that he and the doctors did not have in the first instance? However, in many similar cases the Christian Scientists do have an advantage over the doctors, for they very often do appeal with success to the moral nature, while the doctors rarely appeal to it either successfully or unsuccessfully.

"It is not intended, said Mr. Kimball, that the foregoing illustration shall even seem to apply to Mr. Frederic's case. There was enough besides of a disturbing nature in his case to account for the failure, if failure can be fairly charged to the Christian Scientists, which all Christian Scientists who are possessed of the facts deny.

"The failure in this case, the untimely death of Harold Frederic, was caused, humanly speaking, by the ignorance or mistakes of his doctors, and this is made to appear to shrewd and candid minds by the efforts that are put forth to damage Christian Science by dragging its devotees into the criminal courts. The laws touching these cases were made by, or for the protection of, the doctors, and more such laws they would make if they only could. And right here, said Mr. Kimball, should be introduced an extract from the remarks of William Lloyd Garrison before a committee of the Massachusetts legislature on this subject. The object was to convince the members of the legislature of the injustice of laws enacted with a view to do away with Christian Science practice. This is the extract which Mr. Kimball deems pertinent here: 'The death of a patient under irregular treatment, although it may be demonstrated that the greatest care and intelligence were used, is heralded abroad as something scandalous and terrible. But if any regular physician were to make public the details coming to his knowledge from misapprehension of the disease or because of mistaken remedies used the public might well be alarmed. A statement of the truth is not to disparage the noble body of men and women who give their lives and thoughts to this divine service of humanity, but it is to remind them of their fallibility, and to bespeak their tolerance of others having the same high aim.'

"Mr. Kimball here reminded his interviewer that it is now more than thirty-two years since Christian Science was discovered, and thirty-two years precisely since healing by Christian Science was first attempted. He asserted that during that time a million and a half sick cases have been cured in this country alone. Many of these were of the most stubborn and incurable nature, regarded from the standpoint of the doctors. In the city of Chicago alone as many as five thousand Christian Science treatments are given every day. He added this astonishing statement: 'In eighteen years of Christian Science practice not one hundred patients have died.'

"He continued: How unreasonable, then, to make such an outcry as that made recently over the deaths of Frederic and Kershaw! The question the objectors to Christian Science ask is, Why don't you cure every case? In this question is the greatest possible praise of the Christian Scientists. They are so successful with their patients that people marvel that they lose one or two! It was one such loss in England, that of Major Lester, that was made use of by the friends of the doctors who treated Frederic to induce him to consent to dismiss the Christian Scientists. Mr. Kimball mentioned the following incident, which he contends aptly illustrates the one-sided and intolerant attitude taken by many people toward the occasional loss of a case under Christian Science treatment. A certain man took a special delight in handing from time to time to his son-in-law, who is a believer in Christian Science, newspaper cuttings recording the death of persons under Christian Science treatment. One day in handing one of these cuttings to him he was given in turn the daily paper and asked to note the fact that that day's paper alone recorded over seventy people who had passed out under the treatment of *materia medica*. As each case represented a given failure on the part of *materia medica* to master a definite case of disease, why were not these failures also telegraphed from north to south and from east to west? There were no comments made on either side, but the son-in-law was given no more clippings of the kind to ponder over."

Mrs. Judge Ewing was also interviewed, and briefly said, "I consider that in the case of Harold Frederic the treatment of Christian Science was seriously interfered with by the presence of physicians and the offering of medicine, and that the result might have been totally different if Christian Science had been given free sway. The indictment, of course, is absurd, and no jury will be able to render a verdict of guilty."

PHYSICIANS' OPINIONS.

Following the Christian Scientists a number of doctors were interviewed. Speaking of the doctors, the Chronicle says, "The opinion prevalent among two score and more of prominent Chicago physicians interviewed on the subject of Christian Science—though with few exceptions cynically expressed—is that neither the practitioners of the 'cures' nor the followers of the faith can be molested under the law."

Most of what was said by the physicians was unfavorable to Christian Science, although taken as a whole, the sum total of their evidence is such that discriminating people can readily see, even construing their statements in a light most favorable to them, they are compelled to admit that Christian Science is not the absolute failure in its healing efficacy they would have the public believe it to be. The attempt of some of the physicians at explaining the healing results on the ground of therapeutic suggestion is amusing to every Christian Scientist, and to every one having the slightest conception of the Christian Science method of healing. If Christian Scientists were to attempt to explain, for the information of the public, the exact manner in which drugs taken into the system proceed to eliminate disease and to bring health out of sickness, and further to elucidate all the minutiæ of the practice of medicine, they could not possibly seem more ridiculous in the eyes of the medical profession than do the physicians to the Christian Scientists in their attempts to explain the *modus operandi* of the Christian Science method of treatment.

The first physician interviewed makes this statement: "That Christian Science has produced cures cannot be denied, and what has been said of its physiological workings would go to confirm this statement."

Another physician said: "Underlying it all is the ever-to-be-found kernel of truth, the helpfulness of mind over matter."

Another said: "Public opinion is not educated by experience to the point where any successful prosecution of an offending Christian Scientist could be anticipated. This 'cult' is largely sustained by many of our so-called cultured people, and must go the evolutionary way of these cults. If prosecutions cannot be successfully conducted under the laws we have, it is useless to pass others.

Another said: "No statutory law can reach these Christian Scientists, and it is well that such is the case. The first proposition involved would be,—what constitutes the practice of medicine? and this is not defined, nor do I think it should be. It may be well enough to define the qualifications

Digitized by Google

of practitioners, for in this manner ground could be established on which those practising without qualifications would be liable to prosecution for fraud. However, laws of this nature could not reach Christian Scientists, since they make no pretence to the use or application of medicine. Under the common law they have the God-given right for which our forefathers fought, of enjoying the pursuit of happiness, which includes health in whatever manner or by whatever means they choose. They can go out into the street or anywhere else and hire any one they like to treat them, no matter what their troubles."

Another arrived at the following conclusion: "The moment you attempt to legislate against Christian Scientists, that moment you make martyrs of them. It is absurd to think that you can stop them by law, any more than you could stop any good old mother from making goose oil and rubbing the sprains and the sore throats of her neighbors."

LAWYERS' OPINIONS.

Upon the question of legal responsibility, a number of lawyers were interviewed, first of whom was Stephen A Douglas, son of the celebrated statesman, Senator Douglas, of Illinois. Mr. Douglas said,—

"The proposition appears to me to be a very simple one, although I do not claim to be a criminal lawyer. A man cannot be prosecuted for what he did not do. There is no affirmative charge here. If the indictment were brought it would charge the Christian Scientist with failing to save the life of the patient, which is a negative charge. Again, intent must be shown, and there is no assumption that these people intended to bring about the death of Frederic. It would be the same as though you had seen a man drowning and had tried to save him according to your lights, which might be to stand on the dock and yell for help. If he drowned, you could scarcely be held criminally responsible for his death. These people do the best they can to save their patients, according to the forms of their belief, and it would be hard to prove in a court of law that a man or woman who sat by the bedside of a dying man and prayed for his recovery was responsible before the law for his death. That is really what such an indictment would amount to. The question of duress, of restraining a patient and excluding regular physicians against the will of the sick man, is an entirely different one. There is no evidence, so far as I know, that this was done, and, on the contrary, Frederic approved of the Christian Science treatment, and was in a measure a believer in the theory."

The next was Robert Redfield, who was for years connected with the city law department of Chicago. He said,—

"I have not delved very deeply into Christian Science, but in the strict letter of the law I fail to see how an exponent of that faith could be held criminally responsible for what practically amounts to a negative act. As well might practising physicians be held accountable for the death of patients. There is no law making it a criminal offence to pray over a sick man and urge him to do the same, and if he dies while voluntarily following out this practice no one is responsible, so far as I can see. What the circumstances in the Frederic case may be I cannot say, as I have not looked into it; but if these women who are under indictment did nothing except join with the patient in prayer, I fail to see how they can be held criminally liable."

James Todd, who as assistant State's attorney under Jacob J. Kern had a wide experience as a criminal lawyer, was also of the opinion that a prosecution for manslaughter would not avail in the case quoted.

"The only question in my mind," said Mr. Todd, "is, whether the doctors or the Christian Scientists allow the greater number of people to die. There is no law to compel a man to summon a physician when he is sick. There is no law which says he shall summon a doctor of any particular school, whether a homœopath, or an allopath, or an osteopath, or a Christian Scientist. If Christian Scientists could be prosecuted successfully for failure to save the lives of the people they attempt to cure, so could physicians. I have examined more than eighty physicians of the class generally denominated experts, on mental questions and the causes of death, and I have found there was no unanimity on any subject. When the various schools of medicine are that far apart, how can it be expected that failure to save life can be made a criminal responsibility?

"The nub of the question, after all, however, is that you cannot convict without proving the intention, and intention cannot be inferred from a negative act. Even to convict a Christian Scientist of being an accessory would fail, since it must be shown that the defendant was an accessory to the death by some act, word, or token, whereas the Christian Scientist bends all his or her endeavors to prolonging or saving life, and if they fail it is absurd to talk of prosecution."

Half a dozen other attorneys held almost precisely the same view, and none was found who would say that there was any possibility of bringing about a conviction in such a case, even were an indictment to be found.

Colonel Thomas L. Hartigan has recently investigated the matter relating to the liability criminally of Christian Scientists, or faith curers, in cases of death following their practices. He has found some decisions of interest in this connection. In one state the highest court has held that such practitioners having complied with the registration law, can sue and recover for the value of their services. Arguing conversely, he asserts that they cannot be held liable for failures to save life any more than could physicians of recognized schools of medicine.

"If a man can collect a fee for services," he said, "then he is subject to the rule of all others engaged in the same profession. To render him criminally liable it must be shown that he was criminally negligent in applying his knowledge and skill. Here is where such a case would fail. Faith curers of all kinds bend all their energies to produce good results. They believe, or assert a belief, in the power of divine healing. They repudiate medicines and the ordinary methods of treatment, but none can say that they intend to injure the patient.

"The 'Encyclopedia of American and English Law,' under the title of 'Physicians and Surgeons,' contains a syllabus of the Maine doctrine, which sets at rest the question so far as this enlightened State is concerned. The case cited is that of Wheeler *v.* Sawyer, fifteenth Atlantic Reporter, p. 67. The syllabus declares that 'the Maine law says that no person who has not received a medical degree in any public institution of the United States or of Maine shall recover for his services, unless prior to the treatment he has obtained a certificate of good moral character from the municipal authorities of the town where he lives. If a Christian Science healer has obtained such a certificate of good moral character, he can recover for his services.'

"Now, if a man can sue and recover for such services, it would seem that he cannot be held liable for failure any more than could any other kind of healer. It must be shown affirmatively either that he intended to compass the death or serious injury of the victim, or that his gross and criminal carelessness and neglect had the same result. In the absence of the intent, it would seem that gross negligence would render him liable to financial damages rather than criminal prosecution. But it must be shown that good was not intended, to base a case for indictment.

"'McClain on Criminal Law,' paragraph 286, lays down the rule of English law concerning grounds on which to base a charge of homicide. The paragraph quoted brings up the collateral question of the liability of the parents, or guardians of children, or persons so reduced mentally by disease that they are unable to consent to the treatment. Among the grounds cited is 'failure to provide medical attendance for a sick child.' Authorities bearing on the case are cited in the footnotes, one of which declares that a statute makes the provision of medicines a duty on parent or guardian, for the

Digitized by Google

syllabus contains this language, 'as required by statute.' But it must appear that death was accelerated by such neglect. (Regina *v.* Downes, I. Queen's Bench Decisions, p. 8.) Another case cited practically negatives the statute, for it is held, 'aside from the statute, it is not criminal thus to fail to call medical assistance, if it is in pursuance of a religious conviction.' (Regina *v.* Wagstaffe, 10 Cox, p. 530.)

"In the absence of express statutory provisions, it would seem that criminal liability cannot be alleged against a faith healer. The liability of the controlling persons of those unable to consent might be made to stick, but even this is not so strongly settled as to preclude escape. Intent to injure or destroy seems to be a prerequisite, and who can say in cases such as those under discussion that any evil intent is manifested? In fact, the converse is shown. These healers and their adherents may fly in the face of the opinion of the world at large, but denial of that opinion does not necessarily include a crime."

John F. Geeting is one of the members of the bar who has made a study of the Christian Science problem. Several years ago, he investigated the question and prepared a brief upon it. He holds that an indictment such as that found in the Frederic case will not lie in this country.

"The whole thing hinges on the question of intent. It has been held that if a man attempts to treat another for disease and honestly and faithfully does his best, he is not liable criminally for the death which ensues. An ignorant quack who applies such remedies as he has faith in and does all he can to relieve is not to be prosecuted for manslaughter. Possibly his treatment does injury, but unless it can be shown that he intended injury he is not liable. A skilled physician of a recognized and reputable school is required to make use of all the knowledge and skill he possesses. If he fails, he is liable financially at least, and if the neglect be gross enough may be held criminally. Even then it would more likely be a case of misdemeanor than a felony, unless it could be shown he either intended to injure or was so negligent and indifferent as to work injury by sheer carelessness.

"Society, of course, has the right to protect itself against epidemic or grave danger. In cases of infectious and contagious diseases, the authorities seem to have the power to take measures to prevent their spread. But beyond taking such precautions, who is to say what is proper and what improper treatment? Schools of medicine are numerous and conflicting in their methods. For all the public knows they are equally sincere. Yet none is uniformly successful or death would cease. In cases such as the one under discussion, usually the patient is of adult years and consents to the treatment. The intent, so far as one can glean by what is done, is for good. That intent determines the liability.

"The authorities seem to agree that faith curers of whatever kind are not guilty of such negligence as will make them liable to indictment. They perform no affirmative acts excepting praying and the laying on of hands. They apply no remedies which in their nature if unskilfully used might produce injury. However much of a scoffer a man may be, he must admit that praying will do no harm. Society cannot interfere in the treatment of disease unless it can be affirmatively shown that society will be injured thereby. Society cannot prosecute after a fatal termination of a treatment unless society has been damaged. Who can say this is the case? Would medical aid in any case have saved life? It seems to me that the patients must be left to their fates. They accept the treatment and that is the end of it."

According to the opinion of Joseph B. David, no conviction would be possible under the laws of Illinois. He goes further and expresses doubt that any statute could be passed which would intervene. His opinion is predicated on the theory, of course, that the victim consents to the treatment.

"I can find nothing in the laws of this state which make a conviction possible. In cases such as that of Harold Frederic, where the patient consented to the treatment, it would be absolutely impossible to convict. Of course, the question of contributory negligence in case of homicide can cut no figure. No man can be presumed to consent to his own death. But in order to convict you must show an act which either produces or accelerates dissolution. The only case wherein a conviction would be possible would be where the law makes it obligatory on the part of parent or guardian to procure aid to prolong life. The parent of a sick child is under legal and moral obligation to call in medical attendance. But the Christian Scientist called upon could not be held, for he does nothing. He commits no act.

"If a person pretending to be a physician who in fact was not, should administer a noxious drug which should injure the patient, then it seems to me that pretended physician might be liable. It would be a case of involuntary manslaughter then. There is a statute in England under which parents and guardians are compelled to provide medical attendance for sick children or persons unable to legally consent to the lack. I am clear in my mind that even with this law the prosecution in the Frederic case must fail. I do not believe that our Legislature is empowered to pass a law which would reach faith healers. They do nothing and cannot be charged with any affirmative act. Praying cannot hurt, and the purpose to commit injury or the performance of some act which resulted in injury must be affirmatively shown to create a ground for indictment."

The above opinions from members of the legal profession indicate very clearly the legal aspect of this case, and all similar cases. There can be no crime committed, say all the works upon criminal law, unless there be a criminal intent. This is fundamental. It would be an extraordinary display of verbal gymnastics to construe an act whose purpose is the saving of life into a criminal intent to kill, or destroy life. Making an extreme application, by way of illustration, let us suppose a case where a person is in imminent danger of being killed by the falling of a heavy object. A friend standing by desires to save the threatened victim. He leaps to his rescue, and in doing so strikes the falling object and so far accelerates its velocity that it strikes its victim a little quicker than it would otherwise have done, and he is killed. Would any court upon earth hold this friend guilty of murder? Not at all; because his intention was to save life rather than to destroy it. From the standpoint of the coroner's verdict in the Harold Frederic case, this is a fair illustration, putting upon the case the most favorable possible construction on the side of the physicians' claims. The intention of the Christian Scientist called was to save life, not to destroy it, just as certainly as in the case of the friend who strove to save his friend from the effect of being struck by the falling object. To say that a person, who, through prayer or any other means, seeks to save life, thereby becomes a murderer, is the very supremacy of folly and ridiculousness.

BOARD OF LECTURESHIP.

THE following apportionment has been made of the Branch churches in Canada. Their clerks will write the lecturer assigned to their section.

Maritime Provinces, William P. McKenzie, 2 Cumberland St., Boston, Mass.

The Province of Quebec, the city of Ottawa and Kingston, Irving C. Tomlinson, 8 Norway St., Boston, Mass.

Province of Ontario, Carol Norton, 170 Fifth Ave., New York, N. Y.

NOTICES.

ALL correspondence with the clerk of the Mother Church on matters pertaining to his office, should be addressed to William B. Johnson, C. S. B., 95 Falmouth St., Boston, Mass.

PER CAPITA TAXES and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid $3 00
Twelve or more books to one address, each, Prepaid . 2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea: 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

VOL. 1 BOSTON, MASS., U.S.A., DECEMBER 15, 1898. NO. 16

THE PRESIDENT'S MESSAGE.

PRESIDENT MCKINLEY'S message to Congress was read soon after the re-assembling of that body at noon, December 5. The document deals mainly with the recent war, which is fully reviewed, and the suggestions of Secretaries Alger and Long for increased forces are warmly indorsed. The revenues of the country are shown to be in satisfactory condition, and great pleasure is expressed at the very friendly relations of the United States with Great Britain.

We make the following excerpts from the message:—

To the Senate and House of Representatives:—Notwithstanding the added burdens rendered necessary by the war, our people rejoice in a very satisfactory and steadily increasing degree of prosperity evidenced by the largest volume of business ever recorded. Manufacture has been productive, agricultural pursuits have yielded abundant returns, labor in all fields of industry is better rewarded, revenue legislation passed by the present Congress has increased the treasury's receipts to the amount estimated by its authors; the finances of the government have been successfully administered, and its credit advanced to the first rank; while its currency has been maintained at the world's highest standard. Military service under a common flag and for a righteous cause has strengthened the national spirit, and served to cement more closely than ever the fraternal bonds between every section of the country.

A review of the relations of the United States to other powers, always appropriate, is this year of primary importance, in view of the momentous issues which have arisen, demanding in one instance the ultimate determination by arms and involving far-reaching consequences, which will require the earnest attention of the Congress.

Nicaragua Canal.

The Nicaragua Canal Commission has nearly completed its reports, and the results of its exhaustive inquiry into the proper route, the feasibility, and the cost of construction of an inter-oceanic canal by a Nicaraguan route will be laid before you. In the performance of its task the commission received all possible courtesy and assistance from the governments of Nicaragua and Costa Rica, which thus testified their appreciation of the importance of giving a speedy and practical outcome to the great project that has for so many years engrossed the attention of the respective countries.

That the construction of such a maritime highway is now more than ever indispensable to that intimate and ready intercommunication between our eastern and western seaboards demanded by the annexation of the Hawaiian Islands, and the prospective expansion of our influence and commerce in the Pacific, and that our national policy now more imperatively than ever calls for its control by this government, are propositions which I doubt not the Congress will duly appreciate and wisely act upon.

Interests in China.

The United States has not been an indifferent spectator of the extraordinary events transpiring in the Chinese empire, whereby portions of its maritime provinces are passing under the control of various European powers; but the prospect that the vast commerce which the necessity of our citizens and the necessity of our staple productions for Chinese use has built up in those regions may not be prejudiced through any exclusive treatment by the new occupants, has obviated the need of our country becoming an actor in the scene.

Our position among the nations as having a large Pacific coast and a constantly expanding direct trade with the farther Orient gives us an equitable claim to consideration and friendly treatment in this regard, and it will be my aim to subserve our large interests in that quarter by all means appropriate to the constant policy of our government.

British Relations.

Our relations with Great Britain have continued on the most friendly footing. Assenting to our request, the protection of Americans and their interests in Spanish jurisdiction was assumed by the diplomatic and consular representatives of Great Britain, who fulfilled their delicate and arduous trust with tact and zeal eliciting high commendation.

It will give me especial satisfaction if I shall be authorized to communicate to you a favorable conclusion of the pending negotiations with Great Britain with respect to the Dominion of Canada. It is the earnest wish of this government to remove all sources of discord and irritation in our relations with the neighboring Dominion. The trade between the two countries is constantly increasing, and it is important to both countries that all reasonable facilities should be granted for its development.

Czar's Peace Proposition.

The proposal of the Czar for a general reduction of the vast military establishments that weigh so heavily upon many people in time of peace was communicated to this government with an earnest invitation to be represented in the conference which it is contemplated to assemble, with a view to discussing the means of accomplishing so desirable a result. His majesty was at once informed of the cordial sympathy of this government with the principle involved in his exalted proposals, and of the readiness of the United States to take part in the conference.

The active military force of the United States, as measured by our population, territorial area, and taxable wealth, is, and under any conceivable prospective conditions must continue to be, in time of peace so conspicuously less than that of the armed powers to whom the Czar's appeal is especially addressed, that the question can have for us no practical importance, save as marking an auspicious step toward the betterment and good will among them; but in this view, it behooves us as a nation to lend countenance and aid to the beneficent proposal.

Venezuelan Boundary.

The arbitral tribunal appointed under the treaty of February 2, 1897, between Great Britain and Venezuela, to determine the boundary line between the latter and the colony

Copyrighted, 1898, by Mary Baker G. Eddy.

Digitized by Google

of British Guiana, is to convene at Paris during the present month.

It is a source of much gratification to this government to see the friendly resort of arbitration applied to the settlement of this controversy, not alone because of the earnest part we have had in bringing about the result, but also because the two members named on behalf of Venezuela, Mr. Chief Justice Fuller and Mr. Justice Brewer, chosen from our highest court, appropriately testify the continuing interest we feel in the definite adjustment of the question according to the strictest rules of justice.

The British members, Lord Herschell and Sir Richard Collins, are jurists of no less exalted repute, while the fifth member and president of the tribunal, M. F. DeMartens, has earned a world-wide reputation as an authority upon international law.

International Union.

I have the satisfaction of being able to state that the bureau of the American republics, created in 1890, as the organ for promoting commercial intercourse and fraternal relations among the countries of the western hemisphere, has become a more efficient instrument of the wise purposes of its founders, and is receiving the cordial support of the contributing members of the international union which are actually represented in its board of management. A commercial directory in two volumes, containing a mass of statistical matter descriptive of the industrial and commercial interests of the various countries, has been printed in English, Spanish, Portuguese, and French, and a monthly bulletin published in these four languages and distributed in the Latin-American countries, as well as in the United States, has proved to be a valuable medium for disseminating information and furthering the varied interests of the international union.

New Maritime Policy.

The annexation of Hawaii and the changed relations of the United States to Cuba, Porto Rico and the Philippines resulting from the war, compel the prompt adoption of a maritime policy by the United States.

There should be established regular and frequent steamship communication, encouraged by the United States, under the American flag, with the newly acquired islands. Spain furnished to its colonies, at an annual cost of about $2,000,000, steamship lines communicating with a portion of the world's markets, as well as with the trade centres of the home government. The United States will not undertake to do less.

It is our duty to furnish the people of Hawaii with facilities, under national control, for their export and import trade. It will be conceded that the present situation calls for legislation which shall be prompt, durable, and liberal.

Agriculture.

The department of agriculture has been active in the past year. Explorers have been sent to many of the countries of the eastern and western hemispheres for seeds and plants that may be useful to the United States, and with the further view of opening up markets for our surplus products.

The forestry division of the department is giving special attention to the treeless regions of our country, and is introducing species specially adapted to semi-arid regions. Forest fires, which seriously interfere with production, especially in irrigated regions, are being studied that losses from this cause may be avoided.

The Public Lands.

The public lands disposed of by the government during the year reached 8,453,896.92 acres, an increase of 614,780.26 acres over the previous year.

The total receipts from public lands during the fiscal year amounted to $2,277,995.18, an increase of $190,063.90 over the preceding year.

The lands embraced in the eleven forest reservations, which were suspended by the act of June 4, 1897, again became subject to the operations of the proclamations of February 22, 1897, creating them, which added an estimated amount of 19,951,360 acres to the area embraced in the reserves previously created.

In addition thereto, two new reserves were created during the year, the Pine Mountain and Laca Lake reserve in California, embracing 1,644,594 acres, and the Prescott reserve in Arizona, embracing 10,240 acres, while the Pecos River reserve, in New Mexico, has been changed and enlarged to include 120,000 additional acres.

Certain recommendations were also made as to the army and navy, an increase of the navy being urged.

ITEMS OF INTEREST.

The annual report of Navigation Commissioner Chamberlain is devoted mainly to statistics and facts in support of the project for the creation of the American merchant marine recommended by Secretary Gage. Excluding the Great Lakes, practically shut off by Niagara Falls from foreign competition, the tonnage of vessels entered and cleared at seaports of the United States in foreign trade for 1897 comprised 7,248,625 tons American, and 32,632,419 tons foreign shipping. If a line be drawn everywhere fifteen hundred nautical miles distant from our seacoast, trade between foreign ports inside that zone and the United States comprised 5,179,969 tons American and 5,213,393 tons foreign shipping. In over-sea navigation to foreign ports, more than fifteen hundred miles distant, American shipping amounted to only 2,068,656 tons, compared with 27,419,026 tons foreign.

Only three practical courses, at the present time, are open to the United States: First, We may retain our laws unchanged, ignore national navigation, and continue to rely on vessels under foreign flags for the transportation of our exports and imports. Second, We may permit foreign-built vessels to register under the American flag, ship crews abroad, and increase national navigation. Third, We may extend direct Government aid to vessels built in the United States, and thus increase national navigation and national shipbuilding.

The President has transmitted to Congress the report of the Hawaiian Commission, together with the text of the bills drawn by the Commission for the government of the islands as a portion of the United States. The preliminary portion of the report is mainly descriptive of the islands, the inhabitants, existing institutions, etc., and the remaining portion to a discussion of the legislation proposed by the Commission.

Three bills are formulated for the consideration of Congress. The first and principal one outlines a general plan of government, and the other two deal with subordinate questions. Of the main bill the commissioners express the opinion that it will prove thereby "such a measure for the government of the Hawaiian islands as will best promote the interests of their people at the same time that it promotes the interest and maintains the sovereignty of the people of the United States."

It provides for the erection of the islands into a territory of the United States, to be styled the territory of Hawaii. It contains provisions for the government of the territory, giving it executive, legislative, and judicial officers. A governor, secretary of the territory, a United States district judge, a United States district attorney, and a United States marshal are to be appointed by the President, and an internal revenue district and a customs district are created.

Congressman Hull introduced into the House of Representatives a bill to increase the regular army of the United States. The bill provides for a lieutenant-general and what is considered a sufficient increase of major and brigade generals to command an army of one hundred thousand men

Digitized by Google

scattered from Porto Rico to Manila. The artillery arm is re-organized, separating it into coast and field artillery, but promotion is to be by seniority of the whole army. A decrease of the enlisted men is made, so that the army can be increased by recruits, in case of war, to full strength.

The cavalry is increased two regiments, the infantry five. The enlisted strength of an infantry company is not to exceed 145, so that in case of war new regiments would have to be formed, probably all of which would be volunteer, but the regular army would make a substantial first line. The bill provides for the three battalion formation.

The attempt to effect a coalition between the states of Nicaragua, Honduras, and Salvador, to be conducted under a common administration, and known as the United States of Central America, has completely failed. The federal organizers to-day formally declared the union dissolved, the three states resuming, respectively, absolute sovereignty. The collapse is due to the failure of the troops of Honduras, acting in behalf of the federal organizers, to suppress the outbreak in Salvador against the proposed federation, and to force Salvador into the union. The prospects are peaceful. The Central American coalition lasted nominally just one month.

The national House of Representatives has passed the anti-ticket-scalping bill by a vote of 119 to 101. This action is the culmination of a ten years' struggle on the part of the railroads to put an end to the business of ticket scalping. The debate lasted four hours and was spirited upon both sides. None of the amendments offered was adopted, and the bill passed as reported by the committee.

If a joint resolution introduced in the House by Major-General Joe Wheeler goes through, the thanks of Congress will be given to Miss Helen M. Gould of New York, and she will be the first woman who has thus been honored by Congress in the history of the country.

The Reichstag was opened December 6 by Emperor William, who said that the principal object of his policy would be to contribute to the maintenance of peace. Therefore he hailed with warm approval the Czar's magnanimous proposal for the furtherance of that object.

On December 5, the 55th Congress began its short session, closing at noon. The President's message occupied all its time. General "Joe" Wheeler received more attention than any other man in either house.

On December 7, the cruiser New York entered the harbor at Havana, the first American armor-clad to enter this harbor since the Maine entered it. Great crowds watched her as she took her place.

General Garcia, the Cuban leader, passed away in Washington, December 11, 1898, at the Hotel Raleigh, where the commission of which he was the head had its headquarters.

The Spanish evacuation commissioners notified the United States Commissioners December 5 that the evacuation of the province of Puerto Principe had been completed.

The treaty of peace between Spain and the United States was signed at Paris, December 10, at 8.45 P.M. The treaty as signed consists of seventeen articles.

According to the estimates of the Secretary of the Treasury, nearly $600,000,000 will be necessary for the government's needs for the coming year.

Brigadier-Generals Wood and Henry have been promoted to be major-generals.

MISCELLANY.

THE following originally published in the Concord, N. H., papers, has been republished in nearly all the newspapers of this country, great and small.

Rev. Mary Baker G. Eddy, the Discoverer and Founder of Christian Science, has just completed the examination of a class of about seventy of the active workers in Christian Science Mind Healing, to confer on them the degrees of the Massachusetts Metaphysical College as healers and teachers of this system of medicine, whose only crowned head is divine sovereignty, whose only priest is the spiritualized man, says the Concord Evening Monitor. Most of those present were the students of her students. Nearly all of them had had several years' experience and marked success as healers. Their present fields of labor are as follows: Riverside, Cal.; Salt Lake City, Utah; Denver, Col.; Memphis, Tenn.; Atlanta, Ga.; Minneapolis, Minn.; Houston, Tex.; Philadelphia, Du Bois, and Scranton, Pa.; Fort Howard, Wis.; Omaha, Neb.; Cleveland, O.; Des Moines, Ia.; Orange, N. J.; Chicago, Ill.; New York City, Poughkeepsie, Jamestown, Saratoga Springs, and Lansingburg, N. Y.; Boston, Cambridge, Beverly, and Revere, Mass.; Montreal, Toronto, and Ottawa, Canada; London, England; and Edinburgh, Scotland. There were in this class clergymen, M. D.'s, and members of the bench, members of the bar, and one of our cleverest editors. Judge Ewing of the Superior Court of Chicago arrived too late to be present at the closing lesson, but he and Mrs. Ewing visited Mrs. Eddy at Pleasant View. It now appears that Mr. Harold Frederic of London, England, who is said to have died because of Christian Science treatment, was under the care of an M. D., but inasmuch as he was not recovering under that practice, but growing worse, he decided to try Christian Science. He did not, however, give this system a fair trial, for his friends gave him no peace until they got him again under the drill of *materia medica*. Query: Whose failure was it? And should not the M. D. instead of the Christian Scientist be indicted for manslaughter?

From an able article published in the Washington News Letter, written by John W. Hillmann, entitled, "The Only Way," we extract the following.

There seems to be a wave of spiritual awakening come over our land just now. Clubs and societies are forming all over the country to further its end, and so amazingly rapid has been its growth that the clergy is becoming alarmed and takes bold stand against it. But the antagonism of established man-creed can but tend to further the real cause of Christ.

The doctrines of "original sin" and "vicarious atonement" have outlived their usefulness as convenient church whips, and henceforth the at-one-ment will be the only theme acceptable to His children.

I believe the day will come, and I hope to be yet on earth to enjoy it, when the prophecy of Jesus will have come true, "and there will be but one flock and one shepherd."

Then there will be no more wars, no more revolutions, no strikes or lockouts. Labor unions and trusts will have gone out of existence, as there will be no need for them.

Peace, eternal peace will then reign supreme on this earth, and there will be no masters or servants, but one great brotherhood of men, each doing his share of work and labor for the benefit of the whole, and each receiving his substance in full. JOHN W. HILLMANN.

Daniel W. Chase some time ago received a verdict for $1,500 damages against Fayette Meek for injuries sustained by falling into an areaway. A new trial was granted. He had a suit against the city for $10,000 for the same injury. This was dismissed in the District Court yesterday on testimony that Chase had been cured of his injuries by Christian Science.—From the New York Times, November 24.

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

EDUCATIONAL SYSTEM OF THE MASSACHUSETTS METAPHYSICAL COLLEGE.

MARY BAKER G. EDDY.

THE Massachusetts Metaphysical College of Boston, Massachusetts, was chartered A.D. 1881. As the *vox populi* observed the success of this Christian system of healing all manner of disease, over and above the approved Schools of medicine, they became deeply interested in it. Now the wide demand for this universal benefice is imperative, and it should be met, as heretofore, cautiously, systematically, scientifically. This Christian educational system is established on a broad and liberal basis, law and order characterize its work, and secure a thorough preparation of the student for practice.

The growth of human inquiry, and the increasing popularity of Christian Science, I regret to say, have called out of their hiding-places those poisonous reptiles and devouring beasts—superstition and jealousy. Toward the animal elements manifested in ignorance, persecution, and lean glory—and to their Babel of confusion worse confounded—let Christian Scientists be charitable. Let the voice of Truth and Love be heard above the dire din of mortal nothingness, and the majestic march of Christian Science go on *ad infinitum*, praising God, doing the works of primitive Christianity, and enlightening the world.

To protect the public, students of the Massachusetts Metaphysical College have received certificates of degrees until they graduated with diplomas. These credentials are still required—and their dates examined—of all who claim to practise or teach Christian Science.

Inquiries are made as to the precise signification of the letters of degrees that follow the names of Christian Scientists. They indicate, respectively, the degrees of Bachelor and Doctor of Christian Science, conferred by the President or Vice President of the Massachusetts Metaphysical College. The first degree (C.S.B.) is given to students from the Primary Class; the second degree (C.S.D.) to those who, after receiving the first degree, continue as practitioners of Christian Science during three years in good and regular standing. In the intervening time these collegiates can enter the College class in Obstetrics.

The above reprint is to show that any departure therefrom would break the rules for giving diplomas. The detail thereof having slipped my memory—I did not inform my last class as to this entire matter, and do earnestly hope it will occasion no disappointment, but serve to make us all more perfect, more worthy of the high calling whereunto our Father hath called us. The certificates have been forwarded by mail to each member of this excellent class.

Students who enter the Massachusetts Metaphysical College, or are examined under its auspices by the Board of Education, must be well educated, and have practised Christian Science three years, with good success.

BOARD OF LECTURESHIP.

The Board of Lectureship is not allowed in anywise to meddle with or to disrupt the organization of branch churches. The lecturer can invite churches within the city whither he is called to unite in their attendance on his lecture, and so make for their churches a smaller lecture fee. But the churches are the parties to decide this action.

PLEASANT VIEW, CONCORD, N. H., December 5, 1898.

Another famous novelist and writer has died in London; William Black, one of the most popular writers of fiction for almost a full generation. He died in the hands of physicians at the age of fifty-eight years. He was a comparatively young man. Surely he could not have died of senility. Why then did he die, if the profession of medicine is a life-saving profession? So far as the reports show there was no Christian Scientist around. It cannot be charged in this case that Christian Science killed him. And why, on every fair and reasonable ground, may not the non-believers in the efficacy of *materia medica*, in behalf of an outraged public demand that the physicians in whose hands he died shall be forthwith arrested on the charge of manslaughter? Let a just people answer.

Some prominent citizens of Boston have also recently died, surrounded by physicians. There was no Christian Scientist in these cases. Why did they die? and why should not the American physicians also at once be arrested on the charge of manslaughter? Why do not the newspapers take up these cases and send them broadcast over the world as cases of murder? Let the people answer these questions.

There is one striking peculiarity in connection with many of our newspapers. They will publish every case where there is the least shadow of ground for supposition that there was a Christian Scientist employed, and the case did not terminate successfully, but when asked to publish cases of wonderful and successful healing by Christian Science, they refuse, on the ground that it would be in the nature of an advertisement. Here, also, is a specimen of human justice.

FROM DESPAIR TO JOY.

Two years ago I was in despair and disheartened; for within three months two of our children had passed away and the remaining three were not well. For a long time doctors and a trained nurse had been coming daily. A large selection of medicine bottles made the house look like a hospital. Care, sleepless nights, and worry occupied my thought; heavy losses were added to the poor collections of outstanding accounts of a small retail business, and I was debating whether it was worth while trying to live. I seldom went to church. I thought it needless for a man to spend time for such unprofitable and lonesome lessons as we received in the Lutheran Church.

At this time a young lady told me about Christian Science, and asked me to go to a Friday night experience meeting, and perhaps it would do me good. I did so, and the very first evening was a glorious one to me. The words which I read on the wall of the Church, "God is Love," seemed so much to

Digitized by Google

me. I could not remember that I had ever heard those words before, and I knew that was certainly not the God who sent discord and misery. I paid close attention to the testimonials, and soon realized that I had found what I needed.

I was convinced that these intelligent people who called themselves Christian Scientists were speaking the Truth, and the love and gratitude which they expressed made me cheerful and gave me a longing to know more about it. I investigated and soon found it helpful; my wife became interested, and the three children were sent to the Christian Science Sunday School.

A year ago my wife and I went through a class. I did not think at that time that I would ever be able to give up smoking and drinking beer; being a German, I had to have my beer with nearly every meal. Now I do not want to smoke, neither do I want any beer; not because I have fear, and not alone because it is unscientific, but because I have no desire for it. And it is very seldom that I am asked to smoke or to drink, which was always the first offer before I came to Truth.

Now each one of the family demonstrates the power of Truth. God is our physician, and Truth and Love our medicine. Our beloved Leader's books—Science and Health and her other writings—together with the Bible, which I did not open for fourteen or fifteen years, have become our dear faithful companions, and it is needless to say that I love to go to Church.

Last spring I was healed of pneumonia. It being severe and seemingly real to me, I gladly accepted help, and in four days I was healed. This seemed to be just what I needed to do away with the doubts as to the Truth and healing power of Christian Science.

Two or three months after this a sudden attack of rheumatism, of which I was temporarily relieved some time before I came to Christian Science, manifested itself. I called for help again, thinking I was not able to reflect enough of Truth to make this belief unreal to myself, but was much disappointed at first to hear the practitioner say, "You must work this time yourself; it is time you worked your problem." I took it as a rebuke, thanked my brother for turning my face God-ward, and asked God to show me how to work. The healing was slow, but sure and sweet. In about three weeks I was healed, and with it came the spiritual uplifting which is far beyond my expression. Physically, morally, and spiritually I am a new man.

Soon after this I had to prove the power of Truth for one of my children, and in about fifteen minutes the child was relieved from high fever. I felt like going up to the top of the house and shouting, "Glory to God!" I have had other demonstrations since, and know that we can help ourselves and others if we only ask aright; and this we learn in Christian Science and through our Leader's writings.

The book Science and Health has also been a great help to me in speaking, reading, and writing English, and I realize the value of this jewel to all Christian Scientists.

It is marvelous to see how naturally our little children take to Truth, and I would like to mention a few demonstrations. Our oldest girl, eleven years old, got up at one o'clock one night and asked for a book. "Unity of Good" was nearest at hand; she read it for about twenty minutes and went to bed again. The next morning she was at the breakfast table and there was not a word said about it, although she seemed to be burning with fever, before she took refuge in "Unity of Good."

Our little boy, seven years old, was asked by his school teacher to stay at home, because he had a very severe cold. He came home at twelve o'clock, and instead of going with us to the lunch-table he went to his room, closed the door, and was next seen going to school at quarter before one. In the afternoon, on entering the house, he went direct to his room again, and did not allow any one to speak to or even look at him. The next day he was well, and all he said was, "I demonstrated and error went away."

Happiness, harmony, and love is this little family's home rule now, and for all this we thank God and our beloved Leader, Mrs. Mary Baker G. Eddy; and shall continue our thanks through living this blessed Truth.

Arnold Blome, New York City.

THE LATE MAJOR LESTER.

FROM the Surrey (England) Adv. we take the following:—

At Sunday evening's meeting of the Christian Scientists at their church in Bryanston Street, the following letter from Mrs. K. Stuart, a sister of Major Lester, one of the alleged victims of Christian Science treatment, was read. Mrs. Stuart's letter is dated Vienna, November 17, 1898, and is addressed to Mrs. Julia Field-King, the leader of the movement in England. It runs:—

Dear Mrs. Field-King:—I heard to-day that I may do what I have so much wished to do, that is, make it known that my dear brother, Major Lester, did not suffer under Christian Science treatment as people insist he must have done. I was not with him during the first month when he was attended by five doctors, but I have a letter from my father telling me that towards the end of August and in the beginning of September his agonies were so intense that they had to remove his razors from the room, as he had said he could not endure the pain, and wished to end life. Those who loved him best wished that he might die soon, that the agony they could not endure to see might end. Morphia used to be injected, but its effect only lasted a couple of hours. After Christian Science treatment commenced, and till he passed away he never again had intense or unbearable pain, only on one occasion. I remember when, during a treatment for pain, the healer seemed to wrest it from him, and he cried out as the boy did when Christ cast out the devil. The pain seemed to rend him sore, and come out of him. My great anxiety has been that the world should know that he did not suffer intense pain, as the doctors announced he must have done, for surely no Christian Scientist could believe for a moment that this were possible; but it seems that others believe we "could stand by and see intense pain," day after day, and "do nothing to relieve it."

The writer here alludes to the absurdity of the idea that Christian Scientists are lacking in sympathy and tenderness, and continues:—

Will you also say on Sunday night that Doctor Clark, who was my brother's principal medical attendant, said freely, generously, and emphatically, "By all means try Christian Science if it is any comfort to you, and if it does him any good no one will be so glad as I." The Governor of the College said exactly the same words, which Doctor Clark repeated to me next morning. Afterwards, at the inquest, this free permission was not mentioned. It was deliberately withheld, and the lie allowed to go forth that we had dismissed the doctors. I ought, of course, to have been there (at the inquest), but neither knew of it nor of the healers being summoned till it was all over.

I am, very sincerely yours.

K. STUART.

Dear Editor:—The enclosed clipping from the editorial page of the Chicago Evening Post of December 8, shows that there is a growing appreciation of the legal status of Christian Science and Christian Scientists. Newspapers of the better class are realizing that we do not claim any privilege which we deny to mankind in general, and that the rights which we assert are the rights of humanity the world over. Christian Science will, in due time, demonstrate the fact that there is no country "whose political system is" not "based on individual rights and liberty of conscience."

Digitized by Google

The article is so excellent that it seems worthy of a place in one of our publications.

Yours very truly, ARCHIBALD MCLELLAN.
Attorney at Law.

Chicago, Ill., December 9, 1898.

The British government is to be commended and congratulated upon the withdrawal by the Treasury of the preposterous charge of manslaughter against Mrs. Mills, the healer, and Miss Lyons in connection with the death of Harold Frederic. The case promised to become celebrated throughout Europe and America, and few rational men could find any excuse for the prosecution of the two women.

In discharging the defendants the court said that the evidence was not strong enough to justify sending the case to trial. Public opinion and the enlightened British press had reached the conclusion that the evidence was strong enough to condemn the charge of manslaughter as cruel, wicked, and absurd. Mr. Frederic was a man of great intellectual strength and moral firmness. He was abundantly capable to decide for himself in regard to the mode of treating his illness. He had lost faith in the regular physicians and agreed (if he did not actually demand) to be placed under the care of a Christian Scientist healer. The state could not lawfully compel Mr. Frederic to follow this or that medical theory or school, and it was an outrage to proceed after his death against those who merely acted in accordance with his wishes.

British courts and judges have not been as liberal and consistent in their attitude toward Christian Science as American courts, but the Frederic case, by drawing public opinion to the underlying principles of the question, will serve to render bigoted persecution under legal technicalities impossible hereafter. Adult men and women must have the freedom to choose their physicians. The state should not attempt to determine for them what is orthodox science and what is unrecognized heresy. All efforts to restrict or suppress the practice of Christian Science have failed and will fail in countries whose political system is based on individual rights and liberty of conscience.

Last evening, on the invitation of the Kingston congregation of Christian Scientists, seven hundred people attended at the City Hall to hear Rev. I. C. Tomlinson of Boston, lecture upon the elements of that faith. He is one of twelve lecturers set apart by the Mother Church at Boston, to familiarize the public with its professions. Edward J. B. Pense, who presided, stated that it was a generous custom amongst denominations of Kingston to ask a representative citizen of another creed to preside at their public lectures, and as he belonged to a profession which takes a kindly interest in all creeds, his position was quite natural. Each church in this age was a mission church, whose chief aim should be aggressive work, and for that aggressive work there was ample material!—not only in the heathen world, but in the communities around us,—right here in the city of Kingston, judging by the absence of a proper proportion of men in the services, and from the need of deeper thought amongst a large number of persons. At any rate, aggressive work is much better directed against outside needs than against a sister community working in His name. The local Christian Scientists had brought this lecturer, at no little expense, to Kingston to explain themselves, and that is a right which every community should be freely accorded, and which was justified by the large attendance. It had been said that the Christian Scientists were doing the work of the evil one. He could scarcely believe that from his knowledge of the earnestness and moral character of members of that congregation, with a number of whom he had long had business and social relations. During the war of the Union a great deal of utter recklessness and disregard of morality pervaded the armies of Virginia. It was said there was no God on the Potomac, and it is certain that chaplains paid more attention to the canteen than they did to the religious condition of the fighters. A half-uniformed man, walking through one of the camps, was asked from what corps he came. He replied that he belonged to the army of the Lord, whereupon he was told that he hailed from a fine corps, with a splendid captain, but that he had wandered a long way from headquarters! The speaker trusted that when Mr. Tomlinson concluded his lecture, it would be found that, while he and many of those in the hall might not fully agree with him, that it would be considered that he had not wandered very far from headquarters.

The Daily Whig, Kingston, Ont.

IS SMALL-POX FROM GOD?

WHAT would the apostle Paul have done with a case of small-pox?

This question is not addressed to those who do not believe the accounts in the Bible of divine healing by Jesus and his apostles, but to those who believe. Would Paul have administered drugs and established a rigid quarantine? Would he have sent letters to all the cities of Judæa, Greece, Assyria, and Asia Minor telling his co-workers to look out for small-pox?

If the apostle Paul should re-appear now, what would he do with a case of small-pox? Would he say that the gift of healing the sick by the power of God was a temporary dispensation and give the sick man drugs?

Suppose people should quit using arithmetic for sixteen hundred years, and should forget how to multiply numbers, retaining only a tradition that there had once been a practical science of numbers. Suppose that, although they were not able to multiply and divide, yet they founded colleges and sent out missionaries all over the world to tell about this science of numbers which nobody could demonstrate. Even if all this should be done, and men should be born and die in the faith that the science of numbers was a special gift to a few men ages ago, would that make it any the less practically workable if some one should rediscover the rules for its demonstration? If arithmetic is a science of numbers it cannot be annihilated because people forget how to apply it for a few centuries.—Denver Republican.

DISEASE CAUSED BY SIN.

TELL a man who has always accounted himself a good Christian that his rheumatism is the effect of sin and he will feel insulted. Likely as not he would say, "It's a lie," for he believes himself to be free from sin. In the First Epistle of John, 1 : 8, we read: "If we say that we have no sin, we deceive ourselves, and the truth is not in us."

Job made that mistake and suffered for it. Accustomed to hear himself well spoken of as a just and upright man, he grew self-satisfied. He was asleep in sin, and a pretty rough awakening had to come. When sickness and disaster came upon him, he was patient for a while, but finally, seeing no sin in himself, commenced accusing God.

When Job had finished justifying himself, the Lord spoke to him and showed him his transgressions that had been so long covered up. Job then humbled himself and cried, "I have heard of Thee by the hearing of the ear; but now mine eye seeth Thee. Wherefore I abhor myself, and repent in dust and ashes."

The Scriptures declare that "the wages of sin is death." Sickness, if not cured, ultimates in death, and is properly part of the wages of sin. Jesus said: "If a man keep my saying he shall never see death." If the Bible be true, then the way to cure sickness is to turn from sin. This is the foundation upon which Christian Science rests. The foundation is sure because thousands of Christian Science practitioners are daily proving it in healing consumption, rheumatism, asthma, and all kinds of otherwise hopeless diseases by casting out sin.—*Denver Republican.*

A good-sized audience gathered at the Manchester Opera House last evening and listened with attention to a lecture by the Rev. William P. McKenzie of Boston on "Christian Science: what it is and what it does." Mr. McKenzie is a member of the Board of Lectureship of the Mother Church of Christian Science in Boston. He was introduced by Sherman H. Burroughs, the attorney.

The audience was a thoroughly representative one and in it were all classes, including several clergymen and some of the best people in the city.

Mr. McKenzie first told his hearers some of the things that Christian Science claims to have done, and then asked them what quarrel they could have with a movement organized to do good to all mankind. He said that Christian Science had been much abused, ridiculed, and misrepresented. He felt sure that many, if they but learned what it really is, would have a more wholesome respect for it, if not a belief in it. He asked his hearers if there were not a great need of something to be done for improvement of the condition of mankind, and this he said Christian Science could do.—The Manchester (N. H.) Union.

MR. FARLOW AT KANSAS CITY.

From the Kansas City Journal we copy the following regarding Mr. Farlow's recent lecture delivered in Kansas City, Mo. The lecture is published in full in the Kansas City Journal.

An audience that filled the Academy of Music, pit and balconies, listened attentively last night to an address by Mr. Alfred Farlow, lecturer in the Christian Science Church. Fully twelve hundred people were present. Of these at least half were women, for the most part fashionably dressed Many prominent citizens sat in the audience. A remarkable feature of the meeting was the quiet, close attention paid to the speaker's words. Scarcely any one stirred during the hour's discourse. Mr. Farlow spoke quietly and without any attempt at elocutionary or rhetorical effect. His talk was clear, setting forth the teachings of Christian Science by plain but forcible illustrations drawn from every-day life.

Dear Weekly:—It has been my desire for several years to send "Science and Health with Key to the Scriptures" to my dear old home in Perth, Scotland. Ere long my prayers were answered. I heard they were building a fine library for the city, and I knew then that the way had been opened to ask the privilege of presenting a copy of the "little book" to the Sandeman Public Library. Last September I wrote to the committee requesting their permission to send the book. The reply came promptly and most cordially,—

"Gratefully accepting the proffered gift, as a token of the interest manifested in our library by Perthites beyond the seas."

At the earliest opportunity, by return steamer, I joyfully mailed the precious volume, for which I felt sure many hungry hearts were waiting.

Much to my delight, the People's Journal, one of the leading papers of Perthshire, announced that a gift had been presented to the Sandeman Public Library, "Science and Health with Key to the Scriptures," by the Rev. Mary B. G. Eddy, from Boston, Massachusetts. On Wednesday evening, when the distinguished guests from Scotland were with us, I realized how wonderfully were the words of our dear Mother being fulfilled.

That same evening the "little book" would arrive in Perth to fulfil its divine mission. "The still, small voice" of Scientific thought reaches over continent and ocean, to the globe's remotest bound. (Science and Health, page 551.) With sincere gratitude to our beloved Mother.

Effie S. Watt, Boston, Mass.

For the past year and a half a few faithful students of "Science and Health with Key to the Scriptures" have met at the home of one of our number every Sunday morning to hear the Lesson-sermon read. As our number increased to nine, with more inquiring, it seemed expedient that we have a more public place to meet. One of the literary clubs of the city rent and furnish a room in the Post Office Building, and in turn rent it to us for a very moderate sum. On Sunday, October 9, we had our morning and evening meetings there. We also had a little Sunday School and Wednesday evening meetings. With what money we had on hand we purchased an organ and more Hymnals, for during the eighteen months we had been meeting in a private house regular contributions were made in anticipation of the time when the money should be needed. It is with a heart full of gratitude that we acknowledge how beautifully the way was opened when that time came.

Lily G. Barnes, Provo, Utah.

Poughkeepsie Christian Scientists were happy yesterday over the telegraphic item in the Eagle announcing the release of Miss Kate Lyon from the charge of killing Harold Frederic in England.

The Christian Scientists are making their Wednesday evening meetings very interesting by reading extracts from their publications showing what Christian Science is doing all over the world.—Daily Eagle, December 7, 1898.

A Christian Science Church was dedicated at Fitzgerald, Ga., November 27, at 10.30 A.M. The dedicatory services were appropriate and interesting. This church is known as the First Church of Christ, Scientist, Fitzgerald, Ga., and is located at the corner of Ocmulgee Ave. and Main St.

I HAD sick headaches for several years. In one of my severe attacks Mrs. H. treated me, and in ten minutes I was sound asleep, and entirely relieved of pain and sickness. I have never had an attack since. That was in February, 1886.—*Mrs. Martha Cotting, Wichita, Kan.*

BOARD OF LECTURESHIP.

THE following apportionment has been made of the Branch churches in Canada. Their clerks will write the lecturer assigned to their section.

Maritime Provinces, William P. McKenzie, 2 Cumberland St., Boston, Mass.

The Province of Quebec, the city of Ottawa and Kingston, Irving C. Tomlinson, 8 Norway St., Boston, Mass.

Province of Ontario, Carol Norton, 170 Fifth Ave., New York, N. Y.

The following is the apportionment of states for the Southern Section. Branch churches through their clerks will write to the lecturer named for their state. To Mrs. Sue Harper Mims, 575 Peachtree St., Atlanta, Ga.:—Kentucky, Tennessee, Georgia, Florida, South Carolina, Alabama, Mississippi, Louisiana.

To Mr. Edward H. Hammond, 1900 Bolton St., Baltimore, Md.:—District of Columbia, Maryland, Virginia, West Virginia, North Carolina.

NOTICES.

ALL correspondence with the clerk of the Mother Church on matters pertaining to his office, should be addressed to William B. Johnson, C. S. B., 95 Falmouth St., Boston, Mass.

PER CAPITA TAXES and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Works on Christian Science

WRITTEN BY

Rev. MARY BAKER G. EDDY.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid	$3 18
Two to Twelve books to one address, each, Prepaid	3 00
Twelve or more books to one address, each, Prepaid	2 75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75
Levant, divinity circuit, leather lined to edge, round corners gold edge, silk sewed, each, Prepaid	6 00
Twelve or more to one address, each, Prepaid	5 75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price, (cloth) each, Prepaid	$2 25
Twelve or more books to one address, each, Prepaid	2 00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid	4 00
Twelve or more to one address, each, Prepaid	3 75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid	5 00
Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

VOL. 1 BOSTON, MASS., U.S.A., DECEMBER 22, 1898. NO. 17

HEALING A QUESTION OF FACT.

FROM the Denver Republican, a leading daily of the West, we extract the following:—

Christian Science healing is simply a question of fact. Other systems of religion may be based upon faith that God used to heal the sick, but Christian Science is founded on the fact that God heals the sick now, and investigation as to whether this be a fact is invited.

When scholars to-day attempt to determine the question of fact regarding the healing work of Jesus eighteen hundred years ago, they can do nothing more than review the evidence, which has been thoroughly studied for ages, with the result that millions of people believe that Jesus and the apostles healed the sick, but they do not believe the sick can ever be healed in that way again.

Christian Science healing is a question of fact right at the door of doctors and theologians. The witnesses—thousands of them everywhere—are living and are ready to undergo examination. These witnesses are not feeble-minded or ignorant fanatics. Almost every one who reads this will be able to remember one or more sound-minded, sensible persons who acknowledge that they were healed of chronic diseases through Christian Science.

If any one seriously doubts that Christian Science is a healing agency, and has enough interest in the question to want to settle it, let him write to this department and names will be forwarded to him of practical, sensible, intelligent people who will give their testimony. The names will not be of persons two thousand miles distant from the home of the inquirer, but of men and women in his own city or neighborhood, who will be easy to find. This opportunity should be welcomed by doctors and theologians who are in the habit of saying that they do not know of any case of healing through Christian Science.

There was a time when doctors and ministers could ignore Christian Science, because it was very slightly understood, but that time has passed. The cases of healing have so multiplied that the facts have to be faced. There is probably not a doctor in Denver who has not known of cures through Christian Science, some of them of an astonishing character. There is probably not a preacher in Denver who does not know of some instance illustrating the marvelous redemptive power of Christian Science. It is getting to be generally conceded that Christian Science does heal the sick, the halt, and the blind, and that it then transforms them into model husbands or wives, fathers or mothers, sons or daughters. It is freely acknowledged that Christian Scientists are goo neighbors, good employers, and good workers.

People who acknowledge these results, but say they are the works of the devil, are very, very blind. They find few to believe them now, and soon they will be alone, for the people are turning to Christian Science by thousands, because it does not give them stones when they cry for bread.

A religion that heals all one's diseases is worth a million times more than a religion that does not. When a man finds out for certain that there is a religion that heals, he can never be satisfied with a religion which teaches that God used to heal.

A system of healing that cures disease and leaves the patient with a deep and lasting desire to be honest, truthful, and pure in heart, is a million times better than a system of healing that often leaves the patient a helpless slave to the morphine habit, the cocaine habit, the chloral habit, or the whiskey habit, and the people are finding it out.

If any one wants to know about this religion that heals and this system of healing that purifies, he does not need to spend a lifetime in some college studying musty books, or years dissecting putrefying dead bodies and torturing innocent brutes. He can learn all about it by reading the Bible in connection with "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, who is the Discoverer and Founder of Christian Science. She is a perfectly sane, refined, and gentle American woman, whom her followers tenderly love because she has helped them to the true understanding of how to live, so that life may be a blessing to the world. They are thankful to God that she is here to lead them and show them how to go, but they do not worship her.

Christian Scientists worship but one God. They know that He is Love, and that He is, in all His manifestations, Good. They are taught to strive in every act of their daily lives to glorify Good, to make Good gloriously manifest as the only power there is.

PASTORS DISCUSS PRAYER.

THE advisability of propounding or discussing a thesis questioning the justification of prayer has been debated by the Baptist ministers. The thesis was the subject of a symposium responded to by six pastors, and it was propounded by Rev. Zephaniah Grenell, pastor of the Western Avenue Baptist Church. In the discussion following the symposium Rev. W. W. Dewey of Bethany Church said he was glad he was the only one of his congregation who had seen the thesis, as it was misleading and created doubt. Rev. Kittredge Wheeler in the symposium pronounced the thesis self-contradictory, misleading, and overloaded with difficulties and obstacles. The language of the troublesome thesis was as follows:—

"How can prayer avail for procuring blessings that would not otherwise come to us, seeing that God in His infinite wisdom and goodness will always do what is best, and the attempt to change God's intention, if successful, would result in diverting Him from what is best for us?"

The symposium was responded to by Rev. Mr. Grenell, Dr. J. W. Conley, Dr. James P. Thoms, Dr. Gilbert Frederick, Rev. H. M. Cook, and Dr. Wheeler.

Dr. Wheeler said, 'Prayer is heard when it is offered in the spirit of 'Thy will, not my will, be done.' Prayer is not exactly the license to act like overfed children at a picnic or Thanksgiving dinner and stretch out hands and ask for all the sweetmeats in sight. Some persons approach

Digitized by Google

God in an attitude of 'for revenue only.' They are selfish, dissatisfied children, clamorous with words, and annoy Him with lack of faith."

Dr. Frederick differed with Dr. Wheeler, saying, "If the thought that a man should ask for something he wants be taken away there will be little prayer. I do not believe in the 'Thy will be done' attitude. Should a man on board a sinking ship pray to be drowned because he believes it to be God's will that the ship go down?"

Rev. Mr. Cook thought the question in the thesis could not be answered in a philosophical or logical manner. "In the divine storehouse," he said, "there are thousands of blessings laid away labeled 'Uncalled for.'"

Rev. Mr. Grenell said that the young men of to-day were asking the practical question, "If God will do the best for us, why pray to Him?" and that the question would have to be answered in a rational manner. His answer was that prayer changes the conditions in the divine sight, and that God can do far more for a praying man than he can for a man who does not pray.—Chicago Evening Post.

ITEMS OF INTEREST.

[Special despatch to the Boston Herald.]

Territorial expansion is the leading subject in the mind of American citizens to-day. Whether the United States shall extend its boundaries beyond the Pacific, and far out among the islands of the Atlantic, as the result of the war with Spain, or shall confine itself to the limits of its own great continent, is the uppermost question of the times.

No better index of the general trend of public opinion on this subject can be found than in the great newspapers of the country. To find out the attitude of the press on the subject of expansion, correspondents for the New York Herald have canvassed the leading journals of all parties in every state.

Opinions of more than five hundred journals have been collected, and, as already stated, only the most influential newspapers in each state have been taken. Taking the country at large, the Herald's canvass shows that a very pronounced majority of the newspapers are advocates of the policy of expansion.

Taking the country by sections, the Herald's inquiry shows that only in the South is the majority found in the anti-expansion column. In the West the majority for expansion is more than two to one. In the Middle States twice as many of the leading newspapers favor expansion as oppose it, while in New England the majority, though large, is not so great as in the other two sections.

Oddly enough, every leading newspaper in Florida is found in the expansion column, but this is offset in Georgia, where all the prominent journals are opposed to expansion. Virginia also reports all leading newspapers supporting expansion, while the reverse is found in both North Carolina and South Carolina.

Of all the other states, only Utah, Idaho, and Rhode Island are unanimous, and in each of these states the papers advocate expansion.

New York and Pennsylvania each show a majority of two to one for expansion, while Massachusetts is almost evenly divided, only a bare majority being for expansion. New Jersey, too, only just gets into the expansion column, while Maine just escapes being unanimously opposed to territorial expansion.

Taking the politics of the newspapers into consideration, the inquiry shows that practically five to one of the leading Republican journals are advocates of expansion, while nearly three influential Democratic organs oppose the policy for each one that favors it. Independent newspapers of prominence are in favor of expansion by nearly two to one.

No death sentence has been executed on any Yankee soldier of the late war for any of the crimes that are punishable by death under the rules of war; and President McKinley's commutation of the death sentence passed upon a private soldier for having murdered one of his comrades helps to preserve that remarkable record. It is interesting to note, by the way, that in this case the offender was a colored trooper, who killed a white man, and that the recommendation for mercy was made by General Joe Wheeler of Alabama.—Boston Herald.

The Roman Catholic priests at Ponce have issued a proclamation directing their people not to go near Protestants, nor to receive presents from them, and forbidding them to enter the houses of Protestants. The priests denounce as illegal marriages performed by others than themselves.

General Henry, the military commander of the island, has notified the alcalde of Ponce to inform the priests that they must stop issuing such disquieting proclamations, and that the denouncing of religious denominations will not be tolerated. The alcalde is further instructed to tell the priests that if the action complained of is persisted in the military will put an end to it.

Before leaving for the South, President McKinley signed an executive order establishing a customs tariff for Cuba, to go into effect January 1, next. It is based upon the report and recommendations of Special Commissioner Robert P. Porter, who was sent to Cuba some months ago for the special purpose of making an investigation of the subjects of revenue and customs of the island.

Paris, December 16, 1898. The United States ambassador, General Horace Porter, and the other officials of the United States embassy, a representative of the Foreign Office and the members of the American colony of this city bade farewell to the American peace commissioners at the railroad station this evening, as they started on their homeward journey.

Each of the six provinces of Cuba will have its own military governor, just as General Wood is now military governor of the province of Santiago, but all of these will receive their instructions directly from Major-General Brooke, who is in supreme authority in the island.

President McKinley and party left Washington December 13 for a week's trip through the south, the principal object being to attend the peace jubilee held in Atlanta, Ga.

General Fitzhugh Lee has been appointed governor of the province of Havana, where he was warmly welcomed upon his arrival December 14.

Word comes from Washington that Major-General Brooke has been appointed military governor of Cuba.

CONCORD ITEMS.

From the Concord Daily Monitor.

The many New Hampshire friends of the gentleman in question will be interested in the following despatch dated San Juan, Porto Rico, December 13, 1898:—"The insular cabinet has decided to secure an efficient American superintendent for the Porto Rican schools. General John Eaton, the well-known educator, and formerly United States commissioner of education, has been selected and sent for."

The Rev. Frank L. Phalen has received a communication from the Massachusetts Reform Club investigating committee, asking him to express his views relative to certain conditions that existed at Chickamauga during his connection with the First New Hampshire regiment of volunteers as chaplain.

George H. Moses, Esq., of the forestry commission, lectures before the Nashua Woman's Club on Thursday evening of this week.

MISCELLANY.

THIRD SCIENTIST CHURCH.

A meeting of the members of the First Church of Christ, Scientist, residing on the West Side, was held in the Christian Science Dispensary rooms in the Inter Ocean Building. The object of the gathering was the organization of a Third Church of Christ, Scientist, for the West Side. This step is made necessary by the crowded condition of the Christian Science Temple at Drexel Boulevard and Fortieth Street, which is wholly inadequate for the accommodation of its regular Sabbath audiences.

About two months ago one hundred to four hundred of the persons attending services in that auditorium—the largest of any non-Catholic church in the city—were compelled to stand through the morning worship, and many attendants were regularly turned away. To relieve this condition the Second Church of Christ, Scientist, was organized and secured the rental of the Jewish Synagogue at LaSalle Avenue and Goethe Street, on the North Side. It was thought that the withdrawal from the First Church of that portion of its congregation living on the North Side would sufficiently reduce the attendance at the temple in Drexel Boulevard to permit all the members of its congregation to obtain seats. Last Sunday morning, however, found about one hundred persons obliged to stand during the entire services. In consequence of this condition the organization of a Christian Science Church for the West Side was ordered. The number of new members received into the First Church last Sabbath lacked less than a score of being equal to the number previously given letters for the purpose of establishing the Second Church. The commodious house of worship occupied by the latter at LaSalle Avenue and Goethe Street is now well filled at its Sunday morning services.

The organization of the Second and Third Churches of Christ, Scientist, has not been the result of any division of policy, but is simply an expansion made necessary by the overcrowded condition of the First Church, which seats more than fifteen hundred persons.—Post, Chicago.

The interest in Christian Science in this city was manifested by the large audience that assembled at the Opera House Monday evening, December 5, in the face of the most tempestuous weather, to listen to the lecture by Carol Norton of New York, a member of the Board of Lectureship of the Church of Christian Science, and one of the leading speakers of the organization. The Opera House was made very comfortable and the stage was profusely decorated with palms, ferns, and other choice potted plants, a most pleasant sight and in happy contrast with the elements outside. The lecturer was introduced to his audience at eight o'clock by Arthur E. Hills.

Mr. Norton's ability to discuss the subject of Christian Science was fully demonstrated, and from an educational point of view his discourse was much appreciated, and while he might not be considered a brilliant orator his words were spoken so distinctly and with such perfect enunciation and earnestness of effort that the most critical could scarcely fail to enjoy it.—Jamestown (N. Y.) Evening Journal.

The Christian Scientists of this city are rejoicing that harmony has again been restored, and all are dwelling together in brotherly love, having dropped all personal differences, and are now working together for the good of the cause. Upon the basis of a letter of invitation, formal application was made by the Second Church of Christ, Scientist, to unite with the First, "individually and unconditionally." The application was unanimously accepted, and the Second Church held a meeting and disbanded their organization, and all meet together now. Their services will be held in the auditorium of the Tootle Theatre each Sunday morning as usual. The hall where Sunday and Wednesday evening meetings have been held by the First Church is found to be inadequate, and larger quarters will be secured for these meetings.

An excellent foundation for their beautiful church edifice to be erected at the corner of Twelfth and Felix Streets has been completed, and during the winter months the stone for the superstructure will be prepared, so that work can be resumed in early spring.—*St. Joseph Herald.*

The cosy reading room at the local Christian Science Hall, corner of North State and School Streets, has recently been beautified by some thoughtful gifts from far-away friends. One of the handsomest bronze clocks in the city now adorns the mantel, having been presented by a friend in New York. An explanatory letter, accompanying the gift, states that the figure surmounting the clock is "symbolic of the spirit of Truth which is come to the world; with an olive branch in one hand signifying peace, and in the other a harp representing harmony, which is Love. The world is under the feet of the figure."

A large cut glass vase is from a Boston friend, and two smaller vases testify to the remembrance of a friend across the water in Scotland. Hanging upon the wall, in a gold-leaf frame with hand-embroidered mat of morning glories, is the 91st Psalm beautifully inscribed with pen and ink, a specimen of wonderful expertness in that kind of work.

Independent Statesman, Concord, N. H.

Lockport was visited December 9 by hundreds of the most prominent Christian Scientists in western New York and a number from other localities. They came here for the purpose of hearing the lecture at Hodge Opera House on "Christian Science; Its Scope and Work," by Mr. Carol Norton, one of the Board of Lectureship of that denomination. Three cars full of the visitors from Buffalo, Batavia, and other western New York places arrived over the Buffalo and Lockport electric road, while there were also large numbers from Medina, Middleport, various country towns, and even from as far east as Philadelphia.

Hodge Opera House was well filled when the Hon. John E. Pound, in a few well-chosen words, introduced Mr. Norton. From the time that Mr. Norton began his lecture until he resumed his seat his words were eagerly listened to by the audience.—Lockport (N. Y.) Daily Journal.

The Lowell Mail having exhausted their entire edition containing a full report of a recent lecture, issued a second edition about which they say in their issue of December 5:—

"Copies of the Mail containing the lecture entitled, 'As to Christian Science,' delivered recently in Odd Fellows Hall by Rev. Irving C. Tomlinson, may be obtained at this office. The lecture has been widely read and calls for it are likely to be continued for some time. It is an able presentation of the principles held by the Christian Scientists, and answers many of the objections that have been urged against them."

Mrs. Livingston Mims delivered a most interesting lecture in the Auditorium of the Young Men's Christian Association, Atlanta, Ga., before a large and appreciative audience.

Her subject was "Christian Science: Is it Christian; is it Science?" Mrs. Mims is one of the Board of Lecturers of the Christian Science Church. Her address was well received, being delivered in a most charming and happy manner. The lecture was printed in full in the Atlanta (Ga.) Constitution.

Mr. Alfred Farlow spoke to a large audience November 15 in the Auditorium upon bringing Christianity to a practical basis through Christian Science. There were probably eight hundred people present and the close attention paid to Mr. Farlow was a magnificent tribute to his power as a speaker and a reasoner. Mr. Farlow is sent out by the Church of Christ, Scientist, and is a national lecturer of that organization.—Daily Eagle (Wichita, Kan.).

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

THE MARY BAKER EDDY SOUVENIR SPOON.

IT is our privilege to publish the following letter written to the Rev. Mary Baker Eddy, by the Christian Science Souvenir Co., of Concord, N. H., together with a description of the beautiful souvenir spoon therein referred to. This souvenir will be valued by Christian Scientists, not so much because of its artistic appearance or intrinsic material value, but because of that for which it stands in the spiritual sense. Silver is one of the Biblical symbols for Purity. Purity and Truth are synonymous; therefore this symbol of Purity is also a symbol of Truth. To Christian Scientists it means that Truth which is revealed to the world through "Science and Health with Key to the Scriptures," of which the Rev. Mary Baker Eddy is the author. Christian Scientists know that back of each souvenir is the thought of love; love for Christian Scientists, love for all mankind, regardless of person or condition. In this spirit are the souvenirs sent forth, and in this spirit will they be received. It is truly a beautiful Christmas token. May it keep us in renewed remembrance of the true Christ-mass. May we celebrate it on an ascending scale. May we take on higher and deeper appreciation, in our lives, of the teaching and example of Christ Jesus, whose coming into the world was heralded by that wondrous conjunction of earth and heaven, so graphically portrayed in Luke 2. May all who bear the name of Christ in this age re-echo the glad refrain of the angelic host:—

"Glory to God in the highest, and on earth peace, good will toward men."

Room 7, Dutton's Block,
Concord, N. H., Dec. 12, 1898.

THE REV. MARY BAKER EDDY,
Pleasant View, Concord, N. H.

Dear Madam:—After more than three months of unremitting and painstaking labor the die for the Mary Baker Eddy souvenir spoon has been completed, and to-day it was successfully put to the task.

In recognition of the sentiment attaching to the first impression to be taken from such a work as this we have caused the first spoon to be struck from this die to be made from an ingot of pure gold, twenty-two carats fine. This spoon we venture to send to you, begging you to accept it with our compliments, knowing full well that your possession of it will fulfil and enhance the sentiment which has prompted its making.

Respectfully yours,
CHRISTIAN SCIENCE SOUVENIR CO.

A recent product of the silversmith's art is "The Mary Baker Eddy Souvenir Spoon," which has been prepared by the Christian Science Souvenir Company of Concord, N. H., under our Leader's authority and sanction.

It is a massive piece of work of singularly rich and suggestive design. A life-like bas relief portrait of the Mother is the central feature of the ornamentation, while her autograph in fac-simile relief adorns the handle.

An original text written by Mrs. Eddy for the spoon is reproduced in fac-simile upon the obverse.

In the bowl is a striking and faithful picture of Pleasant View. About the handle appears gracefully wreathed the Mother's favorite flower, the rose, and surmounting the whole is the emblem of the Cross and Crown.

The first spoon which the makers produced was struck in gold, and is now to be found among other loving gifts at the Mother's home.

The spoon appears opportunely at this Christmas-tide, but a work so suggestive of Truth and so inspiring in all the details of ornamentation cannot fail to command admiration and friends at every season.

It is for sale only by its makers, The Christian Science Souvenir Company of Concord, New Hampshire.

A HARDHEADED BUSINESS MAN'S VIEWS.

To the Editor of the Sun. Sir:—An article entitled "A Dangerous Cult," appeared prominently in The Sun of Sunday, November 20. I am not a Christian Scientist, a condition I regret and hope to correct, and I may be wrong in attempting to reply to it. I shall, happily, be protected from making any serious errors, since I know that there is much I do not know.

What I do know may be briefly but broadly stated. If an intellectual man, a believer in the Bible, will diligently, for a space of say six months, not six minutes, study the methods, aims, authorizations, and foundations of Christian Science he will find an ennobling Christianity, not for Sunday alone, but for every day and all day; not for the rich, but for those who desire to be good, and only for those, be they rich or poor; not for the sinning alone, but for the sick also; not for those who want a heaven hereafter, but for those who want it here and now—a Christianity which daily and hourly demands of its followers honesty, sobriety, and purity in every thought and deed, out of the church and in it, sleeping and waking. All of this and much more the student will discover. At the termination of that period, should he decide against Christian Science, he will also, yes, he must also, throw away his Bible and give that up forever, for Science is the mathematically demonstrable explanation of Christ and His works, and the only one.

Among the dogmas of the Scientists one finds the following:—

1. God, who is Good, Divine Principle, Supreme Incorporeal Being, Mind, Spirit, Soul, Life, Truth, Love.

2. An utter disbelief in the reality, permanence, or substance of matter.

3. A firm belief in the spiritual man, the reflection of the Supreme Intelligence or Mind, the omnipotent, omniscient, omnipresent God.

Are these views so new as to surprise you? If so, the delayed education of the editorial writer should begin at once with Plato's writings, which, though certainly not modern literature, will be found to express similar intuitive convictions. And as Plato thought and taught, so was it

Digitized by Google

with the thinkers of all previous ages. There is similar philosophy in Hermetic books of Egypt, hoary with their sixty centuries and more of age.

May we not conclude, therefore, that thus far the Scientists are in practical accord with all the greatest truth-seekers among the ancients in conceding a Supreme Being, one Infinite Mind, and that man is made in his image, absolutely spiritual and not material?

Do the Christian Scientists go further? Yes, for they believe in the Bible and follow its commands "line upon line, precept upon precept." The student now finds these words in the Bible—note carefully every word and the significance of the whole: Christ said to his disciples (Matthew, 10) having given them power "to heal all manner of sickness," "And as ye go, preach, saying, the kingdom of Heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils [evils]." In other words, preach and heal; minister to the sinning and leave not the sick and dying to the doctor, but heal them also. By whose authority have the believers in the Bible divided between minister and physician the duties thus so plainly combined? Did Jesus ever indicate to his disciples that there existed the faintest necessity for them to use drugs, or did he command that healings should be wrought only through the power of the Infinite Mind? Jesus further promised, and again note carefully the meaning of the words (Mark, 16): "And these signs shall follow them that believe; in my name shall they cast out devils [evils]; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick and they shall recover." The Master's injunction is set forth in plain language. If he was right, the Christian Scientist is right also.

Add to all the above the historical fact that for three centuries after Christ the healing was combined with the preaching, continuing until all the real Christ-mind was lost amid Church dissensions, and confess with me that the Scientists have the better of the argument, and let us reverently learn of their wisdom or burn our Bibles. That there is no halfway ground a year's study has convinced me, a common-sense, practical business man, far from emotional, looking for mathematically proved facts and preferring for fifteen years a club to a church because run on more honest principles and less infested with hypocrisy and cant.

In conclusion, let me recommend to truth-seekers, to the weary, sick, and despondent, to those tired of the dishonesty, greediness, vanity, and ill-concealed lust of our present times, that together we study Mrs. Eddy's book, "Science and Health, with Key to the Scriptures," and all the doctrines of the Scientists for a short six months, not six minutes. Start by going to one of their churches. If, perchance, you find gathered there an intellectual, well-mannered, well-dressed body of people, each and all with faces kindly, honest looking, happy, and glowing with health, join me in determining to find out and understand their Principle of Being.

In the mean time, when infrequently the death of a believer in Science is recorded, let us not forget that both the daily death column and the graveyards are filled with monuments to the incapacity and experiments of the physicians. Take my plain, unvarnished word for it—all Christian Scientists are so evidently, palpably, and intensely full of health that a life insurance agent would gloat if given an opportunity to write a blanket policy on the whole crowd at half rates.

Would you send them a physician to improve their superabundant health? In this, a professedly Christian country, where the very laws are founded on belief in God and the Bible, do you seriously advocate legislating against such a positive and self-evident blessing, while the only demand of the Christian Scientist is to be permitted to follow implicitly the commands of that same Bible?

A Truth-Seeker.

To the Editor of Ohio State Journal:—

A terrible crime has been committed in our community. A man had typhoid fever. The physician was prescribing for him antipyrine. The attendants and friends of the sick man were Christian Scientists. It is alleged they did not give the antipyrine which was prescribed. The sick man grew rapidly worse. It is assumed as a dread certainty that the failure to give the sick man the antipyrine is the reason he grew worse. An arrest follows. A crime has been committed. Society has been outraged. Science has been snubbed. It is a plain case of manslaughter. At first blush the case seems a simple one, capable of easy and prompt correction.

But as we go on, complications arise. What is this antipyrine that should have been given, the neglect to give which is regarded as a crime? The doctor would reply, "Antipyrine is an arbitrary name given to a proprietary compound containing one of the coal-tar depressants." It is a new remedy, unknown to our fathers, scarcely a decade old, regarded by the entire homœopathic school as positively harmful, and looked upon by numerous medical writers of all schools as a dangerous and uncertain remedy.

There are twenty-five homœopathic physicians of good standing and influence in this city. Suppose one of these physicians had been called, would he have given antipyrine? No; he would not. Nor would he have allowed any one else to give it, under any circumstances. Of the remaining two hundred physicians in this city, how many would have given antipyrine? Perhaps one-half of them. We cannot escape the dilemma by assuming that the physicians who dissent from giving antipyrine in typhoid fever would have given some other drug of similar effect. This is not true. The homœopaths would have given drugs that have no appreciable or toxic effect whatever, while the other physicians would have given stimulants, or depressants, or neither, according to the individual convictions of each. No sane man would attempt to contend that there is any scientific certainty in the action of antipyrine on typhoid fever, or that even the majority of physicians pretend to use it for such cases.

Supposing the physician had prescribed whiskey and quinine instead of antipyrine, would these people have been considered guilty of manslaughter for giving it? Certainly they would; notwithstanding that the whiskey and quinine is exactly opposite in effect to the antipyrine. If one helps the other must do damage. Suppose a homœopath had been called and he had left the five-hundredth dilution of bryonia; would these people have been considered guilty of manslaughter had they neglected to give it? Certainly they would; notwithstanding that its effect is no more apparent upon the human system than so much water. The hydropath would have given no medicine. The electropath would have given no medicine. The osteopath would have given no medicine, and numerous physicians of all schools would have given no medicine except, perhaps, a placebo to quiet the minds of the attendants.

What were these people who refused to give the antipyrine trying to do? Were they trying to practise medicine without a license? No; they were refusing to practise medicine, that is all. They were relying upon the forces of nature to cure the patient. Whether wisely or unwisely, they have reached the conclusion that by an effort of the mind a man may overcome all disease.

It is recognized by all physicians that some diseases may be overcome in this way. As to how many or what kind of diseases may be overcome by an effort of the mind each physician holds his own views. There is no agreement among them. The Christian Scientist simply extends the list of diseases that can be overcome by an effort of the mind so as to cover the whole list of diseases.

In this he may be wrong. I candidly think he is. But it does seem to me that this is not a proper subject for legislation, for criminal arrests. If he were ignorantly trying to

Digitized by Google

give harmful drugs, the case would be different. But he is simply refusing to give drugs about which there is no scientific certainty or exact agreement even among those who give them.

When law has gone so far as to prevent uneducated men from prescribing dangerous remedies, it has gone as far as it ought to go, much farther than, I fear, it will ever be able to go. But when the law undertakes to compel me, or any one else, to give medicine to our sick ones, whether we wish to or not, it has gone too far. It is simply persecution. It is a relapse toward mediæval inquisitorial hen-hussying.

C. S. Carr, M. D.

WONDERFULLY SAVED.

For seventeen years I had used tobacco, chewing and smoking. I tried medicines that were recommended, and said to cure others of the habit, but they did me no good.

About two years ago I became interested in Christian Science, and the first ray of light from this wonderful Truth healed me of that habit. I had been reading one of the early editions of Science and Health, by Mary Baker G. Eddy, and I began to attend church and Friday evening meetings, and felt that at last I had found the Truth that I had been seeking so long. I bought a late edition of Science and Health, and began studying in earnest every day, and I cannot express my thanks for what this wonderful message of Truth has done for me. It has taught me how to content myself to a certain extent, and brought me that peace of mind I never had before. I have been able to demonstrate over many things. At first I was ashamed to let others know that I was interested in Science, and would try to hide the fact from some; but now I am ever willing to tell the wonderful benefits I have received.

On the nineteenth day of August I was leaning over a large freight elevator shaft talking to one of our boys on the floor below. The elevator was protected only by a sliding gate in front of it about three feet high. I was leaning over this gate, looking down below, when, before I knew what had happened, I found myself pinned down just below my shoulders, and I knew it was useless for me to try to extricate myself. All I could do was to let it grind me down head foremost to what seemed to me death; for the natural position of the elevator, without crowding, left only a space of five inches between it and the shaft. The elevator came down, slowly grinding the breath out of me, and my first thought was of my wife. Then the elevator slowly released my body and clasped my head. I cannot describe my feelings, but this thought came to me, "If this is what they call death, I thank God for what Christian Science has done for me, and I do not fear to meet my fate." Then it seemed for a moment that I did not know where I was. When I was released, it was some time before I could realize my condition. Some said I was torn and bleeding, others said my shoulders were mashed, others that my head was mashed, others my nose. Some wanted me to sit down, others wanted me to drink water, all were terribly excited, while I felt happy that I had realized that God was with me, and was my Protector.

I finally gained my composure, and assured them I would soon be all right. All this time I was walking up and down the floor trying to demonstrate all I knew. I soon felt better and asked to be sent home in the carriage which had already been ordered. On my way down stairs, those who wanted to assist me declared that a "reaction" was sure to come, and they must assist me in walking. When I reached the first floor they gave me a seat, and one man was left to watch for the reaction, which soon came, and for a moment I had a hard struggle to overcome it. I became blind, and I instantly jumped up from my seat and wanted to lie down: but the thought came to me that I was not doing right, so I returned to my seat and began to declare and acknowledge God as the only power, ever-present and omnipotent, and in a few minutes walked to the carriage and soon reached home.

My wife called a neighbor Scientist, who came in time to hear what the doctor, whom my employers had sent, had to say. He laid out troubles of different kinds for me, examined me thoroughly, and wound up by saying my injuries were such as in nine out of ten cases would produce brain fever. I told him I did not expect anything of the kind, but he left his card, and said if I needed him he would be glad to assist me. I think he certainly expected I would need him or some other medical doctor, but I knew I would not. Before he left the Science treatment was telling on me, and I was feeling finely. In five days all traces of my injuries were gone from my face, head, and shoulders, and there is no scar to tell a tale. There was no discoloration, and scarcely any swelling. I lost only four days from business, and in two weeks was entirely healed. I am so thankful for the little knowledge I have of Christian Science, and long to know more and reap more of its rich blessings.

John W. Self, 802 Locust St., Kansas City, Mo.

WEDNESDAY EVENING MEETINGS.

BY ANNIE M. KNOTT.

Speaking of the Wednesday evening meetings, it is well that the churches all be clear as to their real, vital purpose. As a First Reader in a large church, I feel that we have been wonderfully led by divine Principle in the past, I mean all the branch churches,—for there can be no doubt that it was well to exclude as much as possible mere personal opinion at the Testimonial Meetings. This exclusion brought also the demand for good testimonials of healing and moral regeneration, and surely there can be nothing which can inspire eloquence so much as declaring the greatness and goodness of God, as witness the Psalms of David.

While all Christian Scientists must rejoice in whatever tends to give true freedom to thought, it may be well to remember that it is not best to attempt much, if anything, in the way of interpretation of either the Bible or of Science and Health,—yet we can with advantage tell of their application to daily need.

The following instance may serve as an illustration: A student was struggling with a seemingly difficult case, when all at once the Scripture suggested itself, "The word of God is *quick* and powerful, and sharper than any two-edged sword," and the truth of the words was proven by a *quick* demonstration, and this recipe went from one to another doing good work. Another instance may be given from my own work.

Under similar circumstances, the thought came, "Love will finally mark the hour of harmony," and it did, and what is more, this statement was put into eight letters written that day to absent patients and students, care being taken to give the page and line (Science and Health, page 261, line 21), and without a single exception good reports came back from the letters,—I mean from this message of Love.

We have found these Meetings a great educational power in the church, and the constant aim has been to bring worthy offerings to lay upon the holy shrine of this our living faith.

Dear Democrat:—I see by your last paper that the good Methodist minister of your city was to have paralyzed Christian Science last Sunday by exposing its fallacies. I was very sorry not to have been able to hear him, as there are some of those fallacies right in this neighborhood that are sadly troubling me. For instance, three days ago there were two little boys of about the same age taken at the same time with a severe cold. Neither could speak much above a whisper, and both were coughing continually. One took no medicine, but was treated by the simple denials of Christian Science, and was perfectly well in six hours. The other is coughing

Digitized by Google

yet like a Mississippi steamboat, although he has taken a whole lot of medicine and is hungering and thirsting after more. The parents of one child were at no expense, while the parents of the other bought a small interest in a drug store. That is one fallacy, and here is another: A gentleman of this city, formerly of Presbyterian predilections, was subject to various troublesome diseases nearly all his life, such as sleeplessness, stomach troubles, salt-rheum, and other skin diseases, but a year ago he consulted a Scientist, and for twelve months last past he hasn't had an ache or a pain, eats like a preacher, and sleeps like a baby. One more fallacy and I will adjourn this convention. A certain family in this neighborhood used to have a great deal of sickness. Some one of the children was ailing most of the time, and the doctor was there every week. Medicine and physicians cost that family almost as much as meat and groceries combined, but last November the family went into Science, and there hasn't been a doctor or a drug in that household since, and there are no healthier or happier people on this side of the Red Sea. If these things, and millions more like them, are all fallacies, and I can be made to so believe, then I will agree with the good brother that Christ and his followers were mistaken when they said that genuine Christians could heal the sick as easily as they could save the sinner. Yours in Truth,

SIMON PETER.

Central City (Neb.) Democrat.

Rev. William P. McKenzie of Boston, a member of the Christian Science Board of Lectureship of the First Church of Christ, Scientist, in Boston, spoke in Massasoit Hall before a large audience under the auspices of Brockton First Church of Christ, Scientist.

There were present many from Whitman, Rockland, Taunton, Stoughton, Randolph, Braintree, the Eastons, and Boston. It was the first time a Christian Science lecture had ever been delivered officially in this city, and that there is a great interest in the subject was plainly shown by the size of the audience. It was a representative audience in all ways.

The Brockton church has been organized less than a year, but in that time Christian Science has been brought prominently to the attention of many in the city through the healing, and the interest in this new yet old religion is said to be constantly increasing here.

The lecturer, as has been said, is a member of the Christian Science Board of Lectureship, which board was created for the purpose of presenting to the people the subject of Christian Science in a way to correct the popular misconceptions, that the people might judge fairly of it. The attention it is receiving to-day makes it necessary that it should have a fair show, and so the members of this official board go wherever they are called by the branch churches of the denomination, and freely and publicly present the principles of the religion which they stand for.

Rev. Mr. McKenzie was presented by Mr. Herbert S. Fuller, and spoke for an hour or more in a very interesting manner, holding the attention of his listeners from the start to the finish. He has a good delivery, and this added greatly to the pleasure of listening. Mr. McKenzie made it evident from the opening that he was thoroughly conversant with Christian Science, and he possessed the faculty of transmitting his understanding to others, so that what are thought to be the more complex questions were brought out clearly.

A noticeable feature of the lecture was that the speaker made no attack on or reference to any existing form or system of religion or medicine. He confined himself to telling those who had come what Christian Science is and what it is not, as well as what it is doing in the world to-day. In giving this information he spoke without a shade of bitterness against any of the seeming opposition which has been manifested at times. This seemed remarkable, inasmuch as any system criticised as this system of religion and medicine has been, usually makes its strong point by attacking its attackers.

There is no doubt that he corrected many misapprehensions of what Christian Science is and is not in the minds of those present, for his clear and logical reasoning could but have that effect.—Brockton (Mass.) Daily Enterprise.

On Tuesday evening, December 6, a lecture was given in Odd Fellows Hall, Plymouth, Mass., on the subject of "Christian Science; What It Is, and What It Does." The lecturer, the Rev. William P. McKenzie, is a member of the official Board of Lectureship of the Mother Church of Christian Science in Boston, and spoke for over an hour, bringing out and making clear a great many points in regard to this Science, and correcting in the minds of his audience many misapprehensions of its truths.

The hall was filled with an appreciative audience, who spoke at the conclusion of the lecture of the simple yet eloquent manner in which the discourse was delivered. We bespeak for the reverend gentleman a much larger audience should he again favor us.—The Old Colony Memorial.

Mr. Alfred Farlow, president of the Christian Science Institute at Kansas City, and recognized as one of the leaders of the cause in America, lectured December 7 at the Y. M. C. A. on Christian Science. He took for his subject, "Christianity Made More Practical Through Christian Science." His discourse was a defence of the cause, and was listened to by an audience that nearly filled the audience room of the Y. M. C. A. building.—The Des Moines (Iowa) Leader.

November 17, at the Unitarian Church, Mrs. Livingston Mims, of Atlanta, delivered a lecture on "Christian Science." The church was comfortably filled and the lecturer held the individual interest of the audience for over an hour.

Chattanooga (Tenn.) Daily Times.

BOARD OF LECTURESHIP.

THE following apportionment has been made of the Branch churches in Canada. Their clerks will write the lecturer assigned to their section.

Maritime Provinces, William P. McKenzie, 2 Cumberland St., Boston, Mass.

The Province of Quebec, the city of Ottawa and Kingston, Irving C. Tomlinson, 8 Norway St., Boston, Mass.

Province of Ontario, Carol Norton, 170 Fifth Ave., New York, N. Y.

The following is the apportionment of states for the Southern Section. Branch churches through their clerks will write to the lecturer named for their state. To Mrs. Sue Harper Mims, 575 Peachtree St., Atlanta, Ga.:—Kentucky, Tennessee, Georgia, Florida, South Carolina, Alabama, Mississippi, Louisiana.

To Mr. Edward H. Hammond, 1900 Bolton St., Baltimore, Md.:—District of Columbia, Maryland, Virginia, West Virginia, North Carolina.

CARD.

LOYAL Christian Scientists who have received certificates of the degree C. S. B., signed by the President of the Massachusetts Metaphysical College, and who have practised Christian Science healing three years, are, under the rules of the Mother Church, eligible to teach Christian Science. And on application, according to the College rules, to Mary Baker G. Eddy, President, or to the Vice-President of said College, they will receive the degree of C. S. D.

MARY BAKER EDDY.

Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

VOL. 1 BOSTON, MASS., U.S.A., DECEMBER 29, 1898. NO. 18

THE PRESIDENTIAL PARTY AT ATLANTA, GA.

On December 15, 1898, President McKinley addressed the public in the Auditorium at Piedmont Park, Atlanta, Ga. Seven thousand people rose from their seats as the chief executive entered the Auditorium. The band played the "Star Spangled Banner" amid considerable applause, but when the strains of "Dixie" filled the building the crowd went wild. President McKinley stood up and waved his hat above his head. Mr. Hemphill, president of the jubilee committee, made a lengthy speech, being followed by Governor Candler in an address of welcome.

As the President stepped forward the large audience applauded heartily. The speech was punctuated with constant cheers, but there were no outbursts similar to that which marked his reference to the Confederate dead. The President said in part:—

"Other parts of the country have had their public thanksgivings and jubilees in honor of the historic events of the past year, but nowhere has there been greater rejoicing than among the people here, the gathered representatives of the South. I congratulate them upon their accurate observation of events which enabled them to fix a date which insured them the privilege of being the first to celebrate the signing of the treaty of peace by the American and Spanish commissioners.

"Under hostile fire on a foreign soil, fighting in a common cause, the memory of old disagreements has faded into history. From camp and campaign there come the magic healing which has closed ancient wounds and effaced their scars. For this result every American patriot will forever rejoice. It is no small indemnity for the cost of the war.

"This government proved itself invincible in the recent war, and out of it has come a nation which will remain indivisible forevermore. No worthier contributions have been made in patriotism and in men than by the people of these Southern States. When at last the opportunity came they were eager to meet it, and with promptness responded to the call of country. Entrusted with the able leadership of men dear to them, who had marched with their fathers under another flag, now fighting under the old flag again, they have gloriously helped to defend its spotless folds and added new lustre to its shining stars.

"That flag has been planted in two hemispheres, and there it remains, the symbol of liberty and law, of peace and progress. Who will withdraw from the people over whom it floats its protecting folds? Who will pull it down?

"The victory we celebrate is not that of a ruler, a President, or a Congress, but of the people. An army whose valor we admire and a navy whose achievements we applaud were not assembled by draft or conscription, but from voluntary enlistment. The heroes came from civil as well as military life. Trained and untrained soldiers wrought our triumphs.

"The peace we have won is not a selfish truce of arms, but one whose conditions presage good to humanity.

"The domains secured under the treaty yet to be acted upon by the Senate, came to us not as the result of a crusade or of conquest, but as the reward of temperate, faithful, and fearless response to the call of conscience, which could not be disregarded by a liberty-loving and Christian people.

"We have so borne ourselves in the conflict and in our intercourse with the powers of the world as to escape complaint or complication, and give universal confidence of our high purpose and unselfish sacrifices for struggling peoples.

"The task is not fulfilled. Indeed, it is only just begun. The most serious work is still before us, and every energy of heart and mind must be bent and the impulses of partisanship subordinated to its faithful execution. This is the time for earnest, not faint, hearts.

"New occasions teach new duties. To this nation and every nation, there come formative periods in its life and history. New conditions will be met only by new methods. Meeting these conditions hopefully and facing them bravely and wisely, is to be the mightiest test of American virtue and capacity. Without abandoning past limitations, traditions, and principles, but by meeting present opportunities and obligations, we shall show ourselves worthy of the great trust which civilization has imposed upon us.

At Bunker Hill, liberty was at stake; at Gettysburg, the Union was the issue; before Manila and Santiago, our armies fought not for gain or revenge, but for human rights. They contended for freedom of the oppressed, for whose welfare the United States has never failed to lend a hand to establish and uphold, and, I believe, never will. The glories of the war cannot be dimmed, but the result will be incomplete and unworthy of us unless supplemented by civil victories, harder possibly to win, in their way no less indispensable.

"We shall have our difficulties and our embarrassments. They follow all victories and accompany all great responsibilities. They are inseparable from every great movement or reform. But American capacity has triumphed over all in the past."

The President's Speech Before the Georgia Legislature.

President McKinley made memorable the first day of the Atlanta Peace Jubilee by a notable utterance in his speech before the joint session of the Georgia Legislature. It is admitted on all sides that the address marked an epoch in history, and it is on every lip.

Upon the President's arrival at the Capitol he was greeted with a field artillery salute, and was at once escorted to Governor Candler's office, where an informal reception took place. The President was then conducted to the Assembly Chamber, where he occupied the Speaker's chair, with Governor Candler on his right. A scene of intense enthusiasm followed when, amid impressive silence, the President said:—

"Sectional lines no longer mar the map of the United States. Sectional feeling no longer holds back the love we bear each other. Fraternity is the national anthem, sung by a chorus of forty-five States and our Territories at home and beyond the seas. The Union is once more the common altar of our love and loyalty, our devotion and sacrifice.

Copyrighted, 1898, by Mary Baker G. Eddy.

Digitized by Google

"The old flag again waves over us in peace, with new glories which your sons and ours have this year added to its sacred folds. What cause we have for rejoicing, saddened only by the fact that so many of our brave men fell on the field, or sickened and died from hardship and exposure, and others returning, bringing wounds and disease from which they will long suffer. The memory of the dead will be a precious legacy, and the disabled will be the nation's care.

"A nation which cares for its disabled soldiers as we have always done, will never lack defenders. The national cemeteries for those who fell in battle are proof that the dead as well as the living have our love. What an army of silent sentinels we have, and with what loving care their graves are kept!

"Every soldier's grave made during our unfortunate Civil War is a tribute to American valor. And while, when those graves were made, we differed widely about the future of this government, the differences were long ago settled by the arbitrament of arms, and the time has now come in the evolution of sentiment and feeling, under the providence of God, when in the spirit of fraternity we should share with you in the care of the graves of the Confederate soldiers.

"The cordial feeling which now happily exists between the North and South prompts this gracious act, and if it needed further justification, it is found in the gallant loyalty to the Union and the flag so conspicuously shown in the year just passed by the sons and grandsons of these heroic dead.

"What a glorious future awaits us if unitedly, wisely, and bravely we face the new problems now pressing upon us, determined to solve them for right and humanity!"

A wild cheer went up from every throat in the typical Southern audience—a cheer that echoed and re-echoed through the chamber until it was taken up by the crowd outside. Old men who fought for the South rose from their seats and waved their hats. One Confederate veteran, now a venerable legislator, had pressed forward until he was leaning against the Speaker's desk, hanging on each word the President uttered. When the reference was made to the Confederate dead, this old man buried his head in his arms and, while cheers rang out, cried like a little child. Of all the many conciliatory speeches which have been made since Grant said, "Let us have peace," nothing has more deeply stirred a Southern audience.

MISCELLANY.

FROM THE CLEVELAND PRESS.

The following editorial from the Cleveland Press smacks strongly of the movement on hand by the Medical Trust:—

The conviction in Cincinnati of a Christian Science healer who was charged with having violated the Musgrove law to regulate the practice of medicine, probably marks the beginning of a crusade against irregular practitioners in this State by the Ohio Medical Board.

Dr. Charles A. L. Reed, the president of that board, lives in Cincinnati, and he has been taking an active interest in the suppression of the various forms of healing which are not recognized by law. In an address delivered at Lima the other day, Dr. Reed denounced the Christian Scientists and other fad healers in an emphatic manner, and intimated that they ought not to be permitted to practise in the State. He was, nevertheless, magnanimous enough to say that most of these persons were honest in their convictions, and to admit that if they could prove that they were able to do good in the line of their professions they should not only be given the protection of the laws, but their names should be enshrined among the benefactors of humanity.

But the regular practitioners do not believe there is any virtue in Christian Science or any of the other "isms" under which the curing of disease is attempted, and there is plenty of evidence, which is being added to every day, to prove that the belief of the regular practitioners is well founded. There is no way to prevent deluded persons from offering themselves as sacrifices to these "isms," but it ought to be and is possible to prevent Christian Scientists from practising in Ohio, and that should be done as a means of protecting those who are too young or too ill to protect themselves against the deluded advocates of the fad.

[All that Christian Scientists ask is a fair opportunity to show the courts and legislature that they can "prove that they are able to do good in the line of their professions," and they have no doubt that their names shall "be enshrined among the benefactors of humanity."

The opinion of some of the physicians was shown in the following extract from the same paper.]—Ed.

Christian Scientists of the city have taken a lively interest in the Cincinnati case, in which Miss Harriet O. Evans was fined $100 for practising medicine without a license. She treated a typhoid fever patient and he died.

Whether the State Board of Examiners will start more prosecutions under the Musgrove law, is a question the Scientists would like answered.

Mrs. Lida Fitzpatrick, one of the foremost practitioners in Cleveland, said that she had heard of no movement toward prosecution. Asked whether Christian Science was not in conflict with the Musgrove law, she replied in the negative.

"The Musgrove law applies to medical treatment," she said. "We have nothing to do with medical treatment. We do not use medicines at all. If Christian Science is the truth, it will prevail against prosecution. We have been maligned and abused, but our ranks have grown stronger and people are beginning to see the good we do in the world."

Dr. P. Maxwell Foshay, who was deputed by the State Board a few months ago to question the Christian Scientists of Cleveland, said he had heard of no prospective prosecution.

"The doctors have no organization to take up such cases," he said, "but ought to have one. The State Board or any private individual may begin a case."

FROM THE COMMERCIAL TRIBUNE, CINCINNATI.

To the Editor of the Commercial Tribune:

The test case against Harriet O. Evans in the Cincinnati police court has been decided against treatment by a Christian Scientist without being registered as a physician under the State law. This decision was not only expected, but desired, by the friends of Christian Science, as the acquittal of Miss Evans would have left the question just as it was, and a final decision is wanted that will permit a Christian Scientist the religious liberty that is guaranteed to all alike under the Constitution. The case will be appealed to the highest courts, including the United States Supreme Court, if necessary.

It is an admitted fact that all have a right to read and make a study of the Bible. The fact that so many different denominations exist proves conclusively that all do not derive the same understanding. Almost all denominations have a commentary of the Bible prepared from their standpoint, which is adopted as their rule and guide. Shall Christian Scientists be denied the same right? "Science and Health with Key to the Scriptures," written by Mary Baker G. Eddy, is the interpretation of the Bible that is accepted by all Christian Scientists, and in connection with the Bible it is their rule and guide.

As the sun is to light so is Christian Science to health. That mind controls matter cannot be denied, and to what extent the mind will influence sickness and disease no one will dare to say. Only a few days ago one of the most prominent physicians of the city, who is a member of the State Board of Health, said to me while talking about Miss Evans' case: "I have nothing against Christian Science or mind healing. I have practised it successfully. I have removed pain and caused a patient to sleep by its influence.

Digitized by Google

In fact, I regard it as so powerful an agent that I feel all who practise Christian Science should have sufficient intelligence to know just how far it can be used with safety." Now who is to decide this point? Am I or any one else who has faith in Christian Science, a faith due to known results, to be denied its benefits if it is requested? And is this refusal to be made by a State Board of Health which has legalized the practice of physicians who placed a patient upon the table at our hospital some weeks ago to remove a stone in the bladder, only to find after the operation had been performed that no stone was there, and the man had been for months under wrong treatment for this disease? I have yet to learn of any legalized physician being arrested for manslaughter under such circumstances, and yet it would seem that if I am denied Christian Science treatment by the State Medical Board, and it compels me to accept medical treatment, it should secure to me the health of myself and family. In Boston, Chicago, and other large cities magnificent churches have been built, and there is not standing room for the members, and there is scarcely a town where some do not live and practise Christian Science. It is not a fashionable "fad," but a move of deep-seated conviction that must be respected. S. B. HUTCHINGS.

The meeting at Y. M. C. A. Hall Tuesday night was a sort of red-letter event in the Christian Science Church in this city. The large hall was well filled. The audience was not composed of all professed Scientists. There was a sprinkling of members from different churches in town to hear something about this new doctrine from the lips of one able to explain it, Carol Norton, C. S. B., of New York. The platform was very neatly decorated and carpeted. On the wall back of the platform was draped the American flag, and red, white, and blue decorating material was stretched across over the front of the platform. Several beautiful palms and some fine upholstered furniture gave a comfortable appearance to the scene. The audience was composed of our best people, thoughtful people, and the attention with which they listened to the discourse of the speaker showed that they were not present out of mere curiosity, but to learn something about Christian Science. There were no musical exercises at the opening, but without preliminaries of any kind the business for which the meeting was called began. At the hour of commencing, Mr. Norton, accompanied by Professor L. F. Gardner, ascended the platform, and no one else occupied it. Professor Gardner, in his remarks introducing the speaker, said that some nineteen hundred years ago there assembled in an upper room in Jerusalem a small group of men waiting for the coming of the Comforter, and as he was coming up the stairs he thought that this was another upper room, but the company was a little larger of those seeking to learn the Truth. He spoke of mind and matter, of visible and invisible forces, and of the power of the latter, and referred to Christian Science and the quest for Truth, and then introduced Mr. Norton, who referred to Mr. Gardner's naturalness in the presentation of the subject.—Poughkeepsie Daily Eagle, Wednesday, December 14, 1898.

HE HIRED WEBSTER FOR A WEEK.

Of course Webster was in demand by those who could afford to pay for his services, says the Boston Herald. A sharp Nantucket man is said to have got the better of the great defender of the Constitution in an amusing way, however.

He had a small case which was to be tried at Nantucket one week in June, and he posted to Webster's office in great haste. It was a contest with a neighbor over a matter of considerable local interest, and his pride as a litigant was at stake. He told Webster the particulars, and asked what he would charge to conduct the case. "Why," said Webster, "you can't afford to hire me. I should have to stay down there the whole week, and my fee would be more than the whole case is worth. I couldn't go down there for less than a thousand dollars. I could try every case on the docket as well as one, and it wouldn't cost any more, for one case would take my time for the entire week, anyway, for I'd have to be on hand."

"All right, then, Mr. Webster," quickly responded the Nantucketer. "Here's your thousand dollars. You come down, and I'll fix it so you can try every case."

Webster was so amused over this proposition that he kept his word. He spent the entire week in Nantucket, and appeared on one side or the other in every case that came up for hearing. The shrewd Nantucketer hired Daniel out to all his friends who were in litigation, and received in return about fifteen hundred dollars, so that he got Webster's services for absolutely nothing, and made a good profit to boot.

The Saturday Evening Post.

The News of Thursday, December 15, published in full a most interesting and instructive dissertation on the subject of Christian Science, a faith that is embraced to-day by many thousands of intelligent and well ordered men and women representative of the best life of our country. The Science has come in for a good many hard knocks recently, due to the fact that, despite its ministration, a very popular public man died. We believe it is unusual for the Scientists to be represented in the missionary field, and up to quite recently at least the propagation of the faith has proceeded without apparent effort on the part of the promoters, who have been alike silent in the face of attack and unostentatious in their persistent advance, which latter phase, by the way, the building of the Church of Christ, Scientist, is entitled to rank as an eighth wonder of the world. And when the inquirer, be he inspired by motives of curiosity or flat antagonism, is brought face to face with the fundamental proposition of that Church, he will require indeed an abundance of nerve to deny its truth, to contest the principle, which, after all, is precisely the same principle that every Church accepts in greater or less part, and only in the measure thereof differs from the Science faith which declares for the whole.

The News, Providence, R. I., December 17.

At the Unitarian church December 15, the Rev. William McKenzie, a member of the official Board of Lectureship of the Mother Church of Christian Science in Boston, lectured under the auspices of the Christian Science societies of Newburyport. His topic was "Christian Science, what it is and what it does."

The meeting was presided over by George C. Morrill, and the audience, which was a good sized and representative one, was evidently pleased and instructed by the lecture.

Newburyport (Mass.) Daily News.

The Christian Scientists of Arkansas City, Kansas, have purchased property on the corner of Central Avenue and Second Street, one of the most desirable locations in the city. There was a cottage on the ground, and they have torn out partitions, painted, papered, and refurnished, and now have a neat little church home of their own, which will be used until they can put up a regular church building.

Mrs. Clara C. Duer, Arkansas City, Kansas.

The Rev. Irving C. Tomlinson, a member of the Board of Lectureship of the Mother Church of Christian Science of Boston, lectured to a large audience in Association Hall, Y. M. C. A. building, Thursday evening, December 15, his subject being "Christian Science; what it is not and what it is." Mr. Tomlinson handled the subject with great ease and fluency.—The News, Providence, R. I.

Whatever Christian Science may be as a religion, it evidently inculcates on the minds of its votaries the necessity of buying papers, a good idea that the older forms of religion seem to have neglected. They carried away Eagles all day yesterday.—Poughkeepsie Daily Eagle.

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor. CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

When subscribed for in connection with *The Christian Science Journal* to one address, one year, two dollars and fifty cents.

This price is made only when the two subscriptions are received at the same time. To simplify the matter for subscribers, *The Christian Science Weekly* will be sent to *Journal* subscribers until the expiration of their present subscriptions, at the rate of five cents a month.

Foreign subscriptions one year, each copy $1.50.

Together with *The Christian Science Journal*, one year (the two publications) $3.40.

Six months' subscriptions for the *Journal* and *Weekly* together received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

[Copied from The Independent Statesman. — Editor Christian Science Journal.]

TO THE CHRISTIAN WORLD.

BY MARY BAKER G. EDDY.

[The following article from the pen of the Discoverer and Founder of Christian Science was first published in the New York Sun of Friday, December 16. It was re-printed in the Concord Evening Monitor of December 17, and has since then been revised and typographical errors corrected by Mrs. Eddy for the present publication.—Editor Independent Statesman.]

IN the midst of the imperfect, perfection is seen and acknowledged reluctantly. And because Science is unimpeachable, it summons the severest conflicts of the ages, and waits on God.

The faith and works demanded of man in our text-books, the Bible, and "Science and Health with Key to the Scriptures," and the proof of their practicality show conclusively that Christian Science is indeed Science,—the Science of Christ, the Science of God and man,—of the Creator and creation. In every age, at every appearing of Science, it has been persecuted and maligned till understood. Infinite perfection is thus unfolded, as man attains the stature of man in Christ Jesus, in the Science that Jesus taught and practised. Alluding thereto the Psalmist saith: "Why do the heathen rage, and the people imagine a vain thing?"

I have set forth Christian Science, and its application to the treatment of disease, only as I have discovered them. I have demonstrated the effects of Truth on the health, longevity, and morals of men, through Mind; and I have found nothing in ancient or in modern systems on which to found my own, except the teachings and demonstrations of our great Master, and the lives of prophets and apostles. The Bible was my only text-book. I had no other guide in "the strait and narrow way" of this Science.

Jewish pagans thought the learned St. Paul, the Mars Hill orator, the canonized saint, was a "pestilent fellow," but to-day all sorts of institutions flourish under the name of this "pestilent fellow." That epithet points a moral. Of old, Pharisees said of the great Master of Metaphysics, "He is a stirrer up of seditions." And because they could find no fault in him, they vented their hatred of Jesus in opprobrious terms. But what would be thought to-day of a man that should call St. Paul a "pest"? and what will be thought to-morrow of him who shall call a Christian Scientist a "pest"? Again, what indeed shall be said of him who saith the Saviour of men, the healer of men, the Christ, the Truth, "is a stirrer up of seditions"?

What most concerns the world in all ages is, that men suspend judgment and sentence on the pioneers of Christianity till they know of what and of whom they speak. A person's ignorance of Christian Science is a sufficient reason for his silence on the subject; but what can atone for the vulgar denunciation of what a man knows absolutely nothing?

After the cruel attempt to criminate two innocent women and Christian Scientists, in the Harold Frederic case, one naturally asks, Who killed General Garcia simply with pneumonia, or did he die according to rule?

On November 21, 1898, in my class of Christian Science were many professional men and women, and they were of the highest talents, scholarship, and character in this or any other country. What was it that brought this class of people to learn of her who, thirty years ago, was met with the anathema whereof it is written in Scripture: "Blessed are ye, when men shall revile you, and persecute you, and shall say all manner of evil against you falsely, for my sake"? It was the healing of the sick, the saving of sinners, the works even more than the words of Christ, Truth, that hath of a verity stirred the people to search the Scriptures, and to find therein man's only medicine for mind and body. And this Æsculapius, defined Christianly and demonstrated scientifically, is the divine Principle, whose rules are demonstrable, thus proving its faith by its work.

After my discovery of Christian Science, I healed consumption in its last stages, that the M. D.'s by verdict of the stethoscope and the Schools, declared incurable, the lungs being mostly consumed. I healed malignant diphtheria; and carious bones that could be dented by the finger, saving them when the surgeon's instruments were lying on the table ready for their amputation. I have healed at one visit a cancer that had so eaten the flesh of the neck as to expose the jugular vein so it stood out like a cord; I have physically restored sight to the blind, hearing to the deaf, speech to the dumb, and have made the lame walk.

About the year 1869 I was wired to attend the patient of a distinguished M. D., the late Dr. Davis, of Manchester, N. H. The patient was pronounced dying of pneumonia, breathing at intervals in agony. Her physician who stood by her bedside declared she could not live. On seeing her immediately restored by me, without material aid, he asked earnestly if I had a work describing my system of healing. When answered in the negative, he urged me immediately to write a book that should explain to the world my curative system of metaphysics.

In the ranks of M. D.'s are noble men and women, and I love them; but they must refrain from persecuting and misrepresenting a system of medicine, that, from personal experience I have proven to be more certain and curative in functional and organic diseases than their own —or we may not let theirs alone. As a rule, I admonish Christian Scientists either to speak charitably of all mankind, or to keep silent; for love fulfils Divine law, and without this proof mental practice were profitless.

The above mentioned cases healed by me could be made to include hopeless organic diseases of almost every kind, and I name these simply to show the folly of believing that the immutable laws of omnipotent Mind hath not power over and above matter in every mode and form, and the folly of the cognate declaration that Christian Science is limited to imaginary diseases! When, *per contra*, it has healed cases that I assert it were impossible for the surgeon, or *materia medica*, to cure. Without Mind, man and the universe would collapse; the winds would weary and the

Digitized by Google

world stand still. It is already proven that Christian Science rests on the basis of fixed Principle, and overcomes the evidence of diseased sensation. Human mentality, expressed in disease, sin and death—and in tempest and flood—the divine Mind calms and limits with a word.

Medical metaphysics is by no means merely empirical while, *vice versa*, I have witnessed a death-dealing system of medicine that is daily proven simply "scientific guessing." The suffocation by ether while the hands of the frightened, struggling patient are held till death comes to his relief, and where the autopsy shows that neither the disease nor the ether killed him, but that he died of fear:—in such a case, which is proven most potent, disease, medicine, or the patient's mind?

In what sense is the Christian Scientist a "pest." Is it because he minds his own business more than the average man, is not a brawler, an alcohol drinker, a tobacco user, a profane swearer, an adulterer, a fornicator, nor a dishonest politician or business man? or is it because he is the very antipode of all these? In what sense is the Christian Scientist a charlatan? Is it because he heals the sick without drugs?

Well, our best exemplar, the Nazarene Prophet, healed through Mind, and commanded his followers to do likewise. The prophets and apostles and Christians in the first century healed the sick as a token of their Christianity. Has Christianity improved upon its earlier records, or has it retrograded? Compare the lives of its professors with those of its followers at the beginning of the Christian era, and you have the correct answer.

As a pertinent illustration of the general subject under discussion, I will cite a modern phase of medical practice, namely, the homœopathic system, to which the old school has become reconciled. Here I speak from experience. In homœopathy the one thousandth attenuations and same triturations of medicine have not an iota of the drug left in them; and the lower attenuations have so little, that a vial full of the pellets are swallowed without harm, and without appreciable effect. Whereas the homœopathist administers half a dozen or less of these same globules, and you will see it, and he will tell you, and you will believe him, that therewith he heals the sick. This diminishing the drug does not disprove the efficiency of the homœopathic system. It enhances it for it identifies it with Mind, not matter, and places it in the grooves of God, in the hands of omnipotence. Then say, O petty scorner of the Infinite! Wouldst thou mock His miracles, or scatter his shade "who abideth under the shadow of the Almighty?" If as Scripture declares, God made all that was made then whatever is entitled to a classification as truth or science, must be comprised in a knowledge, or understanding of God; for there can be nothing beyond illimitable Divinity.

The homœopathist handles in his practice, and heals, the most violent stages of organic inflammatory diseases, stops decomposition, removes enteritis, gastritis, hyperemia, pneumonia, diphtheria, and ossification—the effects of calcareous salts formed by carbonate and sulphate of lime; and the homœopathic physician succeeds in healing his cases without drugs equally with the allopath who depends upon drugs. Then is Mind or matter, the intelligent cause in pathology? If matter, I challenge matter to act apart from Mind: and if Mind, I have proved beyond cavil that the action of Mind is salutary and potent in proportion as it acts apart from matter. Hence our Master's saying, "the flesh profiteth nothing." The difference between metaphysics in homœopathy and metaphysics in Christian Science consists in this forcible fact: The former enlists faith in the pharmacy of the human mind, and the latter couples faith with understanding, and is based on the divine law of Mind, knowing that this Mind is the only Lawgiver, omnipotent, Infinite, All—hence it is the sovereign appeal, and there is nothing therein to attenuate. The more of this Mind the better for both physician and patient.

We have scholarly Christian Scientists that can compete with men of letters. But, and if the faculty is to gauge Mind, Christianity, and Christian healing, by classics—what of your good Mr. Moody, and what of the blind Tom from whose unlettered head flow to his fingers strains of sweetest music?

Ignorance, slang, and malice touch not the hem of the garment of Christian Scientists—for once touching it they would be destroyed. To be stoned for that whereby our Master sought to designate his best work, saying, "for which of these works do ye stone me?" is thereby to make known the best work of a Christian Scientist.

Finally, beloved brethren in Christ, the words of the New York Press—"Mrs. Eddy not shaken"—are valid, I remain steadfast in St. Paul's faith, and will close with his own words: "Christ is the head of the Church; and he is the Saviour of the body."

We wish the Field to know—indeed they ought by this time to know—that when delays occur in getting out our publications, it is due to some unavoidable cause, or some excellent reason that makes the publication enough more valuable when out to warrant the delay.

If Scientists will observe more patience and await quietly the arrival of the Journal and Weekly, instead of plying the Publisher's Department with letters and telegrams, they will alike add to their own growth and relieve their servants at headquarters of much unnecessary annoyance and labor.

The Washington News Letter of December 21 contains an interesting account of the dedication of First Church of Christ, Scientist, at Clinton, Iowa. We have not thus far received any account from those interested for either of our publications. If it is desired that dedications and other matters pertaining to branch churches shall be published in the Christian Science publications at 95 Falmouth St., Boston, it will be necessary to send articles or newspapers containing these accounts to headquarters.

PETTY PERSECUTION.

In Bellefonte, Pa., the shire town of the county in which the writer was born, there was, a short time since, one of the pettiest exhibitions of prejudice and malice, in connection with Christian Science, that has yet come under our observation.

A woman, in whose family was the mortal law of hereditary insanity, committed suicide by throwing herself on a railroad track where she was run over by a train. About a year and a half previous to this event, this woman had been treated in Christian Science for a short time, and because of this the coroner's jury gravely found that her mental malady was due to the influence exerted upon her by a Christian Scientist.

After a long time the Christian Scientist, thus falsely and foolishly accused, succeeded in getting a local newspaper to publish a sworn statement of the actual facts. Such narrow and unjust measures will only re-act ultimately upon their perpetrators, and Christian Scientists can afford to look on with composure.

These exhibitions of intolerance differ only in degree from those which, not so very long ago, expressed themselves in hanging Quakers, publicly whipping and imprisoning Baptists, and the tyranny and oppression of Puritans. Only a little over a hundred years ago in Milesburgh, a village hard by Bellefonte, a Methodist prayer-meeting was mobbed, and the windows smashed with stones, because the assailants thought Methodism was of the devil.

So goes on the mortal dance of prejudice and misjudgment, and so will it continue, in varied forms, until the healing Christ shall be known and recognized of men.

Digitized by Google

We herewith republish from the Bellefonte Republican the sworn statement of the Scientist. The whole affair marks an event in the history of our movement that will, not many years hence, be looked back to much as we now look back upon the whilom persecution of Quakers, Baptists, Methodists, and many other religious sects.

THE SWORN STATEMENT.

At this late date I have succeeded in having my statement in reference to the Garbrick case published. And not to retaliate, but simply that the whole truth in this case may be understood, do I give this sworn statement to the public.

In the spring of 1896 I moved to Thomas Street and located opposite the Garbrick and Gettig home; and shortly after, my hostess related the sad condition of her neighbor, Mrs. Gettig, who had been shut up in a dark room for six weeks suffering with the belief of ulcerated eyeballs, and her physician had kindly told her if there was anything she wished to try she could do so, as he had done all he could. The patient in her distress consulted with a kind friend who suggested first to try Christian Science; that others had been healed by it, and if she was not benefited by the treatment it certainly could do her no harm. It was five o'clock Friday, in early June, 1896, that I first entered the darkened chamber of the patient, and that was the first time I saw Mrs. Gettig. Mrs. Garbrick was present and listened attentively to my explanation of Christian Science, and remarked, "I believe it all. For years I was a sufferer, doctors and drugs failing to do me any good; then in a moment of great suffering I prayed to God and was instantly relieved."

Next day, Saturday, my patient was cheerfully moving about her room. Sunday afternoon she was down-stairs with her family. Next day, Monday, she walked out into the garden, and before the week was over was attending to her household duties, and from that time has been in good health. Mrs. Gettig informed me that for two years her health had been failing, and believed her disease was inherited scrofula, from which her mother and sister had passed away, and during that time grew worse, medicine having no beneficial effect.

Owing to this marvelous healing Mrs. Garbrick purchased our text-book, "Science and Health with Key to the Scriptures," by Rev. Mary Baker G. Eddy, and became a willing attendant at our Bible lessons. Mrs. Garbrick did not leave her Church, as some of the papers stated, but would have left it because her pastor persecuted Christian healing, had I not opposed her doing so, as I deemed it unwise at that time. I never interfered with their conjugal relations, always leaving such matters to the student's own understanding of Science and Health. At the first appearance of her last illness I offered to help her, which she refused, saying, "I must work out my own salvation." But later, when she became conscious of approaching symptoms of mental disorder, she then for the first time asked for Science treatment. I gave her one week present treatment, and being obliged to leave town at that time, treated her a few weeks absently, for which I received five dollars. Her husband not believing in Science, that ended my services, which was about a year and a half ago. It was well known to Mrs. Garbrick's friends and physicians, long before she knew of me or Christian Science, that her mentality was not balanced at all times.

Mrs. Stine and Mrs. Gettig much regret that their testimony at the coroner's inquest was reported in such a way as to mislead the public mind in the case, and I am sure they will both bear me out in all herein stated.

It must be said to the credit of a number of well-known physicians of Bellefonte that from the first they have not approved of the petty persecutions of Christian Science practice.

For the benefit of those who know nothing of Christian Science, its influence and progress in our own and other lands, I will say that as the result of twenty-five years of practical application of its teaching over a million of hopeless cases of disease have been healed, and nearly four hundred churches established, whose many thousand members are daily demonstrating the Christ truth in healing all manner of sickness and sin. And prominent clergymen are now defending its teachings and practice from their own pulpits, and numbers have given up their old theological ideas and teaching for the more practical gospel of healing as taught and commanded by the Master. "Christian Science" is based on divine Principle, the Triune God, Life, Truth, and Love. When understood and realized it reforms the sinner, destroys the cravings of the inebriate and the tobacco user, whose testimony may be had when asked for. It overcomes all false beliefs: Agnosticism, Atheism, Pantheism, Mesmerism, and Magnetism; proofs of which will be given to any one wishing it. And neither malice, prejudice, bigotry, nor ignorance can ever overthrow it.

In "No and Yes," by Rev. Mary B. G. Eddy, we read, "The two largest words in the vocabulary of thought are 'Christian' and 'Science.' The former is the highest style of man; the latter reveals and interprets God and man; it aggregates, amplifies, unfolds, and expresses the All-God."

MISS REBECCA PARRY.

Affirmed and subscribed before me November 22, 1898.

S. F. KLINE, J. P.

My legal adviser, Hon. L. A. Waters of Scranton, writes:—

"Of course, if any one stops to think and to parse the article and the verdict of the coroner's jury, it will appear perfectly absurd that you should be charged with the death of this woman. Personally, you have nothing to fear. If you should hear of the case again you will have ample opportunity to defend yourself. This is a free country, and religious beliefs cannot be interfered with, nor rights trampled upon. One has a perfect right to employ an allopath, homœopath, electropath, or any other kind of a doctor, and they have a right to employ no doctor, if they see fit, but to rely upon divine Power, and this without fear of molestation. So far as this case affecting the truth is concerned, there need be no fear of that. The Truth will maintain itself, and the harder it is pressed the more it will be demonstrated. Thinking people would not be influenced by the article as printed. Very truly yours,

"L. A. WATERS."

FROM THE NORWICH COURIER.

The attempt to convict the Christian Scientists in Harold Frederic's case for manslaughter was regarded with interest everywhere, as it was an attempt to show that a failure to cure on the part of the indicted parties was a crime. If it was a crime, if it was manslaughter, for Christian Scientists to fail to cure, the world asked itself why it wasn't a crime for any practitioner to fail to cure, a fault not attributable alone to this class of healers.

Commenting upon this proceeding, the Boston Globe cites a case in illustration as follows:—

"Not so very far from Boston a person has died within a year, after having been practised upon by eighteen regular physicians. After each of the eighteen had utterly failed to discover the actual disease, the nineteenth "regular" declared that it would be necessary to resort to surgery in order to discover the real trouble. If this person had died at any time while waiting for the nineteen regulars to find out what was the matter with her, it would have been regarded as in the natural order of things. Had the patient become impatient of their ignorance of her case and called in a Christian Scientist, there are persons who would have imprisoned the latter for murder in the second degree had death intervened after the Christian Scientist had been called in."

If failing to cure is to be made a crime, it would not long

Digitized by Google

be confined to one class of practitioners, whether they were regarded as quacks or not. The London court trying the case found the charge baseless. The charge was withdrawn by the prosecution after instruction from the court that, as these Christian Scientists had acted up to their best judgment in behalf of Mr. Frederic, and with the sole motive of doing him good, coupled with his own desire to be so treated, no charge of manslaughter could be sustained.

There is no country in the world where failing to cure a patient is a crime; but in one country it is ranked and treated as a worthless service. In China the doctor can only collect his fees from cured patients. If that rule was in vogue in this country, a good many physicians would starve to death.

TESTIMONIES.

"For the earth shall be filled with the knowledge of the glory of the Lord, as the waters cover the sea."

Thus saith the prophet of old, and we as Christian Scientists must rejoice when any of our literature is carried into a new-old country. Two boys, both considerably under twenty-one years of age, one a member of the Evanston, Ill. Church, the other of the Chicago Church, in company with some others, have passed over almost the entire length of the Ashcroft trail running from Quesnelle to Glenora, B. C. One of them has Science and Health, the other "Miscellaneous Writings." I was able to reach them with only one *Journal*, and as they say, "We were so glad to get it." While many of their companions have become disheartened and discouraged, throwing away portions of their outfits and abandoning their horses, these two have pushed on, having no accidents to speak of. Following is a quotation from a letter: "I am feeling fine. We walk from four to six hours on a stretch. My feet are not sore, and I am never stiff in the morning. Have covered about four hundred and fifty miles from Ashcroft here. Sometimes it rains, but we never feel any effects from wet feet and clothing dried without removing. You would hardly know F. L., he is so fleshy. Doesn't look at all like the same boy who left C— last March. Our horses have stood it well to what others have. My Science and Health has a waterproof covering to protect it."

They are now in winter quarters, about one hundred and twenty-five miles from Glenora, at the headwaters of the Nasse River.

I intend to have more literature for them on coming out in the spring. So our two most important books will be read in British Columbia among miners and trappers this winter.

All who are trying to demonstrate the Truth, know what divine Love has been to me, and through me to them, verifying our Leader's words in "Miscellaneous Writings," page 152, "Of this we may be sure: that thoughts winged with peace and love breathe a silent benediction over all the earth, co-operate with the Divine power, and brood unconsciously o'er the work of His hand."

Mrs. Georgia A. Farling, Chicago, Ill.

I had a habit of smoking nearly all the time from morning until night. Several times I tried to give it up, but after two or three days I would crave it so that I would smoke harder than ever. In 1890 I began to attend Christian Science meetings, and shortly after went through a class of instruction in Christian Science. During the second lesson the teacher turned to page 405 in Science and Health and read these lines, "Puffing the obnoxious fumes of tobacco, or chewing a leaf naturally attractive to no animal except a loathsome worm,—" that was enough for me. I caught a glimpse of the Christ meaning. I went home and threw three pipes and a paper of tobacco into the stove, and have never had any desire for the weed since.

I know that Christian Science will destroy all bad habits, and all sickness and sin. We have been benefited in many different ways. Our little daughter was healed of a severe fever in a few hours, and at another time of measles. She was all broken out on Saturday, but through the realization of Truth the claim entirely disappeared on Sunday, and she went to school on Monday as well as ever, not losing a day; while at least a dozen children in the same school remained at home from two to three weeks on account of the measles.

I was also healed of a serious attack of lead poisoning in a few days, and other ailments at different times. We have not had any medicine of any description in our house in nine years, and I am fully convinced that Christian Science is the Christ-cure taught by Jesus over eighteen hundred years ago.

John B. Kellow, Scranton, Pa.

BOARD OF LECTURESHIP.

THE following notice has already been given by our Leader, the Rev. Mary Baker Eddy:—

"The Christian Science Board of Directors of the Mother Church, and the branch churches of Christ, Scientist, may apply to the Board of Lectureship for lecturers, within the bounds of their sections or precincts in the United States, Canada, or Great Britain."

Applications from branch churches to the lecturers should be made through their clerks.

Lecturers may not be able to respond to such calls immediately, because of other engagements, but will as soon as possible arrange for a date that shall be mutually convenient.

Sections and Lecturers.—The churches are requested not to address correspondence concerning this subject to the Editor or the Publisher of the Journal or Weekly, or to the Clerk of the Mother Church, but to lecturers in their sections.

Eastern Section.—The lecturers for the New England States and Great Britain, are, Irving C. Tomlinson, 8 Norway St., Boston, Mass.; William P. McKenzie, 2 Cumberland St., Boston, Mass.

Maritime Provinces, William P. McKenzie, 2 Cumberland St., Boston, Mass.

The Province of Quebec, the city of Ottawa, and Kingston, Irving C. Tomlinson, 8 Norway St., Boston, Mass.

Middle Section.—For the states of New York, Pennsylvania, New Jersey, and Delaware, and the Province of Ontario, Carol Norton, 170 Fifth Ave., New York, N. Y.

Southern Section.—Kentucky, Tennessee, Georgia, Florida, South Carolina, Alabama, Mississippi, Louisiana, Mrs. Sue Harper Mims, 575 Peachtree St., Atlanta, Ga.

District of Columbia, Maryland, Virginia, West Virginia, North Carolina, Mr. Edward H. Hammond, 1900 Bolton St., Baltimore, Md.

Western Section.—For the Western States and all Southern States west of the Mississippi River, Edward A. Kimball, 5020 Woodlawn Ave., Chicago, Ill.; Mrs. Annie M. Knott, 759 Woodward Ave., Detroit, Mich.; Alfred Farlow, 430 N. Y. Life Building, Kansas City, Mo.

Pacific Coast Section.—California, Idaho, Arizona, Oregon, Montana, Nevada, F. J. Fluno, 1319 Grove Street, Oakland, Cal.; A. A. Sulcer, 1062 Ninth Street, Riverside, Cal.

CARD.

LOYAL Christian Scientists who have received certificates of the degree C. S. B., signed by the President of the Massachusetts Metaphysical College, and who have practised Christian Science healing three years, are, under the rules of the Mother Church, eligible to teach Christian Science. And on application, according to the College rules, to Mary Baker G. Eddy, President, or to the Vice-President of said College, they will receive the degree of C. S. D.

MARY BAKER EDDY.

PLEASANT VIEW, CONCORD, N. H., Dec. 17, 1898.

Twelve or more to one address, each, Prepaid	4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.

Single book, Prepaid	$3 00
Twelve or more books to one address, each, Prepaid	2 50

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price $1.00; by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price 50 cents; by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price, 35 cents; by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price 25 cents per copy; by mail 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price, 25 cents; by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price, 20 cents; by mail, 21 cents; $2.00 per doz.; prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy, $5.00 per dozen.

Vol. 1 Boston, Mass., January 5, 1899. No. 19

Mr. Depew on Expansion.

At the Christmas dinner of the Independent Club in Buffalo, N. Y., the Hon. Chauncey M. Depew expressed his views on the subject of territorial expansion. From his remarks we extract the following:—

We face at this Christmastide questions as vital to the future of our country as any which in the past have been met and successfully answered. The federation of Washington in 1798 has developed into the United States of 1898, with that inherent power which is always attached to national sovereignty, of acquiring territory by conquest or cession. I do not think any body of constitutional lawyers will doubt that among the reserved powers of sovereignty which belong to us as a nation, is the right to administer the affairs of territories acquired by conquest or by cession, under such form of government as Congress and the executive may prescribe.

We made war against a foreign power, and, for the first time in the history of the world, solely for humanity. To maintain order in Cuba until her people shall be able to maintain a stable government of liberty and law is humanity. To incorporate Porto Rico in our domain, relieve its citizens from oppression, and give them good government is humanity. To permit the bloody hand of Spain again to grasp the throat of ten million Filipinos, or to pass them over to the tender mercies of European governments, would be inhuman and cowardly; it would be refusing the mission which Providence has distinctly forced upon us.

General Wood, governing the province of Santiago, gives an object lesson in American liberty, law, and opportunity. The most unsettled province in Cuba resumes all the arts of peace, and invites enterprise, immigration, and capital as soon as its people understand that they are to be protected in their persons and property, and that as fast as they demonstrate capacity for self-government they will be advanced to positions in the civil and military service.

The $34,000,000 of exports from Porto Rico, of which all but $4,000,000 have gone to Spain, will now come to us, enhanced many fold by American enterprise and immigration. The Philippines to the United States, like Java to Holland, under the inspiring influences of American opportunity, of American schools, and American hope, will be an immense market and a large source of revenue over and above the cost of administration for the United States. Our government, firmly planted, will not only enter the "open door" of the Orient, for the products of our fields and our factories, but when the great boot of Uncle Sam is put in the crack of the door which continental nations would close, there will be no musket jammed upon that boot to compel its withdrawal.

The year 1898 has given to the American people the exaltation of patriotic fury and fervor to relieve the sufferings of an oppressed and neighboring people. The marvelous victories of our navy and army, condensing into one hundred days the struggle of one hundred years for the overthrow of the colonial tyranny of Spain, have spiritualized us with that fire of brain and blood which came to the Greeks after Marathon; to the English after Agincourt; to Americans after the battle of Saratoga.

In 1898 we have become citizens of the world. We have become the foremost power. The boy at school has been wont for half a century to recite with bated breath Daniel Webster's magnificent tribute to the world-wide power of Britain, "whose morning drum beat, following the sun, and keeping company with the hours, circles the earth with one continuous and unbroken strain of the martial airs of England," but the American schoolboy of to-day is himself the citizen of a country upon which the sun never sets.

The Control of the Colonies.

In a thoughtful editorial on "The Control of the Colonies," the Boston Herald says:—

While England is not the only colonizing nation in the world, it is generally admitted that it is the one which has achieved the greatest measure of success in operations of this kind. England is the only country in the world which possesses colonies and dependencies that are loyally attached to the mother country, and, as we wish to govern by affection and well-founded self-interest on the part of the colonists, we should be blind to the obvious teachings of experience if we did not carefully study, and, as far as we could, adapt her methods to meet our own case. The English colonial system has been built up by slow degrees, often as the outcome of hard experiences arising from the practice of bad methods, methods which have been discontinued after their unfortunate results have been discontinued. What we must endeavor to do is, to place ourselves in the position of inhabitants of these various possessions, and endeavor in this way to formulate such laws and regulations as we should adopt for our own well-being if we were thus circumstanced. We must consider what is good for the Filipinos, what is best calculated to build up their industries and encourage their public spirit, more than what is best calculated immediately to promote the enlargement of our own trade. This may seem a sentimental method of treating dependencies, and, if England's experience could not be pointed to as an emphatic indorsement of its practical value, it might be asserted to be altogether too sublimated a method to warrant adoption. But when it is found that in the practices of the world it is the only sure and solid tie by which colonies and dependencies can be bound to the mother country, we should not permit selfish interests to stand in the way of its adoption.

Items of Interest.

Word comes from Washington that General Otis has been cabled instructions to send troops from Manila to take possession of Iloilo, on the island of Panay, two hundred and fifty miles from Manila, the last Spanish stronghold in the Philippines. The reason for the hasty action in taking this island is said to be that it will stop the fighting between insurgents and Spaniards, which has for some time been in progress. This gives notice to the world that the United States proposes to maintain its authority over the Philippines with a strong hand and indefinitely.

Another important move in the direction of expansion made by the administration lately, was the ordering of the gunboat Bennington to Guam, our new possession in the Ladrones, instructing the Bennington to stop en route and take possession of Wake Island, midway between Hawaii and the Ladrones, on the claim of original discovery by the Americans many years ago, and in view of the fact that no other country has asserted authority over it. This island is isolated and unimportant, except for a cable station. The administration expects to have a United States cable laid from San Francisco to Manila by way of Honolulu, Wake Island, and Guam, and is taking the necessary steps to secure cable stations.

In connection with the President's plans for ameliorating the condition of the Cubans and getting them on their feet again, Secretary Alger is working out the details of the distribution of money promised by President McKinley to General Garcia at their last interview, when the President stated that he would arrange to give each Cuban soldier out of the congressional appropriation about $100 for compensation for services rendered by the Cuban troops as allies after the war began, the total amount to be repaid to the United States Treasury out of the future revenues of the island. Some rules to govern the distribution will have to be adopted in order to prevent the money from being squandered and the Cubans cheated out of it after they get it.

It is welcome news which comes to us of the important work for improving the census done by the American Economic Association at its recent meeting in New Haven, Conn.

Thoughtful students of our social life recognize that there is no more important branch of the civil service than that which has to do with the National Census, and every factor which makes for its betterment is to be heartily encouraged.

Among those who were present to advance the good cause were Professor Richmond Mayo-Smith, Walter F. Willcox, Hon. Carroll D. Wright, Professor Roland P. Falkner, Davis R. Dewey, Professor Tausig of Harvard University, Hon. S. N. D. North and Superintendent Horace G. Wadlin of Boston.

In a recent article on an "Eventful period in Religion," the Rev. R. Heber Newton, D.D., of New York says:—

I am convinced that the coming year, the last year of our present century, is fraught with big events. Mystic thought for a long time looked ahead to the close of this century as to a critical era. The old evangelicalism of theology, interpreting the Old Testament prophecies, expected the coming of Christ somewhere in the latter part of this century. As we understand the second coming of Christ, it means a great spiritual reformation, or renaissance, or reviving, or a new illumination, a new vivification of Christendom. There are many things that look like the fulfilment, even in the last year of this century, of this belief of our fathers.

The President has nominated Ethan A. Hitchcock of Missouri to be Secretary of the Interior. Mr. Hitchcock is a business man of St. Louis, and was for a time an extensive plate glass manufacturer. He is a great-grandson of Ethan Allen of Revolutionary fame. His ancestors were from Vermont, but his father moved South and Mr. Hitchcock was born at Mobile, Ala. He is a brother of Henry Hitchcock, a lawyer of note. Mr. Hitchcock is at present ambassador to Russia. He was appointed minister more than a year ago, and when the rank was raised to an embassy he was re-appointed.

In reply to the question, "Do you think the Filipinos are capable of citizenship?" Senator Frye of the Peace Commission said: "I think that with patience and wisdom in government, that by treating the people of the Philippines justly, nearly the entire population of the Philippine Islands will be an intelligent, industrious, prosperous, self-sustaining, and contented people. The Philippines, of course, cannot be admitted as a state of the Union. They must be governed by us at first somewhat in the manner of the British government in East India."

A proclamation for the evacuation of Cuba to take effect New Year's day has been issued by the American Evacuation Commissioners. The Spanish troops remaining must stay in their quarters. The preservation of peace will be strictly enforced. At twelve o'clock on the first of January all forts and municipal buildings with fitting ceremonies were transferred to the United States, and the Stars and Stripes wave where for centuries the banner of Spain has floated.

A despatch from Manila says Admiral Dewey considers it absolutely necessary that a first-class statesman be sent to Manila, to thoroughly investigate the situation there and ascertain the aspirations of the Filipino republicans. He further states that the United States must accept its responsibility in the Philippines, which have been acquired by conquest. If it should shirk this duty it would put itself back two hundred years in the world's history.

Delegations representing the Cuban residents of Peru went to Callao to meet the warships. They presented to each a gold plate. With the name changed, each bore the inscription: "All honor to the commander, the officers, and the crew of the United States warship Oregon, victorious in the navy combat off Santiago de Cuba on the 3rd day of July, 1898. This plate is given as a testimony of the patriotic gratitude of all Cuban citizens of Peru."

The congress of the revolutionary government of the Filipinos has unexpectedly adjourned, owing to the difficulty of formulating a constitution, and the cabinet of President Aguinaldo, appointed at Bacoor on July 15 last, has resigned. Reliable advices say that he is indefatigable in his efforts to overcome the policy of the militant factions, which is hostile to the Americans. It is probable that his influence will avail to avert trouble.

The Hon. Justin S. Morrill, Senator from Vermont, died at 1:25 o'clock December 28, in the eighty-ninth year of his age, after an illness of less than a week. Senator Morrill was the father of the National Senate, having been in Congress forty-four years, in the House twelve, and the Senate thirty-two years. He was a man of personality, spotless character, unswerving integrity, and will be widely mourned and deeply missed.

Hereafter, when American artists go abroad for work and study they will enjoy the privilege of bringing or sending home as many of their own works as they please and are unable to sell, without paying duty upon them, even though they remain abroad half a dozen years or more. The same privilege is extended to American artists who are now in foreign parts.

The United States minister at Pekin, Mr. Edwin H. Conger, has entered a protest against the proposed extension of French jurisdiction at Shanghai. This, added to the vigorous British protest on the same subject, will undoubtedly stiffen Chinese resistance to the French demand, but unless the Chinese are sustained they will eventually be compelled to yield.

Christmas everywhere was markedly a day of joy and good will. Not only in the home but in the hospital and prison was the blessedness of giving in evidence. Prophetic indeed of the time even now at hand when every day shall be one of giving—the glad giving of spiritual, not material, gifts, the gifts of health, happiness, and wholeness (holiness).

News comes from Washington that President McKinley, his Cabinet officers, and the more thoughtful Senators and Representatives, with other public men, are studying the British colonial system carefully, in view of the present problems and the future responsibilities of our government respecting the islands taken from Spain.

The ablest statisticians estimate the present population of the world at 1,500,000,000, which is an increase of about twenty million in the last seven years. And the Anglo-Saxon is more than keeping the pace with foremost.

The Boston Herald.

One of the largest, if not the largest, railroad stations in the world was opened New Year's Day in Boston, Mass. It covers twelve acres, has thirty tracks, and its frontage on three streets is 2,190 feet. Twenty-five million passengers pass in and out annually.

President McKinley has given directions that every possible precaution shall be taken by our commanders in Cuba to keep the peace and prevent violent outbreaks, and he is very hopeful that they will be successful in doing so.

The success of the American arms in the late contest has fastened the eyes of all nations on this Republic. This was manifested on the arrival of the battleships Oregon and Iowa in Peru.

Major-General Merritt, retiring military governor of the Philippines, with his bride, formerly Miss Laura Williams, and his chief aide, Major Strother, spent the holidays in Chicago.

Is Heaven a Condition?

JOHN CARROLL LATHROP, Reader in one of the Christian Science Churches, criticises the statement that heaven is a locality as belonging to an outdated school of thought. This is the Christian Science view of heaven as Mr. Lathrop gave it yesterday to a World reporter:—

"Christian Scientists understand heaven to be a condition of mind, a realization of the omnipresence of the divine Mind, God, attainable by each and all here and now, in perfect accord with Jesus' reply to the Pharisees: 'The kingdom of God cometh not with observation: neither shall they say, Lo here! or, lo there! for, behold, the kingdom of God is within you.'

"Christian Science teaches that the ever-presence of the Kingdom of Harmony is not affected by or related to the mortal mind's belief termed death, but that through a perfect understanding of the former the latter is met and overcome, as are death's partners—sin, sorrow, suffering and all manner of inharmony."

Carol Norton, of the Board of Lectureship of the Christian Science denomination and a well-known Christian Scientist, declares that heaven is to be had right here in New York by anybody who fully accepts and follows out the Christian Science tenets. He said:—

"In the Lord's Prayer, the one great universal petition given by Christ to his followers in all ages, Jesus teaches us to pray as follows: 'Thy kingdom come. Thy will be done in earth as it is in Heaven.' Jesus further said: 'The kingdom of God cometh not with observation: neither shall they say, Lo here! or, lo there! for, behold, the kingdom of God is within you.' The kingdom of God means the kingdom of Good, or the reign of righteousness, and is synonymous with the kingdom of heaven, or rule of harmony. According to the words of the Founder of Christianity this kingdom is already within us, within spiritual consciousness. It is, therefore, a state of Mind. Mind includes individuality and phenomena. Therefore, the kingdom of heaven must include place and man living in harmony with the Principle of Being. In Christian Science we believe that the kingdom of heaven is a state in which Mind and all the manifestations of life and identity express immortality, boundless bliss, spiritual evolution, and perpetual progress. In this realm individuality is never lost, but found. Man is never absorbed, but is ever on an ascending scale, the image and likeness of God."

New York World, December 28, 1898.

Cuba under American Protection.

THE following is the proclamation issued January first by Major-General John R. Brooke, Military Governor of Cuba, to the people of the Island.

"Coming among you as the representative of the President, in furtherance and in continuation of the humane purpose with which my country interfered to put an end to the distressing conditions in this island, I deem it proper to say that the object of the present government is to give protection to the people and security to person and property, to restore confidence, to encourage the people to resume the pursuits of peace, to build up waste plantations; to resume commercial traffic and to afford full protection in the exercise of all civil and religious rights.

"To this end the protection of the United States government will be directed; and every possible provision will be made to carry out these objects through the channels of civil administration, although under military control.

"The people of Cuba, without regard to previous affiliations, are invited and urged to co-operate in these objects by the exercise of moderation, conciliation and good-will one toward another; and a hearty accord in our humanitarian purposes will insure a kind and beneficent government.

"The military governor of the island will always be pleased to confer with those who may desire to consult him on matters of public interest."

Mortality Decreasing.

IN an editorial on the health of Boston, the Herald says:—

"We can congratulate ourselves upon the record of an exceptionally healthful year just passed. The exact mortality for the year has not yet been officially determined, but it is safe to say that the year's death rate will not much exceed twenty deaths to each one thousand of the city's population, and this is the lowest death for any year found in Boston's vital statistics. It will also be found that the infant mortality and the deaths from preventable causes have been unprecedentedly low during the year, which may fairly be attributed in great measure to improved sanitary conditions throughout the city. The reduction of the death rate has been a notable feature of the statistics of all our centres of population of late years, and it is gratifying to note that Boston is keeping pace with other great cities in this regard."

If the Herald will let us interpret "improved sanitary conditions" to mean, *improved mental and spiritual conditions*, we can rejoice together over the good news.

The Christian Science Weekly

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, Editor.
CAMILLA HANNA, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies, or more, to one address, one year, each copy ninety cents.

Twenty-five copies or more, to one address, one year, each copy eighty cents.

Fifty copies, or more, to one address, one year, each copy seventy-five cents.

Foreign subscriptions one year, each copy $1.50.

Six months' subscriptions for the *Weekly* received at half the above rates.

TERMS OF SALE:

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, one dollar and fifty cents.

Entered as second-class matter.

Editorial.

A Very Happy New Year.

SEPTEMBER FIRST, 1898, the Weekly made its first bow to the Field. So cordial was its reception, and so well has it been supported, that even thus early in its career it has found enlargement advisable. Therefore it commences the new year in a partly new dress and double its original size. In this form it makes its second bow, and wishes all its readers a very happy New Year. If the present year shall be as prolific of good work and great results in connection with our movement as was the year just closed, we shall indeed have cause for rejoicing.

May Christ's Kingdom find renewed and enlarged place in human consciousness this year, and fraternity and brotherly love on truly Christian principles prevail in larger measure than ever before.

To our dear co-workers we are moved to say:—

"Now unto him that is able to keep you from falling, and to present you faultless before the presence of his glory with exceeding joy, to the only wise God our Saviour, be glory and majesty, dominion and power, both now and ever. Amen" (Jude, 24, 25).

English Press Comment.

SINCE we last wrote upon the Harold Frederic case we have received from London a great stack of press clippings, covering, we suppose, what every newspaper of any consequence in the British Islands had to say of this case. We have run over these various publications and gathered the general drift of what they contain. Many of them publish only the facts relating to the coroner's inquiry. Many others contain editorial comment upon the case and upon Christian Science in general, while still others publish communications from private citizens. The major part of the editorial comment is adverse to Christian Science and its adherents, as well as to everything pertaining to it. Much of what was said was bitter, unreasoning, and of course utterly unjust. Based, as were these comments, wholly upon prejudice and misapprehension growing out of entire ignorance of what Christian Science is, this was to be expected. That which is least understood is usually the most severely denounced. It seems to be the habit of a part of our modern press and pulpit to assume in advance that the thing which is not conventional and well-understood is dangerous, and it becomes a public duty to denounce it—especially if it relate to religion or healing disease—as a fad, an imposture, a humbug, a fraud, etc. If it bases its claims upon any religious premise bringing it in conflict with established religious views and conditions, or if it in any sense runs counter to the "traditions of the elders," then truly is it a blasphemous pretender, and its votaries must, by every consideration of religious respectability, be stigmatized as silly, ignorant, weak-minded, superstitious, and altogether unworthy of fair treatment or decent consideration. This is indeed the exact tone of some of the editorials referred to.

Yet some of these are less notable for their severe strictures, than for their arrogant assumptions. One might judge from the supercilious view-point from which the editors write that they were quite competent to pass final judgment upon all the teachings of Christian Science, upon the question of the mental, moral, and spiritual status of all Christian Scientists, determine without personal inspection or inquisition the question of their sanity, and pronounce judgment, final, conclusive, and entirely satisfactory to themselves, that all Christian Scientists are insane, or so nearly so that they are fit subjects for asylums for the weak-minded or idiots. Indeed, we might go further and say, that we have scarcely ever witnessed a more striking attempt of mortals to arrogate to themselves the prerogative which is usually admitted to belong solely to the Supreme Wisdom, than the superlatively egotistical, arbitrary, and self-satisfied manner in which these editorial gentlemen essay to wipe Christian Science and its followers off the face of the earth. If their power were indeed equal to their assumptions, and their judgment upon the subject operative and final, then we should be compelled to admit their supremacy of wisdom, acknowledge them as almighty, and able to say that sickness can be healed only by drugs and medicines.

We feel disposed, however, notwithstanding the bold assumptions of these gentlemen, to hold to the view that they are, after all, only human, and subject to the infirmities and limitations of our common humanity, and are therefore not competent to decide the great questions they have so readily undertaken to settle.

If they will first answer us a few simple questions in such a way that their answers shall be known to be correct and conclusive, we shall then be ready to assent to their fitness for the task they have undertaken, if not quite willing to accord to them the quality of almightiness.

1. As mortals, will they tell us who and what they are? Will they trace for us their ancestry back to its origin, and tell us who and what their first progenitor was? If they should refer us for answer to the deductions of Mr. Darwin, however much we might be inclined to adopt his theory in their particular cases, we could not conscientiously accept Mr. Darwin's conclusions as final and authoritative, for they are involved in too much doubt, and there are too many who disagree with Mr. Darwin. Will they, therefore, kindly answer our question independently of Mr. Darwin?

2. Will they tell us of what their bodies are composed? giving us, not theory or speculation, but tell us absolutely and by an unquestionable analysis, so that we shall definitely know, the primary substance of which their bodies are composed?

3. Will they tell us what their mind is, and its exact relation to their body? If their mind is located within their body, tell us where, and how and when it got there? If they prove to us that their mind is located in their brain, having gone so far, they can tell us how and when it got into the brain, and, moreover, trace their brain back to the first

Digitized by Google

brain. That will answer, in part at least, our first question, and aid in determining their mortal origin.

4. Will they make for us a real and conclusive analysis of their mind, so that we may know what it is, its constituent elements, and whence it came?

5. Will they take from their fruit dish an apple and tell us all about it? how it came to grow on a tree? how the tree grew from a seed? how the seed from which the tree grew found its way into the apple? what the propagative element of the seed was that enabled it to reproduce its kind? and, finally, tell us which was first, in the primary sense, the seed, the tree, or the apple? It would also be interesting to have these modern wise men answer the ancient inquiry, Which was first, the egg or the hen? and if the egg whence came the egg? if the hen whence came the hen?

6. Will they tell us what power it is that holds this earth of ours out in space without material support? Having answered this, they can also tell us what holds in their orbits without visible prop, all the myriad worlds or suns and systems of suns, some of which so far outweigh our little earth that a comparison can scarcely be made? If they answer, "Gravitation," then will they please inform us definitely, so that all can understand, what gravitation is?

7. These gentlemen, and also a learned divine who recently denounced Christian Science in unmeasured terms over in England, said that the cures which Christian Science professed to effect had really been wrought by Nature. Now if they are competent to say this, they can also tell us all about Nature. Will they kindly tell us in an authoritative and definitive way just what Nature is?

*

We might multiply like questions almost indefinitely, but if only these simple, elementary questions, which any child could ask, are well and truly answered, we shall, as we have said, bow in deep deference to the Daniels who shall interpret them, and freely acknowledge that they are competent to sit in judgment upon Christian Science and all connected with it, and determine the sanity or insanity of its followers.

Is it asked if Christian Science answers these questions? We answer, There are thousands of intelligent, thinking men and women who will say that it has answered these and all similar questions to their entire satisfaction, and in the only conceivable way they can be answered. But they are answered on a spiritual, not a material, basis. To undertake to elucidate this point, however, is not the purpose of this article, nor would it be possible in any space we could devote to it in this publication to do so. But if those who desire to "know of this doctrine" will seriously and carefully study the Christian Science text-book, "Science and Health with Key to the Scriptures," and other books written by the author of that text-book, the Rev. Mary Baker Eddy, of Concord, New Hampshire, they will find their answer.

*

Because Christian Science claims to heal sickness without drugs or material means it should not be censoriously assumed that it is a ridiculous fad or a blasphemous fraud. It would be much more in consonance with rational methods to stop and soberly and seriously investigate its claims, however extraordinary they may seem, and from such investigation arrive at final conclusions. This is all that Christian Scientists ask. Their works have been too long in vogue, and the results thereof are too well known, to warrant any thinking person in scornfully denouncing without any attempt at investigation.

We ask our assailants, in all soberness, Is it fair and just to judge of any thing or any people without knowledge, and condemn without a hearing. Even those who crucified the Saviour gave him at least a pretence to a trial; and yet the distinguished editors and clergymen across the Atlantic have mentally and verbally attempted to crucify all Christian Scientists without even a mock trial. Nevertheless these same men boast of the enlightenment and glory of our modern civilization and beauty of our nineteenth-century justice and Christianity.

Simply by way of corroboration of what we have above said we herewith quote a few specimens of this English literature. They are not the choicest, but they will answer our present purpose.

*

The London Standard:—

"There is little temptation to dwell upon the painful picture presented of the home life of a gifted man of letters. It is the old story of the contrast between the brilliant triumphs of the creative imagination and the weaknesses to which poor humanity is prone. What concerns the public conscience more closely is the fresh revelation of the lengths to which credulity will go in an age that claims to be one of singular enlightenment. We need not travel for illustrative material beyond the account which Mrs. Mills herself tendered of her equipment as a healer. To attempt any epitome of what her school call the theoretical basis of Christian Science would involve something not easily distinguishable from profanity. By no stretch of charity can it be assumed that the jargon of religious phrases they employ covers any sincere and reasoned belief. As applied in practice, their system is simply to deny to those suffering from disease the advantages of medical treatment. Whether this be called, in plain English, doing without a doctor, or be described, in the Pantheistic claptrap of the sect as reliance upon the efficiency of the divine Presence, makes no difference to the patient."

*

The Daily Telegraph:—

"As to their theories, they are not worthy of a moment's consideration by any intelligent mind. Those, however, who bestow that undeserved honor upon them will speedily perceive that they either resolve themselves into a mere blank fatalism, or they depend upon a childishly capricious application of the doctrine of Providential government to a single event in human life. Recovery from sickness is neither more nor less a matter of Providential ordinance than escape from shipwreck; and faith in Providence is therefore no less absurdly pleaded as a reason for declining medical aid than it would be for refusing to put on a life-belt."

The Umpire of Manchester:—

"The dead novelist, who was a journalist of repute and position, and, as such, a recognized teacher of inferior persons, seems to have surrendered his will, intellect, and faith to a little group of visionaries who are remanded on a charge of manslaughter, and who stand on the same low level as the Peculiar People. It is a charity to speak of them as 'mistaken enthusiasts,' who regard prayer (considered by many eminent theologians as an impertinence) as more efficacious than scientific treatment."

According to this authority, then, many eminent theologians regard prayer as an impertinence. It might be interesting to know how many of the eminent English theologians would endorse this statement as authoritative, but if it be true that English theologians are teaching that prayer is an "impertinence," the sooner they renounce the name of theology and Christianity the sooner they will have shown their consistency and honesty. How any one occupying the position of a spiritual guide or expounder of Scripture can thus

Digitized by Google

turn the lie upon their own profession is one of the anomalies of the age. If the Manchester Umpire is correct, we say, God pity the English theologians. We are aware, however, that the statement is a slander upon many of them.

The Daily London Chronicle thus sententiously dismisses the subject:—

"We gather from the interview with one of the authorities on the subject, which we publish to-day, that a little persecution would not be unwelcome to the promoters of this movement—and prosecution would inevitably read persecution. The less we interfere with these people the sooner their hysteria—or call it mysticism if you will—will work itself out. But, above all, do not let us advertise them. Advertisement is contagion."

It would perhaps not be impertinent for us to suggest that this wise admonition is a trifle late in the day. The enterprising journals over there having already advertised Christian Science throughout most of the world, it would seem that the Chronicle's warning cannot well be heeded.

Doubtless as the result of this generous advertising, many thousands of persons have heard of Christian Science for the first time. People never hear about a thing, as a rule, without making some inquiry as to what it is. We know that just such gratuitous advertising on this side the ocean by some of our American newspapers has caused scores of people to investigate and accept Christian Science who otherwise would not have known of it. Christian Scientists do not seek such publicity, but if our friends of the press will persist in thus bringing us to the world's attention, it would seem that we have no power to prevent.

Per Contra.

By no means, however, have all the British newspapers taken sides against us. There is always a residue of fair-mindedness and cool-headedness among English as well as American people. We append some of the more favorable comments.

The Morning, of London, publishes an article by Mr. David Christie Murray, from which we extract:—

"The theory is that this is a Christian nation, that its people believe in God, and that our lives are regulated by the rules laid down in the New Testament. The facts do not fit in with the theory. The people who believe that God can cure their sick, without the intervention of earthly aid—which is pure Biblical doctrine, beyond any shadow of a doubt—are liable to be tried for manslaughter. Plain Apostolic teaching and plain English law are in dead opposition to each other. This is a point on which most people prefer to maintain a rather hypocritical silence. If you declare in favor of the law you are open to the accusation of being an Infidel and a Vessel of Wrath. If you declare in favor of the Gospel, then you are a crank and a fanatic, and blind to all the light of modern thought. It is a prickly question, but we have solved so many of its kind in England that we need have no fear in attempting the solution of one more. It will be found in the long run that the only solution lies in perfect liberty of conscience."

The London Echo says:—

"It is of some importance to point out that if the faith which underlies Christian Science is baseless, a good deal of the New Testament is moonshine, and half of the conventional prayers of Christendom are foolishness. That, of course, is not an argument in favor of Christian Science, apart from prepossession; but even the British Philistine might do well to reflect upon what follows if the faith which underlies Christian Science is baseless."

From the London Referee we quote:—

"The moment you interfere with people's beliefs in the direction of suppressing or coercing them you open the door to all sorts of alarming possibilities. What is to prevent me from charging with manslaughter a medical man who has allowed, say, a child of mine to die under his treatment? What could be plead in defence? That the state sanctioned his method? Well, but the power of prayer, upon which the Christian Scientists rely, is also recognized by the state; at all events, it is a favorite agency in the hands of the state-supported Church for ameliorating not only spiritual, but physical ill. How can the state logically condemn the resort to prayer in one case while it sanctions it in another? Often in churches the prayers of the congregation are solicited for a sufferer on a bed of sickness. What is the attitude of the law towards this proceeding? Does it say practically this: 'You can pray as much as you like, so long as you provide the patient with medical attendance, but prayer as such we regard as a mere superstitious observance; we cannot accept it as proper treatment for a sick man'? And would it make matters better if, the doctors having been dismissed as useless, as they might very well be, a clergyman were called in to pray for the patient's recovery? On what ground can it be alleged that doctors always are of service in a case of illness? Poor Harold Frederic suffered from paralysis, which finally killed him by invading his heart. The doctors had him in hand for a time, but they did not succeed in driving his paralysis away or even in preventing it from extending. Is it not a purely gratuitous assumption on the part of the coroner and his jury that the medical men by remaining in attendance a little longer could have saved their patient's life? Doctors do in thousands and millions of cases enjoy carte blanche, and their patients die all the same."

Reynold's Weekly Newspaper says:—

"The verdict of 'Manslaughter' against two of the women who attended the late Harold Frederic, the novelist, during his last illness was to be expected after the evidence given during that remarkable inquiry. Yet it is quite puzzling to imagine any one who believes in the Bible objecting to the doctrines and practices of the fanatics known as the Christian Scientists and the Peculiar People. Nowadays, however, people seem to accept, or to reject, such portions of the Bible as suits them, never thinking that if it be an inspired book and true, to reject a portion is to throw discredit on all. We, of course, do not agree with those unfortunate individuals who believe that medical aid may be rejected where it is a question of disease or sickness. But we say they are perfectly logical. Either they are right, or the Bible is wrong. And if they be right, according to the Bible, then those who do not follow similar methods cannot believe in the Bible, as a whole. Indeed, Bible belief is becoming a matter of ridicule among the clergy themselves. The Archbishop of Canterbury does not believe in the Biblical account of the creation; the late Archbishop of York said it was impossible to run a nation on the principles of the Sermon on the Mount."

The Weekly Times and Echo:—

"I know scores of people who are being 'killed by homœopathists'—so my allopathic friends declare. While the ladies and gentlemen who pin their faith to pilules are equally certain that the drug doctors are debauching naturally healthy constitutions into doddering degeneration."

The London Observer:—

"Of course, these Scientists declare that their list of cures is enormous, and it is a fact that a large number of men and women, mostly of fair education and good social position, have come forward and announced in public meeting that they have by its means been cured of serious illness.

Digitized by Google

Whether they are right or wrong (and for our part we think them wholly wrong), they are clearly at liberty to treat themselves, or allow themselves to be treated, according to any method which they choose, whether they call it Christian or pagan, scientific or magical. Nor is there any reason why they should not pay for it, if they choose, so long as they perfectly apprehend what it is they get for their money. The sudden outcry against them as a set of fraudulent humbugs who are to be put down by the strong arm of the law is perfectly preposterous. There is no reason to believe that they are any more humbugs than the regular physicians of the sixteenth century, who prescribed all kinds of absurd things, such as live lizards as a treatment for hernia, or powdered adders for snake bites."

The Church Gazette:—

"The jury in the case of the well-known novelist, Frederic, has brought in a verdict of manslaughter against the Christian Scientist whose treatment, or rather non-treatment, of her patient, has had the fatal issue which, in the name of letters, we all deplore. After the coroner's summing up, the jury probably thought that the law gave them no option to do otherwise. But, from a logical and moral point of view, the question which came before the court is a highly complicated one, admitting of considerable discussion.

"Has not a man a right to dispose of himself and his life as seems best to him? If he chooses to be killed by unscientific methods, instead of the scientific way prescribed in the 'British Pharmacopœia,' why should he not be permitted to exercise his own individual discretion? Then, again, where are we to draw the line between science and superstition? Three centuries ago the whole of England believed in magic and charms and incantations, as preventives of, and remedies for, disease, and the average doctor was described by Ben Jonson as:—

> A rare physician,
> An excellent Paracelsian, and has done
> Strange cures with mineral physic. He deals all
> With spirits he, he will hear not a word
> Of Galen or his tedious recipes.

and hundreds of women, many of them perfectly innocent, were burnt at the stake as witches (the last trial for witchcraft took place in 1712). For aught we know, a future generation will look down upon our modern medical science, and detect in our vaunted scientific knowledge a not inconsiderable mixture of folly and superstition."

From Justice, London:—

"The verdict of manslaughter recorded against the two Christian Scientists who attended Mr. Harold Frederic in his last illness, appears to me to be a most illogical and unreasonable finding for a Christian jury. It seems to me little short of scandalous that people whose only offence is that they give a logical and literal interpretation to the religion which is supposed to be that of this nation and its law-makers, should be charged as criminals.

"Let us have done with cant in this matter. I have frequently protested against the persecution and punishment of the Peculiar People on the same grounds. Either our judges and juries are Christians and believers, in which case they should honor rather than punish the simple folk who make practical application of their creed, or they are sceptics themselves, in which case they are also humbugs and hypocrites.

"They would insult and persecute any one with sufficient courage and honesty to avow a disbelief in their creed, and would profess to regard such an one with horror and aversion. Yet they manifest the hypocrisy of their own professions when they censure, persecute, and punish such true believers as the Christian Scientists and the Peculiar People."

Light, of London:—

"The curious thing is that in branding Mrs. Mills' faith as nonsensical and murderous, the coroner and his jury branded scriptural and evangelical Christianity as nonsensical and murderous also; for scriptural and evangelical Christianity are both committed to the divine and supernatural power of faith and prayer. The Christian Scientist may yet get the conventional Christian into a very pretty hole."

The Sunday Chronicle:—

"For to tell only the sober and modest truth, medicine is the most inexact of sciences, even if in charity we permit it the dignity of a science. Its methods and the manners of its professors are still surrounded by much of the sham mystery, the real ignorance and hocus-pocus of the Middle Ages. Its verdicts are largely matters of guess work, of experiment. It has made progress undoubtedly, but such progress as it has made has been more by rejection than by discovery. It has given up many of its bad old habits; it has adopted but few that are either new or valuable. The modern general practitioner gives far fewer drugs than his predecessor a hundred years ago, and gives them in much smaller doses; and that is all to the good of the patient."

The Saturday Review thus editorially comments upon a sermon preached upon Christian Science by Canon Eyton of Westminster:—

"On Sunday last Canon Eyton said (I take the Daily Mail report, which the canon has not contradicted nor amended, in spite of the fact that he allowed himself to be interviewed by the same paper on the following day), 'Christian Science, with its tale of manslaughter, is part of the muddy stream of abject credulity which engulfs so many lives at the end of the nineteenth century.' I leave this phrase to the judgment of the 'indifferent honest,' reminding the careless that Canon Eyton here makes himself judge and jury too, in order to condemn for manslaughter one or two women whom even the coroner asserted were well-meaning. In his interview with the Daily Mail reporter next day, this eminent exponent of Christ's lovingkindness railed against credulity. 'What can be said,' the canon asked rhetorically, 'of a sane man who refuses to have a doctor, and calls in faith-healers when a leg is broken, or even in a case of confinement? . . . What the age lacks,' he concluded, 'is common sense.'

"This is surely strange doctrine in the mouth of a Church of England clergyman. Is, then, faith like a grain of mustard seed, able to move mountains, as Jesus said it was, but unable to heal a broken leg? The dilemma is immediate; either Canon Eyton does not believe in prayer, in which case he ought to give up his profession, position, and pay; or else he does believe in it, in which case he should apologize for and repent of these atheistic utterances. It is not common sense, O belated disciple of Charles Kingsley, that this age lacks; the feeble grasping after straws, like Christian Science, shows that the age is drowning in common sense, smothered in common sense, and choking; it is uncommon sense that this age and all ages want, and sympathy, and above all, charity, or, as we should phrase it to-day, 'imagination,' that divine gift which enabled Christ to feel with the adulterous woman and the halt and maimed and blind, and which forced Paul to endure even fools gladly. I must not be led away from the main issue by my own emotion; I believe that a great wrong has been done, and that it can only be partially righted if the Treasury refuses to support the disgraceful verdict of this coroner's jury."

The Presbyterian publishes the following communication:—

"*Sir*:—Your editorial in this week's Presbyterian on the

Digitized by Google

subject of Christian Science is unique, and while I accord you due credit for your desire, namely, to tear down 'Truth-healing,' it would be unfair to let it pass by unnoticed as being, not an attack upon Christian Science, but a false conception thereof entertained by its assailants.

"All Bible students must admit that Jesus never used figs to cure boils, or any other disease; nor did he instruct his disciples to do so. The Presbyterian Church is supposed to be built on the rock—Christ—and if we wish to follow Christ it must be in the way he instructed us. Jesus said, 'The works that I do ye shall do.' Are medical men doing these works?

"Have you not made the common theological error of looking at the Adam-man as the real man, instead of the spiritual or Christ-man? If the fundamental truth underlying this be comprehended, no one could criticise, let alone attack, Christian Science.

"This system of healing has come to stay, and if you will look in the right direction you will be convinced that on the side of therapeutics its adherents are doing a better work than materia medica has ever been able to do. There are hundreds of cases of healing by this science in the world to-day, many of which have blamed the skill of the medical profession, while its theology enables mankind to live lives of higher morality, being devoted to the purpose of bringing about a higher and better Christianity, which your paper so sincerely desires. Why attack Christian Science when doing good, if you would be Christian? Paul said, 'man was free born,' and it is surely trespassing upon this declaration to seek to take away man's individual right to resort to whatever healing power he chooses. Very truly,

"ARTHUR E. JENNINGS.

"New Shildon, *via* Darlington."

*

The following from the Westminster Gazette will be interesting, as showing Mr. Frederic's estimate of the medical profession:—

"In the late Harold Frederic's book, 'Illumination,' the following allusion to medicine derives new interest from the revelations of the coroner's inquest. The Rev. Theron Ware, in his first interview with Dr. Ledsmar, is uncertain whether he may not be talking to a doctor of something else than medicine, and decides on venturing the question.

" 'Oh, yes, it is medicine,' replied Ledsmar. 'I am a doctor three or four times over, so far as parchments can make one. In some other respects, though, I should think I am probably less of a doctor than anybody else now living. I haven't practised—that is regularly—for many years, and I take no interest whatever in keeping abreast of what the profession regards as its progress. I know nothing beyond what was being taught in the sixties, and that, I am glad to say, I have mostly forgotten.'

" 'Dear me,' said Theron, 'I had always supposed that science was the most engrossing of pursuits—that once a man took it up he never left it.'

" 'But that would imply a connection between science and medicine,' commented the doctor. 'My dear sir, they are not even on speaking terms.' "

*

We conclude our article with some extracts from American publications which may be instructive to our friends across the water. From Town Topics, New York City, we take the following:—

"Mr. Harold Frederic ought to be canonized by the Christian Scientists. That distinction certainly would be appropriate had he continued steadfast to the end, in view of what since has occurred. But he relented a few hours before death, . . . called to his aid common, every-day physicians, and thus missed his saintly chances. As it is, the occasion of his death and the circumstances attending his last illness have been so manipulated, unintentionally, of course, by doctors of divinity and doctors of medicine as to do more for the cause of Christian Science than could have been accomplished by a lifetime of prayer. Protestant, Catholic, and Hebrew, forgetful of creeds, and Allopath, Homœopath, and Eclectic, unmindful of schools, united forces to crush out the Scientists by the force of vigorous invective, and have carried on the warfare for several weeks. Never did competition get such substantial advertising from those in direct opposition. The new cult itself is rightly constituted to thrive on what has happened. . . . What it most needed was publicity, and this it has now obtained in world-wide measure from its most bitter competitors."

From the Boston Evening Transcript, one of the leading dailies on this side, we cut the following editorial comment:—

"There can be no question as to the earnestness of the Christian Scientists. In Ohio, where the State Board of Health has secured a second conviction under the law regulating medical practice, $10,000 has been pledged by one of the Scientists to carry the case up on appeal, and the leader of the Christian Science Church at Cincinnati says the building fund of $24,000 pledged to this church is also available for the same purpose. He declares that the case will be carried to the United States Supreme Court, if necessary. In England, lately, all the cases against Christian Scientists seem to have been thrown out by the higher courts."

Yes, in England, so far at least as the Treasury bench is concerned, the prosecution of the Christian Scientists in the Frederic case, came to naught, as by every rule of law, common sense, and common justice it must have done.

Letters to Mrs. Eddy.

Dear Mother and Teacher:—January 1, 1899, will mark an event in the work of our little band, the fruits thereof we trust will prove our loyalty to the cause we so earnestly advocate. On that day we shall dedicate to the cause of Christian Science the first church building in this little village that has stood the sunshine and storm of forty years of time.

Two months ago we had a lot and nine dollars in money. To-day we have a pretty little church and reading room, finished and furnished, our only debt one of *gratitude* to God and the dear Mother who taught us "*God is the source* of supply," and has a treasure house full of blessings for His children.

That we may prove our worthiness of this blessing, we will continue to strive, watch, and pray.

Your loving student,

Mary E. Graves, Schofield, Wis.

Dearest Mother:—Christmas greetings to you from a heart filled with love for the Revelator, and gratitude for the revelation of what the Christmas means to and for us in Christian Science.

On this Christmas morning we hold our first service of the Third Church of Christ, Scientist, of Chicago, in the Jewish Synagogue, "Zion Temple." The lessons for the day, "Christian Science" and "Christ Jesus, the Heir of All Things," are most marvelous and wonderful to be read on Christmas Day, and in this place. For the two Sundays preceding the annual election I have been appointed Second Reader.

Accept these few words in place of what we so love to send you at this season of the year, an offering, as a slight reminder of our never waning gratitude and love.

Mary M. W. Adams, Chicago, Ill.

Questions and Answers.

What apologies have Christian Scientists to make for healing?

None.

What apologies have the stars for shining? or the fig-trees for bearing fruit? What apologies has the mathematician for getting the right answer to his problem? or the musician for bringing forth harmony?

Is it not the destiny of stars to shine and fig-trees to bear fruit? Said the first Christian Scientist, "Let your light so shine before men that they may see your good works and glorify your father which is in heaven." Of the fruitless tree the Master said, "Cut it down." For Christians not to shine, not to heal, is to be without "good works" and therefore to fail to glorify their heavenly Father. Said Christ Jesus of every believer, "The works that I do shall he do also." Who will deny that healing was among the works of Jesus? Who can deny, then, that healing is the fruit which every believer should bring forth? What apology has a believer to make for being without fruits: the healing works of Christ? No more apology than has a tree for having only leaves. Is it not easy to see, then, that the fate of a Church without healing is the fate of the fig-tree without figs? Is it not plain that in order to glorify the Father there must be Light enough to make the works manifest? Is it not clear that for the Church of Christ to flourish it must have Life enough to bring forth fruit? for "By their *fruits* ye shall know them."

It is the business of mathematicians to solve problems. It is the business of musicians to make harmony. "Wist ye not that I must be about my Father's business?" said the Scientific solver of human problems, the maker of heavenly harmony. This eminent Christian Scientist was successful in business because he applied to every task the Science of Mind. He eliminated error from every human problem through Mind. He transformed every discord to harmony through Mind. What apology is needed from Christian Scientists of to-day for doing business in the same way?

Instead how plain it is that an apology is called for from those who are attempting to heal in man's way instead of in the Christ-Way. If the great Physician healed through Mind, what right has another to attempt to heal through human opinions?

When those whose trade is affected attempt to pass laws to prevent Christian Scientists from healing, let them at the same time pass laws to wipe out from the Bible the record of Christ's healing. While this text-book on healing contains the command, "Heal the sick," so long will Christian Scientists hasten to obey. If the disobedient are to take away healing from the obedient they must first take away their Christ; for so long as they have Christ so long will they heal. As well legislate the stars from shining and the heart from loving as to legislate the possessor of Christ from healing.

Take from the mathematician the right to destroy error with Truth, rob the musician of his right to heal discord with harmony, then ask legislatures for laws that will punish Christians for destroying the error of sin with the Truth of God, and for healing the discords of mortal life with the concord of eternal Life.

Once when about his business there sought him out one who "had suffered many things of many physicians, and had spent all she had, and was nothing bettered, but rather grew worse." (How modern this old story seems!) She was healed and no apologies offered.

What would be thought to-day of those bunglers who for twelve years had been experimenting on the invalid if they had cried out against her Scientific healing? We have no record, but was the Medical Trust silent in this case because she had spent all she had? If, after twelve years "suffering many things of many physicians," she had had more to spend, should there have been a law to compel her to suffer on while her money lasted? She had been under regular treatment so long was it right for her to be healed by such irregular treatment?

Touched by the Christ-Truth she was "healed of her plague." For that healing should her healer have been branded as a criminal? For twelve years the guessers had been blindly hunting for the right answer to her problem. While the guessers guessed the sufferer suffered. In presence of the Christ-Truth the error vanished. To her it was proven that "Ye shall know the Truth and the Truth shall make you free." Through one who understood the Principle which governed her problem at last the right answer was obtained. The evidence of the unscientific methods of those who had been treating her case was the fact that after twelve years of experimentation she "was nothing bettered but rather grew worse." The evidence of the Scientific method of the Christ treatment was that she was made whole. Is such success to be apologized for?

For over thirty years Christian Scientists have been employing the Christ method in the treatment of sickness and sin. More than a million sufferers made whole evidence that the Christ method is the Scientific method for healing sickness and sin. In presence of the Christ-Truth the errors have vanished and the discords have been silenced. Through those who have understood the Principle which governed the problems of the million, the right answers have been obtained. That Christian Science *is* Christian and *is* Science is proved by this healed multitude. Is such success to be apologized for? No, nor will apologies be asked for by people possessed of reasoning faculties and free from monetary considerations. There are some questions which the *vox populi* are asking and which they are answering for themselves. Among these questions are the following:—

What apologies have Christians to make who do not heal? What apologies have those to make who attempt to heal by any other than the Scientific method?

Miscellany.

As to Medical Science.

"Medical science occasionally makes a grand miscalculation," said an old citizen to the Tales-of-the-Town man. "I never pass a certain house on lower Prospect Street without remembering that twenty-eight years ago a certain noted doctor of this town—he died recently—condemned me to death. 'You have but a week to live,' he said.

"This was information of somewhat serious import to me, although at that time I didn't much care whether it was a week or a month. But I went to another doctor. 'Are you really frightened?' he asked. 'No,' I said, 'I've got beyond that.' Then he remarked, 'You can't last a month.' Somehow this corroborative testimony didn't satisfy me. Before I got through my search for information I consulted eight doctors. And, by the way, I was hunting through the second week before I made the rounds. Of course they all agreed

Digitized by Google

pretty well. The most liberal man of the lot said I might pull through for a year, but he greatly doubted it. The other medics gave me from a week to three months.

"Well, sir, I've attended the funerals of five of those doctors, and, please God, I'll see the other three under the sod before I quit.

"Understand me, I was a pretty tough object at that time. A bronchial trouble had worn me to skin and bone. I walked with a crutch and a cane. I could scarcely talk. All the doctors agreed that my lungs were past mending. Five of them said I had but one lung left, and that, they claimed, was on its last legs.

"Well, when I went to the ninth doctor I was mad clear through. I was mad when he looked me over. I knew he didn't have a blessed idea concerning my case. But he tried hard to look knowing, and went back in his little drug tank and presently returned with a neat package wrapped in white paper. I handed him the $2 he demanded and walked away. 'Here,' he said, 'you've forgotten your medicine.' I turned back. 'No, I haven't,' I said hotly, 'I left it there purposely. Give it to the next credulous fool whose case you don't understand.' Say, it did me good to get mad. I went home, chucked every drug into the ash barrel stayed out in the open air all I could, wasn't the least bit careful about myself, worked about the house every day until exhausted, and began to get better. By George, inside of a year I was in tiptop condition! Look at me now. Sound as a dollar. Yes, sir, science does occasionally slip up with considerable unanimity."—Cleveland Plain Dealer.

What Do the Angels Do?

We print the following without comment just as it appeared in the Boston Herald.

The Pearl Street Baptist Church (Providence, R. I.), is agitated by the political and other views of its pastor, the Rev. Francis E. Tower.

The society was formerly the First Advent Church, but seven years ago went over in a body to the Baptist denomination. Two years later Mr. Tower became its pastor. He was an ardent admirer of Bryan and an advocate of free silver, and a number of brothers took strong exceptions to his political creed. These disaffected ones have been fanning the little flame ever since, and when the pastor preached a few days ago on what the dead do they were further incensed. They declare that he pictured the angels as having regular employment similar to their earthly vocations. The dominie says he declared that the dead have a conscious state in heaven and have employment there in the service of God.

On this rock the society is in imminent danger of being wrecked, and the pastor awaits a gale from the minority asking him to resign, but he says in advance that he will do nothing of the kind.

William C. Watson, attorney for Mrs. Addie F. Weaver of Batavia, the Christian Scientist who was indicted on March 3, 1898, on charge of practising medicine without a license or being registered, presented a demurrer to the indictment in county court.

The grounds on which the demurrer was based were that more than one crime was charged in the indictment, and that the facts stated do not constitute a crime. The demurrer also alleged that the indictment contained matter which, if true, constituted a legal justification or excuse for the crime charged or a legal bar to prosecution. The fourth point in the demurrer was that the crime charged was a misdemeanor, and the indictment was not found within two years after the commission of the crime.

The court allowed the demurrer and quashed the indictment.—News, Batavia, N. Y.

The Lectures.

A Notable Meeting.

A NOTABLE meeting of Christian Scientists was that which gathered at Carnegie Hall, New York, Sunday, December 18, 1898, to hear a lecture delivered by Mr. Carol Norton. This meeting was in the nature of a mass meeting of the Christian Scientists of Greater New York. There were thirteen churches represented. The audience filled the large hall to overflowing. There were upwards of three thousand people in the hall.

Mr. Norton was introduced by Hon. P. C. Talman of Brooklyn, who in his introduction spoke from a lawyer's standpoint of justice, tolerance, and fair hearing. On the left of Mr. Norton sat Dr. George D. Cochran, a graduate of both schools of medicine. Seated on the platform back of the speaker were the representatives of some thirteen Christian Science churches in and about the immediate vicinity of New York City. Also some twenty students of our Leader, graduates of the Massachusetts Metaphysical College; General John Lewis, ex-Postmaster of Atlanta, and the official representatives of the Boards of Trustees of a number of the New York City churches. Some of the most prominent divines of the metropolis were to be seen in the audience, among whom can be mentioned Rev. Minot J. Savage, D.D., Rev. George F. Pentecost, D.D., Rev. Professor James T. Bixby. Over three thousand persons listened to the lecture. Three or four hundred went away because they were unwilling to climb to the top of the auditorium, where the only seats available were situated. The lecture closed with a benediction by a representative of the National Board of Education of the Christian Science movement, Mrs. Laura Lathrop, C. S. D.

From the Harlem Postscript of December 19, 1898, published in New York, we extract the following notice of said meeting, and epitome of Mr. Norton's lecture.

Carnegie Hall was the scene of a remarkable mass meeting yesterday afternoon, the occasion being a lecture delivered by Carol Norton, C. S. B., on "Christian Science; its Religion, Healing, Therapeutics, and Philosophy."

The lecture was given under the auspices of the Christian Science Churches of Greater New York, and was designed as an answer to the misleading newspaper articles published on both sides of the Atlantic on the death of Mr. Harold Frederic, the London correspondent of the New York Times.

The lecture was announced for half past three, but when the Postscript reporter entered the hall at 3.35 many people were coming away, unable to gain admission. Excepting a few rear gallery seats, the auditorium was taxed to its utmost capacity. On the platform were many prominent Scientists. All told, more than three thousand people were present.

Ex-Judge Talman, of Brooklyn, introduced Mr. Norton, saying that although he was not, in the proper sense of the word, a Christian Scientist, he had seen so much good resulting from it, both in the community and in his family, that he could say only good words for it. He bespoke for the lecturer a fair and impartial hearing, and then presented Mr. Norton, who was enthusiastically received.

Mr. Norton said, in brief, as touching the Harold Frederic case, that the wife of the journalist had been healed in Christian Science, and that while Christian Science practitioners were called to attend Mr. Frederic, at a critical point in the case the Scientists were discharged and regular medical attendance summoned and substituted, and that Mr. Frederic died under the physicians' care.

Mr. Norton then took up his subject and handled it in a masterly manner, speaking extemporaneously. He spoke for upwards of an hour and a half, and held the close attention

Digitized by Google

of his vast audience. He emphasized the fact that Christian Scientists were not believers in pantheism, but were believers in one God as divine Principle, and that this Principle was Spiritual, and was the Great First Cause. He vigorously denounced the theory of the co-operation of mind and matter, and declared that materiality, sin, and suffering were of the carnal, or mortal, mind, from which mankind would be redeemed by the understanding of Spiritual Law as the only real law.

Referring to the healing therapeutics of Christian Science, Mr. Norton cited many instances of failures of medicine, and gave numerous authoritative cases of Christian Science healing. He declared that healing was an essential element of Christianity, which had been practised in the early Christian Church up to the time of the union of the Church and State under Constantine.

He declared that the philosophy of Christian Science would stand the test of time; that it proved its accuracy by its results, and demonstrated its divinity from the Bible, which, he declared, could be so literally interpreted as to obscure its true and spiritual meaning.

A felicitous Introduction.

PROFESSOR MARTIN of Macon, Ga., thus felicitously introduced Mrs. Mims on the occasion of her recent lecture in that city:—

Ladies and Gentlemen:—Hidden in its archæological bed the diamond imprisons for ages the beautiful sunlight of God, refusing to release it in all its brilliancy and splendor until shaped and polished by the lapidary's skill. Hundreds of thousands now believe that likewise the great truths of Christian Science had lain veiled for centuries until recently revealed by Mary Baker Eddy in all their convincing force and spiritual beauty.

As Mary, the mother of Jesus, nearly nineteen hundred years ago, gave to the world the blessed Saviour of mankind, so Mary Baker Eddy within the present century has given to the world in Christian Science, as her adherents firmly believe, the very highest interpretation of Christ's teachings—the great and holy mission of which is to establish harmony between science and religion. By establishing this harmony, and banishing sin, sickness, and death, Scientists would efface the horizon-line of demarcation 'twixt earth and heaven—enveloping the one in the realized hopes and transcendent beatitudes of the other.

In all ages, most great movements having for their purpose the elevation of mankind to greater moral and religious altitudes, have been the coinage of the feminine mind, while all —without exception—have been nurtured by woman's hand, and prospered by woman's love.

It is not surprising, therefore, that chief among the exponents of Christian Science we find many of the noblest women of the land—women whose faith has risen higher than mountains, whose shoreless love for humanity no mariner has ever compassed, and whose fathomless depths of charity for the weak and erring no plummet has ever sounded.

Conspicuous among these, stands Macon's loved and loyal leader, Miss Alice Jennings, the story of whose devotion and good deeds has already been engraven upon Macon's entablature in enduring letters of living light. Another of the noblest and most honored of this noble band of women is the distinguished lecturer of the evening; and as I look upon this audience, comprising much of Macon's broadest culture and highest chivalry, I deem it unnecessary to invoke a patient, considerate hearing of our honored guest, Mrs. Livingston Mims of Atlanta, who will now address you.

Mrs. Mims at Chattanooga.

At the Unitarian Church Mrs. Livingston Mims, of Atlanta, Georgia, spoke to a large audience on the subject of Christian Science. In spite of the extremely unpleasant weather the audience was a representative one, embracing many of the deepest and most conservative thinkers in the city. The subject was "Christian Science! Is It Christian? Is It Science?"

As a speaker Mrs. Mims is one of the most attractive women that ever appeared before a Chattanooga audience. She would invest any subject with charm, and this subject, which for the past twenty-five years has been gaining adherents steadily and rapidly in the face of bitter opposition, is one which she handles with skill and fluency. In the brief space of time allotted for lectures it was impossible to explain more than the rudiments of the faith of which she is so able an exponent.

She explained that not to bodily healing only was this system confined. "It is the bugle call to higher action, it ramifies every condition, its influence is silent like the dew, but it dissolves the mist of poverty and ignorance, it enlarges the scope of true government and harmonizes nations. It wipes away all tears, for it is the comforter leading into all truth, explaining the infinite meanings of God's ways to men. A true Christian Scientist must be a good citizen, a good neighbor; he must prove that honesty is the only true policy; that God—Good—is with the upright, that there is a divine way to have all that the 'Gentiles seek after,' and that is to seek first the kingdom of God and his righteousness, and all these things shall be added."

The News, Chattanooga, Tenn.

A few evenings ago we attended the lecture of a noted expounder of the doctrines of Christian Science. One thing was a great surprise to us, the largeness of the audience. The hall was filled to its utmost. The lobby was crowded with persons standing, the stairway to the gallery was covered. There seemed intense interest. Why has this teaching aroused so wide and sympathetic a hearing? Why are so many transferring their allegiance to it? The strength of a system is not its error and evil, but the truth and good it contains or simulates or approaches. If current Christianity were more skilfully brought to human needs, and if medicine were more Christian and less commercial, then would this distinct school of thought have less welcome. One has only to read the patent medicine advertisements of our daily papers, into which hundreds of thousands of dollars are put, and some of which are fashioned with inhuman shrewdness and greed, to discover that poor mortals need some defence and escape. Let the pews of all churches as well as the pulpits exalt the spiritual,—"look not at the things which are seen, but at the things which are not seen,"—and show by conduct, faith in God and God's Word, and the hungry hearts of men will be filled.

Christian Advocate, Detroit, Mich.

In these days Christian Science has come prominently before the public by reason of the death of persons who were under treatment, notably Harold Frederic, and much feeling has been aroused against it on that account. It was a timely address, therefore, which was delivered in Karn Hall last night, by the Rev. Irving C. Tomlinson, C. S. B., of Boston. His subject was, "Christian Science; What It Is and What It Is Not." The lecture was under the auspices of the local First Church of Christ, Scientist, a flourishing body, and the lecturer was introduced by Mr. Pearson, one of the leaders of the movement here.

Digitized by Google

There was a large attendance of those interested in Christian Science, or anxious to know what it really is, and the lecture was listened to very attentively. Mr. Tomlinson is a scholarly-looking gentleman, fluent and eloquent, and convincing in his manner. His statement of what Christian Science stands for was clear and lucid.

The Herald, Montreal.

About Diphtheria.

I AM glad to give to the Field an instance of the healing power of Christian Science which occurred in the city of Berlin, Ont., last February.

A Christian Scientist was called to one of a family of thirteen children, and the claim was diphtheria. The parents notified the Board of Health, as was the law of the city, and a doctor came and said, "Examination proves it to be diphtheria, and a very bad throat." The boy's sister was pronounced affected with the same disease. The Scientist then said to the mother of the children, "Which do you want, Christian Science or *materia medica*." "Why, Christian Science of course. This is no more to God than any other disease." When the doctor returned to his home he said to his sister, who is a Christian Scientist, "There will be a funeral at the S—— home." This was Saturday afternoon. The Tuesday following the boy was well, playing in the back yard—all the outing the city allowed the family while in quarantine. The first two nights the Scientist read "Science and Health with Key to the Scriptures," and the sense of protection, and joy to witness the removal of every seeming mountain by the omnipotence of God rendered her too grateful to want to sleep. The second day two more of the children complained of the same symptoms that the others did at first, and the next day two more, and the next day one, but the fear was met in a few hours, thus proving what Science and Health says, "Destroy fear and you end the fever."

Three days after the first examination of the M. D., another doctor was sent by the Board of Health who said, "I am sent to swab the throats of all the children, and each swab, with the child's name attached, will be sent to Toronto to a specialist; if the report of diphtheria is returned the swabbing will be repeated in a week, and every week until no germs are found, then disinfecting will be done and the card removed from the house." The doctor said to the Scientist after swabbing the throats, "I have looked into Christian Science, and it is beneficial in some cases, but this is different." "Can we limit the power of God?" the healer answered. The doctor then continued, "That child needs immediate attention, his throat looks all right but it has gone down; it is a serious thing to tamper with a human life." "*Yes*," replied the Scientist; "that is why we leave the child in *God's* hands."

He was silent a few seconds then said in a gentler tone, "Well, have your own way." "No," said the healer; "it is not man's way or nothing could be done."

At the last swabbing the doctor acknowledged to the parents, "They have recovered very nicely." Outside he said, "You couldn't kill one of those S. children any way." In all there were three advanced cases healed and four relieved in a few hours after first symptoms appeared, and one relapse. At the same time there were four more healed in another home not far away through this same understanding of God as all there *is;* and this notwithstanding the town's predictions that it would not be accomplished. Many other cases were healed during the season by Christian Science, one only passing on. At the same time a little girl having the same disease passed away in a closet filled with steam where an allopathic physician had placed her, depending on this material means to aid her recovery. Not long before this five cases had proved fatal under medical treatment in this small city of Berlin.

An uncovering of scientific medical guessing was this:—

The doctor examining the first two cases, Frankie and Lucy, said Frankie's was an advanced case of diphtheria, very bad throat, and would undoubtedly die, and Lucy had the fever and spots on throat. Three days later another doctor swabbed four, the above two, and Eddie and Nelson, and said, "I don't see much the matter with their throats," but added that it had gone down in Nelson's case, and he needed immediate attention. When the report came from the specialist in Toronto it was that Lucy and *Eddie* had the above malady, but Frankie and the rest did not. Eddie's fear and fever had been met in a day and night, and he had been free and skating for two days, but when he heard he had diphtheria he immediately relapsed (to sense) and it was several hours before it was met.

The healing of the cases referred to in this article, was made possible through "Science and Health with Key to the Scriptures," and other writings by Mary Baker G. Eddy, which prove the truth in the Scriptures to be practical, living *fact*, demonstrable Principle.

N. M. Dunn, 313 Huntington Avenue, Boston, Mass.

Does Christian Science Heal?

THE above question has been answered in thousands of cases, and is every day being answered in hundreds more. In the Christian Science Weekly of November 24, we published the following testimonial from Mrs. Amelia S. Korfhage, Louisville, Ky.:—

"On November 14, 1897, our little daughter, then seven years old, was taken with St. Vitus' dance. She reeled when she walked, her speech was impaired, and she had no control of her left side.

"In less than three months she was entirely healed, and under very trying circumstances. Error seemed to have the upper hand of everything; but we kept on, never doubting that Truth would triumph. Oh, how thankful we are for Christian Science! It not only healed the child, but sustained us through it all. I am glad to testify to this glorious Truth. It has brought light where there was darkness, and has taught me that God is really All-in-all."

Since publishing the above, we have received the following interview had with Mr. H. C. Korfhage, father of the child referred to in the above testimony. We submit these two cases as additional answer to the question at the head of this article.

[Interview with Mr. H. C. Korfhage of Louisville, Ky., November 28, 1898.]

Question.—Is the testimony relating to the healing of your little daughter published in the Christian Science Weekly, page 7, under date of November 24, 1898, correct in every detail?

Answer.—Yes.

Question.—Have you had any further evidences of Christian Science Mind healing in your family?

Answer.—Yes; quite a few.

Question.—Will you name what you consider the best and most convincing instance of cure?

Answer.—In January, 1897, my wife, who was sick, was examined by three physicians. They pronounced her disorder consumption of the heart and internal cancer. The examination was made by two of the doctors, the third agreeing to the deductions of the others.

Question.—Did the doctors furnish you any means of seeing the growth?

Answer.—Yes. During the examination of my wife I saw the growth with my own eyes, and the doctor had about made

Digitized by Google

arrangements for a room in an infirmary at Louisville, Ky., and the following week it was expected that she would be operated upon. During the week a gentleman who had just heard of Christian Science came in and told us to try it. We went to church with him, and after reading "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, and attending continually the Christian Science Church, to our great surprise in about three months my wife was completely restored. She is completely healed, and has never had the slightest return of pain or fainting spells. This healing occurred nearly two years ago.

Yours in Truth,

HEMAN C. KORFHAGE,
566 Fourth Avenue, Louisville, Ky.

Appetite for Strong Drink Destroyed.

IT was in 1894 that my husband was healed. He had been sick for three years, was given up by three physicians, and seemed ready to pass away at any time. He had inflammation of the bowels and several other diseases, also something growing in his side. He was never free from pain. His sister was healed through this Truth, and advised him to try it. He did so, and was ready to go to work in one week.

He had found the Truth, and we got the book Science and Health, studied it, and have been able to overcome sickness and accidents. My husband had a very strong appetite for drink, and had tried to get rid of it. He took the Keeley Cure, and that was good only for a short time and then he was worse. But after he had been in Christian Science for six months his appetite left him entirely in one night. That was over three years ago, and he has never had the least desire for it since. Words cannot express my gratitude to Christian Science for that one thing.

In five months we moved to Missouri, where they had never heard of Christian Science, but we were able with our books and what little understanding we had to handle whatever came up, and there was where we learned to lean on God as our "ever-present help." After one year we came to Clinton, Iowa, where we went through a class. I was healed of dyspepsia and several other complaints through reading Science and Health, and I cannot tell what happiness it has brought into our home. We have three grown children, and they are all members of the Christian Science Church. How my heart goes out to Mrs. Eddy with love and gratitude for all she has gone through that we might know the way. I have had many good demonstrations, especially among animals.

We were away from home with a team and had put up for the night at a farmhouse, and one of the horses was taken very sick. My husband was frightened, and said, "What shall we do?" I replied, "Trust her to Truth." I went to work. It seemed for a time as though error would get the best of us, but after a while Truth conquered, the horse was healed, and the next day we went on our journey.

One time I was on a visit to my sister in the country who knows nothing of Christian Science. They have a fine lot of hogs, and she took me out to see them. She said, "The cholera is amongst them; one died yesterday and there is one we have turned out to die, and it is almost gone." The thought came to me to treat it, so I did, but said nothing to my sister. We walked around awhile and came back where it had been and it was gone. I said to her, "Where is your sick pig?" We looked around and there it was eating and all right. In about a week she said to me, "My hogs are all well and doing finely, and I believe you treated them." I told her that I did, and that I did it to prove to myself that Truth can heal all manner of diseases for man and beast.

Martha Hartman, Clinton, Iowa.

Our Weekly.

BY JOSEPH S. EASTAMAN.

IT is with a feeling of deep gratitude that I accept the permission to write an occasional contribution to our Weekly.

This being my first letter, I feel it my duty to first give God thanks, and also our beloved Mother, Mrs. Eddy, for this added facility given to the Christian Scientists, and to all the people everywhere, to progress and speed our way out of "Sense into Soul" while we are learning the proper relations between God and man, by which mortal bondage can be destroyed, and man can manifest the freedom of the children of God.

In my heart I welcomed you ten weeks ago, for I feel sure you are destined to do much good to the cause of Christian Science as well as to Christian Scientists everywhere, and though you are only a few weeks old, already the Field is anxiously looking for the little messenger that brings to all words of peace and guidance from our dear Mother and guide. You have come to the help of Christian Scientists under very different circumstances from your elder brother, the Christian Science Journal. How well do I remember the days when the very helpful Christian Science Journal was very nearly the same size and form as you are. But oh, what hard struggles it had to go through to hold its own and gain circulation! There were then very few in the ranks of Christian Science who had inclination, or even ability, to help it. Its founder, editor, publisher, and owner, the Leader and Discoverer of Christian Science, Mrs. Eddy, had to do about all the writing for it. What little help she had from students in the way of furnishing matter for the paper she had in many cases to correct, and even prevent some articles being printed, because they were more a hindrance than a help to the advancement of the Journal. Of course there were in those days very few in the ranks of Christian Science, and the few who had the ability to write were not sure of their ability to write what such a journal needed to make the proper impression on the minds of the people. It was not because Christian Science was not old enough and good enough to do all the good that God intended it should, for, aside from the great demonstrations by its founder, Mrs. Eddy, there were then already many hundreds instructed, and not a few in the practice of Christian Science as healers, and the demonstrations of healing and reforming were good. But the Christian Scientists somehow could not talk Christian Science as they can now, mainly, I suppose, because there were not many sufficiently interested in Christian Science to listen to it, and also because in many cases it was for the good of the Cause, and for the Christian Scientists, too, not to talk it, but to *think*, to *act*, and to *live* it. In those days we had to use much care and judgment in talking and in practising Christian Science.

Object Lessons.

BY B. S.

WHO does not see in the innumerable objects around us some lesson both interesting and profitable? And a still deeper import it has for us when we come into (if but a little) of the understanding of Christian Science, and learn that what we see about us are types and figures of the real, and that just so far as our spiritual eyes are opened can we discern the true and eternal. A great, if not the greater, part of Jesus' teaching was through object lessons which emphasized the Truth he taught, thus bringing it to the comprehension of his hearers.

A thought came to me through a simple remark about a worm-eaten pear. I had been watching my sister preparing fruit for future use, when in picking up a worm-eaten pear she said, "When this gets into the fruit, it falls of itself." This started a train of thought in my mind. Falls of its own

Digitized by Google

volition, and that because of a foreign element entering in,—the parent tree did not cast it off, had nothing to do with the error or its results.

Let the foreign element of self, material motives, aims, etc., once take seeming possession of our minds, we separate ourselves from the consciousness of Light, cause our own darkness and its results. Abiding in Principle, we grow and become fitted for our work in the world of lifting humanity out of the darkness and discords of a belief of material existence into the knowledge of oneness with the great unchanging Principle, our Father-Mother God, and proving through this spiritual understanding and through demonstration the consequent falsity of an existence apart from God, the One All. And as we grow in understanding, we do have the proofs.

Divine Love gave us our much-loved Bible to guide us out of the tangles of false beliefs, and we did, at times, catch sweet glimpses of the real, and were uplifted, but were so clouded by materialism that it was almost a sealed book to us, and we worshipped we knew not what. Then was our need met again by infinite Love, who gave us Science and Health, our key to the Bible, which threw such Light upon its sacred pages that we caught a true glimpse of the Christ and our way out of darkness; and we know that through careful, earnest, and honest study of these books, and abiding in the Vine, every step can be taken, not in blind belief, but in understanding.

Is not our pure and earnest love for Jesus, our Way-Shower of centuries ago, our love and worship of our Father-Mother God, and our love and gratitude to our dear Leader but the natural outcome of hearts touched by Truth? Can we better show it than by living daily up to the Light given us for each day, destroying our own errors, and throwing light on others' pathway?

A Word from St. Louis.

BY L. W. TEUTEBERG.

THE thought has been with me for some time that it would be interesting to inform the readers of the Weekly that the text-book of Christian Science is in great demand at the Public Library of our city. This library now has *nine* copies of "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy. Five of this number were presented by students and friends of the Cause, and *four* were purchased by the Library Board of Managers.

This wonderful book is arousing public interest to such an extent that all of these copies are generally in circulation among the patrons of the library, and the writer has been told by the librarian and his assistant that those who ask for the book often find it impossible to get it, because the number of copies on hand is not sufficient to meet the demand. This need will be met by the addition of further copies.

The growing appreciation, on the part of the library managers and officers, of the works of the Discoverer and Founder of Christian Science, is also shown by the recent purchase of a copy of "Miscellaneous Writings," and the assistant librarian has stated that an effort would soon be made to secure for the readers of the library a copy of each of the other writings of Mrs. Eddy. It should be added that the Journal has also had a place for several years in the reading room among the periodicals of the library.

The Mercantile Library also has two copies of Science and Health.

The Journal and three copies of Science and Health are doing good work through the Jail Library, and two copies of the "little book" have found a place in the Poor House and one copy in the Work House.

From the above it will be seen that the good work is quietly going on, and that the cause of Christian Science is prosperous in our city.

A Kindly Tribute.

WHEN the Christian Science Weekly came, clad with beauty and freshness all its own, bringing joy and peace to all who read its precious pages, I resolved to help to cherish, feed, and clothe it with purest, loving thoughts gained from the study of Science and Health by our loving Mother, Mary Baker G. Eddy. I have never seen her, but her gentle kindness for man has touched and revived within me a higher hope, and because of this I love her, and try, with God's help, to prove the power of Love by healing the sick, through the teachings of "Science and Health with Key to the Scriptures."

For nearly five years I have worked in this city, devoting all my time to Christian Science practice. Divine Love has led me in paths before unknown. I was a year and a half trying to overcome poverty, and many a day five cents' worth of crackers was all I could buy. Many times I was tempted to go back and pursue my old trade, blacksmithing, and one evening I started out to find work in order to pay that which I owed.

After going several blocks I seemed to hear a voice saying, "Where are you going? Go back!" I turned and went back to my office, and to my surprise a gentleman met me at the door with a five dollar bill in his hand to pay for one week's treatment. I took it and went into my private room, fell on my knees and gave God the praise, and promised to never doubt His loving care again. This was three and a half years ago, and since then the demand has always been met and every debt paid by looking steadfastly to divine Love as the source of all supply, knowing that God's promises are true and sure to lean upon at all times. Having understanding of Good through Christian Science, enables me to help others out of failure in business, through having the current of thought changed to an immortal foundation, the Rock—Christ. I feel this will help some brothers or sisters, still in bondage to poverty to see their way out of darkness into Light.—*Henry D. Janes, Denver, Col.*

Our Christmas Tree.

IN my Sunday School class there are several little children who have recently come into Christian Science, and who were accustomed to having Christmas trees in their former churches.

While thinking of the glorious blessings which have come to the world through Christian Science, I heard two of the children speak of their Christmas celebration of last year. My heart went out to these little children in an earnest desire to show them that the true Christmas is far beyond and above anything that the world can give.

Then I pictured to them a Christian Science Christmas tree. It was a tree whose leaves will not fall, and one that can never lose its freshness, for it was the Tree of Life. This tree was fully lighted, not by flickering candles, soon to be snuffed out, but by the eternal radiance of divine Love. On the topmost branch was a star, not a poor little tinsel star, but the seven pointed star of purity which points the way. By its light we saw God's chosen One as our Leader and Guide.

There were most exquisite and imperishable gifts on this tree. Among them were found joy, peace, love, and the wonderful gift of healing. Our tree was for the whole world to enjoy. Each child could have all the gifts he would take, and there were enough for all.

The children were very joyful over our Tree of Life. One little girl said, "The old trees were trees of error, this is the tree of Truth." Another said, "There is no room for error on this tree."—*E. C. S., Boston.*

"Tell me, doctor, were you successful with that patient in the next block?"

"Partially so; I cured him, but I haven't succeeded in getting any money out of him yet."—Yonkers Statesman.

Testimonies.

In my early Science days, I was the manager when putting in a new stope for the purpose of bringing coal through. The timbers were four feet apart. One Saturday evening at quitting time we had about three feet of space, and the ground was frozen and quite safe. The following day it thawed some, and Monday morning I had the timbers ready to put in as soon as the three men would have the other foot of space. They had worked only a short time when the ground caved in, and so completely covered one man that it took the three of us fifteen minutes to get him out. The other men declared that the man was dead. I went to work with all the understanding I had to use the Truth as taught in Science and Health. It seemed quite a while before he began to breathe, at first feebly, then loudly, and finally so piercing was the noise that it drew the men from the old mine about one-fourth of a mile away. Of course, then all was confusion. The doctor came and said he could not live, but the man was able to work in a week.

About three months after this I was having an air shaft sunk. We were about fifteen feet down the shaft, when a large hickory club five feet long and as thick as a man's arm fell down and struck the man that was with me on the head. I took hold of him by his arms, placed him upright, his back against the side of the shaft, and all Scientists know what I did. To mortal sense this was the situation,—one man nearly killed, three men scared, and one Christian Scientist half a mile from a house. I said, "Send down a bucket and a rope to tie this man safely, and get him out of here." Then I went up next. I took him by his arm, led him under a shade tree, and continued declaring the Truth. In half an hour he was at work again in that shaft. In some way the news of his getting hurt had gotten to his wife, and she and the neighbors came over to see why we had not taken him home. Suffice it to say, they were surprised.

Thomas Phillips, Brazil, Iowa.

Two years ago I first heard of Christian Science. I was invited to attend a testimonial meeting, and I have been attending regularly ever since.

I want to tell of my first demonstration. I was put to the test after having attended but a few meetings. I had very little of the letter, having not as yet purchased a copy of Science and Health; but, happily, I was reading one that had been loaned me, and which proved to be indeed a "very present help in time of trouble."

One evening my son, who was then fifteen years old, ran into the house saying, "Mamma, now don't worry, God will heal this, will he not?" at the same time pointing to an ugly gash right underneath the chin, fully an inch long. The flesh lay about a half inch apart, exposing the bone, and the blood was flowing freely from the wound. He said, "I was running, and fell, striking my chin with full force on the curb-stone."

Then came the struggle within my own consciousness. Fear tried to prevail. Error said, "What will you do? You haven't sufficient understanding to treat, and as there is no Scientist near, you will have to send for the doctor." Then followed the thought of the doctor dressing the wound and the suffering connected with it. This turned me to God. I realized the Truth as best I knew how, and almost instantly the bleeding and pain ceased, and there was no more fear. The wound being filled with sand, it was necessary to wash it out, and this was done without the least suffering. Then it was tied up and left to Truth and Love. The healing was beautiful, for it was done in God's own way, and my heart was filled with gratitude for this proof of divine Love.

It has been my privilege since then to receive the class instruction from a loyal student of Mrs. Eddy. These teachings have many times enabled me to stand alone with God, and many beautiful demonstrations have been the result.

Julia D. Stiegler, Cincinnati, Ohio.

Seven years ago I was severely injured by a fall and sought medical aid. I was informed that I had concussion of the spine, and could not return to work. I suffered intense pain all winter and had constant headache and backache. The following spring I felt somewhat better and my physician recommended out-of-door employment, but I grew gradually worse. I was then put into a plaster-of-paris jacket, still no improvement. The pain in my head so affected me that I tried glasses. Eighteen months later I went to the hospital and was operated upon for stone in the bladder, but received no permanent benefit.

In the fall of 1897 I was prostrated with kidney trouble, and was attended by two doctors and a nurse. For three months I was unable to attend to business of any kind. In February, 1898, I tried light employment, still remaining under the care of a local physician, who finally informed me that I was incurable.

About this time I received a letter from a friend who had been cured by Christian Science, and was positive that I could be healed if I would give it a trial. I did not have any faith in it and thought it was all folly. The physician said that I would soon be paralyzed, as my left side was already affected. I then decided to try Christian Science and wrote to a healer in Brooklyn. She gave me absent treatment for nine weeks. I often became discouraged, and at times I was tempted to return to medicine, but when I remembered that I had received so little benefit from it, I clung to the Truth. When I had been under treatment six weeks, my friend who had recommended Christian Science returned home and encouraged me by constantly holding the Truth before me. Now I am well and happy, and have learned that Christian Science not only heals us, but teaches us how to keep well. In July we started meetings in our home, and have from three to seven in attendance every Sunday. Several have been healed through Christian Science.—*William Groeling, Middletown, N. Y.*

I never had good health, but my last sickness was caused by a fall which injured my spine and ankle. The injury to the spine was slow to develop, nothing seemed to cure my ankle, and in two months I was confined to the bed. Sometimes my brain was troubled, and I had such headaches that often I could not raise my head from the pillow without hurting my spine. Finally one doctor called it Bright's disease. I suffered more than ever from his treatment.

A year ago I heard of Christian Science, and it seemed the only thing left for me to try. I gave the healer to understand that I had no faith in Christian Science, but that seemed no obstacle to him. I had been confined to the bed for five months and was almost helpless. What relief came with the first treatment! That day I sat up while my bed was made, the next day stood on my feet, the third day I took a few steps, and in ten days I walked to the street and rode around town for an hour. I shall never forget the enjoyment of that ride. I limped a long time in walking, but gained steadily, and this week was told, "You walk as if you had good health." I said, "I am well, and I have no limp now." I have had no treatment for the past six months. Had two teeth extracted last week and they pained me very little. I thank God more and more every day for my little knowledge of Christian Science. It did not at first bring peace into my home life, but a sword. But peace has begun to dawn, and I know it will come in its full brightness.

Emma Harvey, Harcarden, Iowa.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid $3.18
Two to Twelve books to one address, each, Prepaid 3.00
Twelve or more books to one address, each, Prepaid . . . 2.75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid 4.00
Twelve or more to one address, each, Prepaid 3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid 5.00
Twelve or more to one address, each, Prepaid 4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid 6.00
Twelve or more to one address, each, Prepaid 5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (Cloth), each, Prepaid $2.25
Twelve or more books to one address, each, Prepaid . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid 4.00
Twelve or more to one address, each, Prepaid 3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid 5.00
Twelve or more to one address, each, Prepaid 4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

CHRIST AND CHRISTMAS. An Illustrated Poem.

Single book, Prepaid $3.00
Twelve or more books to one address, each, Prepaid 2.50

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half doz., $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price by mail, 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price by mail, 21 cents; $2.00 per doz.; prepaid.

Vol. 1 Boston, Mass., January 12, 1899. No. 20

Uniting Their Battle Plans.

No abler presentation of the problems confronting our Republic has been written than the thoughtful paper of Hon. Joseph Chamberlain, British Colonial Secretary, in the December Scribner's. It will be remembered that Mr. Chamberlain's wife is a brilliant American woman, the daughter of ex-Secretary Endicott, of Massachusetts.

From this excellent paper we make the following excerpts:—

In the course of the last few months a great and noteworthy change has come over the relations between the United States and Great Britain. It is a quickening of popular sentiment and a growth of mutual appreciation, which, in suddenness and strength, may, without exaggeration, be compared to an explosion.

No great gift of imagination is required to foresee the far-reaching and beneficent consequences that may result in the future from a cordial understanding between the two great branches of the Anglo-Saxon race. The conviction of the depth and sincerity of English feeling has at last struck root in the American mind. The old suspicions have been dispelled, and room is left for the display of a sentiment all the deeper because it has long been suppressed. The last state paper written by President Lincoln contained these words: "The interests of civilization and humanity require that the two nations should be friends. I have always known and accepted it as a fact, honorable to both countries, that the Queen of England is a sincere and honest well-wisher of the United States; and have been equally frank and explicit in the opinion that the friendship of the United States toward Great Britain is enjoined by all the considerations of interest and of sentiment affecting the character of both."

And similarly General Grant, writing from his death-bed the concluding passages of his Memoirs, leaves as a legacy to his countrymen this expression of his opinion: "England and the United States are natural allies, and should be the best of friends. They speak one language and are related by blood and other ties." And then he goes on to say, in words that have a special interest and application at the present time, "England governs her own colonies, and particularly those embracing the people of different races from her own, better than any other nation. She is just to the conquered, but rigid. She makes them self-supporting, but gives the benefit of labor to the laborer. She does not seem to look upon the colonies as outside possessions which she is at liberty to work for the support and aggrandizement of the home government."

In a recent essay on "The Control of the Tropics," by Mr. Benjamin Kidd, the well-known author of a work on "Social Evolution," he reminds us that the temperate regions of the earth are now practically appropriated, and that, owing to the improvement of transport and communication and to the diffusion of technical knowledge, the competing nations in these countries already possess little advantage one over the other, and are likely in the future to possess still less. The one great sphere of commercial activity which remains lies in the interchange of products between the tropics and the temperate regions; and it is this inheritance which is now the subject of the rivalry of nations.

An Englishman, accustomed all his life to the idea of a vast empire enjoying peace and prosperity under British rule, finds it difficult to understand the fear excited in the minds of many distinguished and patriotic Americans by even so small an expansion of the national mission as the recent occupation of the Hawaiian Islands. He knows the comparative ease with which his own gigantic task has been fulfilled, and he is unwilling to believe that the American, with greater resources, equal intelligence, and equal energy, will fail where he has succeeded.

The objections which are urged from the American standpoint are, in many instances, the same as those which have already been refuted by the results of his own experience. Thus, it is said that such a development of American policy will involve responsibilities which the country is unfitted to undertake, and will divert the attention of the nation from its domestic affairs and from the pursuit of its own material and moral interests; and especially that it will interfere with its special mission as the type and example of republican institutions. The Englishman believes, on the contrary, that nations, like individuals, cannot remain isolated without deterioration. The man who pleads the claims of his family as a reason for refusing all public work and repudiating all charitable obligations, is not usually a better husband or a better father than the good citizen whose purse is open and whose leisure is freely given to the service of the community in which he lives; and the nation which elevates selfishness into a virtue and shirks its responsibility to the other members of the human race is wanting in one of the principal elements of greatness. The absolute devotion of any people to its domestic politics narrows the issues of public life, gives to them a partisan and personal character, and tends to a provincialism of sentiment and aspiration. Greatness does not consist in growing rich and prosperous, and it is only by incurring responsibilities, by struggling with obstacles, by confronting dangers, and by conquering difficulties that men or nations justly win respect.

Copyrighted, 1899, by Mary Baker G. Eddy.

Digitized by Google

The object of the writer has been to point out the general nature of the forces which are at work and which tend to draw the United States, sooner or later, into a share of the great work of controlling and civilizing the Tropics; and to state the grounds for the belief that, when that time comes, they will perform the duty worthily and with honor and advantage to themselves.

It can hardly be necessary to say that the British nation will cordially welcome the entrance of the United States into the field of colonial enterprise, so long and so successfully occupied by themselves. There would be no jealousy of the expansion of American enterprise and influence; on the contrary, every Englishman would heartily rejoice in the cooperation of the United States in the great work of tropical civilization.

The pursuit of a common mission will gradually bind us together and lead to a better understanding. We shall find that our interests are identical, and, while we shall prosecute them separately, we shall inevitably be drawn into closer union if they are threatened or endangered. And in this way may yet be fulfilled the aspiration of the poet:

> When closer strand shall lean to strand,
> Till meet, between saluting flags,
> The eagle of our mountain-crags,
> The lion of our Mother-land!

Sovereignty Proclaimed.

America Officially Rules the Philippines.

THE following is an abstract of the instructions sent by President McKinley to General Otis, in command of the United States forces in the Philippines, to be proclaimed to the Philippines as expressive of the purposes of the United States with respect to them:—

The destruction of the Spanish fleet in the harbor of Manila by the United States naval squadron commanded by Rear Admiral Dewey, followed by the reduction of the city and the surrender of the Spanish forces, practically effected the conquest of the Philippine Islands and the suspension of Spanish sovereignty therein.

With the signature of the treaty of peace between the United States and Spain by their respective plenipotentiaries at Paris on December 10, and as the result of the victories of American arms, the future control, disposition, and government of the Philippine Islands are ceded to the United States. In fulfilment of the rights of sovereignty thus acquired and the responsible obligations of government thus assumed, the actual occupation and administration of the entire group of the Philippine Islands becomes immediately necessary, and the military government heretofore maintained by the United States in the city, harbor, and bay of Manila is to be extended with all possible despatch to the whole of the ceded territory.

Finally, it should be the earnest and paramount aim of the military administration to win the confidence, respect, and affection of the inhabitants of the Philippines by assuring to them in every possible way that full measure of individual rights and liberties which is the heritage of free peoples, and by proving to them that the mission of the United States is one of benevolent assimilation, substituting the mild sway of justice and right for arbitrary rule. In the fulfilment of this high mission, supporting the temperate administration of affairs for the greatest good of the governed, there must be sedulously maintained the strong arm of authority, to repress disturbance and to overcome all obstacles to the bestowal of the blessings of good and stable government upon the people of the Philippine Islands under the free flag of the United States.

Items of Interest.

Religious Freedom for Cuba.

The Catholic priests of Cuban birth are going to send a petition to President McKinley, asking him to remove the Bishop of Havana, who is a Spaniard, and appoint a Cuban in his place. They say that the Spanish ecclesiastical authorities have always treated with injustice the Cuban priests, who number only thirty-two in all the island, while the Spanish priests are counted by thousands.

A committee of these priests called on a reporter to show the petition that had been prepared, and to ask the help of the American press in the cause. It was hard to convince them that they should not address the President of the United States, but the Pope, who is the authority by whom Catholic bishops in Cuba will be appointed hereafter.

Their astonishment was great when they learned that under American rule religious freedom will be so absolute that the Bishop of Havana will have no more to do with the government than any other citizen in the island, and that there will probably be several Bishops of Havana, one for each important denomination of Christians.

The idea of close union between the Church and State is so deeply rooted in the Spanish mind that, notwithstanding these explanations, the correspondent's callers decided to send their petition to Mr. McKinley.—New York Sun.

The Journal has been informed by a personage in the suite of the ex-Empress Eugenie that, on the eve of her departure from England, in the early days of the Fashoda incident, the former empress called upon Queen Victoria. When she was about to take her leave, Queen Victoria said, "If war should break out between France and England, I would ask God to allow me to die before hostilities begin."

Boston seems to be growing more and more virtuous. According to the police returns, the number of arrests made in the city during the past year was 41,816, against 45,659 the year before, and 48,796 the year before that.

Boston Herald.

The city of Cleveland is greatly scared about something the doctors call smallpox. If the smallpox isn't there already it will surely break out before the doctors get through with it.—The Record, Winesburg, Ohio.

The cost of the Spanish war, including garrisons in the dependencies during the remainder of the present fiscal year, will probably fall within the limit of $250,000,000.

The gold production for the past year was nearly $300,000,000. The United States contributing $67,000,000 of this amount.

Six regiments have sailed for Manila to reinforce General Otis.

A Prophecy.

I CHANT the world on my western sea.
I chant copious the islands beyond, thick as stars in the sky;
I chant the new empire grander than any before, as in a vision it comes to me;
I chant America the mistress, I chant a greater supremacy;
I chant projected a thousand blooming cities yet in time on those groups of sea islands;
My sailships and steamships threading the archipelagoes.
My Stars and Stripes fluttering in the wind:
Commerce opening, the sleep of ages having done its work, races reborn, refresh'd,
Lives, works resumed—the object I know not—but the old, the Asiatic renew'd as it must be,
Commencing from this day surrounded by the world.

Walt Whitman.

Miscellany.

Address of Judge Day.

In an address at his home, Canton, Ohio, Judge Day, president of the Peace Commission at Paris, said:—

"If I were called upon to state the most gratifying circumstance of our foreign relations during the war, it would be in the uniformly cordial and hearty friendship of the English before and during the struggle. Observing the obligations of neutrality and never stepping outside the requirements of international law, we had the sympathy and good will of that great power.

"I do not believe either nation seeks or would be benefited by a formal alliance. Nevertheless, the existence of cordial relations between people kindred by blood, speaking the same language, and having the same ideals of civil liberty and good government, is a fact the potency of which can hardly be overestimated.

"It cannot be a matter of regret to any American that the rising sun of the new year beholds the ensign of our glorious republic floating from the walls of Morro, where for so many years the royal banner of Spain has looked down upon so much corruption, misery, and shame. To-night not one foot of American soil remains under Spanish domination, and the people so long oppressed are to have a new birth of freedom."

A Notable Message.

We gladly commend the annual message of Boston's progressive mayor, Josiah Quincy, who fills the place so ably occupied by two of his illustrious ancestors. The message is largely filled with that which pertains to the higher life of the metropolis. He commends the erection of new school buildings and the expenditure of large sums of money for educational purposes. He speaks of the Public Library as being a great system of libraries, and tells us that over two million persons entered its various departments and one million books were issued to card holders for use at home. Almost any day seven hundred readers may be found in the central library building.

He approves free public lectures, and the establishment of a Music Department, which is unique in the municipal government of this country. He informs us that Boston is the only American city which has placed Art upon the same basis with other municipal work.

He is hearty in his approval of the bath department, and tells us that there has been an attendance upon public baths in the past year of over one million nine hundred thousand bathers.

He commends vacation work for children, and heartily encourages the comprehensive system of playgrounds which the city has adopted.

The mayor believes that the interests of the city are largely advanced by seven unpaid Boards, composed of many citizens who have been enlisted in advisory capacities, which is an important feature of Boston's city government.

Although this all is of a local nature, we deem it worthy of attention, because of its exceptional high character, and the progress in character of the advanced methods of municipal government.

Behind the Times.

President Harper of the University of Chicago in his last convocation report has something of interest to say upon the subject of theological education. He places himself squarely against the entire American system, which he declares to be of a type unequal to the demands of the time, and which must undergo complete renovation and re-adjustment before it can properly discharge its obligations to society. He says:—

"The theological seminaries are not in touch with the times. They do not meet the demands of the times. They are not preparing men for the ministry who are able to grapple with the situation in which the Christian Church to-day finds itself. A new order of things is demanded, and the indications seem to point to the introduction of this new order of things in the opening years of the coming century, but meanwhile we are drifting, and precious time is being lost."

It is interesting to note that this opinion, held by a most distinguished authority on the inside, is identical with that expressed by a great variety and number of observers on the outside of theological circles.—Toronto Globe.

Professor Booker T. Washington on the Race Problem.

Gentlemen and ladies, friends of humanity; raise yourselves above yourselves, above race, above party, above everything, if you can serve the highest welfare of ten millions of my people, whose interests are permanently interwoven by decree of God with those of sixty millions of yours, and seek with me a way out of this great race problem; find any method of escape save that of patiently, wisely, bravely, manfully bringing the southern white man and the negro into closer sympathetic and friendly relations through education, industrial and business development, and that touch of high Christian sympathy which makes all the world akin —find any way out of our present condition save this, and I am ready to lay down all my plans and will follow where you lead.

There is further encouragement in the fact that, almost without exception, North and South, between both races, there is an agreement that what the negro most needs is education. As to the form of education in the South, we of both races have grown to the point where practically all are united in the opinion that just now industrial education, coupled with thorough religious and academic training, without circumscribing the ambition and inclination of those who have the means to secure what is regarded as the higher education, is now most needed. This industrial training will teach the negro thrift, economy, and the dignity of labor, and will soonest enable him to become an intelligent producer in the highest sphere of life—a property holder, a larger taxpayer, a greater commercial factor—that will enable him to knit himself into the business life of the South.

The Product of Human Opinions.

As an illustration of the vagaries which are the product of mere human opinion divorced from divine revelation, we print the following, taken from a new opera about which the world of human opinions is making much ado.

"I am," exclaims the Sun, "I am Life! I am infinite Beauty, Light, and Heat. Love ye one another, O Things! I am the God of to-day and of yores love ye one another! I am Love. Through me birds sing, flowers possess perfumes and charm; dawns are colored with pink, and Things palpitate. In my beaming rays Men calm their troubled souls. I am the everlasting Charm; it is I who wipe away men's tears and assuage their pain—I it is who, with law of Equality, give Hope that revives all hearts. I am the Cause of the World; I the Reason of the Heavens! I shed my light equally over Kings and over you, Iris! Compassion is of my essence, and Eternal Poetry, and Heat, and Light, and Love!"

Attention! New Subscribers.

Attention is called to the fact that there is now no special price made for the Weekly when subscribed for in connection with the Journal, as was done previous to the enlargement of the paper. The prices which now govern the Weekly will be found on page four.

Entered as second-class matter.

Editorial.

One Cause of the Church Depletion.

A RECENT number of the Interior, a leading publication of the Presbyterian Church, published in Chicago, contains a very interesting article entitled "One Cause of the Church Depletion." The article commences thus:—

"Attention has been called a number of times to the disparity between the number of additions to the church and the net increase. Where is the large leak through which thousands of members disappear? It is not in the death rate, nor in dismissals to other churches. Inquiries come to us for an explanation of these mysterious disappearances.

"At the same time, from all parts, especially in the cities and towns, come reports of the inroads of Christian Science upon our churches. Presbyterians and Baptists appear to be suffering more from it than any others. Ministers are astonished and grieved to find that some of their choicest minds and best people are affected by it. Sooner or later they quietly drop out of the churches—vanish, leaving no trace. Those people are no zealots, nor fanatics. They are quiet, and reserved, disposed to avoid attention and to escape even the shadow of a 'scene.' "

The above frank admission on the part of the editor of the Interior, although brief, contains volumes of food for reflection. That which leads from the churches its choicest minds and best people surely has some attractive potency. It is not strange that ministers who resolve things from their own peculiar theological standpoint should be astonished and grieved at the loss from their flocks of their choicest minds and best people. Nevertheless, is it wise and just for them to conclude that, because this class of people, or any good class of people, are leaving their churches, that which draws them away therefrom is a something wrong or delusive? Would it not be the part of ordinary caution to seriously consider the question in all its lights and shades, and determine, if possible, whether there is anything within the churches or their systems from which these persons are withdrawing themselves, to warrant their action?

It would be a reflection upon the intelligence and honesty of purpose of the class referred to, if it were assumed that they are being drawn away by another system unworthy or valueless. It would seem that, in view of a movement from or out of the churches which takes on almost the character of a stampede, the clergy and others interested would awaken to the fact that there is something lacking, either in the religious system of which they are adherents, or in the conduct or promulgation thereof.

The article continues:—

"An instance is this: A man of great intelligence and influence found himself under a dire weight of business anxiety and danger. It oppressed him by day and bereft him of sleep by night. He attended a Christian Science meeting, and the load fell off him, as by the touch of magic, not in changed conditions, but in mental emancipation. He was cured of his despondency and forebodings, and he attributes it to Christian Science."

This incident, thus naively stated, surely must address itself to the ordinary man in a favorable light. The beneficiary mentioned, no doubt, was clearly convinced that by some process, perhaps then unknown to him, a single meeting of Christian Scientists had done for him what his entire experience in his old church had failed to do. Ordinary reasoning, or reasoning divorced from theological bias or preconception, would declare the accomplishment of this mental emancipation to have been a most worthy act. The average on-looker would naturally expect all friends of the gentleman thus happily released from bondage, not only to congratulate him thereupon, but to at least respectfully regard the cause producing such a result.

There is no greater foe to success than despondency. This is especially true of business men. To cure them of this mental ailment must be regarded by all unbiased and unprejudiced people as a commendable thing.

It would seem as though non-Christian Scientists who are of a philosophical turn of mind, would be ready enough to say that such curative means are deserving a full recognition, and a system having for its purpose the effecting of such cures, worthy of investigation. But how does the author of the article in the Interior undertake to account for so satisfactory a result? As follows:—

"It was, in fact, the operation of a very simple principle in human nature, but one upon which, unfortunately, all medical and all religious quackery depends. It was the false factor in the old-fashioned religious revivals. The revivalist exerted all his powers to terrify, depress, and reduce his hearers to a condition of spiritual despair. That would hold for a day or two perhaps, when it would break, and there would be a mental and physical rebound. The 'convert' would shout 'Glory!' spring to his feet and make demonstrations of joy—and in a week be back at his meanness.

"Every person of sensitive and highly strung nervous organization goes through this experience often. The gloom gathers and the weight increases, becomes black and almost crushing, when suddenly, upon the most trivial and inadequate cause, he or she is a winged bird, up in the sunshine. If that resilience did not exist in human nature, there would soon be but two classes in the world: stolid, phlegmatic, and rather stupid people—and maniacs. Life protects itself in this and in every way. The healing power of nature is constantly exerted upon the mind and upon the body. The vigor of the bodily functions is employed in healing the mind, when weak or hurt; and the mind employs its virtues for the healing of the body. But for these complementary healing forces, mankind would become extinct."

This is what may be called a religio-philosophical attempt to explain the phenomenon in question. Doubtless it is satisfactory to its author. To one who has made the slightest intelligent study of mental philosophy or metaphysics, it

Digitized by Google

seems wholly wide the mark. It is neither our office nor our purpose in this article to go into a dissertation upon mental philosophy by way of answer to the deductions of our editorial friend. We cannot refrain, however, from calling attention to the studious manner in which he has avoided attributing to a power higher than the human any connection with the case of cure referred to. In other words, God is carefully excluded from the premises. The phenomenon, in the view of our friend, must be accounted for independently of divine Mind, and relegated solely to the realm of the human or mortal mind. May we not reverently suggest to our friends of the orthodox churches, who are so troubled over the loss of their membership, that this cold and cruel attitude toward omnipresent Love explains the apparently sad lack in their churches? Our orthodox friends are ready enough, under conditions which to them seem favorable, to admit the presence and power of the Holy Spirit. If the result in question had been produced at a meeting held by Presbyterians, they would doubtless have freely acknowledged divine intervention in the case. But because it occurred in what they are pleased to call a non-evangelical church, the religious element must be carefully avoided, and only poor, human measures admitted.

Our friend says, "but for these complementary healing forces, mankind would become extinct." That is, we understand him to say, but for the natural forces mankind could not live. This is a declaration that man's existence is dependent on the forces of nature. His life is derived from nature, a nature entirely apart from God, therefore nature, not God, is the author of his existence,—his Father. Is this Scriptural doctrine? Does the Bible so teach? What earnest student of the Bible can truthfully and consistently answer, yes? From the Christian Science standpoint, such a conception of the origin of man is grossly pantheistic. It is material, not spiritual, philosophy.

Ah, but says our good friend:—

"We do not deny that a sudden acceptance of the love of Christ may bring sudden joy, but we never had much faith in that kind of conversion. The Holy Spirit sanctifies. The divine Life grows like a mustard seed. A grain of seed corn does not break into stalk and tassel and milky ear in one minute. The consciousness of the indwelling of the divine Life is quite a different thing from its implanting. It may be growing and even fruiting heavily for years, unknown to the happy possessor."

In this we agree with our friend. The sudden relief from mental depression of the gentleman whose case we are considering, while happy in itself, was not to him a release from all mortal bondage nor the cure of sin. It may have been, and doubtless was, a turning point in his career, which followed, will lead to the sanctification of the Holy Spirit, or, in other words, to the ultimate overcoming of all sin or release from all mortal bondage. If he will investigate Christian Science in a truly Christian spirit, reading Holy Scripture in the light which shall be revealed to him thereby, he will be enabled to work out his own salvation, as we are taught by Scripture all must do, under divine guidance, and by aid of the Holy Spirit.

Our author continues:—

"It is no reproach to the pastors who inquire of us what they shall do to protect their people from this delusion. They have found that argument has no effect. It is quite natural that they should suppose that a delusion which contradicts every fact of reason and of common experience needs only to be seen clearly to be rejected. Where they are young ministers, their training has been away from the exigencies they meet in their work. While not professing special knowledge on this subject, yet on the principle that a dim light is better than none, attention is asked to some facts of observation.

"We have knowledge of two great churches, each of which have distinguished and able pastors, both of them conservative in doctrine. One of these churches has not lost a member to Christian Science, while the other is riddled by it, and if the process be not arrested will be destroyed by it. Here is a contrast which invites study. One would say that the causes must be apparent, and we think they are. The pastor of the exempt congregation is a man of tender sympathies, of skill in winning confidence, and of knowledge in healing hurts of the mind. The other depends upon his intellectual brilliance, upon his 'backbone,' upon his power as a champion of the Truth. The one pastor shepherds his people and holds them; the other dazzles, domineers, and loses them. We can ourselves, by knowing the general conditions of a congregation, tell whether it is immune from or hospitable to the delusion. How much more thoroughly do those know whose business it is to proselyte?

"The remedy then is in pastoral care, and in that only. But what kind of pastoral care? A social call, a pleasant meal, manifestations of good will? It is not in these. It is in diagnosis—in knowing what is wrong and in applying the correctives and the balm of the Gospel. As the physician must depend upon the health-giving forces of the body, so must the pastor depend upon the virtues of the mind. He must find his lifting fulcrum in the conscience, which testifies to the reality of sin and the judgment to come. He must practise that art of 'faith-healing' and of mind-healing himself—that is, administer the cheer and happiness found in fellowship with Christ, and do what he can to dissipate the delusions of the mind in imagining disease. He will find the natural reactions ready to spring up at his touch."

Here, evidently, our friend is making the best effort possible to him to be a Christian Scientist. He borders close upon the teaching, in at least some of its aspects, of the Christian Science text-book, "Science and Health with Key to the Scriptures." Now, if the above results were accomplished within the Presbyterian Church, they would be in accordance with reason and good sense and the teachings of Christ, but the same result having been accomplished by Christian Science, it is stigmatized as a delusion, unnatural, and outside the realm of Christianity. This would seem to be the true logic of the article in question.

Christian Scientists are not proselyters. Our friend is entirely mistaken. Only as investigators of the subject, in the quiet and unobtrusive manner set forth by our editorial friend, become deeply convinced of the truth and Christliness of Christian Science teaching and practice, do they turn away from the old systems and methods of teaching the Scripture. They are impelled thereto by a power higher than themselves. They become so deeply imbued with the knowledge that, through Christian Science, they are hearing the voice of God, as to leave them no choice. This is why "argument has no effect." It were impossible for them, after seeing and knowing the true Light, to return to the obscure light out of which they have emerged. Our friend's attempt to make a diagnosis of the motives and mental condition of those leaving the old church and adopting Christian Science, in view of the certainty of their own knowledge and experience, will be read by Christian Scientists with feelings of mingled amusement and pity.

Digitized by Google

Here is what is stated:—

"The process of proselyting is the same in everything good or bad. The first thing to be done is to establish in the mind of the intended convert or victim, as the case may be, confidence in the superior knowledge or power, or both, of the manipulator. In this particular business, the first thing which he or she does is to make a correct, or at least a credible, diagnosis of the mental condition, a simple matter of guessing around a limited circle of possibilities, and recognizing the fact when the right one is hit upon. The victim is surprised at this seeming acquaintance with what was supposed to be hidden. There is the superior knowledge. Only one thing more is needed to make the convert. A superior but benevolent smile, a caress, an assurance that the trouble is only a figment of the mind, and the resilient spring is released—there is sudden exhilaration and joy—so there is the manifestation of power."

How pitiable is human wisdom in its efforts to explain divine phenomena! If our good friend would make but a casual investigation of the teachings of Christian Science, he would surely not refuse to correct this last statement by blotting it all out.

May the time speedily come when professing Christians, and especially professional expounders of Holy Scripture, will be able and willing to recognize God as an all-powerful Force and Presence, instead of a far-off, inscrutable personality.

Important Use of Literature.

EXCELLENT use is being made of our literature in distributing it at the close of the lectures—the Christian Science Weekly, Answers to Questions, Healing through Christian Science, The Christian Science Movement, etc., are eagerly sought by the public, are carried home and read thoroughly. It is clear that there is a great desire on the part of all honest thinking people to know just what Christian Science is. No one comes to the lectures without some considerable interest in the subject, and experience proves that nearly all are glad to obtain the definite information which our publications contain concerning our cause. We are sure that more and more, this method of reaching the people will be employed.

Questions and Answers.

What does the Christian Scientist mean by saying that evil is nothing and devoid of power?

Light (to our sense) is something, it is reality, it is cause, it gives greenness to the leaf and color to the flower. Darkness is the absence of light, it is light's opposite. In itself it is not a something, it is not a cause, it is but the absence of *the* some-thing, light.

"But," says a mistaken one, "it seems real, and if a plant be left in the dark, it loses its color and becomes pale and sickly, therefore," says this deluded person, "this shows that darkness is some thing, and is a power which causes the sickness of the plant." One, however, acquainted with physics says, "Light is the cause, green the effect. The lack of green is not due to darkness, but to the absence of this cause, the light. When the cause or light goes, then the effect or color goes."

"But," says our mistaken one, "if a child be left in the dark, often it is tormented with visions of ghosts and bears, and has fears which sometimes result in sickness. Now, does this not show that sickness was caused by the darkness, and that darkness has power to produce sickness?"

No, not at all, for the only ghosts and bears are those of the child's false belief. Let the truth appear that God is with him always, and then the mistaken child sees that the only power darkness has is the mistaken and false power which his ignorance has given to it.

Now, as of the light so of Good or God. Good or God is *the* something, *the* reality, *the* Cause, and the only *Cause*. This Cause "giveth to all life, and breath, and all things" (Acts, 17 : 25).

As darkness is the absence of light, so evil is the absence of Good, it is Good's opposite. In itself it is not something, it is not a cause. It is but the absence of the some-thing—evil then is no-thing.

"But," says a deluded one, "evil seems real, and if a human being be left in evil he loses his Good and becomes sinful and sickly. This shows," says the deluded person, "that evil is something and causes the sickness." One, however, acquainted with metaphysics, says, "Good is the Cause, health the effect. The absence of health is not due to evil, but to the absence of the Cause, Good. When the Cause or Good goes then the effect or health goes.

Let one go into the dry goods business, and in beginning business there goes up the sign. When one goes out of the dry goods business down comes the sign. The empty room is not the cause of the removal of the sign. The cause of the absence of the sign is the absence of the business. The greenness of the plant is the sign that it is doing business with the sun. Let the plant go out of business and it takes down the sign.

So of health and harmony. These are the signs that one is doing business with the only Cause, God or Good. Let one go out of business with this infinite Good, and the signs, health and harmony, are removed. The absence of these signs we call sin and sickness. They are nothing in themselves, they testify to the absence of the real things, health and harmony.

It is quite plain, then, that evil is only so much of a power as one makes it. The fear and torment supposed to be caused by evil are due to false belief. Let the Truth appear that God is All-in-all, that "in Him we live, and move, and have our being," and the deluded one then sees that the only power which evil has is the false power which his ignorance has given it. Says John, "There is no fear in love; but perfect love casteth out fear: because fear hath torment." This view of the no-thing-ness of evil Christ Jesus takes in John, 8 : 44, when he defines it as a liar, for a liar is one who would make something out of nothing. All of which Christian Science makes so plain that through its understanding the sense of sin and sickness vanishes, and health and harmony appear, thereby proving evil to be nothing and devoid of power.

Is God Ignorant of Evil?

As a corollary to the truth of the no-thing-ness of evil, sin, sickness, and death, is the logical inference that God sees not, knows not, evil nor your disease. We are helped to realize this by remembering that light cannot find, cannot know, darkness. Light is some-thing; this *some*-thing, then, cannot be on speaking terms with no-thing. Darkness is the absence of the real thing, light, therefore it is no-thing, where the light goes the darkness vanishes. It is plain, is it not, that where the real thing is, there cannot be its absence?

Now it is written, 1 John, 1 : 5, "God is light, and in Him is no darkness at all." Changing physics to metaphysics we have,—God is *some*-thing, the something cannot be acquainted with the no-thing. Evil is the absence of the real thing, God. Does it not follow, then, that where the real thing is, there cannot be its absence, evil. Wherefore, is not the conclusion logical as well as theological, that God cannot know His absence, to which such names have been given as evil, sin, sickness, and death?

Light Destroys Darkness.

DARKNESS keeps millions of miles away from the sun. If the rays of light which that orb sends out into space, were shortened or withdrawn, the darkness would creep closer and smother out the great light of day. But the sun shines and its bright sentinels hold darkness at bay.

Jesus told his followers to let their light shine before men and again he said: "For every one that doeth evil hateth the light, neither cometh to the light, lest his deeds should be reproved. But he that doeth truth cometh to the light, that his deeds may be made manifest, that they are wrought in God."

In Christian Science we learn that this light of our life, which is so often spoken of by Jesus, is the reflection of divine Love. We learn that God as divine Love is reflected in love, and that when we are not reflecting Love by loving our fellow men, we are in spiritual darkness.

If our hearts overflow with pure affection from the source of all purity and light, God, who is divine Love, we send out loving thoughts as sentinels, which meet and conquer malice and hate before they reach us, and this is practical Christian Science. As darkness vanishes when the light appears, so impurity, hate, malice, and selfishness depart into their native nothingness when the light of Love appears, "For every one that doeth evil hateth the light." When these evil manifestations step aside, the light of Love shines directly on the true man, who stands revealed as the living expression of all that is fair, beautiful, pure, and good, for "he that doeth truth cometh to the light, that his deeds may be made manifest, that they are wrought in God."

If the sun feared the darkness and should try to keep itself hidden, it would be doing just what would give victory to darkness. The safety of the sun is in boldly shining. If a man fears evil in any of its forms, be it hate, malice, lust, dishonesty, or drunkenness, he is gathering the darkness of evil close around him, which not only prevents his own light from shining, but seemingly puts him beyond the reach of the light reflected by others.

If your light be one candle power, let it shine and it will grow brighter and brighter until it shall illuminate the way for countless thousands. If you only feel sure of having one good quality, manifest it and other good qualities will troop forth to keep it company.

If a man fears malice, evil speaking, or any other evil, and personifies them, he is joining in a conspiracy against himself. If then he tries to hide from this enemy of his own imagining, he is actively fighting against his own peace. Love overcometh hate, and if one keeps on reflecting love, he is clad in armor that hate cannot penetrate and his own fear—which was the actual progenitor of his disquieting visions—will be destroyed, for John says that in perfect love there is no fear.

In the wilderness, where wolves lurk, hunters feel safe at night if the camp-fire be kept in a bright blaze. Wolves fear the light and stand aloof, hoping for the light to go out. The darkness of worldly mindedness is inhabited by fears, the ravenous beasts of prey which are ready to destroy our peace if we wander into that condition of thought and let our light go out. The only safety is in loving more for every hate.—Denver Republican.

The Doom of Physiology.

BY WALDO PONDRAY WARREN.

MUCH there be that is called wisdom, which is but the opinions of men; much that is called good which bears evil fruit; much that seems to be Truth yet savors of unholy things.

Physiology is a wolf in sheep's clothing—a "way which seemeth right unto a man, but the end thereof are the ways of death." It inculcates a theory from which grow practices that mock manhood, traduce innocence, sneer at the might of intelligence, and enthrone relentless tyrants as rulers of men.

Where volumes could be written, a paragraph must often suffice; yet if that paragraph be truth, it will some day overthrow countless volumes which speak not the truth.

Physiology, as it has been taught for centuries, treats of man merely as a mass of matter, ignoring his mental and spiritual manhood, and by virtue of its silence declares these sublime realities to be false.

Who has learned of physiology that Man is a little lower than the angels? of his relationship to his Maker? of his latent possibilities? of his character? of his genius? of his intellect? of his love? of his real life—the sustaining principle of his being? Can a system which claims to tell us of Man, yet knows nothing of his higher nature, be trusted to teach us concerning any part of him? And if it ignores the highest and best, does it tell us truly of Man? And if it speaks falsely of Man, certainly to accept its testimony concerning him were not wise; and to regard man as physiology teaches us to regard him, would shut off from our view all that is good and great in manhood, and rob us of the Truth of Life. Misunderstanding ever works ill to us; and misunderstanding the very nature of our being is that which works the evil of evils, and is the cause of every discordant condition in our lives.

Some day those who now would teach us will learn that man is more than matter; and when they learn this grandest of truths, physiology will become obsolete, physicians will be needless, surgeons will find better employment, hospitals will no longer be necessary,—and methinks millions and millions of unmade graves will wait in vain for immortal Man.

Church By-law.

THE Board of Lectureship is not allowed in anywise to meddle with or to disrupt the organization of branch Churches. The lecturer can invite churches within the city whither he is called to unite in their attendance on his lecture, and so make for their churches a less lecture fee. But the churches are the parties to decide this action.

As a rule, there should be no receptions or festivities after a lecture on Christian Science. But there may occur important exceptions. If there be an individual who goes to hear and deride Truth, he should have the chance to go away prepared to discern it; and he who goes to seek Truth, should have the opportunity to depart in quietude to find it.

The Board of Lectureship.

IN response to inquiries, we would state that the district embraced in the Middle Section of the lectureship territory includes the States of New York, Pennsylvania, Delaware, and New Jersey, and the Province of Ontario west of the city of Kingston. The lecturer is Mr. Carol Norton, and his address is 170 Fifth Avenue, New York City.

Notice.

WILL the applicants for the degree of C. S. D. of the Massachusetts Metaphysical College, please note, that I specified the application must be made according to the By-laws of this College. These By-laws require two courses under the auspices of this College before this degree is conferred.

In November, 1888, the following notice appeared in the Christian Science Journal. "Hereafter no students can be admitted to the Massachusetts Metaphysical College Normal Class, who have not passed through the Primary Class."

MARY BAKER EDDY.

New Church is Dedicated.

THE handsome new place of worship of the First Church of Christ, Scientist, at Ninth Street and Forest Avenue, was dedicated with imposing services on Christmas day. The day was chosen as the most appropriate, being the one on which the Christian world celebrates the birth of the Saviour. There were three services yesterday, at 11 A.M. and 3 and 8 P.M. The same programme was rendered at each service.

The church was crowded at the opening services yesterday. Many quiet, but fervent, murmurs of appreciation were heard as the members of the church saw the beautiful auditorium for the first time.

The new church is of the early English type. The exterior is massive and simple, and with its beautiful interior makes one of the finest church buildings in Kansas City, or in the West for that matter. All the exterior walls are of white limestone. The stones have rough, or rock faces. The openings are toned down in roughness by moldings, and the whole has the effect of strength and ruggedness. At the northeast corner of the church is a heavily buttressed tower, rising seventy-five feet above the sidewalk. At the northwest corner is a smaller and lower tower. The larger tower will have a set of chimes. Between the two towers is an arched logia, forty-two feet long by twelve feet wide. It is intended more for an exit than an entrance.

The auditorium of the church is a grand room, one hundred feet long and sixty feet wide, with an unbroken height of forty-two feet. A gallery extends around three sides of the room. The platform for the readers and the choir is at the south end. Behind this is a grand organ, and on either side in the rear is a room for the choir and the readers.

The roof of the auditorium is supported by semi-circular arches of strips of oak, and the ceiling is of highly polished wood. The ceiling between the beams is stained yellow, while the plaster above the wainscoting is colored red, giving an impression of warmth and harmony. The building was designed by Architect George Mathews, and is intended to embody the Christian Science faith in simplicity, truthfulness, and harmony.

The church, including the organ, cost $50,000. Ground was broken for the edifice in May of 1897, and Christmas day, 1897, the corner-stone was laid.

Mr. Alfred Farlow, first reader of the Christian Science society, stated that the church was dedicated without a cent of indebtedness on it, and that there was money enough on hand to pay for everything necessary.

Mr. Farlow read the following telegram from Rev. Mary Baker Eddy, founder of the society:—

First Church of Christ, Scientist, Kansas City, Mo.

Concord, N. H., December 25, 1898.—Beloved Brethren: My heart greets you with Christmas joy. Continue, fellow-worshipers, vigilant in that whereto God calleth thee. Unity imparts the spirit of the trinity. Opinions of men are not substitutes for Science. Be patient with misjudgment. Christ Truth overcometh error. To-day is to-morrow understood. Love maketh right prosperous. Pure hearts and clean hands upbuild the cause and Church of Christ, Scientist. Have one God; live in conformity therewith, obedient thereto, governed thereby. With Love, Mother,

MARY BAKER EDDY.

The address delivered by Alfred Farlow, C. S. D., was as follows:—

There could be no more fitting day for the opening service of this church than the day on which we celebrate the birth of Jesus, the great and perfect example for mankind. The occupancy of this substantial and beautiful structure on the anniversary of the birth of Jesus may be recorded as an important event in the annals of time. Each successive new year brings its new unfoldings to bless mankind.

Some may ask, "Do Christian Scientists believe in Christ, and do they claim any benefit to the world through the birth and life of Jesus?" We venture to say that the birth of Jesus means more to Christian Scientists than to most Christians. Why? Because the outcome of this wonderful birth is more to the Christian Scientist. The birth of Jesus was the birth of Christianity, the beginning of the Christian era. His life in the flesh, made possible by his birth, proved that mortal existence and its attending ills could be overcome by the divine Power. The sum total of Jesus' experience, including his birth, his life in the flesh, and his ascension was a briefly prolonged demonstration by which every mortal law and every material claim was overcome by the divine impulse. All that this material existence claims concerning life, substance, and intelligence, the life of Jesus proved to be false.

The study of his life convinces us that existence, sustenance, and all things that belong to man are dependent upon the divine Power, and that matter or material law can neither give nor take life. This understanding sets us to work on the solution of the problems of life from a spiritual standpoint, and this results in the discovery that life, substance, and intelligence is God, and man is His reflection or manifestation. This discovery constitutes the birth of Christian Science. By this we note the relationship between the birth of Jesus and the birth of Christian Science, and how the birth of Jesus was essential to the final revelation of Christian Science.

The life of Jesus proved that there was an unseen power which he declared was Spirit, and by means of which he overcame every ill of the flesh, and even the flesh itself, thus proving the truth of his words, "The Spirit alone giveth life; the flesh profiteth nothing."

He not only healed the sickness and sin of the people of his time, but he overcame for himself, and in the presence of mortals, every material law, and proved the absolute supremacy of Spirit, while his life of perfect self-immolation, understood, reveals the fact that the principle which actuated him was Love. If Jesus had not been born in the flesh, he would not have demonstrated the true theory of life by his works. Mortals needed to know the possibility of the works, that they might have sufficient encouragement to search for the way. Jesus proved what could be done, Christian Science shows how.

As Christian Scientists, we may celebrate with greater interest than ever before the birth of the great demonstrator of Truth. Our hearts are filled with gratitude for all the blessings of this day. All glory and praise is due to our heavenly Father, the All-wise Intelligence, the author and finisher of all things, yet we must "render unto Cæsar the things that are Cæsar's."

"He that honoreth not the Son honoreth not the Father who hath sent Him." If we honor not God's children, through whom He gives the blessings of life, we do not rightly honor God. I believe we might safely say that nine-tenths of the people who worship with us to-day owe their present health and prosperity to Christian Science, and in acknowledgment of the great benefit derived from it our hearts are filled with gratitude to our Mother in Israel, the Rev. Mary Baker Eddy, Discoverer and Founder of Christian Science, to whom we owe more than to any other earthly friend.

Digitized by Google

In building this house we have spent two years of toil and a few thousand dollars, but that out of the strength, vigor, and prosperity afforded us through this blessed Science. Ours is a poor sacrifice compared with that of our Mother, who has toiled in the heat of the day and has gone over her long journey alone. Even now, though we would, we can scarcely offer relief to her cares; for while we ought to be men, we are still babes.

Base indeed would be our ingratitude if we should not rightly estimate the character and mission of Mrs. Eddy, her relation to Christian Science, and what she has done and is still doing for mankind. We have no greater proof of what can be accomplished and attained through Christian Science than that which we witness in the life and conduct of this remarkable woman. If the reports concerning her wonderful wisdom, goodness, meekness, self-sacrifice, and love be not true, then Christian Science will not do for mankind what it claims. If the Founder of this Science, who understood it better at her discovery than her most advanced students now do, has not attained much of what Christian Science promises after thirty years of faithful work under its influence, Christian Science is a failure, and our effort to lead our neighbors into it is in vain. We do not hesitate to say that all we have heard is true, and the half has never been told. The students of Christian Science have learned by experience that what our Leader gives out as advice, admonition, or instruction is no uncertain sound, but the clear sense of right, which she has tested before giving it to others. And we have always succeeded when we have followed her instructions. For this reason we seek her advice as a child would seek the advice of its mother.

Only a few years ago Mrs. Eddy would sometimes wait for days to find one individual who would give ear to this Science. To-day the ranks of Christian Science will outnumber some of the oldest church denominations. The presentation of this building to the public of Kansas City is a good argument in favor of the growth of our cause in this place.

The Christian Science text-book, "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, has reached its one hundred and fifty-fifth edition. This means one hundred and fifty-five thousand copies in circulation. Granted that each copy is read by five, the number of the average family, there are seven hundred and seventy-five thousand people studying this book. In view of these facts, do you wonder that Christian Scientists love Mrs. Eddy, and watch daily for her latest instructions? Parents teach their children to love their teachers, and without a mutual love between teacher and pupil school life is more or less unfruitful. Love and confidence are necessary to that obedience which alone insures success.

We trust, however, that if we, as lisping babes in Christian Science, do and say things which are beneath the dignity, intelligence, and love of Christian Science, these things may be charged to us, and not to our Leader and Teacher, nor to her text-book, which is the revelation of Wisdom itself.

Jesus said, "Greater works shall ye do, because I go to the Father. If I depart I will send Him [the Comforter] unto you."

Jesus' scientific departure, called the ascension, demonstrated or illustrated certain facts concerning the Science of Being. The Science which this departure demonstrated is the "Comforter" which is properly named Christian Science. Mrs. Eddy was the one who was called to solve this great problem of life, and give its rules to the world. Blessed was that Mary who gave birth to the child Jesus. Blessed also is that Mary who gave birth to Christian Science. Blest are the people who have lived to see this day, and enjoy the result of this wonderful birth.

We are not unmindful of the sacrifices made by the members of this church. Many of you have cast in all of your living. Others out of limited incomes have made liberal contributions, while the rich also have cast in of their abundance. There has been an uninterrupted incoming supply, and all bills have been paid when due, and all that is needed to pay the entire indebtedness of the church is provided for. Your undaunted scientific faith in the final consummation of this effort has given mental strength to the undertaking. To the building committee who have been entrusted with the execution of the plans, we would say, you have held the most trying position connected with this effort. When you thought upon the material sense of your undertaking, fear came upon you and you faltered. When you trusted to the almightiness of God to carry forward your undertaking and provide the means, you moved forward, and the means always came. If you note well the steps in this excellent demonstration, you cannot doubt the final outcome of anything that is right. The final triumph of Truth has caused all obstructions to vanish as airy bubbles, and we are now ready to say, "it is finished." We have passed the struggling period of planning and building, and are now ready to leave this house with God, while we will try to use it to His honor and praise.

It is but just that we should speak of the most excellent service rendered this church by the architect, Mr. George Mathews, who has, without remuneration, contributed his entire service, including clerical help and architects' supplies. But I would refer especially to the honesty, integrity, and perseverance by which Mr. Mathews has pursued this undertaking to a finish, even under difficulties which sometimes seemed insurmountable. Some might say, "What is there of special significance in the building of a church edifice, even though it should be one of elegance? Is it not an easy task to build a house? Are there not plenty of architects and builders, plenty of money and material? Is there any cause for rejoicing in the building of a material house of worship?" One may read about the difficulties which attend the building of a church edifice, and especially a church of this new denomination, but experience alone will reveal the seeming actuality of error's sentinels, arrayed at every point, ready to say, "Thus far and no farther."

If the building committee of this church had believed the testimony of the personal senses, they would never have finished this house. They trusted to the divine Power, which they knew could overrule every claim of want. The cost of this church could not be estimated by counting the dollars expended. The patience, forbearance, long suffering, perseverance, and self-sacrifice needed to build such a structure can only be reckoned up by those who have been through this or a similar experience.

The faithful members of this church, after nearly two years of labor with trowel in one hand and sword in the other, may now rest in peace under their own vine and fig-tree. Added prosperity, harmony, and love, something more than mere words, will be to you the declaration, "Well done, thou good and faithful servant." Every dollar which you have so cheerfully given will come back again, bringing with it ten others. Every midnight wrestle over the adamantine problems concerning this demonstration will redound to your spirituality and advancement.

This home is builded by love and the universal brotherhood of this church. God has allowed us to progress only as we were united, and this building was not finished, nor all of the money subscribed, till we reached a perfect and complete unity of its members.

This massive building is the outward manifestation of the substantiality of this church, and speaks to the public that

Christian Science has come to stay. Now that we are planted in our own home, we are ready to reach out more than ever to help others, for the leaven of Christian Science, which can no longer be considered "a little leaven," must leaven the whole lump.

This idea must go out into all the world, feeding the hungry, clothing the needy, relieving the distressed, until we are become one family, dwelling together in perfect peace, infinite love, unchanging health, and eternal happiness.

Address of Mrs. Emily D. Behan, Second Reader.

Beloved Brothers and Sisters in Christ: To-day, in happy recognition of the prayers, sacrifices, and self-denials, which have brought forth this beautiful manifestation of our church, my thought reverts to the summer of twelve years ago, when the seed of Christian Science was first sown in Kansas City, and to a little band of earnest seekers, meeting each week, a few months later, at the home of one of their number, to study the Bible in the light of Christian Science; later, organizing as a Christian Science society, and in 1890 as a regularly chartered church, a branch of the Mother Church in Boston. From this time until the present, the history of Christian Science in Kansas City has been one of continued growth, as well as vicissitudes, represented at one time by three organizations of the same faith.

The plans for the present edifice were formulated, and the foundation begun, under the auspices of the Third Church of Christ, Scientist, of this city, in 1897. In August of the same year the union of the Third Church with the First Church was effected, since which time the building has been continued under the united interests and efforts of the consolidated body. We should clearly understand, however, that this church does not rest upon the demonstration of any one organization, or any individual; but remember that every loving thought, every spirit of sacrifice, every denial of error, every sense of humility, every realization of the allness of God and the perfection of man, has helped to build this church, to make this demonstration possible.

In connection with the growth of the Church of Christ, Scientist, in this city, and in all cities, two scriptural references seem especially significant at this hour: the parable of the mustard seed, "which, indeed, is the least of all seeds; but when it is grown, it is the greatest among herbs, and becometh a tree, so that the birds of the air come and lodge in the branches thereof." And the words of the Prophet Isaiah, "For as the rain cometh down, and the snow from heaven, and returneth not thither, but watereth the earth, and maketh it bring forth and bud, that it may give seed to the sower and bread to the eater; so shall my word be, that goeth forth out of my mouth: it shall not return unto me void, but it shall prosper in the thing whereto I sent it. For ye shall go out with joy, and be led forth with peace: the mountains and the hills shall break forth before you into singing, and all the trees of the field shall clap their hands. Instead of the thorn shall come up the fir tree, and instead of the brier shall come up the myrtle tree: and it shall be to the Lord for a name, for an everlasting sign, that shall not be cut off."

This manifestation of the church, as we see it, with our outward senses, is not the perfect idea of the church, but an exponent of that idea, a stepping-stone leading to the "building of God, an house not made with hands, eternal in the heavens." Our work is not completed in the building of this structure. It must be supported and nourished through divine Love, for Love alone can bring forth perfection. The Church of Christ, Scientist, is not a shelter for evil thoughts; it is not a place wherein we are to see our brother or sister as sick or sinful; but where we are to lay aside the false concept of man, and know each other, only as the divine image and likeness. Paul said: "For I determined not to know anything among you, save Jesus Christ, and him crucified." So should the mortal, material concept of man, be crucified in each one of us; and this temple should be to us the sanctuary of the soul, where none but holy thoughts can dwell.

As the more perfect comprehension of the church dawns upon us, and we allow nothing but the perfect idea of man to dwell in our consciousness of this church, this sublime thought will gradually pervade our entire relations to all mankind; for the church, in its full meaning, is our consciousness of man's unity with God. The Church of Christ, Scientist, stands forth in the world to-day as a visible proof that the law of God, rightly understood, is demonstrable, and that both sin and sickness are healed by the same spiritual law.

Christian Science as a mere theory, as a proofless proposition, could never build or sustain a church. It rests wholly upon demonstration, and the presumption is safe, that there is not an individual member of this church who has not experienced the healing power of Christian Science in sickness, as well as in sin.

As members of the Mother Church, the parent vine, from which the branches have multiplied, and are continually multiplying, we should know that we are demonstrating our true membership in this church only as we bring forth harmony, unity, and health in its branches. It may seem, in view of the errors yet to be overcome in the false material consciousness, that the attainment of the perfect concept of the church is still far removed, and the way leading to it still steep and rugged; but the progress of truth is eternal, forever moving onward and outward. Though the heights we are striving to attain seem as far removed from our present comprehension as the present manifestation of this church seemed impossible, in years gone by, yet we can feel the assurance that the demonstrations of the past make the more perfect ones possible to the future—future only to human sense, but ever-present to God; and, even now, already here, awaiting our recognition.

In conclusion, let me say to those brother and sister Scientists who have a like demonstration to make, we extend a hearty hand of welcome and God-speed, and say press on, never doubting, for "if God be for us, who can be against us?"

And now, dear friends, in devout and earnest gratitude to God, and to Mrs. Eddy, our beloved Mother in Christian Science and His appointed messenger of Truth, let us strive to consecrate our efforts, our lives and our acts in this work of God—"this life hid with Christ"—casting all our influence on the side of Truth, realizing that the real builder and healer is God, Love.—The Kansas City Times.

Church Dedication in the South.

Editor Weekly:—I send you the Fitzgerald Enterprize giving an account of the dedication of our Church, First Church of Christ, Scientist, Fitzgerald, Ga., on the 27th of November.

One minister expressed himself as greatly delighted and uplifted, "For," said he, "I saw the divine Light in so many faces."

We have come up, as it were, through great tribulation, but God is truly with His people, and we felt the divine Presence on the day of our dedication more than usual. Our little flock was greatly encouraged, and greater desire to leave all for Christ was manifested than ever before.

Digitized by Google

Ours is not only the first church of our denomination to be built in the South, but the first church of any denomination in our three-year-old city, to be finished and dedicated. Three years ago this was a pine forest, with nothing to disturb the rural silence except the woodman's axe in getting timber and cutting turpentine boxes. But with the coming of the Old Soldiers' Colony we have grown to a town of four or five thousand inhabitants, and it is good to know that Christian Science has kept pace with the growth of our town. Yours in Truth,

JOHN H. WILLIAMS.

Sunday morning, November 27, 1898, was a memorable day for the little flock of Christian Scientists of Fitzgerald, Georgia. The day was beautiful, and the people were early seen flocking to this place as the centre of attraction for that particular day. Their neat little church building is situated on Main and Ocmulgee Streets.

Before time for services to begin, standing room was at a premium and arrangements were immediately made for an overflow meeting in the afternoon, which meeting we are told was as well attended as that of the forenoon.

We are told that Christian Scientists never dedicate a church until paid for. The members of this church here have, by sacrifice, started out with a building free of debt. The windows were donated, and all hands helped to build the house. Scientists from Thomasville, Macon, Waycross, Atlanta, and Florida came purposely to attend the dedicatory services.

Address of Sue V. Portmess, Second Reader.

Friends:—We are assembled here to-day, to dedicate with simple and appropriate ceremonial, this little building to the service of the one God, Omnipotent Mind.

It is truly, to our mortal sense of things, a material structure. But it typifies the house not made with hands. It is the outward confession of the spiritual consecration to His service, and with gratitude for what has been done, and with hearts overflowing with thankfulness to the Author of all good who has worked with us, to will and to do, it is fitting that we should to-day take a retrospective view of the pioneer work done by the faithful few, whose willingness to be guided by divine Principle has made it possible for them to accomplish this demonstration.

A little more than two years ago our attention was first drawn to Christian Science by our present leader, Mr. Williams.

His teaching was attended by the demonstration of Truth, in healing the sick and raising the sinful, as revealed in the Christian Science text-book by the Rev. Mary Baker Eddy, Discoverer and Founder of this Science.

Fitzgerald was at that time a most unpromising field. Our colony was new, and composed of people from nearly every state in the Union, and what is more, they were in a very unsettled condition, making frequent changes, coming and going. But this did not hinder the Truth from taking root. A few of us rallied to the standard, most of whom had been healed physically and helped mentally and spiritually.

This induced us to wish to investigate and try to find out for ourselves what there was in this marvelous Science that had already done so much for us. So with the Bible in one hand, and Science and Health in the other, we began diligently, and with fixed purpose of heart to find the true light. The search was sweet, and our labor has been abundantly rewarded.

It is impossible, however, to estimate the good here, by the number that have cast in their lot with us. The seed has been sown with an unsparing hand, and the Truth has taken root.

It is not now a question, Does Christian Science heal? Hundreds in this vicinity can testify to its healing power who have not identified themselves with the Church. Neither is it a question, Does Science raise the standard of morality and religion higher than the general teaching of Christianity? We answer that we have for our motto and aim the words of Jesus: "Be ye therefore perfect, even as your father which is in Heaven is perfect." Nothing less than this will satisfy the demands of divine Science.

Our work here has prospered in the face of opposition such as rarely falls to the lot of any church in this day.

Error was arrayed against us, and poured forth a mighty flood of persecution. But we were only wafted on these billows to a higher, firmer stand in Christian Science, and we have come through the fire and the flood, more fully purified and made meet for the Master's use.

Only those who have braved the criticism of friends and neighbors, and have followed the teachings of the Bible as interpreted by Science and Health, in spite of all unpleasant surroundings, can fully realize what this means to us when we dedicate to an infinite God, this, our little home.

The Church of Christ, Scientist, is now with us, and the gates of hell cannot prevail against it.

Address of John H. Williams, first Reader.

Friends:—This is a most happy hour in our experience, and we welcome every brother and sister who has come from abroad, with a brotherly feeling which only those who are united in our kinship in Christian Science can appreciate. To the friends who reside in the city and have turned aside for this hour to join us in this service we bid you a most hearty welcome, and may the lessons here learned give them a longing to know aright the only true God.

To the casual observer the event seems fraught with little importance. No great cathedral have we to dedicate. No popular movement do we represent,—popular from the world's point of view,—but there is attached to this event an importance which many are unable rightly to estimate. In 1879 a woman organized a church in Boston with twenty-six members. This was known as The First Church of Christ, Scientist. To-day that church numbers over twelve thousand members. To-day, looking back over a period of less than twenty years, we have in America, Canada, and Great Britain, over three hundred and twenty-five churches of this denomination. This is a remarkable growth, a parallel to which is not found in history. Back of this is a fact of far greater importance than numerical strength. Christ Jesus, seeing his faith, said to Peter that upon the rock of Truth which he saw and had faithfully demonstrated, he would build his church, and the gates of hell should not prevail against it. This great spiritual rock in the structure of Christianity, which is designed to become the chief cornerstone, has been obscure and hidden for ages, rejected by the builders, and it remained for Christian Science to bring to light this lost element of Christianity, through the great discovery of Mary Baker Eddy. This seemingly lost element which the materiality of the ages has obscured is Christian healing.

One of the stones in the temple of Christian Science is that the Gospel of the meek and mighty Nazarene is one of physical as well as spiritual healing. The two cardinal principles of Christianity are, first, that Christ destroys sin and heals the sinner, and secondly, if he is sick, the Christ will destroy and heal his diseases. The dedication of our own little church takes its proper place in the history of our denomination as it stands for these great Truths of the gospel.

I would like to turn your thoughts from the material to the spiritual; to a house not made with hands, eternal in the

Digitized by Google

heavens, the building whose architect is divine Science—the Science of God; whose Builder and Maker is Mind. The church of the New Jerusalem is the invisible manifestation of Truth and Love whose power is demonstrated in casting out devils, or error, and healing the sick. Could these friends of ours who are united under the disease-liberating banner of Christian Science have cast their all on its altar without absolute proof of the truth of its teachings? No organization could have been effected and not a building erected had it not been built upon the rock Christ whose Gospel heals disease as well as sin.

Many of our latter-day prophets set the date 1866 as the time of the second coming of Christ, and it is a notable fact that in that same year Christian Science was discovered by Rev. Mary Baker Eddy who, through her study of the sacred Scriptures was healed of an incurable disease. Born of Puritan parentage and brought up by most devout Christian parents, this God-loving and God-fearing woman discovered the divine metaphysics which characterized the words and works of our great Master. Never faltering and never losing faith in the Most High, she pressed on into the land where man's freedom from sin, disease, and death, as his rightful inheritance, is acknowledged and demonstrated. Her years of toil, cross-bearing, and sacrifice have been partially rewarded. The fruit of her work is a million of people who have been healed and elevated to a higher moral and Christian life.

This triumph of Mind over matter, this demonstration of Christian healing on a spiritual basis in a material age, is great cause for rejoicing, and the power and presence of our God, and to that end we consecrate and dedicate this building to His service, to the honor and glory of His cause and the establishment of His kingdom on earth. May all who turn aside here to worship, if weary, find rest; if thirsty, find the living waters; if hungry, the bread of Life; if sorrowing, may their tears be wiped away, and if sick, may they find Him, who forgiveth all our iniquities and healeth all our diseases.

Fitzgerald (Ga.) Enterprize, December 9, 1898.

Chillicothe Scientists visit Kansas City.

The following appeared in the Chillicothe (Mo.) Daily Constitution:—

The visiting Christian Scientists, as well as most of the resident Scientists of Kansas City, were happily surprised Christmas morning when they discovered that the First Church would be dedicated that day. Christian Science churches are not dedicated until free from debt, and they expected only to open their church Sunday in Kansas City.

Since last Wednesday night the offerings from their members, amounting to twenty thousand dollars, changed the service from opening to dedicatory.

This seed of Truth was first planted in Kansas City twelve years ago. The growing membership throughout the world, and the new churches being built in the larger cities and in many smaller places, is encouraging to all workers in this vineyard of the Lord.

The Chillicothe Scientists rejoice with their Kansas City brethren in their demonstration, and are encouraged to go on in their work, knowing that neither denunciation, misrepresentation, persecution, prejudice, bigotry, nor any other form of error can overthrow the cause of Truth.

All these things only cause renewed and more earnest effort on the part of these Christian workers. They know "the fiercer the battle the greater the victory."

As in Kansas City, so in Chillicothe, "Christian Science is here to stay." The darkness of error at times hides from mortal view the sunlight of God's truth; but Christian Scientists are not dismayed nor discouraged by these clouds,—the Light will penetrate the darkness—the mists will disperse, and each will serve one God and love his neighbor as himself.

A CHRISTIAN SCIENTIST.

Lectures.

A Large Audience in Concord.

ONE of the finest audiences ever gathered in Concord assembled in Phœnix Hall, Monday evening, January 2, 1899, to listen to a lecture by Mr. Carol Norton, C.S.D., of New York City, on "Christian Science: its Religion, Healing, and Philosophy." The audience was large and thoroughly representative, comprising several representative physicians, clergymen, and lawyers of the city, and many of the best people of the community. There were also present a number of prominent Christian Scientists from out of the city, delegations of considerable size being in attendance from Manchester and Boston. On the platform were seated the Rev. and Mrs. Ezra M. Buswell, Readers in the local Christian Science Church, and several distinguished teachers and Readers of the faith, among them being representatives of the official Board of Lectureship of the Mother Church in Boston, of which Mr. Norton is an effective member.

The lecture was received with warm manifestations of appreciation. Mr. Norton came here with an enviable reputation as a vigorous, yet graceful speaker, and his efforts Monday evening largely enhanced his reputation in that regard.

The speaker was introduced by Mr. George H. Moses, editor of the Concord Evening Monitor and the Independent Statesman, and secretary of the New Hampshire State Board of Forestry Commissioners. In presenting Mr. Norton, the presiding officer said,—

Ladies and Gentlemen:—The duties ordinarily assigned to a presiding officer upon an occasion like this are, by custom and with propriety, as short and simple as the traditional annals of the poor; and I shall not transcend my functions. Nevertheless, it would be doing violence to those sentiments of personal pleasure which this moment brings to me, if I failed to make allusion to the close and tender and helpful friendship which has for so long a time existed between the speaker of the evening and me. For more than twenty-five years—and I venture to name the period of time without fear that I shall reveal anything detrimental concerning the age of either—for more than twenty-five years we have been friends, and I record now my conviction that throughout all that time I have never found him to be actuated by other than the purest of motives; that I have never known him to be allured by less than the highest of ideals; and that I have never known him to fall short of following the loftiest of purposes. In this spirit, therefore, and animated by these distinguishing characteristics, he comes to you to-night as a member of the official Board of Lectureship of The First Church of Christ, Scientist, in Boston, the Mother Church of Christian Science, to present to you an authoritative summary of a great topic—a topic which daily invites a closer and deeper scrutiny, a topic to the fundamental truth of which, within the brief span of less than a generation of human life, more than a million individuals have subscribed their support; and it is a topic, I may venture to add, which should commend itself to the candid consideration of this community because, if for no other reason, here is fixed the home of the revered and beloved and illustrious Founder of the Faith. Christian Science, I doubt not, in common with every other radical departure from the recognized boundaries of mental and psychic research, has met with misinterpretation and misconstruction. To correct, or obviate, and to eliminate these discordant elements is, I take it, the stimulating purpose of this lecture, and in order that the speaker of the evening and you also may be no longer detained from a consideration of his inspiring theme, I pass directly to the main duty imposed upon me, and with great pleasure, ladies and gentlemen, I introduce to you my life-long friend, Mr. Carol Norton, C.S.D., of New York City.

Digitized by Google

From Auburn, Maine.

"And it shall come to pass, that before they call, I will answer: and while they are yet speaking I will hear." This prophecy of Isaiah has been renewedly fulfilled in our case. At the close of one Wednesday evening meeting, those interested in the advancement of Christian Science, were asked to remain for a few moments, that some step might be taken toward raising money for a lecture. Thirty-one remained and the amount pledged was eighty-seven dollars, and the offerings came in until we received one hundred dollars.

Thursday evening, December 1, Rev. Irving C. Tomlinson gave a lecture on Christian Science in the largest hall in the city. The hall was well filled with representative citizens of Auburn, who gave the closest attention throughout, and one of our daily papers printed the lecture in full. Surely this was a demonstration of love. After paying all expenses we have a balance of twenty-three dollars in the treasury.

In providing this Board of Lectureship, divine Love has met a great human need, as evidenced in the large numbers that eagerly listen to these lectures, and how can we better show our gratitude for this evidence of loving care, than to avail ourselves of this mode to reach the multitudes who are hungering and thirsting after this Truth that makes free.

We have made our first deposit in the bank toward a church building which we hope to build in the near future.

R. F. G.

Gratifying Testimony.

It is a season of thanksgiving and joy for the Scientists of Baltimore. The demonstration recently made by the two Christian Science Churches of our city, in inviting Mr. Carol Norton to lecture for them, was spontaneous, and from its inception until the close, was one ascending tone of harmony and love,—above limitation.

It was delivered in Music Hall, the largest hall in the city, to an audience of over sixteen hundred, composed principally of the thinking classes of Baltimore, and was listened to with profound attention.

The lecture has made a deep impression, and it is interesting and encouraging to note on the part of the public, an attitude of expectancy, showing that they have awakened in a measure, to the fact that there is a power in Christian Science not to be found in other denominations, or systems of healing.

The cordial and pronounced acceptance by the people of Baltimore, of the invitation lovingly and freely extended them by the two Churches, to hear the subject of Christian Science officially presented by a member of the Board of Lectureship, is only another evidence of the wisdom of our beloved Mother, whose wonderful demonstration has made it possible for Divine Love, through her, to supply every need of humanity as it is presented.

(Signed) The Joint Lecture Committee.

Alfred Farlow of Kansas City, a Christian Scientist of note, lectured at the Luella Theatre on "Christianity made Practical through Christian Science."

There was a large audience present in spite of the fearful weather, and all were deeply interested in Mr. Farlow's lecture.—Daily Mail and Star, Chillicothe, Mo.

Every seat in the Opera House was occupied the night of December 15, by the best people of our city, to hear Edward A. Kimball of Chicago, in his lecture on "Facts and Fictions about Christian Science." It was a forcible and logical setting forth of the fundamental principles of Christian Science, and all were highly pleased with the lecture. Mr. Kimball is one of the leaders of that belief in the country to-day, and his presence in the city was quite a notable event.

The Webster City (Iowa) Tribune.

Concord Items.

Christian Science in Concord.

Christian Science is well organized in Concord. Many are embracing its tenets through practical experience in its healing the sick and reforming the sinner. The progress has been wonderful in the past four years. The growth in the past year has been greater than in all the years before. The Christian Scientists of Concord began public service in their own hall the last Sunday in November, 1897. This is a well located place of worship, at the corner of School and State Streets, furnished them by the Rev. Mary Baker Eddy, the Discoverer and Founder of Christian Science. They hold services Wednesday evening at half past seven, and Sunday morning at half past ten. The hall, which seats two hundred, is usually well filled.

There is a public reading room connected with the hall, where all the works of Mrs. Eddy are kept on the table and for sale, together with all the publications of the Christian Science Publishing Society. Christian Science has become one of the established religious bodies of Concord.

Independent Statesman, Concord, N. H.

A Case of Healing.

Mrs. Elizabeth Higman of Ottawa, Canada, who is remembered by many in Concord as a member of the class in Christian Science which was instructed here last summer by the Rev. E. M. Buswell, and who was later admitted to the class which received instruction from Mrs. Eddy, has written to Miss Shannon, a member of the household at Pleasant View, telling of a case of metaphysical healing which has recently occurred in her practice.

The patient was Mr. J. A. Gamble, who came to Mrs. Higman suffering from a fractured elbow joint, in which the ligaments had been broken so that the arm hung down at his side with the palm turned out. Surgery had promised him no relief, except that wearing a silver band for a support would keep the member from swinging loosely. In three weeks Mrs. Higman's treatment had so restored the patient that he was able to raise heavy weights with the injured arm and to use it as freely as before the injury. Mrs. Higman also writes that Science is winning many friends in Canada.

Independent Statesman, Concord, N. H.

It certainly is gratifying to Christian Scientists to see the independent and judicious position of Mr. G. H. Moses, the editor of the Concord Daily Monitor and the Concord Weekly Statesman, who presided and introduced the speaker at the recent Concord lecture. It cannot but be gratifying to Mr. Moses and to the Concord friends to know of the appreciation of his work and his paper by Christian Scientists. On their return to Boston quite a party sent their dollar subscriptions for the Statesman, which paper Mrs. Eddy has used on several occasions to address the Christian world.

A party of Christian Scientists from Providence, R. I., were registered at the Eagle January 2, among whom were Mrs. E. S. Chapin, Mrs. L. A. Newton, Frank H. Newton, Mr. and Mrs. G. Carpenter.—Concord Evening Monitor.

A despatch to the Manchester Union from Washington, D. C., formally announces the candidacy of Hon. Henry M. Baker for the United States Senate to succeed Hon. William E. Chandler.

No subscriptions for the Quarterly will be received for less than one year. No subscriptions for the Weekly will be received for less than six months. Orders other than subscriptions, for Weekly, Journal, and Quarterly, should be given for current issues and back numbers only.

What there is in Christian Science.

for Business Men.

THE following excellent articles appeared in The Denver Republican of December 17:—

Business men feel that the hindrances in the way of their living Christianity are peculiar and nearly insurmountable. The tricks of every trade, which seem so essential to success, are like fetters.

What goes for honesty in the business world does not satisfy the heart that is quickened with the desire to be a Christian after the pattern of Jesus. The so-called honesty of the market when compared with ideal honesty seems almost like villainy.

If a merchant displays a line of goods marked "below cost," his competitor feels that he must duplicate the offer, even though it be the most transparent of lies. Deception ranges from such petty instances to the robbery of millions of dollars from the government through fraudulent manipulation of contracts.

When a man begins to practise dishonesty, it seems to him almost impossible to stop. Once in the snare, he makes himself believe that bankruptcy would follow a return to honest methods, for his own dishonesty has caused him to believe that all his competitors are dishonest, and he will be virtually handing his trade over to them.

Business men are no more fond of being dishonest than others, in fact they are—many of them—heartsick of business just because they feel that they cannot be truthful and honest. Christianity has been known to business men, but not as Science. They half believe that God rules the universe, but "business is business," and they feel that God cannot do anything to help one meet a promissory note. Christianity as Science, demonstrated, is what is needed to straighten the crooked ways of business, and this need is supplied by Christian Science.

Christian Science makes so clear the understanding that a business based on Principle and governed by high motives cannot fail, that merchants, manufacturers, bankers, traveling salesmen, railroad officials, and busy people in all avenues of industry are changing to the Christian Science standard with great benefit to their business and the gain of a priceless peace.

Sometimes the buried secret of participation in a fraudulent transaction, which seemingly cannot be rectified without disturbing long settled conditions, holds a man in base slavery to error. Often a man with a cloud like that over his life is so miserable that he seeks death as a means of escape. Christian Science releases men from this form of servitude to evil as well as every other. It gives them courage to squarely face every fear and prove it powerless.

Fear prevents men from straightening their crooked ways by suggesting that exposure will disgrace them in the eyes of neighbors and friends. Christian Science causes a man to prefer the frowns of men to shutting himself away from God, Good, and practically he finds that an honest effort to reform wins the admiration and warm-hearted support of his friends, and besides, he inspires others with courage to follow his example.

The Scriptural promise, "Know the Truth and the Truth shall make you free," is proven to be practical in Christian Science. The hypocrites and self-righteous Pharisees would stone a person who acknowledged guilt. Christian Scientists sincerely strive and pray to have that Mind which was also in Christ Jesus, who said to the scribes and Pharisees, "Woe unto you, . . . for ye shut up the kingdom of heaven against men, for ye neither go in yourselves, neither suffer ye them that are entering to go in," but to the repentant woman taken in sin, "Neither do I condemn thee, go thou and sin no more."

Jesus read "the heart's sincere desire," and knew that his compassionate tenderness and loving admonition would purge out the woman's sin, for she was ready to give it up.

They who to-day reflect the compassion for sinners which the loving Master did, help to free their brothers from their bondage. Christian Scientists try to be compassionate because they know that God's man is not expressed by such qualities as deceit and dishonesty; and seeing through the veil of error they discern the qualities of courage, strength, honesty, truthfulness, and purity, which the atmosphere of Love develops.

Let business men be assured that truthfulness and honesty do lead to the highest success, if consistently adhered to, and Christian Science is a wonderful help toward steadying one's resolve to be consistently good, and noble, and true.

A Banker's Experience.

IN response to your invitation for an expression of benefits through the understanding which has come to me from the study of Christian Science, I would say, that about nine years ago I wrote my youngest sister something like this, "Now, Aggie, don't be carried away by the foolishness of Christian Science." Here I am, nevertheless, proud in the conquering of the presumption which sought to keep that sister from seeing Truth. However, even Paul kicked against the pricks considerably before he recognized that which knocketh at the door of human consciousness and satisfieth the understanding.

The transformation through Science in yet another sister in the overturning of former characteristics where they were severe or ungovernable; the remodeling and further improving where they were before natural and good; the constant evidence of discipline of self, not through will power, but through love of and interest in the study of God as "Intelligence," "Mind," "Principle," that which becomes understanding with us and is therefore real, this, four years ago, arrested me as it should any one, and caused me to investigate.

I found a Science, simple, natural, full of dignity; demanding much but giving more. I found a Science practical not alone in healing sick bodies and minds, but sick relations with mankind, sickly interests in life, half-hearted interests in business, half-hearted results; giving in place the courage of conviction and the man which is governed by Principle, not simply the human ideas of principle, but Principle, self-operative, perfecting in its nature, overcoming every form of problem which confronts mankind.

With the Key to the understanding of Life as revealed in Science and Health, by Mary Baker G. Eddy, the Scriptures become the grandest literature. The types therein become a poem of character, and we begin to read such character in the natures of to-day, rather than two thousand years ago, often distressingly near our own doorstep. As we learn to know how to crush the serpent through study of its nature, where before we became its victim through fear, and ignorance of divine Law, is it any wonder that we are heralding the discovery of an all-round Science which applies to every day and governs all Creation, according as we learn through it how to detect the human false creations of sense which ultimate in discord. ROBERT M. ORR.

Mr. ORR is second vice-president of the America National Bank of Chicago.

Opinion of a Capitalist.

MY attention was called to Christian Science seven years since by the healing of an intimate friend—one whom *materia medica* had failed to cure, although patiently and

Digitized by Google

thoroughly tried for many years. My wife and I entered a class of Christian Science instruction early in 1892, and from that time until the present moment we have never ceased to praise God for being led into this great Truth. It has been of inestimable value in my family and my business life. It has enabled us to overcome serious physical ailments, to rise superior to disappointments and discouragement in many forms—also to overcome fear, which is the bane of human existence—for we have been taught what "perfect Love" is, and that understanding has destroyed our fear.

I would not part with my knowledge of Christian Science (even if it were possible) for any money consideration. It is the pearl of great price, which, having found, we would part with anything rather than leave it. I know if business men would study this Science and practise it lovingly and simply, they would find rest and comfort. J. E. KNAPP, President of the Maryland Coal Company, No. 1 Broadway, New York.

A General Passenger Agent.

I HAVE been rather a close student of the beautiful teachings of Christian Science for the past seven years. Like many others, at first I was inclined to treat the matter with derision, and could not understand how practical, sensible business men and women could be interested in such a belief.

I was physically in very bad shape, and naturally turned to anything that held out a hope of relief. I took up the study, but did not obtain instantaneous relief, as many do, but I clung to the Truth until I was absolutely and entirely healed of every physical ailment, and for the past five or six years have enjoyed perfect health and happiness.

I could write pages giving my personal knowledge of others who have been healed physically and spiritually. Christian Science is a religion that commends itself not only to practical business men, but to every one regardless of vocation—the rich and poor alike.

Speaking somewhat from a railroad man's standpoint, I happen to know personally of railroad presidents, prominent railroad attorneys, traffic managers, and in fact all along the official line I know many persons who are earnest supporters and followers of Christian Science.

It will afford me special pleasure to impart information to any one who is earnestly seeking further light in this direction. H. C. ORR.

General Passenger Agent of the Kansas City, Pittsburg & Gulf Railroad Company, Kansas City, Mo.

A Good Word from Galveston.

I AM happy to report that Christian Science is established in Galveston on a firm basis after many a heart-ache and bitter disappointment, accompanied by doubts and fears while the foundation was being laid.

We organized First Church of Christ, Scientist, Galveston, in November, 1896, with three members. At the following Communion service one member was added, and then another, until we had seven. Then seven more were admitted, and again at our last Communion seven others united, making twenty-one members at present, with an attendance of forty to sixty.

We have rented a building unique in design and beautiful for situation. It contains three large rooms which are used for Church services, Sunday School, and reading room and dispensary. We have two services on Sunday and the Wednesday evening meeting. Love and unity prevail, and to many who have attended these meetings have blessings come. Frequently at the Wednesday evening meetings testimony of excellent healing is given. I send this to the Weekly, hoping it will be helpful to all who are working in the vineyard of Mind-healing and trying to realize the ever-presence of God as a healing and saving Principle.

JAMES D. SHERWOOD.

Testimonies.

All Remedies Tried.

IN March, 1897, after having tried all available remedies, my wife was pronounced incurable by the M. D.s. About this time a friend told us of Christian Science, and gave us the address of a healer in Austin, Texas. My wife commenced taking treatment, and in six weeks was completely cured of her physical ailments, and had learned that the healing of sickness was the least blessing to be derived from Christian Science. We procured a copy of "Science and Health with Key to the Scriptures," and commenced to study the beautiful truths contained therein.

I was healed of sick headache, a claim I had had all my life, also of the tobacco habit, after using tobacco to excess for twenty-five years. A friend of mine who had been confined to his bed for several months, and who had been pronounced incurable by the M. D.s, tried Christian Science, and is a well man to-day. His wife was also healed of several claims, and both are studying and deeply interested in Christian Science. In fact, several severe claims were healed in this county. Since then we have had many beautiful demonstrations, and we are reading in the Bible, some of the works of Mrs. Eddy, or the Journal regularly, and thus we are drinking at the fount of inexhaustible Love daily.

We are holding a little Sunday School at our house, where several friends meet with us, but owing to distance all that are interested in Christian Science cannot meet with us every Sunday, but they come whenever they can. There are several reading "Science and Health with Key to the Scriptures," and we hope that many will learn the truth.

John A. Deadrich, Johnson City, Texas.

Nine Christian Science Children.

There are nine Christian Science children in our Sunday School and we have worked about a year to get five dollars and we are going to send this week for six more Hymnals for the church. It is our first gift to the church.

We all have demonstrations and use our little understanding to the best advantage. We only started our Sunday School last November, and Christmas we had a few exercises in the church. All the Sunday School scholars spoke pieces and the older Scientists were surprised and pleased.

Science helps us in our school studies and we find the need of Truth more and more ev ry day.

From all the children.

Francis Beem and Sadie Brodie, Marengo, Ia.

A Signal from Phoenix, Arizona.

I cannot let the year close without sending a signal to the Field from Phœnix, Arizona. Christian Science is established here. The faithful few have been at work for about two years, holding Sunday service and mid-week meetings. We also have a Christian Science Dispensary and reading room. Our little band is growing and good healing work is being done.

Rejoice with us.

ALMEDA NORCROSS TRACY.

No Blacksmiths Wanted.

During the recent big snowstorm, a country doctor drove to the little schoolhouse for the purpose of vaccinating the children, only to find there was no session that day. After listening to some discussion on the subject by his elders, and the possibility of the doctor's coming again, a three-year-old remarked, "Well, it'll take a bigger man than Dr. Greenwood to be a blacksmithin' me."

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.
Cloth, Price, Single book, Prepaid $3.18
Two to Twelve books to one address, each, Prepaid 3.00
Twelve or more books to one address, each, Prepaid . . . 2.75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid 4.00
Twelve or more to one address, each, Prepaid 3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid 5.00
Twelve or more to one address, each, Prepaid 4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid 6.00
Twelve or more to one address, each, Prepaid 5.75
Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (Cloth), each, Prepaid $2.25
Twelve or more books to one address, each, Prepaid . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid 4.00
Twelve or more to one address, each, Prepaid 3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid 5.00
Twelve or more to one address, each, Prepaid 4.75
Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.
No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

CHRIST AND CHRISTMAS. An Illustrated Poem.
Single book, Prepaid $3.00
Twelve or more books to one address, each, Prepaid 2.50

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half doz., $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price by mail, 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price by mail, 21 cents; $2.00 per doz.; prepaid.

Vol. 1 Boston, Mass., January 19, 1899. No. 21

Hypnotism.

That Way Madness Lies.

We extract the following valuable testimony prepared by Sidney Kuh, M. D., and published in The American Journal of the Medical Sciences, for December, 1898.

The question which we will attempt to answer, will be this: Can the hypnotized be injured physically or mentally by hypnotism?

What the dangers are is stated in a paper by Dr. Henry Raymond, written in 1893, in which he says: "The risk of mental deterioration by the frequent induction of states of incomplete consciousness, hypnotic or other, should be distinctly taught and labelled 'Dangerous—this way madness lies,'" This opinion is supported by numerous other writers. Thus, Professor M. Benedikt of Vienna, in his book on Hypnotism and Suggestion, states that hypnotic experiments have a demoralizing influence on the intellect, will-power, and physical independence of the patient. Artificial catalepsy, he continues, resembles narcotic drugs, in giving momentary relief at the cost of subsequent injury.

Similar to the views held by Benedikt are those of Dr. A. B. Richardson. Binnswanger found that long-continued use of hypnotism rendered the patient feebler in intellectual force—mentally weary. Mendel, too, is of the opinion that it is often followed by injurious after-effects, such as nervousness and even convulsions. Its use is strongly condemned both by Meynert and von Ziemssen. Norman Kerr has found the after-effects to be a mental disturbance, a dissipation of energy, and a nerve exhaustion, a frequent repetition being apt to cause deterioration of brain-function and nerve-function, intellectual decadence, and moral perversion.

In our country Dr. Leszinsky stated in a paper, that he felt satisfied that in one of his cases hypnotism was responsible for the deterioration of the nervous tone. Dr. Landon Carter Gray spoke of the demoralizing influence of hypnotism.

The well-known fact that the greatest of all neurologists, Charcot, but a few years ago one of the most enthusiastic on the subject of hypnotism, had abandoned this method of treatment almost completely during the last years of his life, is known to all who have followed the literature on this subject.

We have seen, then, that in all parts of the civilized world recognized authorities have spoken and written of the dangers of hypnotism. That they were justified in so doing, the brief records of a few of the most striking cases will prove beyond all doubt.

An officer who had been hypnotized at a public seance would from time to time have attacks of spontaneous hypnotism at the sight of any shining object. Thus the sight of a carriage-lamp was sufficient to throw him into a trance, in which he would follow the vehicle as though spell-bound. One evening this occurred, and he was going directly toward an approaching carriage and would have been crushed to death had not a comrade saved him. This experience was followed by a violent hysterical crisis. An instance in which the outcome was even more serious is reported in the British Medical Journal, of 1893, p. 130, as follows:—

A woman who had attained a certain local notoriety in Vienna as a spiritualist and faith-curer has for some time past had under her care a young man of twenty-five years, who suffered from epilepsy. According to particulars now forthcoming, this person promised her patient and his parents that she would complete the cure at a seance of a spiritualistic society of which she was a member, and where, for this purpose, she intended to employ the young man as a medium. All that the patient can remember of this seance was that at the beginning the usual "magnetic circle" was formed by those present. He was apparently put into hypnotic sleep from which he was aroused at half past nine o'clock and told that he could go home. He had only taken a few steps after leaving the tramcar near his own home when he fell senseless into a heap of snow by the roadside. In this condition he was taken to his home, where he remained unconscious for a long time. On recovering he spoke so wildly and incoherently that a doctor was summoned, who declared him to be suffering from a religious mania. He was accordingly removed to a hospital.

In the American Medical Journal of 1888, I find a brief notice referring to the case of a lady who was hypnotized by her husband, a physician, to relieve pain during the extraction of a tooth. He made a few movements before her face; she screamed and fell dead.

Finally, I can add to these cases which I have gathered from what little literature on the subject was at my disposal, another unpublished one which in many respects resembles Lombroso's case, excepting that in this instance the termination was a more tragic one. The patient, a young woman, had been under the care of one of the best-known European alienists, a man who had done quite a little work on the subject of hypnotism, and may well be considered to be one of the authorities on this subject. He had hypnotized a patient a number of times by the sounding of a gong. In course of time any regular and monotonous noise would suffice to produce a trance in her. One day at noon she was crossing a very frequented square in her native city, when the bells of a neighboring church began to ring. She promptly became hypnotized, staggered along, and before anybody could interfere had run under the wheels of a vehicle. When picked up she was dead.

We have seen, then, that hypnotism may be the cause of

Copyrighted, 1899, by Mary Baker G. Eddy.

Digitized by Google

chronic headache, of an outbreak of hysteria—a very common occurrence; that at times it has an undesirable effect upon pre-existing mental disease, and that in rare instances it may even produce an outbreak of insanity.

The next question which I shall attempt to answer is this: Can the hypnotized fall victim to crime? Th. Ribot, in discussing hypnotism, states that "in the form called lethargic there is an absolute annihilation of the will, the conscious personality being reduced to one single and unique state, which is neither chosen nor repudiated, but undergone, imposed. Upon the whole," he concludes, "the state of natural or provoked somnambulism may justly be regarded as an abolition of the will." Luys holds similar views on this question. He says: "The individual in these novel conditions no longer belongs to himself; he is surrendered, an inert being, to the enterprise of those who surround him. At one moment in the passive stage in this condition of lethargy or catalepsy he is absolutely defenceless and exposed to any criminal attempt of those who surround him. He can be poisoned and mutilated."

These views are largely, if not exclusively, based upon the laboratory experiment which has been resorted to in numerous instances by Bernheim, Liegeois, Liebault, Beaunis, and many others, and seems to show that the hypnotized is a most ready victim to all sorts of crimes, that he may be induced to sign all kinds of documents, that he may be induced to accuse himself of being guilty of crimes which in reality were never committed.

We are glad to see in so prominent a medical journal such high authorities taking pronounced grounds against the use of hypnotism. It is evident that the thoughtful physicians are seeing what Christian Science has always affirmed, that hypnotism in all its forms is both dangerous and demoralizing. The text-book of Christian Science, "Science and Health with Key to the Scriptures," is very pronounced in pointing out the error and dangers of hypnotism. See pages 280, 448, *et seq.*

Items of Interest.

A Cabinet of Advisers.

General Wood's visit to Washington has done much to elevate the Cubans in the estimation of the government. He has shown from his personal experiences that they have been very much misrepresented as to their capacity for self-government, and the remarkable success which has attended the plan so carefully developed by him of allowing the best element among the Cubans the largest opportunity to administer the affairs of their own municipalities and provinces has made a deep impression upon the official mind here.

As the province of Santiago emerged from the war in apparently worse shape than any of the others, it is regarded as entirely probable that a system which has worked so well under adverse conditions there would be quite as successful in the other provinces.

Governor-General Brooke of Cuba has been carefully considering the formation of a cabinet of civil advisers, and has decided to have four secretaries—the first of state and government, the second of finance, the third of justice and public instruction, and the fourth of agriculture, industry, commerce, and public works. Only prominent residents of the island will be invited to join the cabinet.

The executive control, of course, will remain entirely in the hands of General Brooke, under whose direction the various departments will be connected on the broad principles of wise and honest government carried out into details. In this way the Cubans will be prepared for self-government. General Brooke will proceed entirely upon the theory of ultimate self-government.

Senator Hoar's Strong Words against Expansion.

"WHILE there is little else that a democracy cannot accomplish, it cannot rule over vassal states or subject peoples without bringing in the elements of death into its own constitution."

"Our danger to-day is from the lust of empire."

"Any people has the right, when it thinks its existing government is destructive of the great ends of life, liberty, and happiness, to throw off the old government and make a new one for itself; and certainly, if it have that right, no other man has the right to impose one on it against its consent."

"The question is whether Congress may conquer and may govern, without their consent and against their will, a foreign nation, a separate, distinct, and numerous people; a territory not hereafter to be populated by Americans nor to be formed into American states."

"At last the Constitution conformed to the Declaration of Independence, and its great doctrines of liberty are written upon the American flag wherever the American flag floats. Who shall haul them down?"

The doctrines of the Declaration of Independence "were not for a single generation. They were not glittering generalities. They were blazing ubiquities." They were eternal verities.

Our fathers "said that King George had 'kept among us in times of peace standing armies,' and 'quartered large bodies of armed troops among us without the consent of our legislatures.' I suppose somewhere in this Capitol men are at work to-day devising ways and means for a permanent standing army to be kept in these islands, east and west, without the consent of anybody there."

"The Monroe doctrine is gone. Every European nation, every European alliance, has the right to acquire dominion in this hemisphere when we acquire it in the other."

President of Peru Visits the United States Battleship Oregon.

Nicolas De Pierola, President of Peru, visited the United States battleship Oregon, at Callao, and was cordially received by United States Minister Irving B. Dudley, Captain Barker of the Oregon, and Captain Silas Terry of the battleship Iowa.

The American ships saluted the arrival and departure of the president, who expressed great admiration of the power and excellent efficiency of the battleships and their crews.

The British minister to Peru, Mr. W. N. Beauclerc, gave a dinner to Minister Dudley and to Captains Barker and Terry. The peruvian minister of foreign affairs and other persons of note were present.

General Wood on Santiago.

General Wood, the military governor of Santiago, who is here for a short stay, said that when he left Santiago everything was in splendid shape; schools were being organized and ready to receive scholars; and nearly one thousand miles of roads had been constructed throughout the province. The customs receipts exceeded the amount formerly collected and turned into the Spanish treasury. Funds were available for meeting the expenses of the administration of the province, and the only expense to the United States would be the cost of maintaining her army.

Mataafa Reigns Again.

Mataafa has been elected King of Samoa, to succeed Malietoa. The election was held without trouble, though Tamasse, who was Vice-King in 1881, backed by a small following, endeavored to obtain the office.

Mataafa's election is highly satisfactory, not only to the Washington government, but to the German and British governments. Mataafa's opposition to Malietoa led to his exile. He is a chief of much higher rank than Tamasse, and this fact, doubtless, has had influence with Samoan voters.

Statistical.

The total value of our wheat crop for 1896 is placed at $310,602,539.

The value of all horses in the United States in 1897 was estimated at $452,649,396.

The value of our mineral products in 1896 was $623,717,288.

The value of our sheep in 1897 was $67,020,942.

The value of our milch cows in 1897 was $369,239,993.

The value of sugar consumed in this country is now about $220,000,000 a year.

Hon. Nelson Dingley.

In the death of the Hon. Nelson Dingley the State of Maine loses one of her most respected and conspicuous citizens, and the nation one of her most useful statesmen.

Mr. Dingley was one of the hardest working and most practical men in Congress.

"The most notable statement that has ever been made by the national banks," was the language in which Comptroller Dawes describes the statement of the condition of the national banks on December 1 last.

The total resources of the banks are larger by $300,000,000 than the statement of September 20, 1898, which stood until that time without challenge. The loans and discounts have increased in a large proportion, and the individual deposits are $200,000,000 larger than in September.

The House committee on territories has reached a final and unanimous agreement to make a favorable report on the Hawaiian bill. As agreed to, the bill is in all essential features the same as submitted by the Hawaiian Commission. The qualifications of electors, representatives, and senators are arranged so that no limitations are placed on admission to the House, while the qualification of senators and electors of senators is $1000 worth of property, or $600 income.

Exports of manufactures to the value of $305,000,000 are indicated for the calendar year 1898 by the complete returns for November and what is known of the exports of December. The total for 1896 was $253,681,541, and for 1897 $279,616,898. The increase has occurred in the face of an enormous volume of agricultural exports. Agricultural exports for eleven months were $749,963,480 in 1898, as compared with $635,782,489 in 1897.

A contract will be awarded by the Navy Department for the establishment on the Island of Guam, in the Ladrones, of a complete naval station, including facilities for coaling war vessels, and accommodations on shore for a great naval colony. Bids were opened a few days ago for the work, which includes every part of the equipment that is to be undertaken now, the cost of which will approximate $300,000.

President McKinley wishes the people of the Philippines to understand that their desires will be consulted when the time comes to form a permanent government for the archipelago, and that they will be treated substantially as the Cubans will be treated after the provisional military period. General Otis has communicated this fact at his conferences with Aguinaldo's representatives.

There has been held an important conference between duly authorized American and Filipino commissions, at the instance of Aguinaldo.

General Otis said the purpose of the conference was a mutual understanding of the policies, aims, and desires of the people of the United States and of the Philippines. There was a frank discussion.

It can be said on authority that the German government is disposed to recognize the unqualified sovereignty of the United States over the Philippines. Germany's attitude of friendliness has gone so far as to cause her positively to decline to permit her consuls in the Philippines to take charge of the interests of Spain.

A great undertaking has just been finished by British ornithologists, after twenty-five years of labor. It is a complete catalogue of birds, in twenty-seven volumes, by eleven eminent authors, and it gives an account of 11,614 species, which are divided into 2,255 genera and 124 families.

The Greater New York assessors have now brought the valuation of the real estate of that metropolis up to the stupendous total of $2,950,046,317. These figures overtop the total assessed valuation of any state in the Union outside of New York.—Boston Herald.

The Postoffice Department has decided to issue a new set of stamps for Cuba, and the bureau of engraving and printing has been called on for designs, and the denominations contemplated are one, two, three, five, and ten centanos.

The Cuban commissioners in Washington have been advised that Congress has appropriated $3,000,000, which may be used to pay the Cuban soldiers now in arms, and have the army disbanded.

A telegram from General Otis says that conditions are improving in Manila. Citizens feel more secure. The city is quiet and business is active.

The Hon. Joseph H. Choate of New York has been named by the President as ambassador to Great Britain.

Hon. Chauncey M. Depew will represent the State of New York in the United States Senate.

United States Senator Henry Cabot Lodge from Massachusetts will be his own successor.

General Joseph R. Hawley has been re-elected as the junior Senator from Connecticut.

The 8th Massachusetts Infantry has sailed for Cuba.

Concord Items.

Improved Health in New Hampshire.

The report of the State Board of Health, soon to be issued, written by Dr. Irving A. Watson, will contain a chapter on consumption which will be of the greatest possible interest. The percentage of mortality caused by consumption fell from 14.46 in 1884 to 9.92 in 1897. Alluding to diagrams made from statistical returns, Dr. Watson says the present figures and calculations from three sources show a reduction in the number of deaths reported; first, in the actual number of deaths reported annually; second, in the proportion of deaths to the total mortality, and third, in the proportion of deaths returned to each ten thousand of the living—all of which prove a very marked and gratifying diminution in the fatality of this disease in this State. There were returned in 1896, 679 deaths from consumption, and in 1897, 697 deaths, nearly two hundred less than were reported in 1884.

Independent Statesman.

The service at the Christian Science Church, Sunday, January 8, was attended by some thirty visitors from all parts of this country.—Concord Evening Monitor.

Degrees of Metaphysical College.

WILL the applicants for the degree of C. S. D. of the Massachusetts Metaphysical College please note, that I specified, the application must be made according to the By-laws of this College. These By-laws require two courses under the auspices of this College before that degree is conferred.

In November, 1888, the following notice appeared in the Christian Science Journal. "Hereafter no students can be admitted to the Massachusetts Metaphysical College Normal Class, who have not passed through the Primary Class."

MARY BAKER EDDY.

Christian Science Souvenir Spoons.

ON each of these most beautiful spoons is a motto in bas-relief, that every person on earth needs to hold in thought. Mother requests that Christian Scientists shall not ask to be informed what this motto is, but each Scientist shall purchase at least one spoon, and those who can afford it, one dozen spoons, that their families may read this motto at every meal, and their guests be made partakers of its simple truth.

MARY BAKER G. EDDY.

The above named spoons are sold by the Christian Science Souvenir Co., Concord, N. H., and will soon be on sale also at the Christian Science Reading Rooms throughout the country.

The Board of Education.

IN accordance with the Church By-law establishing the Board of Education, published in the Church Manual, the Board convened on the first Monday of January, 1899, the second day of the new year. The sessions were held in the Mother Church and continued during the week. A special class in obstetrics was also held Monday, January 9, 1899. The entire class that were selected as teachers in general session took the obstetric course under the instruction of Alfred E. Baker, M. D., C.S.B., a regularly graduated and licensed physician, and now a Christian Science practitioner.

Under the By-law there could be but twenty-one teachers sent forth. In some instances husband and wife were united in one certificate, and authorized to teach under the restriction that the two could teach only the same number of students that a single teacher is authorized to teach; the question as to who should teach being left to the persons themselves. If the husband taught, he could teach only two classes, if the wife, only two. If both taught, each should teach only one class a year. So that only twenty-one certificates were issued.

It is needless to say, that the sessions of the Board were exceedingly interesting and beneficial. There were in attendance in all one hundred and sixty-seven, coming from many parts of this country and from Europe. There were two from London, England, one from Dresden, Germany, and several from the Canadian Provinces, the following cities being represented: Winnepeg, London, Toronto, Westmount (Quebec), Kingston, Belleville, Hamilton, and Owen Sound.

In this country, San Jose, San Diego, and Fresno City, California; Denver, Colorado Springs, and Montrose, Colorado; New London and New Haven, Connecticut; Jacksonville, Florida; Savannah, Americus, and Macon, Georgia; Chicago, Elgin, Ottawa, Pontiac, and Savanna, Illinois; Kokomo, Indiana; Des Moines, Merrill, Denison, Charles City, Ottumwa, Independence, Cedar Rapids, Fort Dodge, Burlington, Davenport, Sioux City, and Lemars, Iowa; Ar kansas City, Atchison, Topeka, and Wichita, Kansas; Brannon, Kentucky; New Orleans, Louisiana; Boston and Beverly, Massachusetts; Augusta, Gardiner, and Rockland, Maine; Baltimore, Maryland; Battle Creek, Detroit, Kalamazoo, Saginaw, Marshall, Mancelona, Grand Rapids, and Hart, Michigan; South Park, Austin, Minneapolis, and Fairmount, Minnesota; St. Louis, Kansas City, Springfield, Jefferson City, and Liberty, Missouri; Butte, Montana; New York City, Brooklyn, Buffalo, Oneida, Kingston, Oneonta, Utica, Mt. Vernon, Saratoga Springs, Albany, Rochester, Amsterdam, Syracuse, and Staten Island, New York; Milford, New Hampshire; Newark and South Orange, New Jersey; Norfolk and Omaha, Nebraska; Biltmore, North Carolina; Grand Forks, North Dakota; Springfield, Columbus, Dayton, and Marion, Ohio; Portland and Salem, Oregon; Philadelphia, Scranton, Johnstown, and Sharon, Pennsylvania; Memphis, Knoxville, and Chattanooga, Tennessee; Dallas, Galveston, and Austin, Texas; Ogden, Utah; Norfolk, Virginia; Randolph and Montpelier, Vermont; Spokane and Virginia City, Washington; Milwaukee and Sheboygan, Wisconsin.

It is not too much to say that this class is next in importance to the class recently taught by the Rev. Mary Baker Eddy, so far as recent teaching is concerned. Nor is it any disparagement to the earlier teaching, nor to the noble army of students who were sent out under that teaching, to say that the more recent teaching has met a great need of the hour. The disciples thus recently sent forth, David-like, with their sling of Truth in hand, to battle with the Goliath of error and misconception, become so many additions to the noble band of veterans, who, for a number of years, have valiantly led the van. They are co-workers in our ranks. With steady, hopeful tread they all will march shoulder to shoulder in our grand army. No sense of rivalry, jealousy, or other element shall enter in to disturb harmony and unity.

Those who attended the class, but to whom certificates were not issued, have returned to their respective fields strengthened by reason of their attendance upon the class. They, in common with those who were granted certificates, received to all intents and purposes class teaching, and are sharers in the benefit thereof. Certificates were not withheld from the attendants because of any unworthiness or unfitness apparent to the Board, but because of the impossibility of granting more than the prescribed number.

The question of the needs of the respective localities necessarily presented itself for careful consideration, and was adjusted by the Board, as far as lay in their power, with reference to such needs. It seems unnecessary to say that they were unable to meet all the needs presented, and

Digitized by Google

doubtless there were fields not included whose claims were equal to those of some that were. Our friends in these localities may rest on the assurance, however, that in due time their want will be supplied; for it is as true with reference to teaching as to any other fact, that "Divine Love always has met, and always will meet, every human need."

Those who received certificates go forth armed with the authority conferred by The First Church of Christ, Scientist, in Boston, Mass., by which the Board of Education was established, as well as the Massachusetts Metaphysical College. Under the By-laws as they now stand, the applicants selected by the Board of Education were certified to the Rev. Mary Baker Eddy, and by her approved. The certificates are issued under the auspices of the college and signed by her as President thereof. They also bear the signatures of the members of the Board of Education. Thus is established a connection between the Mother Church and the Massachusetts Metaphysical College, under the authority granted to the College by the Commonwealth of Massachusetts in the charter creating the College. This certificate confers upon its recipient the College degree of C.S.B., thereby placing the student on an equality with all others graduated from this department upon whom the degree of C.S.B. has been conferred; and according to the present church ruling they become teachers.

This class throughout was a most harmonious one, all present expressing a high sense of the privilege granted them, and seeming to realize fully that this means of providing an educational system in Christian Science was ordained of God through our Teacher and Leader, and endued with all the importance and sanctity of her other acts.

It is evident that this event marks a turning-point in Christian Science teaching. A new era in this respect dawned with the new year. It seems to be a stride toward a more impersonal teaching. That the new order will confer infinite blessings all will recognize.

In point of locality certificates were granted to students representing California, Michigan, Nebraska, Wisconsin, Kansas, Washington, Oregon, Missouri, Georgia, New York City, Massachusetts, Iowa, Texas, Ontario, England, Germany.

Under the By-laws this Board will not re-assemble until the first Monday of January, 1900. Applications for examination will not be received by the Board until notice thereof is given through our publications.

Questions and Answers.

Is it not enough to be a Christian? Then why add the term Scientist? Was Jesus anything more than a Christian?

Yes, Jesus was a Scientific Christian, and because of this fact he healed the sick, raised the dead, cleansed the lepers, and cast out demons. There are those to-day who call themselves Christian, who do not obey his command, "Heal the sick," because they do not know how to. Why do they not obey? Because they are not Scientists. Teach these worthy people how to obey. Give them the method of accomplishing the "mighty works," and you furnish the Science lacking. "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, provides the "one thing thou lackest." You desire to be like Christ. This will teach you, will give to you the method of attaining the Christ. That which explains how, that which unfolds the method of successfully attaining a given result, is a Science. Understanding how to attain the Christ you possess, the Christ Science, or Christian Science. Is it not plain, then, that if one would be like Jesus he must be a Christian Scientist?

I see that the Cause of Truth would be greatly advanced by the increased circulation of our literature. How may I help in this good work?

This is an excellent and important question. We answer, First, by furnishing the editors with all important Christian Science matter. By this we mean not spring poetry, but solid facts. Carefully prepared testimonials and the news of Church organizations and Church dedications are always welcome.

Second. Know that the world not only needs but wants our literature. See that when patients are ready for it Science and Health is placed in their hands. Provide yourself with all Mrs. Eddy's works. Subscribe yourself and get your Church to subscribe for extra copies of the Journal and Weekly. The Anglo Saxons feed on the newspapers. Fill them up with the Weekly. It will prove a good appetizer. In Christian Science this is an era of expansion. In the circulation of our literature let all become expansionists.

Can it be said that Isaiah's words (40 : 4): "The crooked shall be made straight, and the rough places plain," can be applied to the highways of men and nations?

Yes. They should be and are. Truth straightens the crooked and smoothes the rough. The coming of Christian Science to a community means much straightening of crookedness and much smoothing of roughness. The spiritual realities are sure to be followed by the visible manifestations. Mind is instantaneous in its action. Mind works without friction and with ease. The recognition of this divine fact is finding fulfilment in varied lines. Every movement which tends to lessen the hours for toil and increase the hours for thought, which makes for the abolition of drudgery and helps men to realize the joy of divine service, is in entire harmony with the thought of the Christian Scientist. Isaiah's prophecy is finding fulfilment in the bettered highways,—streets, steam, electric, etc.,—the movement for which is now well-nigh universal.

Dedicate a Church.

Christian Scientists of Clinton, Iowa, Dedicate their Handsome New Structure.

THE new church edifice of the First Church of Christ, Scientist, was formally dedicated Sunday, November 6, with appropriate ceremonies, and hundreds attended the services held through the day. Owing to the limited size of the auditorium the dedication service held at half past ten was repeated at three and again at half past seven, and those who attended the first and second were so notified, so that each audience was a new one, yet at each service the church was packed with auditors.

The address of welcome, delivered by S. Jerome Schenck at each of the services, was in part as follows:—

In January, 1897, this church was organized, and incorporated under the laws of the state of Iowa, with five members. From that time forward the interest was one of spiritual advancement, although each attending step was fraught with ordeals seemingly insurmountable, and only by the utmost reliance in God, the divine Principle of all Good, was the path made clear, and the labor of each individual member made to shine forth as the radiance of the midday sun. The need of a home for this faithful little band of Christian Scientists began to be manifest, and when the new organization was six months old, with seventeen members, a church site was purchased on which to build a house of worship. A building committee was appointed and instructed to report plans for the erection of a church. After much deliberation, it was decided to remodel the building already on the lot in which to hold services until such time as it was deemed

Digitized by Google

expedient to begin the construction of such a church as had been contemplated. To repair this building and furnish it suitably for a temporary home in which we could meet was no small undertaking to this little band of earnest Christian Scientists, for there seemed a lack of funds, even at the very start, and although our worldly supply seemed limited, from the beginning our trust was not in the material or earthly, but in "Him who doeth all things well;" for had we not been taught that "the earth is the Lord's, and the fulness thereof"? Then why should we not put our full trust in Him who gives us Life, Truth, and Love, and understand through the infinite Mind that there is always plenty and to spare? Yet in this our infancy the pathway was not through flowery beds of ease, nor could we sit down and realize that we had an easy task before us.

There were trials and self-denials, and many were the seeming obstacles to be overcome, but always putting our trust in God, the giver of all, and striving as did Abraham of old, to walk by faith and not by sight, we pushed forward, endeavoring to realize that all would be supplied as fast as needed. And in this way we toiled on, keeping our gaze ever toward the light, clinging steadfastly to God's promises: knowing that divine Love meets all human needs; with loving and encouraging words from our teacher, who ever reminded us that we had a rich Father. We pressed on, and when funds were low, we never swerved or doubted, and when the time came and a bill was due there was always plenty on hand to meet the need, for well did we know, that "except the Lord build the house, the workmen labor in vain."

One year ago to-day we opened our doors to the public and held the first service. To-day, with a membership of eighty-six, we lift our hearts in loving gratitude to the Father who has builded this house, which we are permitted to dedicate free from debt.

Although plain in appearance and having no lofty towers, but in the utmost simplicity, Zion stands forth in all her beauty and grandeur. To us who have stood the trials, it is as precious as though the cost were ten times as great, knowing as we do that God is our God, and to Him be the praise and glory.

And here, too, let me add a few words in regard to the growth of our Sunday School, which is most dear to us who know from whence it sprang. From a mere handful at the start our Sunday School has increased and broadened in its work,—until at the present time we have an enrolled membership of one hundred and twenty scholars.

The address of Mrs. Crider, First Reader, which followed that of Mr. Schenck, was also an able effort, an abstract of which follows:—

To the all-wise and ever-present God be praise and thanksgiving for the priceless Truth that frees from sin, disease, and death, for the understanding that "man's heritage is dominion over the material sense," for the blessings and privileges of this hour. In the Ninety-first Psalm we read, "He that dwelleth in the secret place of the most High shall abide under the shadow of the Almighty"—that dwelling-place must be in the understanding that God is all powerful. The suggestions of the enemy—the temptation and the tempter—are both destroyed in the realization that God is Omnipotent, and is everywhere present. You who have assembled here with us, many of you from distant places, rejoice with us in the possession of this church. You have helped us by your words of encouragement as well as by your material aid, both always arriving at a moment when most needed. This church is the outcome of the realization that God is "supreme, incorporeal Being." Jesus said, "upon this rock I will build my church; and the gates of hell shall not prevail against it."

Suppose that you had been a prisoner for years, shut away from home and friends, bound with chains heavy to carry; no hope of ever being free, despair waiting to bear you to destruction, when a friend appears, opens your prison doors, strikes off your shackles, and you walk forth in the glorious sunshine, would you not be an ingrate if you failed to acknowledge both by word and deed your appreciation and thankfulness for the service rendered? You could not forget the liberator, although the dungeon might fade with its dark, loathsome, and foul atmosphere, and its chains become a thing of the past in your joy at being at liberty, you would not forget to whom you owed your liberty. Thus it is with us. We were in darkness, ignorance of our birth-right, chained by personal sense, worshiping God afar off, hopeless and helpless, when Truth appeared and illumined the dark and hidden places, God became a present help, the Bible a new book revealing God as Love and God as all. Mary Baker G. Eddy is loved to-day by a million of grateful people. She has met persecution, wrestled with poverty and overcome every obstacle that stood in the way. Like David of old with the sling of denial and the five small smooth stones (statements of Truth), God's supremacy, she went forward, thus disarming Goliath, this king of mortal mind, and destroying his false power. She saw the Red Sea before her, but undaunted pressed on and reached the summit, safe in divine Love. She has given us the key to unlock the door; none may enter but through the realization of God's supremacy. Omnipotence cannot be divided with any lesser power.

The building committee labored faithfully to bring their part of the work to a successful issue, and we are enabled this day to dedicate our church free from debt to the service of Almighty God. We have learned that giving does not impoverish and withholding does not enrich; also that God loves a cheerful giver. The realization of this blessed Truth has enabled us to build this place of worship and to be found with one accord in one place.

As a spiritual structure with Christ for our guide, let us lay aside every weight, looking to Jesus as the author and finisher of our faith.

The Church is in a prosperous condition, has one of the handsomest little churches in the city, and the membership is constantly increasing. Sunday's dedication was a great event in Christian Science circles, scores coming from distant states, called by the meeting of the Association.

Clinton (Iowa) Morning Age.

The notice of this dedication was promptly sent us, but was never received. We trust that the Field will in all cases report to the Weekly such important events. It is our earnest endeavor faithfully to chronicle the progress of the Cause, and the editors are grateful for the hearty co-operation which is always so gladly given.

About Christian Science.

To the Editor of the Indianapolis Journal:—

It seems to me there is a world of needless pother about Christian Science and a deal of gratuitous advertising of it that it does not merit, and what is remarkable is that the advertising is all in the religious press and under the guise of criticism and fault-finding. Even the Journal, to show that it is religiously inclined, especially on Sundays, in addition to its excellent sermon and other religious reading, gave us last Sunday an editorial criticism of Christian Science that would have done credit to the Christian Advocate or the Independent. What is further remarkable in these criticisms is, they are never truthful, and seem to desire not to be —that is, they suppress material facts or pervert them so as not to tell the whole truth. The Journal's editorial, however, lacked one element which characterizes some, if not all, the religious papers. These seem to have discovered that, after all, whatever of good is in Christian Science, so-called, is found in Buddhism and other Oriental religions, and it is sacrilegious to transplant it into Christian countries and

Digitized by Google

name it Christian Science, whereas it is older than Christianity itself, if there is anything at all in it. This, in their logic, is conclusively fatal to its merits, and must settle the question with all Christians who believe that all creation outside Christian countries is outside the tender regards of the All-Father, most of them including in this reprobate class all Christians who do not see the Christ through the colored glasses they use. They think the other sheep of whom the Master spoke who do not belong to their little fold are very few and to be greatly pitied; hence the binding obligation to contribute liberally to foreign missions that all these may be cared for in the one fold.

Now, I am not going to defend Christian Science against the attacks of these religious papers and of the Journal when on its good behavior on Sundays; I am too fully apprised of the formidable force I would thus encounter. Besides, the delusion, if it be one, seems not to need any defence. It appears to be gaining favor with intelligent people, notwithstanding such criticism. Even the coroner's inquest, some time ago, over a man who died of consumption while under Christian Science treatment, to ascertain how much longer he might have lived under the treatment of a regular doctor, only called attention to the Science people, for it appeared in the investigation, official and unofficial, that men had died of consumption even under treatment of men having a state license to practise medicine. And the more recent attempt to hold surviving friends criminally responsible for the death of a Christian Science patient because they had not called in a regular doctor has re-acted and advertised Christian Science as a possible remedial agent. Better let it be, for all these diatribes of the religious press, and of the religious issues of the secular press, and coroner's inquests, and prosecutions for not employing doctors that have diplomas, only call public attention to it, and are investigations of its merits by showing what it does accomplish.

Of course, I feel humiliated at the passing of the friend of my childhood, the regular doctor. The scars on my arms tell how I loved the lancet in the days of his supremacy; and there is not a tooth in my mouth that I have not bought of the dentist, the original supply having perished in early life, through calomel. There were "schools" even then that repudiated the lancet and would not salivate a woman in childbirth or a man with the ague, whereas there were sovereign remedies on these and all other occasions, but they were "quack" remedies, you know, and I wanted to be "regular" if it killed me. But it developed in the course of time that women need not be bled and calomeled preparatory to giving birth to a child, and that a man with ague could get well without either and not have a sore mouth or be debilitated by loss of blood; and little by little the "quack" doctors came to the front, and the "regulars" were only too glad to leave off bleeding and salivating on all occasions, and they are now willing to recognize that which their fathers anathematized, and make common cause against Christian Scientists. Meanwhile the number of persons who have been benefited by Christian Scientists is constantly increasing in every community, and is including men and women of such intelligence and social standing that the cause they represent is not likely to be pooh-poohed down, and editorials in religious papers and the Sunday editions of secular papers, or coroner's inquests, or criminal prosecutions, or all put together, is not likely seriously to impede its growth. Just how "the regular doctors" of the future are to coalesce with them, and make common cause against some new fad that is in the womb of the future, I cannot now see, any more than I could have foreseen fifty years ago how the discordant "schools" would one day be cheek by jowl in demanding legislation to save the whole posse of them from the unlicensed doctor that cuts on prices and plays the "scab," though doing as good work as the best of them. But I don't have to foresee how that is to be done; it is enough to foresee that it will be, and that the foremost in the "combine" will be the doctors, just as the "regulars" of fifty years ago are foremost in the "combine" of to-day with the "quacks" of fifty years ago.

U. L. See.

The Sunday Journal, Indianapolis, Ind.

Supreme Power of Mind Rules.

A reporter for The Postscript, in an interview with a representative Christian Scientist of this city, has gained much information in relation to the growth of the movement in the Metropolis and in the Empire State.

In the State of New York, Christian Science has over thirty thousand adherents and some thirty-five churches and congregations. A $220,000 edifice is about to be erected at Sixty-eighth Street and Central Park, West.

The Scientists have among their number many representative people.

"Probably two-thirds of the followers of the faith in the city of New York," said the gentleman, "have been healed by its system of mental therapeutics.

"Extensive reform and prison work is carried on by the churches, and philanthropic labor is well organized. The Christian Science churches are invariably dedicated free from all debt. In the last twelve months the attendance at the Scientist churches in the Metropolis has more than doubled. The growth is of a solid nature, and represents the result of a practical religious philosophy.

"Christian Science is no longer the stranger within the city gates, but the recognized Healer, Friend, and Reformer of the race."

"Does Christian Science cure organic diseases, or only nervous disorders?"

"Two-thirds of the patients that come to Christian Scientists are sufferers with organic disorders. The most remarkable results have been achieved in the realm of such diseases. The positive proof of these claims is open to the investigation of any sincere inquirer.

"A passing fad in no wise engages the attention of the million or more adherents of Christian Science. That which heals the body and clearly interprets the teachings of Christ enters into the deeper nature of man, and can in no wise be influenced by blind opposition, satire, or persecution.

"One of the fathers of the homœopathic profession in the city of New York, a physician who has for years sent many of his severest cases to Christian Scientists for healing, has recently said that Christian Science is meeting with no greater opposition than his own school of *materia medica* during his own knowledge and experience.

"Men love progress, but hate the details of progression. In early New England days, the men who introduced the cook stove, which was designed to take the place of the old-fashioned brick oven, are said to have suffered bitter persecution, and even bodily danger, because of their threatened innovations.

"It is well to remember the admonition of Abraham Lincoln, 'You can fool a part of the people all the time, and all the people part of the time, but you can't fool all of the people all the time.'

"Christian Scientists have become tired of being fooled by the perpetual agitation concerning germs, bacteria, contagion, the thousand and one epidemics, and all that makes life not worth the living, and have enlisted in a common-sense crusade for the establishment of rational living, good health, good morals, and the contagion of happiness."

"Can the healing be separated from the religion?"

"No. The two are but equal parts of a united system. Physical health is one with spiritual or mental health in Christian Science. Man's exemption from disease has not been at all equal to his progressive exemption from ignorance and evil.

"The human mind has separated the realm of the mental

Digitized by Google

from that of the physical. It has surrendered the body to a reign of terror, while the higher nature of soul has been looked upon as directly related to God. This grave weakness of religious philosophy has worked great havoc with bodily health.

"The laws of Mind are the laws of Life. This is the secret of the success attained by the operators in mental therapeutics.

"One case of mental healing proves the infinite possibilities of Mind Healing. One case of moral transformation is prophetic of the infinite power of Good.

"Superstition has no place in religion, nor should it have an abiding place in the philosophy of health."

The Postscript, New York, N. Y.

A Terrible, because Truthful, Indictment.

BY ALEXANDER M. ROSS, M.D., F.R.S.L., ENG.

Member of the College of Physicians and Surgeons of Quebec and Ontario, Professor of Hygiene and Sanitation at St. Louis Hygienic College of Physicians and Surgeons, Vice-President of the Association of Hygienists of America, Member of the Ninth Session of the International Medical Congress, Member of the British, French, and American Association for the Advancement of Science, etc., etc.

I ARRAIGN the leaders of the profession on the following grave charges—the rank and file are but sheep led astray:—

1. I charge that, whereas, the first duty of a physician is to instruct the people in the laws of health, and thus prevent disease, the tendency has ever been toward a conspiracy of mystery, humbug, and silence.

2. I charge that the general tendency of the profession is to depreciate the importance of personal and municipal cleanliness, and to inculcate a reliance on drug medicines, vaccination, and other unscientific expedients.

3. I charge that they have encouraged superstition and humbug by the germ theory of disease. I do not question the existence of infinitesimal micro-organisms; but they are the result, not the cause, of disease. They are scavengers, their legitimate work is to clean out the sewers of our bodies. Whenever there is decay, pus, or decomposing matter, there these little life-savers are doing their work of neutralization, sanitation, and purification, they feast upon effete and decaying animal matter—they are beneficial helpers to an important end.

4. I charge that the prevalent custom of advising a speculum examination for every trifling backache, earache, headache, ingrowing toe-nail, or a bunion, is an unnecessary outrage on the modesty of a woman, and disgrace to the profession.

5. I charge that the present abominable and dangerous custom of spaying women for the most trivial uterine derangements is nothing less than criminal, and in contravention of scientific practice.

6. I charge that the prevalent custom of ascribing all ills (imaginary or real) that afflict women, to uterine troubles, weakness, ulceration, or displacement, is false in theory and fact, and is nothing but a cloak to cover ignorance, immorality, or cupidity.

7. I charge that they prescribe to their patients—even child-bearing and nursing women—the use of beer, ale, and other alcoholic beverages, which not only encourages drunkenness, but poisons the life-blood of unborn children, and stamps a permanent appetite for liquor on the rising generation.

8. I charge that they have bitterly opposed every real and scientific reform in the healing art; they have filled the world with incurable invalids, and given respectability to quackery by the outrageous quackery of the profession itself; disgusting all sensible and thoughtful men by their fallacies, tyrannical delusions, fetichism, and humbug.

9. I charge that they have, under the treacherous guise of protecting the people from quackery, secured the enactment of most unjust monopolistic laws, which deprive the people of one of their dearest and most important rights—the right in the hour of sickness and in the presence of death to choose their own medicine.

10. I charge that they have by doctor-craft hoodwinked the legislature into enacting compulsory vaccination laws, which compel parents to submit the bodies of their children to the beastly, useless, and dangerous rite of vaccination, and to deprive unvaccinated children of the right of education in our public schools and colleges. I hold that every individual should be protected and sustained in his medical opinions, as he is in his religious or political opinions, and any man or set of men who would withhold from his brother man this right would light the fires of the Inquisition if he dared.

The Washington News Letter.

Dosed to Death.

A Physician's Testimony.

IN some heathen lands they kill the doctor if the patient dies, but it would hardly do to follow that custom here, else there would be as great a hegira out of the ranks of the profession as there is now into it. And still the question arises in the minds of those best capable of judging, whether drugs are not killing more people every day now than are being benefited by them. One cannot pick up a daily paper but a profusely illustrated, sickening advertisement of some villainous nostrum will bang him in the face; and the public pay for it. If they didn't they wouldn't be there. It has got to such a pass that every family has some one or more patent medicines in the house constantly to fall back on in case of emergency, or as a stand-by to keep them well.

But we will leave those all out of the question; people are daily dosed to death by doctors—so called—and I am satisfied that the somewhat recent innovation, called the hypodermic syringe, has slain its thousands. Further, it is a known fact that deaths from hydrophobia have increased vastly since hydrophobic innoculation was adopted by certain of the profession. Well-informed physicians are fast coming to the opinion that hydrophobia is a mental disease with a physical manifestation oftentimes, and that if the mind can be kept right there will be no convulsions. "As a man thinketh in his heart, so is he."

I well remember a good many years ago being called in a consultation over the case of a very prominent merchant in Ovid, who was dying apparently of typhoid fever. The local doctor, as well as one from St. Johns, were in daily attendance, and had declared his case hopeless. They were good physicians, too, but had lost their grip in this case.

Being very well acquainted with the patient, I sat down by his bedside, put my hand on his pulse, and looked long and steadily at his closed eyelids, listening meanwhile to his muttering delirium. At length he opened his eyes, and for the first time in weeks, the attendant said, a gleam of intelligence shot from them. "Do you know me?" I inquired. He nodded assent and whispered weakly, "What do you think?"

I took hold of his hand with a firm grasp, and looking him sharply in the eye, assured him that he would certainly recover, and that I would stay right by him until he did. He dropped off immediately into a sound and refreshing slumber, simply rousing to take a swallow of milk punch occasionally during the whole night, and when he awoke in the morning he was moist with perspiration, his fever had nearly all left him, he was free from delirium—the crisis had passed. He recovered and is alive to-day for aught I know, and this was thirty-five years ago or upward. He didn't require any medicine at all.

This is only one of many instances that every physician of any amount of experience can relate, and he told me years afterward that the only thing he could remember for weeks during his illness was that I came over and turned his craft around and started him up stream toward health. Right here

Digitized by Google

permit me to say that medicine is not a science; it is a trade, an occupation, a pursuit (for the almighty dollar), and is followed by some very ignorant, low-down, shameless rascals, too, frequently. Time was when the title of "Doctor" was looked up to and supposed to be applied only to educated gentlemen, but now every veterinarian, dentist, drug clerk, or shyster, who can rake the money together to buy a sheepskin of one of our numberless toadstool "medical colleges," which spring up in a night in almost every chartered city in our State, is a doctor. The only wonder is that there hasn't been one inaugurated in Owosso ere this. There is ample material there to compose a faculty of superior merit.

Now, if Christian Scientists prefer to go, or have their friends "enter into eternal Life," immediately, than to be dosed to death, and damnation, perhaps, why not allow them the God-given privilege?

Finally, there is one thing more that should be understood by the laity as well as the so-called professional man, and that is that medicine never *cured* anything. It will sometimes remove obstacles, but nature always does the cure.

DR. WARD.

Laingsburg, Mich., December 8, 1898.

A Purchasing Agent's Views.

THERE are probably a great many residents of your State who are subscribers to The Denver Republican who will recall me as a former resident of your city. If these people had opportunity for the same daily intercourse with me that occurred in the period referred to, I think some of them would ask, What has happened to Hubbell? The question is an easy one.

In May, 1895, through the healing of my daughter's eyes of astigmatism of the eyesight by the teachings of Christian Science, I was led to read a copy of "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, and by reading this book for the purpose of determining as to whether or not it was a fit book for a Christian girl to read and study, the scales fell from my eyes, and I have been from that day to this as conscientious a student of the teachings of Christian Science as is possible for me to be, and with the increased understanding as to the teachings of our Saviour there has come to me a more complete happiness and peacefulness than I ever dreamed I could possess.

In May, 1895, I was asked by parties having extensive and varied interests to accept the position of purchasing agent for all their interests, which represent some thirty-three distinct corporations, among which are railroad lines aggregating nearly fifteen hundred miles. In this work I am called upon to make the purchase of all kinds and classes of materials and supplies needed by these several companies. When I first began the work I had not had as much understanding of the teachings of Christian Science as is possessed at the present period, and therefore my work irritated me to a greater or less extent, and when called upon to meet experiences that had not been previously gone over there was always a feeling of distrust and uncertainty as to whether or not the work could be successfully accomplished.

The Scripture recorded in the fifth and sixth verses of the third chapter of Proverbs says,—

"Trust in the Lord with all thine heart; and lean not unto thine own understanding. In all thy ways acknowledge Him, and He shall direct thy paths."

In the eighth verse of the thirty-second Psalm we read,—

"I will instruct thee and teach thee in the way which thou shalt go: I will guide thee with mine eye."

I have found in my experience that God is the same yesterday and to-day, and I believe that as the future becomes the present, I shall find also that He is the God of the forever, as well as of the yesterday and to-day, and I therefore realize that the God who cared for the Children of Israel in all their journeyings is the same affectionate, loving Father who cares for His people to-day, whenever His people permit Him to do so.

All Christian people believe that the Bible has been given for man's guidance and direction; at the same time, up to May, 1895, I always gathered from the instructions that were given me regarding the Bible, by those claiming to be versed in the Scriptures, that there was a sort of a limit as to the application of, for instance, the promise just above quoted; yet I have since found in my business that I had the greatest success only when the more completely following the Scriptural teachings as above given, and this has come from studying and practising Christian Science.

I was recently asked to accomplish a certain result, which involved the ultimate expenditure of a sum approaching five hundred thousand dollars, and was instructed to complete the purchase along certain lines. When I started eastward for the purpose of accomplishing this work, I had not journeyed many miles from home when I thought over the work in hand, measuring the work from what business men would call a cold blooded business standpoint, and as I reviewed the business in hand from that basis, I said to myself, "You are a fool to undertake anything of the kind, because it is impossible, and people will laugh at you."

In other words, I got scared, and as recorded in the forty-first verse of the seventy-eighth Psalm, I was on the point of fulfilling the Scripture, which is as follows: "Yea, they turned back and tempted God, and limited the Holy One of Israel."

When the thought occurred to me that perhaps if I would look into my Bible I would find a way out, because the work in hand was honest, it in no way, shape, or form involved any questionable transaction, and to accomplish the purpose desired would produce harmony, whereas failure would be to manifest discord, and so I opened the Bible at random to the eighth verse of the thirty-second Psalm, and read:

"I will instruct thee and teach thee in the way which thou shalt go: I will guide thee with mine eye."

I realized then and there that the work in hand was accomplished, and so it was with a net saving to the company of over twenty-seven thousand dollars below the figures that I had been authorized to expend, which estimate was predicated upon a carefully prepared estimate of what the expense would be.

To a great many, perhaps, this would not have any particular significance, yet to me it is a clear evidence that the promises of God are continually fulfilled, whenever we will accept the guidance of Truth.

The practice of Christian Science is the only medicine that has been used in my home for over three years, and during that period referred to we have had occasion to prove the claims of Christian Science.

As a religion, it has brought into my home—to the mother, the daughter, the son, and myself—a happiness that was never known before, although our home was always known as a happy one, and measured by any standard known to my experience, Christian Science is the grandest gift to mankind since the period when our Saviour personally demonstrated its teachings.

You can take from me to-day everything that I have in the world, but leave me my copy of Science and Health and the Bible, with the understanding, with the wisdom and knowledge that is given to mankind from a close study of these two books, I will be able to demonstrate the Allness of God and so prove that, "Sufficient unto the day is the evil thereof."—IRA C. HUBBELL, Kansas City, Mo.

Mr. Hubbell is purchasing agent of the following companies: Kansas City, Pittsburg & Gulf Railroad Company; Kansas City & Northern Connecting Railroad Company; Omaha, Kansas City & Eastern Railroad Company; Omaha & St. Louis Railroad Company; Kansas City Suburban Belt Railroad Company; Kansas City & Independence Air Line

A Wonderful Key.

THROUGH Christian Science, the sick and dying are healed; the slaves of sin and evil appetites, set free; the insane restored to reason; the otherwise incurably blind, deaf, and crippled, made whole; and this Science has been revealed to mankind in "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy.

These are facts, and yet, even those who have been healed in Christian Science sometimes complain of the distinction that is given Mrs. Eddy and her book in the church services and in the practice. The writer was one of these unreasonable persons.

Let us consider a parallel case. A man has been lying in a damp, deep dungeon—manacled hand and foot—ever since he can remember. He has been given keys from time to time, none of which would turn the bolts of his dungeon door or loosen the iron clasp of his fetters. His condition has excited the sympathy of men of all nations, and keys of the most cunning design have been sent to him. Some of them are very beautiful and almost fit, but an unseen flaw in the design makes them as useless as the key of crudest design which does not come near fitting the lock.

In the course of years, the prisoner has acquired a large and varied collection of keys. Some have helped to make the time pass agreeably for a while, giving him employment in trying to adjust them to the lock, but finally he gives up all hope and concludes that the only escape for him will be death. Just at this time a woman offers him a key. He has tried so many that it seems folly to try another, but in a half-hearted way he applies it to the lock of his ankle fetters, and lo! they are loosed. Then he tries the bands around his wrists, and they spring open. His joy at first is too great for words. He weeps tears of heartfelt gratitude. Recovering from his emotion he goes to the door and tries the key in it. The bolts slowly slide back and the door opens. He is free!

Looking back into his dungeon, the man's joy turns to grief. He sees all those beautiful keys, and regrets that his liberty could not have been gained by the use of one of them, instead of this key that a woman has given him. He turns on the woman and abuses her, and insists that if he must owe his liberty to a woman, and to such a key as that, he will go back into his dungeon.

The woman pities the poor creature, for she knows that he will thank her some day when he gets out into the light, and the delusive fancies bred in his dark prison house have been dispelled.

Others who are in similar dungeons hear about this wonderful key and ask to see it. They have become expert in the knowledge of keys, and look this one over without finding anything very peculiar about it.

There are locksmiths who have spent a lifetime trying to devise keys to unlock these dungeons. Some of these locksmiths are graduates of famous universities, where they have studied the literature of keys in every known language. They look at this wonderful key also, and immediately pronounce it a fraud, without even trying it. They say it's just a compcsite of the notions of visionary keymakers of all ages—"Nothing new in it at all."

"That may be," says some one, "but this new key unlocked that dungeon door that no other key would unlock. How do you account for that?"

"Well," responds the educated locksmith, "if it unlocked that door, it's the devil's work, for I have been a locksmith now for fifty years, my father was a locksmith, and my grandfather was a locksmith, and I never found a key among all theirs or mine that would unlock that door. It's my opinion that it was not the will of God that that man should ever get out."

Science and Health is more than a collection of truths from ancient and modern authors. It is the full revelation to mankind of the Principle of all Truth, which imparts spiritual understanding, by which one is enabled to separate the wheat from the chaff (Truth from error) in all that he reads, whether in ancient or modern literature. It is the Science of Being which leads into all Truth, all Life, and confers health, happiness, freedom, and abiding peace.

This great book opens the hidden meaning of the Scriptures. It is, in very truth, a "Key to the Scriptures."

Denver Republican.

Unreality of Evil.

BY C. L. R.

IT is often objected against Christian Science that it denies the reality of evil, in whatever form it may seem to manifest itself, and yet does not explain its origin or cause, and this is called unscientific and illogical. But surely it rests with those who claim that evil is a reality, to explain its origin and cause. Who can explain the origin of that which has no origin, because it is not, never was, and never will be? Should we expect to find in a book on the Science of arithmetic an account of the origin and properties of nought? What child fails to understand that the symbol "0" represents the absence of something? And, having grasped that, what child or grown person would ask to know more?

Should we look in a scientific work for the history of that which is unscientific? The only notice which Science takes of any unscientific statement, is to deny it and prove its falsity. Euclid disposes of propositions that are not in accord with the principles of mathematics, by the method called, "Reductio ad absurdum," and this is how Christian Science deals with the false concept called evil.

I. God is Good.

God is the Author of all that is.

Therefore Good is the Author of all that is.

But evil is.

Therefore Good is the Author of evil; which is absurd.

The first two statements we imagine all Theists, and certainly all Christians, will admit. The second is equivalent to the first article of the Nicene Creed: "I believe in God the Father Almighty, maker of heaven and earth, and of all things visible and invisible."

Again.

II. God is Infinite.

Therefore God fills all space, and includes all, for there can be nothing outside the Infinite.

God is Good.

Therefore Good fills all space and includes all.

But evil is.

Therefore Good includes evil, and wherever and because Good is, evil is, and hell is in the midst of Heaven, which is absurd.

III. Nothing can be, unless it either has a cause, or is self-existent and self-sustained.

God is self-existent Life and Truth; He has no cause outside Himself, but is Himself, Cause.

If evil is, either (1) God is its Cause; or (2) it is self-existent and self-sustained; or (3) it has a cause outside itself and outside God.

(1) That God, Good, should be the cause of evil, is manifestly impossible. If evil springs from Good, then evil must be good, which is absurd.

(2) If evil has no cause outside itself, evil must be self-existent life. But God is self-existent Life. Then either (*a*) evil must be God, Good; which is absurd; or (*b*) there must be two gods. But God is One and Infinite. Therefore there are not two gods, and evil is not self-existent.

(3) If evil has a cause outside itself and outside God,

Digitized by Google

then again there must be more gods than one; which has been shown to be impossible.

Therefore evil has no cause outside itself and God.

Therefore it has no cause.

Therefore it is not.

But Christian Science is vastly more than a statement by logical or self-evident propositions. Every student of Christian Science is daily working to gain for himself the true understanding of God, that knowledge which Jesus said, "Is Life eternal." It is stated in our text-book, "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, that when man truly realizes his relation to God, he will lose all consciousness of evil. It is possible to-day, for each one of us, even the humblest and least, to begin to prove these words, and to see for himself, that in proportion as he does learn to know God, Good, the false claim, called evil, does vanish from his consciousness.

A Newspaper for All the People.

Few newspapers, notwithstanding their protestations to the contrary, are without prejudice. A striking illustration of this assertion is given in the mass meeting of Christian Scientists, held in Carnegie Hall, on Sunday afternoon, December 18.

Three thousand representative people, including the members of seven churches in the Greater New York, assembled to hear a lecture delivered by Carol Norton, C. S. D., an exceptionally talented man, and incidentally to refute the charges that have been made throughout the land that Harold Frederic, the London correspondent of The New York Times, died under the treatment of Christian Scientists.

Convincing proof was offered that Mr. Frederic met his death while under the care of regular physicians. But all the daily newspapers, except The Postscript, had gone on record as saying that Mr. Frederic had died without regular medical attendance. Evidently this fact, and the additional fact that they were afraid of offending some of their readers, prevented them from making a report which was interesting to the general public as well as to the members of Christian Science churches.

The Postscript had a reporter at the meeting, intending to deal with it, as with all other matters, fairly. Next day it printed a report. Orders soon began to pour in from people who had attended the meeting for copies of December 19. The supply was soon exhausted. The demand continued, and orders are coming in even yet from all parts of the country.

To meet this demand, and as a matter purely of newspaper enterprise, we decided to reproduce the article. Then it occurred to us that while we were about it we might as well secure an accurate and detailed synopsis of the lecture, if possible. This we have done through the courtesy of Mr. Norton.

We believe in religious and political tolerance—that religious freedom which is guaranteed every citizen in the Constitution which was framed by our forefathers. As everybody knows who is a reader of The Postscript, it is without prejudice, and it takes pleasure in again announcing to all the citizens of New York that The Postscript will always deal, without prejudice, with important affairs that concern reputable people of this imperial city, no matter what their creed.

Twenty-five thousand copies of this issue have been printed. A few thousand copies remain unsold, and may be had for one cent per copy by addressing this office.

The Postscript, New York, N. Y.

Double Rupture Cured.

It is knowing that man is the reflection of God,—that we should do unto others as we would have others do unto us,—that God is no respecter of persons,—and other similar thoughts, that leads me to write of this wonderful cure, which has illumined so much the pathway of life before me.

I was ruptured on one side when very young, but cannot give the date. At the age of twenty-five it troubled me so much that I had to consult a doctor, who told me that I was so bad that I might have to be operated on; but that I might try wearing a truss. I did so. It answered the purpose very well, but with some trouble occasionally. After the lapse of ten years I was ruptured on the other side. I then wore a double truss for a year and a half.

Last year I was working in a lumber yard, where I had some very hard work to do, such as handling timbers, hardware, cement, etc., and at times the claim would trouble me. I concluded to try Christian Science. I took one treatment on Saturday and laid aside my truss, and another treatment on Sunday and was healed and went to work, laying aside all fear.

Some people on hearing of my healing said I should be very careful about lifting, else the claim might return. But how can I fear, when "perfect Love casteth out fear," hence there is no fear.

Some who do not understand anything of the one Mind think that a disease like the one above mentioned cannot be cured if it has been of long standing, or if the patient is very old. I ask, did Jesus on being asked to heal a disease ever ask of how long standing it was, or the age of the person? Through the understanding of the one Mind, we see that one disease is as easily cured as another. All that is necessary is to reject our mortal thoughts, and accept the corner-stone which we first rejected,—Christ-Jesus.

The peace and happiness which I now have through my little understanding of the One Mind is of more value to me than the healing of the above mentioned trouble. I feel thankful that I now know what Physician to consult for every ill.—*Samuel T. Williams, Denver, Col.*

On Christian Science.

The Rev. F. W. Hamilton speaks of its Rapid Spread.

In the Roxbury Universalist Church, the Rev. F. W. Hamilton recently preached on "The Meaning of Christian Science." He said, in part,—

Looking at Christian Science, we see a movement which, in a very short time, has attracted many thousands of devoted followers. These people are, for the most part, cultivated and intelligent. They are intensely in earnest. They believe with the utmost sincerity that they have the message that shall save the world, and their zeal is according to their belief.

It is a mistake to suppose that a certain method of healing or avoiding is all there is to Christian Science. That is only an incident of their main message of the absolute supremacy of Spirit over matter.

If we ask why Christian Science spreads so rapidly, we are likely to get two answers, neither of which is satisfactory. One answer is, it succeeds because it is true; but men do not receive the truth simply because it is true, or even because it meets their needs. They receive it only when it meets their wants. The other answer is, that it is a fascinating delusion, but there must be some reason why men are fascinated and deluded by it.

Christian Science has prospered because it has pretended, at least, to meet certain human wants. Men are not satisfied with the materialism of this most materialistic age. They are repelled by the tendency in the church to hasten on the one hand into ritualism and a conventional morality, and on the other hand to rationalize into a philosophy for the head only. They are reaching out for something which will supply their deepest spiritual needs. Whether or not Christian Science can do this, I do not now care to discuss, but it professes to do it, and because it professes to do it, it attracts spiritually minded men and women, who are failing to find that which they need through other agencies.—Boston Herald.

Miscellany.

A Case of Mental Surgery.

THE following conversation recently took place between Mr. Cornelius G. Ramsay of 1399 Detroit Street, Cleveland, Ohio, and Mr. Carol Norton:—

Question.—I understand that you have had a dislocation of the shoulder healed through Christian Science mental treatment. Is this true?

Answer.—Yes.

Question.—Was it the first time that you had ever had a dislocation of this nature?

Answer.—No.

Question.—What was your first experience of this character?

Answer.—In attempting to board an express train my shoulder was dislocated. Two surgeons, a medical student, and an attendant, labored for over an hour to set it. This effort ended in failure. Finally chloroform was given and the operation was successful. This was about the year 1896. The surgeons told me that they had never heard of a case of dislocation set through the use of mental surgery; and also said that Christian Science might be good for some things, but that it *could not* set dislocated shoulders.

Question.—When did the second dislocation occur?

Answer.—About one year after the first.

Question.—Did you attempt to have a surgeon set this one?

Answer.—No. The dislocation took place in the presence of my brother, who was with me all through the second experience and was desirous that I should call a surgeon and take whiskey. This I was unwilling to do, desiring to demonstrate mental surgery in this case. I withdrew to the privacy of a room, my brother going with me. I asked to be allowed to practise the mental self-treatment. He was anxious to make an attempt to put it in place himself, and did so, but with no success. I then attempted to lie down on the bed, but this I was unable to do. I then handled the case entirely through mental treatment, and in about five minutes the joint went into its place naturally and I had no more trouble.

The Old Man's Wonderful Cure.

A GOOD story is being circulated among the medical men of Cleveland, a story which was started by the victim himself. He is a physician of considerable repute, and some time ago was called to attend a gentleman of advanced years, who was suffering from a slight complication of disorders. The doctor went to work with a will, and presently had the patient on the road to recovery. In fact, two weeks from the time he took the case he had him cured.

As he left the house, after announcing that further visits would be unnecessary, the daughter of the restored man accompanied him to the door.

"Doctor," she said in somewhat tremulous tones, "I want to tell you——"

The doctor, who supposed she was anxious to express her gratitude for his skilled attention, waved her thanks aside.

"Don't mention it, madam," he affably said; "we always try to do our duty."

"But, doctor," she persisted, "it is something that will interest you. I feel that——"

"Say no more, madam," cried the doctor, much moved by the woman's agitation.

"It is something I must tell you, doctor," she continued. "Please listen."

The doctor halted with his hand on the knob.

"Yesterday," said the woman, "I was down town and met Mrs. Pugsley, the Christian Scientist, and she told me she had been giving father absent treatments for two weeks. Isn't it just too wonderful?"

"Good morning," said the doctor dryly.

Cleveland Plain Dealer.

Choked by Imagination.

THE fact that the throes of the imagination under great nervous excitement often produce a corresponding physical frenzy, was illustrated recently in the case of a man who had gone to sleep with his artificial teeth in his mouth.

Waking suddenly with a choking sensation he found his teeth had disappeared. He looked in the glass of water where they were usually deposited, did not see them there, and realized that they must be far down his throat.

Choking and struggling, he hammered on the door of a friend sleeping in the house, who, seeing his critical condition, vainly endeavored to draw the teeth out of the sufferer's throat. He could feel the teeth, but had not the strength to extricate them. He ran for a blacksmith who lived a few doors away, but the blacksmith's hand was too big to put into the man's mouth.

A doctor had been sent for, but he was so long in coming that the victim of the accident seemed likely to die of suffocation before the physician arrived. A little girl of ten years was brought, under the impression that her small hand might reach the obstacle and withdraw it, but she got frightened and began to cry.

The sufferer became black in the face, his throat swelled out, and his friends expected every moment to be his last, when finally the doctor arrived. He heard the history of the case, saw that the teeth were not in the man's jaws nor in their nightly receptacle, felt the throat and chest of the sufferer, and cast his eyes seriously upon the floor.

There he saw the whole set of teeth. He adjusted them in the jaws of the patient, told him to breathe freely, and every symptom of suffocation disappeared.

Philadelphia Record.

Free Choice of Doctors.

ANOTHER Christian Science healer—this time in Cincinnati—has been acquitted of practising medicine illegally, and this closes the old year with an unbroken series of victories for the "irregulars" over the forces of the recognized schools of medicine. The courts have uniformly decided in favor of the Scientists.

The question has been an interesting one, because it involved something more than a mere dispute between regularly licensed medical practitioners and those who professed to heal disease without the use of drugs. It involved the freedom of the individual. That is to say, it involved the right of a man to call in any one he wanted to and to intrust his health to the care of physicians who acknowledged no allegiance to any medical school. And it is very well that the question has been answered in the affirmative. For if it had been decided that the Christian Scientists, for instance, should not act as physicians, there is no telling when the prohibition might have been extended to some other medical sect, relatively small in numbers, though perhaps fully as efficient as the "regulars" or the homœopaths. Proscription is a dangerous precedent to establish.

So long as his volition does not involve a trespass upon the rights of his fellows, the individual is the supreme and final judge of his own actions. And rightly so.

Therefore it is not to be regretted that the prosecution of Christian Scientists and similar practitioners has failed. The question is left just where it should be left—for the decision of the patient. The sick man is the one most deeply interested. It is not for the law to make the decision for him.—Chicago Chronicle.

Five Pulpits Vacant and two or three Churches ready to Sell Out.

THE New York Presbytery is full of trouble.

Nothing like it has been known in years, and pastors, elders, trustees, and Sunday School superintendents are discouraged by the outlook.

Five pulpits are vacant, one church has passed through a scandal, two or three churches are anxious to sell out,

Digitized by Google

churches are divided over the pastors they want, and in the work of extension the Church is falling out of the race with other organizations.

To cap the climax, now comes the report that the Rev. Dr. Parkhurst has offered to resign.

The vacant pulpits are those of the Fifth Avenue, East Harlem, New York, the Fourth and the Fourth Avenue churches. The Thirteenth Street Church is being urged to sell, and members of Calvary want to sell.

One new preaching service and one Sunday School, it is said, represent all of Presbyterian Church extension in Greater New York in two years. Many Presbyterians think there is some trouble with the form of the Church organization and government, and lively discussions may be looked for hereafter.—New York World.

Deaths Caused by Substitute Drugs.

UPWARD of one hundred persons are fatally poisoned in this city every year through the practice of New York druggists of substituting one drug for another, either by mistake or to increase profits.

Such was the startling statement made last night by Edward Thimme, secretary of the Druggists' League for Shorter Hours of Labor, at a meeting held under the direction of that organization in the Judson Memorial Church. Mr. Thimme added that there was not a druggist in the city who could truthfully say that some mistakes in compounding medicines had not been made by him.

"During 1897," said Mr. Thimme, "as I learned after long research in the coroner's office, there were thirteen deaths reported as due to the mistakes of druggists. Coroner Hoeber, who was serving at that time, told me that for every case of that kind coming to the official notice of the coroners, at least five similar cases were hushed up.

New York Telegram.

A Church at Malden, Mass.

NOVEMBER 19, 1898, seven students of Christian Science and members of the Mother Church met and organized a church to be known as First Church of Christ, Scientist, of Malden, Mass., and were granted a charter by the Commonwealth of Massachusetts, November 25, 1898.

Our first services as a Church were held Sunday, December 11, 1898, in U. V. U. Hall at 10.45 A.M. and 7.30 P.M. Sunday School at the same hour as the morning service. We have had an average attendance of about forty-five including the children in the Sunday School, and have a total membership, January 1, 1899, of seventeen.

A marked feeling of harmony has pervaded each service, and a deep sense of gratitude goes out to our beloved Leader and Mother, Mary Baker Eddy, whose self-sacrifice has made this little church a possibility.

FRANKLIN I. WELCH, Clerk.

Burglars' Visit Cured her.

MRS. JULIA ADAMS of 1923 Madison Avenue appeared in the Jefferson Market Court yesterday and charged Joseph Foster, alias Joseph English, with entering her house December 15, in company with one George Allen, now awaiting trial on a similar charge, and carrying away a large quantity of silverware.

"I had been an invalid for many months when those burglars entered my house," said Mrs. Adams. "I was unable to leave my room except on rare occasions, and was a very sick woman indeed. But on the morning after the burglary I rose without difficulty and went about my house as if I had never been sick, I have been in excellent health ever since. I suppose that the excitement of that night did it."—New York Sun.

Change of Views.

"THE substance of the change of views announced recently by Rev. Lyman Abbott from his own pulpit may be stated as follows: Formerly he used to think of God as a being apart from nature, the creator of its forces, external to and transcendentally above it. Now he does not think of God as the engineer of the world, nor that the world has any forces. There is but one force—God; and there are no causes, for there is but one underlying cause—God. The natural and the supernatural become the same."

Since the announcement of his change of views Dr. Abbott has resigned his pulpit.

Rights of the Sick.

IF English law is to dictate the system of medicine, or cure, which sick persons shall employ, it will find too much occupation for its own health. There are thousands of persons who believe in the faith-cure or the cure of Christian Science as fervently and honestly as others believe in their religion, and it is easy for these persons to look upon legal authority of the kind proposed as the most insufferable of all tyranny.—Judge.

Christian Builders.

THE Boston Association of Universalists held its January meeting yesterday, with the Hazelwood Universalist parish at Hyde Park. The general subject of discussion was "Christian Builders," and the several parts of the subject were spoken upon as follows: "Building a Body," the Rev. T. Roscoe of Somerville; "Building a Brain," the Rev. R. E. Connors of Waltham; "Building the Soul," the Rev. Arthur W. Grose of Stoughton.—Boston Herald, January 12.

THE most favorite medicine in China is largely patronized because it is believed to cure almost anything. It consists of a few slices of the licorice root, some dried flower-heads, dried cockroaches, dried cockchafers, and the skin of a small lizard. The extravagant customer can have, for five cents extra, a dried "sea-horse," and for another five cents a little dry fish. The whole of these are boiled together, and the decoction cures everything from heartburn to amaurosis.

The Medical Age.

A wanderer from the Flowery Kingdom recently died in Melbourne. It transpired at the inquest that he had been treated by a Chinese physician, who gave him pills each the size of a duck's egg. There were said to be forty ingredients in the medicine, including blood, grasshoppers, ashes, bone dust, clay, dates, honey, sawdust, and ground-up insects.—Macon County Citizen.

Only Once since the World Began.

FEBRUARY, 1866, was in one way the most wonderful month in the world's history. It had no full moon. January had two full moons and so had March, but February had none. This remarkable state of things has never happened before since the era we assign to the creation.

Denver, Col., Weekly Times-Sun, January 4, 1899.

Patient.—Oh, doctor, I've such queer pains in my head, and such a queer taste in my mouth, and such queer feelings when I wake in the morning, and such queer——

Doctor.—Madam, the only advice I can give you is to stop reading the patent medicine advertisements for a while!—The Illustrated American.

"We have a new preacher."

"How do you like him?"

"I can't say; my wife hasn't met his wife yet."

Independent Statesman.

The Lectures.

At Pottsville, Pa.

Mr. Carol Norton, C.S.D., on January 10, delivered a lecture at Pottsville. A leading Scientist of that city writes as follows with reference to the lecture:—

"The Academy of Music has a seating capacity of eleven hundred. The people began to arrive at seven o'clock, one hour before the lecture began. At eight o'clock, when the lecturer and Mr. Seltzer appeared on the platform, every seat was occupied, except a few in the topmost gallery. There were at least three hundred people standing, and the manager of the Academy told us that hundreds went away when informed there was standing room only.

"The personnel of the audience was above the average in regard to intelligence, and during the hour and a half that the lecturer occupied in delivering the lecture there was the most intense interest manifested, and I did not feel an opposing or antagonistic thought. He talked in a quiet, convincing manner, and the love he gave forth melted all hatred and malice, and error did not get even a foothold."

From the Pottsville Miner's Journal we extract the following concerning the lecture:—

"Not since the political campaign last fall has the Academy of Music held such a big free admission audience as that of last evening, when Carol Norton, C.S.D., of New York City, delivered a lecture on Christian Science. The parquet and dress circle were crowded with men and women, and there was a big crowd in the upper gallery. People who did not want to climb the stairs stood four deep back of the seats in the parquet circle. And this big audience listened attentively to the speaker.

"Mr. Norton gave the people of Pottsville the first general talk on Christian Science, the foundation of a religious order that has been established here within the last two years. Mr. Norton is a pleasing talker, and his remarks were interesting, if not convincing."

The Pottsville Republican of January 11 also contained an excellent account, and published the lecture in full.

Lecture in Lynn.

The teachings of the now much-discussed Christian Science were explained by the Rev. W. P. McKenzie, C. S. B., at the First Christian Church, Silsbee Street, to an audience that gave the closest attention to the speaker. Rev. Mr. McKenzie is of the Board of Lectureship of the Mother Church, and appeared in Lynn under the auspices of the First Church of Christ, Scientist, of Lynn. "The Truth About Christian Science" was his subject, and in the course of his lecture he spoke of Mrs. Eddy, Founder of the Faith, and her life in Lynn, where the new teaching was first given.

Testimonies.

In 1892 I had an attack of la grippe which assumed several phases, rheumatism, pneumonia, then blood poison. This, with an old trouble in my left leg contracted when a soldier in the war of the Rebellion, confined me to my bed for a long time under the care of our family physician. There was also a swelling under my right arm, and a breaking out over my body which was irritating and painful.

I think I never passed a year without sickness and a large doctor's bill from 1863 to 1892.

My doctor advised that I should go to a hospital in Buffalo, N. Y., have a thorough examination, and have the bunch under my right arm cut out. My greatest fear was that they would find it necessary to amputate my left leg. The arrangement was finally made to take me to Buffalo. A good friend, hearing of my intended trip to the hospital, called and obtained a promise from me that I would not let the surgeons operate. She then asked that I would call on a Christian Scientist, and said she would bring me the address of one before I started. My trip to Buffalo was made on Thursday under my doctor's care, and I submitted to an examination at the hospital. The physicians thought that the bunch under my arm could be taken out and in two months I might use the arm again, but they could give no decision regarding the leg.

I made excuses to get out of the hospital, obtained help into a street car, and found my way to the Christian Scientist, not caring much whether I lived or not. I made my errand known to the healer, and told him where I had been. I said I did not care to have my religious belief disturbed, as I did not think I had long to stay in this world. He replied that if I had religious views that were comforting to me to hold on to them until I found something better.

After some explanation, I made the necessary arrangements for treatment, and from that very hour I began to mend, and within four days the bunch under my arm disappeared. The fifth day I dressed myself without aid and walked half a mile to tell my friend, the M. D., that the bunch had gone. My leg also began to improve, and I resumed business, which is that of a traveling salesman and milling engineer, within three weeks. My recovery was completed within a few months, and from that day to this, a period of six years, I have had perfect health. I purchased a copy of Science and Health, by the Rev. Mary Baker G. Eddy, and this "little book" has been my constant companion and study, and through it I have gained the understanding which has enabled me to overcome every disease that has attacked me.

Six months after my recovery I received a letter from my sister, a lady sixty years old, living in Rensselaer County, N. Y., informing me that a cancer on her breast, with which she had been afflicted for twelve years, had become so malignant that she could no longer endure the pain. She had exhausted her means with the doctors, and now they pronounced her case incurable. I took her letter to the Scientist who had treated me. He said he would treat her if she desired it. I wrote my sister, telling her of my healing through Christian Science, and advised her to write to the Scientist at Buffalo for treatment, and I would provide the means. This she did, and the cancer was healed in about two months. I visited my sister a year after her healing, and all traces of the disease had disappeared. This was a case of absent treatment, the healer and patient being three hundred miles apart. Verily, "the Truth shall make you free."

William Henry Snyder, Batavia, N. Y.

I was a sufferer from locomotor ataxia, or progressive paralysis. I could walk but a few steps at a time and would stagger like a person under the influence of liquor, and when standing still I had to hold to something to keep from falling down. My eyesight was very poor, and I wore glasses all the time, as I could not see without them. My throat was so affected by tonsilitis, quinsy, and diphtheria that I had to undergo a surgical operation for my throat.

Mentally I was a wreck. I had taken medicine for three years, from one to ten doses a day, and had grown worse continually. I had doctored with the best physicians in Chicago, Ill., and Buffalo, N. Y., but all to no avail. I had known of Christian Science all this time, as I had a brother who was healed of a disease of long standing; but being a member of an Orthodox Church, and having learned its teaching, I thought that what I did not know about the Bible was not worth knowing. I refused to listen to Christian Science, and was so prejudiced against it that I would not read Science and Health; but when I failed to get cured, or even relieved, by *materia medica*, I was glad to knock at the door of Christian Science for relief. The door was opened, and for the first time I realized what the Master meant when he said, "Ye shall know the Truth, and the Truth shall make you free." I was entirely healed, and soon learned my way in

Science so as to demonstrate it in my own life, and oh, what a revelation it was! We now have a little flock here and hold services regularly, and we are demonstrating the power of Truth every day.—Greely Price, Muncie, Indiana.

A year ago I was so burdened with physical claims and mental depression that I wanted to die, hoping beyond the grave to find rest and peace, for after trying for six years to gain good health I was almost exhausted. A physician who knew something of Christian Science said it was the only thing that could help me, and I have found it the true prescription.

My claims were backache almost continually, pains in head and neck, indigestion, swelling and inflammation of the feet, fainting-spells, great fear and worry at times, melancholy, and hysterics. Months passed and I seldom even smiled. I was discouraged at being told that I was naturally a frail person. I have been healed of all these claims by nine treatments and faithfully reading Science and Health since October, 1897. I gladly accepted Christian Science teachings, and am thankful to learn, as early as this, that it is sinful to believe that there is intelligence in matter. I have learned how to be a better Christian in this one year than in all the twenty-six years I spent in the Episcopal Church.

Christian Science has bound up my broken heart and made me happy, healthy, and prosperous. My limitless gratitude goes out to Mrs. Eddy and all Scientists who by their helpful words of comfort led me to know my heavenly Father, who is All-in-all.—S. M. Campbell, Chicago, Ill.

After three years of seeming trials, persecutions, and great tribulations, which have taught us grand lessons and for which we are truly grateful, we organized First Church of Christ, Scientist, in Augusta, Maine, October 13, 1898. Our meetings are held in the Christian Science Reading Rooms, and are well attended. I will mention a few of the demonstrations in healing. A young girl fell on the icy sidewalk fracturing her left arm, the pain was intense until she received Christian Science treatment. Soon the arm was much better and in two weeks was perfectly well and strong. By pressing the arm where it had been injured a hard ridge could be felt where the bone had become united.

A patient who was thought to be passing away with pneumonia was restored to health by absent treatment, the patient beginning to mend as soon as the request for treatment was received.

A gentleman was healed of facial humor, after various material remedies had failed. Throat troubles have been healed in numerous instances. Our daily newspaper has recently changed its attitude towards Christian Science from the most radical opposition, to a position perfectly fair-minded and just.—Aralize C. Moncrief, Augusta, Maine.

When my youngest child was six months old he swallowed corrosive sublimate. Feeling that I must have help I sent for a Scientist who lived near, but she had left home for the day, so I felt that I had the work to do myself, and yet not I, but "God, who worketh in me."

In the mean time, my baby had become partially unconscious, moaning, and twitching, and the change in his appearance was marked; but I tried to realize the Omnipresence of God, and suddenly all fear left me and I knew that the error would be cast out. Then the little one began to vomit, and the strain was so great that my daughter feared that he would suffocate. In a few minutes he fell back in my arms, and I knew that he was well, although his sister thought he was dead. Soon his breathing proved that he was asleep, and he slept for two hours and awoke perfectly well. He is now eight years old, and is and always has been a strong, healthy, happy boy.

I have had many experiences of healing since then, but never one that brought a greater realization of the allness of God.—Mrs. Clara A. Wilcox, Buffalo, N. Y.

I send this testimonial in grateful acknowledgment of what Christian Science has done and is doing for me. It is nearly four years since I began to study Science, and I have seen the helpless strengthened, the sick healed, the hopeless cured, and the innocent protected by its holy influence. My attention turned in that direction for help for an invalid friend, but now I know I needed its help as much as she did. She was healed, and is now the principal of our schools. We, with two others, read the Bible Lessons every Sunday. Some are reading Science and Health and other Christian Science literature.

I am a primary teacher, with about eighty little ones in charge. I find that Christian Science is all I need to meet all discord, even the claim of scarlet fever disappeared in less than a week.

I cannot tell what a blessing Christian Science is to me, and my heart goes out in gratitude to the dear Mother for all she has done to show us the way and make it possible for us to "*know* in whom we have believed."

Mattie A. Witt, Anacortes, Washington.

There are a few earnest workers in Christian Science here, but we have no church organization yet. We meet every Sunday and study both lessons.

We have had some experience in going through the fire during the last fourteen months, but we think a more liberal spirit is beginning to be manifested. Three of our city newspapers published the clipping from the Concord Evening Monitor relative to the class recently taught by our Mother and Leader. The editors of one of the papers are Scientists. In this county we have seven members of the Mother Church, one of whom is an ex-Cumberland Presbyterian minister, the Rev. Matt Russell, of Veal Station, and myself an ex-minister in the Primitive or "Hardshell" Baptist Church.

A. C. R. Morgan, Weatherford, Texas.

Dear Editor:—When I commenced reading "Scriptural References Sustaining the Doctrine of Christian Science," in the December Journal, I had a sore throat, in aggravated form. Before I finished reading it I was healed. I started to read it one evening and finished the following day. In former years, I have frequently suffered, for weeks at a time with this complaint. I was exceedingly grateful for the sudden healing.

Mr. Gillespie's article, above referred to, is excellent, calling attention to and explaining wonderful Bible references.

Viola Bishop, Lansing, Kan.

Notices.

Attention, Subscribers!

ATTENTION is called to the fact that there is now no special price made for the Weekly when subscribed for in connection with the Journal, as was done previous to the enlargement of the paper. The prices which now govern the Weekly will be found on page four.

No subscriptions for the Quarterly will be received for less than one year. No subscriptions for the Weekly will be received for less than six months. Orders other than subscriptions, for Weekly, Journal, and Quarterly, should be given for current issues and back numbers only.

ALL correspondence with the clerk of the Mother Church on matters pertaining to his office, should be addressed to William B. Johnson, C. S. B., 95 Falmouth St., Boston, Mass.

PER CAPITA TAXES and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid $3.18
Two to Twelve books to one address, each, Prepaid 3.00
Twelve or more books to one address, each, Prepaid . . . 2.75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid 4.00
Twelve or more to one address, each, Prepaid 3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid 5.00
Twelve or more to one address, each, Prepaid 4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid 6.00
Twelve or more to one address, each, Prepaid 5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (Cloth), each, Prepaid $2.25
Twelve or more books to one address, each, Prepaid . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid 4.00
Twelve or more to one address, each, Prepaid 3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid 5.00
Twelve or more to one address, each, Prepaid 4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

CHRIST AND CHRISTMAS. An Illustrated Poem.

Single book, Prepaid $3.00
Twelve or more books to one address, each, Prepaid 2.50

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half doz., $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price by mail, 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price by mail, 21 cents; $2.00 per doz.; prepaid.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU I SAY UNTO ALL, *WATCH.*"—*Jesus.*

Published Weekly at 95 Falmouth Street. BOSTON, MASS., JANUARY 26, 1899. Vol. 1 No. 22

Meeting of Single Taxers.

At the regular monthly meeting of the Massachusetts Single Tax League, January 17, 1899, two instructive addresses, followed by a lively discussion, were delivered. Mr. William Lloyd Garrison presided, and there were present a large number of invited guests. After dinner Mr. Garrison in part said,—

"Our purpose is a simple and direct one. We are engaged in the propaganda of a great truth, a social reform, which to us seems fundamental and imperative. We seek to reach the ears and gain the attention of all who, transcending merely personal interests and aims, desire to better the social conditions of the people.

"We do not come to you with vague theories or speculative propositions. Indeed, the chief objection made to our reform is that it is clear and definite. We invite you to expose our delusion or share in our faith.

"It is an accepted dogma that the demand for employment is naturally in excess of the supply. We hold that the reverse is the truth; that opportunity is artificially restricted, and that artifice should give way to nature. Nature has always offered illimitable chances to all the populations of the globe. It is for the selfish interest of some men that these chances should be withheld or granted only on the payment of tribute fixed by the party in control.

"In other words, what is the right of all has by the jugglery of parchment laws become private property. What was the Lord's has become the landlord's. Confiscation and robbery have in the course of time enthroned themselves in statutes, confusing ideas of property, disinheriting the many, permitting the few to thrive at their expense. To stop this confiscation, to pull down the barriers which keep workers from their work and produce starvation and beggary, is the purpose of this League.

✤

"The means are as simple as the object. Stop doing wrong is the one requirement. Abolish privilege and trust freedom. Until the earth is freely opened to all who must live upon its surface, there must be congestions of poverty and wealth, tenement houses and palaces, millionaires and beggars, feasts that rival in luxury the days of Roman extravagance, and human beings perishing for a crust of bread. At present, as Henry George describes, 'the tramp comes with the locomotive, and almshouses and prisons are as surely the mark of material progress as are costly dwellings, rich warehouses, and magnificent churches.'

"Unless all signs fail, we are rapidly coming into a time of higher taxes and increased burdens, which are to fall, under the present maladjustment, more and more heavily upon the laboring and the poor. Militarism and conquest are expensive luxuries. We know the legacy they entail. Therefore we urge the consideration of a system of taxation based on equity and common sense. We preach that equity in faith and hope.

"To-night the League has invited you to listen to an address upon those pregnant and momentous topics by a man whose life is consecrated to the service of his fellows and the progress of the truth. As one of the first to welcome the truths of 'Progress and Poverty,' and to uphold the hands of Henry George in the days of the Anti-Poverty. Society, no one can speak with more right and authority upon charity than Father Huntington, whom I have the honor and pleasure to present to you."

✤

The Rev. Father Huntington, Mission priest of Holy Cross House, Westminster, Ind., delivered the principal address of the evening. It was an interesting and able exposition of the subject from his point of view. Among other things he said,—

"What is the barrier that shuts men out from access to the sources of production? It is the blindness of the nation to its own heritage. We allow individuals to appropriate the richest, most serviceable, most remunerative portions of that which is the property of all. Private ownership of land is private monopoly of opportunity, the opportunity for the growth of a free state, made up of free men. If a democratic government must secure opportunity for each of its members, it must refuse to allow this ever-decreasing minority of those members to hold, as against others, the opportunities which are needed by all.

"How, then, can this restriction be removed? How can the state insure a place for each of its members, an opportunity for every man to labor and to live? Any dream of repartition of the soil would be ineptitude and folly. But that is quite unnecessary. All that is really needed is to change the incidence of taxation.

"It is quite possible to shut out from use one or another commodity by simply raising the tax upon it. The tax as now levied enables the holder of natural opportunities to reap for his own advantage the benefits that should go to all. Not only that, it enables him, by holding those opportunities, to exclude others from a realization of their place in the national life.

"The Massachusetts Single Tax League asks you to consider whether our boasted democracy must not remain abortive and ineffectual until the tax is so laid upon the rental value of land that the value of opportunities may be returned to the community which creates that value, that those who are holding opportunities unused will be glad to relinquish them, that thus the way may be opened for the realization of citizenship, for the restoration of the pauper and convict to the position of men, for the staying of the rising tide of pauperism and crime which results from in-

Copyrighted, 1899, by Mary Baker G. Eddy.

Digitized by Google

equality and injustice, for removing the evils of special privileges and an aristocracy of chance and fortune in place of a democracy of free men."

Mr. C. B. Fillebrown said he wished to make a suggestion. Special privilege, he said, is where one man gets more than his share of what belongs to others, and to all. There are various kinds of special privileges. They are largely franchises—railroad franchises, telephone franchises and the like, which comprise a large body of special privileges. In addition to these, there is one other special privilege which is many times greater than all these, and it is the private appropriation of ground rent.

Now, we say that whoever enjoys these special privileges at the expense of all—whether they be railroad, electric, water, or gas franchises, or the private appropriation of ground rent—let those people pay to the community the market value of that ground rent, and you have no taxes to impose at all.

Items of Interest.

Hon. Joseph Chamberlain Again Speaks.

London, January 18, 1899.—This evening the secretary of state for the colonies, the Right Hon. Joseph Chamberlain, speaking at the Wolverhampton Chamber of Commerce banquet, reviewed at great length the various threatening foreign questions confronting the government.

In connection with the withdrawal of the French demand for an extension of the settlement at Shanghai, he congratulated his hearers that Great Britain's opposition to the French proposal had been strenuously supported by the representatives of the United States. "That, I think," he said, "a significant and noteworthy fact. Nay, I think and hope it will become history. It shows that circumstances are bringing about the community of interests between Anglo-Saxons which, in the future, may have far-reaching and beneficent results."

The Quay Fight.

As matters now stand in the Pennsylvania Legislature, Mr. Quay lacks fourteen votes of enough to elect him to the United States Senate. The essence of the situation is that, so long as the anti-Quay Republicans are united to the Democratic vote for George A. Jenks, Quay cannot be re-elected. His friends are confident, however, that he will speedily gain votes and finally be elected. Governor Stone is his friend, and is aiding him in every way he can.

The Miles-Eagan Controversy.

It is now certain that Commissary-General Eagan will be court-martialed. It is understood that General Eagan will be shortly under technical arrest, and it would seem to be equally certain that his vituperative attack upon General Miles will cost him his position in the army. There seems to be no alternative. Secretary Alger has found it impossible to ward off the court-martial proceedings.

John Russell Young.

In the death of John Russell Young, this country has lost one of its ablest journalists. Mr. Young's career was one of unusual success. From printer to reporter, from reporter to correspondent, and from correspondent to editor, his promotion was rapid, and his work always well sustained. As minister of the United States to China, his diplomatic career was also one of success.

A good deal of work will be given to the New England coasting fleet through the closing of one of the largest lumber deals of years between the government and two lumber companies located at Lumberton, Miss., and New Orleans. The contract calls for the delivery of twenty million feet of yellow pine lumber inside of two months at Cuba and Porto Rico. They are to receive further contracts for four months aggregating one hundred million feet. This will be swelled by an additional quantity from private concerns.

The most striking improvement over October is in internal revenue, which increased from $13,411,410 for the first nineteen days of that month to $14,780,860 for the same days of December. The principal change, however, is in expenditures, which have been only $26,777,000 in December, as compared with $33,614,000 for the same days of October, and $33,524,000 for November.

The situation in the Samoan Islands is full of gravity. For some time past there has been an exchange of correspondence between the three governments party to the treaty of Berlin respecting the choice of a successor to the late King Malietoa, and some of the friction developed owing to the strict adherence of the United States government to the terms of the treaty.

From present indications, there is some reason to believe that the ratification of the Paris treaty of peace will be filibustered over the present session of Congress. There are evidences that the opponents of the treaty have begun a polite system of filibustering by making unnecessary speeches on the Nicaragua Canal question.

The U. S. Treasury receipts thus far during December have been $26,260,720, as compared with $23,835,237 for the same days of October and $26,270,030 for the same days of November. November included one more business day than the same number of days this month.

It is asserted that the Czar is planning to meet the Emperor of Austria, the Emperor of Germany, and the President of France early in the spring, to impress upon them his peace proposals.

Senator Cockrell, Democrat, on January 17, was re-elected to his fifth term in the United States Senate by the Legislature of Missouri.

Henry Cabot Lodge has been re-elected to the United States Senate by the Legislature of Massachusetts, for another six years.

Newspaper advices indicate that New York City is rapidly becoming, if it is not already, the financial center of the world.

The Minnesota Legislature has re-elected Cushman K. Davis, Republican, United States Senator.

The Hon. Eugene Hale has been elected for a fourth term in the United States Senate from Maine.

Joseph R. Hawley has been re-elected for another term as United States Senator from Connecticut.

Senator Julius C. Barrows, Republican, has been re-elected United States Senator from Michigan.

The Hon. Chauncey M. Depew has been elected United States Senator from New York.

W. H. Lincoln has been elected Vice-President of the Boston Chamber of Commerce.

Albert J. Beveridge has been elected United States Senator from Indiana.

Words of Encouragement and Gratitude.

To the many students who send in helpful words of encouragement and gratitude, we wish to extend our heartfelt thanks. The rapid progress of our cause is due largely to the lovingkindness prevailing in our ranks. Let it more and more find expression in good words and deeds.

We herewith append a few of these expressions of love and appreciation.

South Bend, Ind.

Dear Brother:—The common refrain of all your brother and sister Scientists here is, "What a splendid Weekly this week," and it is indeed true. I am going to send one to each one of our ministers here. A week ago one of our leading Baptist ministers preached a sermon against Faith Cure and Christian Science, classing them together. To-day about fifteen or twenty of them (the ministers) met together in solemn conclave at regular monthly association and cordially extended to me an invitation to be present. After taking up an hour presenting the sermon, they kindly invited me to speak and present the opposite side. I spoke to them about an hour, read from our text-book, and answered questions. Some of the questions asked were: Sin, Origin and Character; the Trinity; Healing and Theology; God as Principle; Pantheism and Christian Science; Faith Healing and Christian Science, etc.

The ministers asked their questions carefully and respectfully, and were very polite and kind. After the meeting we all shook hands in the spirit of Christ's charity. I felt loving and lenient towards them.

With such experiences as these, the magnitude of our Mother's life-work dawns upon one; it is simply stupendous; beyond realization. WILLIAM B. DICKSON.

New York City.

Dear Editor and Brother:—Permit me to extend my compliments and congratulations for the beautiful demonstrations manifested in the enlarged and improved Christian Science Weekly. It seems to have risen out of the category of newspaperdom into the higher atmosphere of a weekly magazine. Truly, as our Leader says, "Progress is the law of Infinity." And nowhere is this declaration made more plainly true than in the Christian Science work in all its branches. The Journal is ever replete with good things suitable to the hour, giving great encouragement and strength to all its readers. The Sunday Lessons are marvels of Light, giving us all a keener insight into the deep things of God. The Weekly, grown so strong and robust, that in its nineteenth number it has so far ascended out of the old into the new, that it is not recognizable as the child so lately born!

And Christian Science everywhere is marching on with such a firm and stately tread that its opponents stand appalled, as they hear the slogan,—

Onward, Christian Scientists,
Marching as to war;
With our Royal Leader
Going on before.

Yours in Truth,
GEORGE W. DELANO.

Des Moines, Iowa.

Dear Editor:—After receiving the Weekly of last week in its enlarged form, and drinking in the grand truths it contained, the thought came to me to express in words to the editors and publishers and faithful workers at headquarters at least our appreciation of their untiring labors for the Field in general and our Cause. Our blessings have been coming so thick and fast the past few months, I am afraid some of us can hardly appreciate them or find words sufficient to express our gratitude, not only to our dear Leader, Mrs. Eddy, but to the entire force at headquarters. Having been raised in the printing business for the past twenty years, we appreciate the typographical neatness and general makeup of the Weekly in its enlarged form, and may it grow in strength and power for good as the weeks go by, is our prayer.

Very truly yours,
B. A. MILLER.

Oak Park, Ill.

To The Christian Science Weekly:—

What a gracious New Year's gift is your coming this week, and what love is manifested in this double measure. While we know that "every good gift and every perfect gift is from above," we would express our gratitude to those through whom this is brought to our consciousness,—first to the loving Mother, her ceaseless labor for, and wisdom in guiding, all. Then to the dear ones at the front, who so faithfully are doing their part of the work in God's vineyard. Words but feebly express our thankfulness for all the blessings that are ours in Christian Science to-day.

MARY A. PACKARD.

The following from a private letter we also take the liberty of publishing:—

But I must not close this letter without telling you how much we all appreciate the Journal and the Weekly. The last numbers of those excellent publications are par-excellence. The Weekly enlarged was an agreeable surprise. Its contents are just what the hour requires, and show the power of the divine Mind to guide all in the right way.

HENRY T. HOWELL.

From "Book Notes."

The feeling in England against vaccination as a preventive of smallpox is now clearly shown. In a single town, Oldham, in Lancaster County, forty-three thousand certificates of exemption have been given to parents, who applied under the conscience clause in the law recently enacted; and this, or something just like it, is true of all the towns in England. Mr. Alfred R. Wallace calls the penal enforcement of vaccination a crime. So, too, is the legal enforcement of anybody's whim in medical practice.

Mr. Wallace, in his terrible arraignment of vaccination, shows a diagram of the London death-rates from zymotic (contagious) diseases from 1760 to 1896, and separate lines showing the death-rate for the same period from smallpox, which was the only disease (zymotic) for which vaccination was used as a preventive. The result shows the same decline in all zymotic diseases, as is shown by the decline of vaccination; and this proves that vaccination had nothing whatever to do with the decline, all other unvaccinated diseases declined in the same ratio.

Book Notes, Providence, R. I.

A few months since the detective force of the City Police was used to "make" evidence to convict a practitioner of Christian Science, in his attempts to restore the sick to health. Now we have the very heads of the police undertaking to "make" a practiser of Christian Science minister to a sick woman. Is, or was, the practitioner to be blamed, in the light of experience, for thinking that the police were laying a trap for him just as they did for Dr. Swarts, Secretary of the State Board of Health.

CHRISTIAN • SCIENCE • SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, C.S.D., Editor. — CAMILLA HANNA, C.S.D., Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.
Ten copies or more to one address, one year, each copy, ninety cents.
Twenty-five copies or more to one address, one year, each copy, eighty cents.
Fifty copies or more to one address, one year, each copy, seventy-five cents.
Foreign subscriptions, one year, each copy, $1.50.
Six month's subscriptions received at half the above rates.

TERMS OF SALE.

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, $1.50.

Entered as second-class matter.

Degrees of Metaphysical College.

WILL the applicants for the degree of C. S. D. of the Massachusetts Metaphysical College please note, that I specified, the application must be made according to the By-laws of this College. These By-laws require two courses under the auspices of this College before this degree is conferred.

In November, 1888, the following notice appeared in the Christian Science Journal. "Hereafter no students can be admitted to the Massachusetts Metaphysical College Normal Class, who have not passed through the Primary Class."

MARY BAKER EDDY.

Christian Science Souvenir Spoon.

ON each of these most beautiful spoons is a motto in bas-relief, that every person on earth needs to hold in thought. Mother requests that Christian Scientists shall not ask to be informed what this motto is, but each Scientist shall purchase at least one spoon, and those who can afford it, one dozen spoons, that their families may read this motto at every meal, and their guests be made partakers of its simple truth.

MARY BAKER EDDY.

The above named spoons are sold by the Christian Science Souvenir Co., Concord, N. H., and will soon be on sale also at the Christian Science Reading Rooms throughout the country.

Our Third Bow.

NOW again comes the Weekly making its third bow to the Field, under the new title of "The Christian Science Sentinel," and in a new head-dress. It is enough to say that this new name and dress were suggested by our beloved Leader, the Rev. Mary Baker Eddy, who, with loving Mother-heart and watchful eye, keeps constant vigil in the high tower of her spiritual observation, praying for the awakening unto salvation of all her children, nay, of all mankind. She also suggested the quotation from Jesus, "What I say unto you I say unto you all, *watch.*" A sentinel is pre-eminently a watcher. Our weekly publication is to be a sentinel for the Field.

One of the lexicographical definitions of sentinel is, "One who keeps watch or guard to prevent surprise." One of the most important duties of Christian Scientists is to be so watchful as to never be caught off their guard or taken by surprise. How shall this degree of watchfulness best be attained? By keeping every one's consciousness in the "secret place of the Most High." This place can be reached and abided in only through watching and praying. Let our watching be unceasing and our praying instant. Let us reflect God, Good, in our lives in such a manner that error will flee before us, and never be able to get near us. Let us be sentinels on the watch-tower of Truth.

Questions and Answers.

Is Christian Science Evangelical? A friend.

Christian Science is absolutely in touch with the spiritual demands of the Gospel—the words and works recorded of Jesus and his disciples. Since the early centuries, no other religion has followed so intimately the Gospel teachings and practice of Christianity, confirming the word by "signs following," as Christian Science. Other religions question more or less the necessity for all that the Gospel demands, and require no obedience to a portion thereof. Yet their religion is held as Evangelical, and ours as adverse to the Gospel. Rev. A. A. Hodge, professor of didactic, historical, and polemic theology, in the Western Seminary, and author of "Presbyterian Doctrine briefly stated," writes, "The *Evangelical* believer holds that every individual must be spiritually united to Christ, and through Christ united to the Church." His views on this subject distinguish it from mere orthodoxy. While Christian Science does not accept all the dogmatical doctrines of the German, Prussian, and Scotch Evangelical Alliances, it does accord with the evangelicalism of the above author.—M. B. E.

Is a righteous prayer, voluntarily sought by the sick, and used as a means for healing, capable of becoming a crime? A Subscriber.

Under the Constitution of the United States, we answer, No! If the Scriptures are valid and their requirements just, importunate prayer, to preserve human life, has the sanction of Christianity, and in no case is criminal. The higher Courts of our land will never construe prayer a crime. This I said over thirty years ago; and every case of persecution, and prosecution of Christian Scientists for this pathological practice, has, by appealing from the lower to the higher Court, proved this saying true. Our Superior Courts have always sustained these cases as belonging to the individual rights guaranteed to every citizen by the constitutions of the Nation and States.

Christian Scientists, press on—watch, pray, and labor for the cause of Christ, heal the sick, reform the sinner. And if people are enough unwise (?) or sufficiently wise, to employ you to treat the sick, do it, notwithstanding class legislation to the contrary. If brought before councils for His name's sake, remember the Scripture: "Fear thou not; for I am with thee: be not dismayed; for I am thy God: I will strengthen thee; yea, I will help thee; yea, I will uphold thee with the right hand of my righteousness."—M. B. E.

Reply to the Boston Traveler.

A SHORT time since the Boston Traveler published an article made up of matter much of which had previously been published in some of the New York papers, in opposition to Christian Science. Immediately after such publication the editor of the Traveler requested a presentation of the Christian Science view of the question, calling upon the editor of the Journal and Sentinel to prepare an answer especially upon the legal aspect of the question. The request being a cordial one, and made in a friendly spirit, the editor felt it his duty to comply. He accordingly furnished the Traveler with the following article, which is republished.

I have read the article published in The Traveler of January 9, entitled "The Legal Aspect of Christian Science." You request me to present the Christian Science view of this question.

The first paragraph of your article is this,—

"The question of Christian Science, when considered in its legal aspect, presents an interesting problem which must soon be solved by legislation, or the effect upon the public will be even more dangerous than the instance of such abuse in England, as evidenced in the case of Harold Frederic."

Digitized by Google

This is a broad assumption. It assumes without reason or argument that Christian Science is without any virtue whatever. It refuses to admit even the possibility that Christian Science can heal disease. If this assumption were correct, you do not put the case too strongly. You might put it much more strongly and yet be within reasonable bounds. This raises, however, the question as to whether your assumptions are correct. I will refer to this later.

You again say: "The recent death of Harold Frederic has revived the interest in the opposition to Christian Scientists, and the so-called faith healers have been indicted on the charge of manslaughter by the London coroner's jury which investigated the case. There is every reason to believe that this prompt and vigorous action may lead to the proper legal treatment of these dangerous fanatics."

A sufficient answer to this part of your article is the fact that the prosecution against one of the persons charged with manslaughter was dismissed by the Crown, and the other was discharged, the court finding that there was no ground for a criminal prosecution of any character. The absurdity of attempting to hold a person on a charge of manslaughter, where the motive was to save life, rather than to destroy it, is apparent to any one having the slightest knowledge of criminal law. There can be no crime committed, say all the works upon criminal law, unless there be a criminal intent. This is a fundamental principle.

A number of leading lawyers of Chicago were not long since interviewed by representatives of the Chicago press, upon the general question involved in the Frederic case from whom I will briefly quote.

Mr. Stephen A. Douglas, son of the celebrated Senator from Illinois, said this,—

"The proposition appears to me to be a very simple one, although I do not claim to be a criminal lawyer. A man cannot be prosecuted for what he did not do. There is no affirmative charge here. If the indictment were brought it would charge the Christian Scientist with failing to save the life of the patient, which is a negative charge. Again, intent must be shown, and there is no assumption that these people intended to bring about the death of Frederic. It would be the same as though you had seen a man drowning and had tried to save him according to your lights, which might be to stand on the dock and yell for help. If he drowned, you could scarcely be held criminally responsible for his death."

Mr. Robert Redfield, who was for years connected with the city law department of Chicago, said,—

"I have not delved very deeply into Christian Science, but in the strict letter of the law I fail to see how an exponent of that faith could be held criminally responsible for what practically amounts to a negative act. As well might practising physicians be held accountable for the death of patients. There is no law making it a criminal offense to pray over a sick man and urge him to do the same, and if he dies while voluntarily following out this practice no one is responsible, so far as I can see."

Mr. James Todd, who was assistant state's attorney and a criminal lawyer of wide experience, said,—

"The only question in my mind is, whether the doctors or the Christian Scientists allow the greater number of people to die. There is no law to compel a man to summon a physician when he is sick. There is no law which says he shall summon a doctor of any particular school, whether a homœopath, or an allopath, or an osteopath, or a Christian Scientist. If Christian Scientists could be prosecuted successfully for failure to save the lives of the people they attempt to cure, so could physicians. I have examined more than eighty physicians of the class generally denominated experts, on mental questions and the causes of death, and I have found there was no unanimity on any subject. When the various schools of medicine are that far apart, how can it be expected that failure to save life can be made a criminal responsibility?

"The nub of the question, after all, however, is that you cannot convict without proving the intention, and intention cannot be inferred from a negative act. Even to convict a Christian Scientist of being an accessory would fail, since it must be shown that the defendant was an accessory to the death by some act, word, or token, whereas the Christian Scientist bends all his or her endeavors to prolonging or saving life, and if they fail it is absurd to talk of prosecution."

Half a dozen other attorneys held almost precisely the same view, and none were found who would say that there was any possibility of bringing about a conviction in such a case, even were an indictment to be found.

There can be no doubt of the correctness of these views of members of the Chicago bar. No one in Chicago, Boston, England, or elsewhere, familiar with criminal law, would have the hardihood to say that a person can be convicted of a crime when there was an entire absence of intent to commit any crime whatever, and where the intention was benevolent and good. Any other view would be manifestly absurd.

You further said, "In the case of Harold Frederic a valuable life might have been saved but for the fatal influence of the Christian Scientists, who disregarded the experience of ages and refused to take even ordinary precautions against the progress of his disease, until finally there was nothing left to them but the corpse of a prominent man as evidence of abuse in inflicting a so-called religious sham upon the public."

This statement is certainly positive, broad, and made with all the assurance of statements based upon fact. Nevertheless, it is true that this statement has no basis in fact. The fact is that Frederic had been restored to the hands of the physicians some days before his death. He had been in the hands of physicians for a long time prior to the calling in of the Christian Scientist, and was rapidly growing worse.

The Christian Science practitioner relieved him of pain and suffering that the physicians were unable to relieve him of, and it was only at the urgent solicitation of some of the immediate friends of Frederic that he consented to have the physicians again called. These friends, of course, had no confidence in Christian Science treatment.

The fact is that Frederic died under the ministrations of physicians, and not of Christian Scientists. Your remarks, therefore, about "the fatal influence of Christian Scientists," etc., are untrue and unjust.

It is true that there are few decisions of the courts touching the Christian Scientists. A great many prosecutions have been instituted, and in some instances police courts have found Christian Scientists guilty of practising medicine without license, etc., but with a single exception these cases have been reversed in the upper court.

These courts were not courts of final jurisdiction, and therefore their decisions have not become precedents for the guidance of the lower courts, only so far as the lower courts see fit to adopt their dicta.

You quote from the decision of the Supreme Court of Rhode Island. This was a very interesting case. Permit me to make brief additional quotations from it. The court says,—

"To give to the words 'practice of medicine' the construction claimed for them by the state, in the opinion of the court, would lead to unintended results. The testimony shows that Christian Scientists are a recognized school or sect. They hold common beliefs, accept the same teachings, recognize as true the same theories and principles.

Digitized by Google

"If the practice of Christian Science is the practice of medicine, Christian Science is a school or system of medicine, and it is entitled to recognition by the State Board of Health to the same extent as other schools or systems of medicine.

"Under said chapter 165, it cannot be discriminated against, and its members are entitled to certificates to practise medicine provided they possess the statutory qualifications.

"The statute, in conferring upon the State Board of Health authority to pass upon the qualification of applicants for such certificates, does not confer upon said board arbitrary power. The board cannot determine which school or system of medicine, in its theories and practices, is right; it can only determine whether the applicant possesses the statutory qualification to practise in accordance with the recognized theories of a particular school or system.

"It would be absurd to hold that under said chapter 165, which provides against discrimination, the requirements necessary to entitle an applicant to a certificate were such that the members of a particular school or system could not comply with them, thus adopting a construction which would operate not as a discrimination only, but as a prohibition.

"On the other hand, to hold that a person who does not know, or pretend to know, anything about disease, or about the method of ascertaining the presence or the nature of disease, or about the nature, preparation, or use of drugs or remedies, and who never administers them, may obtain a certificate to practise medicine, is to hold that the operation of the statute is to defeat the beneficial purposes for which it was enacted."

If this decision is good law (and if good law is common sense it is), it would seem difficult for the Legislature to control Christian Science practice. I can conceive of no language that could be made broad enough to cover the ground that must of necessity be covered by any inhibitive legislation.

If, as the court says, Christian Scientists constitute a separate school for the practice of medicine, they are entitled to all the rights and privileges of any other school.

If they do not constitute such a school, they are not practising medicine in any sense. The fact being true that they can heal disease without the use of medicine, what earthly power can say that they cannot exercise that healing power as a matter of inherent, constitutional right?

Is it not a perfectly rational and safe proposition, that if the Christian Science method of healing is the result of prayer (and every Christian Scientist knows that Christian Science healing results from the exercise of the highest prayer known to mankind), no legislative enactment can reach or prevent it?

On the same principle might the Legislature undertake to inhibit the reading of the Bible, and ministers of the gospel from offering prayer in their pulpits or elsewhere. The very purpose of prayer is to benefit humanity, and if it be a fact that prayer will heal the body as well as the soul, why is not its exercise as legitimate and lawful in the one case as in the other?

Never can there be successful legislation against the Christian Science method of healing until legislators shall have acquired wisdom sufficient to draw a sharp line of demarkation between prayer which heals the soul and that which heals the body. Will any one pretend that such a time will ever come? All the medical trusts on earth to-day, or that ever can be organized, will fail of this result.

In Cincinnati, O., the Court of Common Pleas has recently rendered an interesting decision affecting Christian Scientists. A Miss Evans had been living in the home of a Mr. T. McDowell for about five years.

Mr. McDowell was not unfriendly to Christian Science and his wife was a Christian Scientist. In October he was taken sick with typhoid fever. The physicians gave him no relief, and in ten or twelve days he asked to have Miss Evans treat him in Christian Science. This was done with noticeable improvement for five days.

At the end of this time his mother, two daughters by his first wife, and his employer, being very much opposed to Christian Science, applied to the Medical Board to have Miss Evans arrested under a statute intended to prohibit Christian Science practice.

The doctors were again called in. Miss Evans was arrested Friday, November 11, and the patient died under the doctors' care November 13. Miss Evans was fined by the Police Court, and the case was appealed to the Court of Common Pleas. Judge Hollister of that court rendered an opinion overruling the decision of the Police Court.

The statute under which Miss Evans was arrested, after reciting the usual restrictions upon the practice of medicine and surgery, contained this additional clause, "Any person shall be regarded as practising medicine or surgery within the meaning of this act who shall append the letters M.D. or M.B. to his name, or, for a fee, prescribe, direct, or recommend for the use of any person any drug or medicine or other agency, for the treatment, care, or relief of any wound, fracture, or bodily injury, infirmity, or disease."

Judge Hollister in the course of his opinion said, "It must be remarked that if any virtue accrues to the patient subjected to this treatment, it is not through the operation of any physical substance brought into contact with the body. This consideration calls into operation the very rule rejected in passing upon the demurrer, as not applicable thereto, for it is quite certain that 'drugs, or medicines, or other agency,' used as they are in connection with the subjects, medicine and surgery, can only mean, so far as their actual use in treatment is involved, the physical agency employed by one acting as physician or surgeon, whether used internally or externally, and were not intended to cover cases in which the application of the remedy does not partake of physical attributes, but is the operation of some subtle influence flowing from the mind of one person to that of another, or growing out of the contact of the spiritual nature with the great source from which it came."

It is a well-known fact that the act of the Ohio Legislature was especially intended to prevent Christian Scientists from practising. The language was as broad as it could well have been. If the words "Christian Science" had been used it would not have strengthened the act, and the above decision has as great effect and is as broad in its results as if the act had contained these words.

In the light of the decisions of the Rhode Island and Ohio courts, it is difficult to conceive of legislative enactments that could reach Christian Science practice. Christian Science feels quite safe in the view that human legislation is not sufficiently powerful to prohibit the operation of divine Law in human affairs. Notwithstanding the assumptions of human power, Christian Scientists have yet an old-fashioned notion that God is supreme.

The Ohio judge points out a view of the question that possibly was not in the minds of the medicos and Solons when the said legislation was enacted. Thousands of religionists besides Christian Scientists would have been affected by such legislation if it could have been enforced. It would strike a blow at every method of healing disease not sanctioned by materia medica.

It would strike a special blow at the Roman Catholic Church, one of whose chief tenets has always been a method of healing independently of drugs and medicine. What is true of the Ohio legislation would be true of any attempted legislation anywhere.

Digitized by Google

For more than thirty years Christian Scientists have been proving their ability to heal diseases without medicine or other material means. Many thousands of cases attest this ability. It is no longer a matter of doubt or speculation. It is as susceptible of absolute proof as any other human fact, and Christian Scientists challenge the world to disprove the fact that its methods heal where all other methods wholly fail.

This article is already too long to go into the citation of particular cases, but all the cases desired can be furnished to any sincere seeker or inquirer. Cancer, malignant tumors, consumption, broken bones, and broken tissues have, in numerous instances, been healed through the power of Christian Science prayer, without the assistance of any material means whatever.

If this be true, and I confidently challenge its contradiction, as well might the Legislature attempt to legislate Almighty God out of His universe as to undertake to prevent healing by virtue of His law. S. J. HANNA.

As to Dr. Faunce.

WE republish from the Englewood (N. J.) Press the following communication:—

Mr. Editor:—A little investigation of the question raised in the article on this subject in your issue of December 24, will disclose the fact, I think, that Dr. Faunce was not treated unfairly or unkindly in the quotations I made from his Examiner article as a reply, signed Y Y, to the article of X X of the previous week.

First, "after noting the fact that I explicitly stated the nature of some of the portions omitted, that they were critical, and where the whole article was to be found, it is next to be observed that the very first paragraph I did quote contains his statement that he opposes Christian Science.

How, then, can the Scientists be fairly charged with endeavoring to represent him "as virtually belonging to their number"? The demand for The Examiner of March 31 last, in which his article appeared, was so great that the regular edition was quickly exhausted and a second edition was issued—a most unusual occurrence, I believe, for a religious weekly of thirty-two pages—and this, also, was soon exhausted. . Without doubt, the people who bought the bulk of all these extra copies were Scientists, and bought them, too, for circulation among those outside their ranks. I myself bought several dozen, mailing them, largely, to friends who do not believe in Christian Science because they do not understand it. I sent the papers as educators and without comment, believing that the "strictures and warning," answerable but unanswered, were overwhelmed by the conceded facts. And for months copies have been on sale at the Christian Science reading room in Englewood, where there are a few still to be had, and quite likely also in some of the reading rooms of the society elsewhere. Hence it would appear that the Scientists used their time and money in giving the *entire* article, notwithstanding its strictures and warning, the widest possible publication until it was out of print, and they made no attempt at claiming Dr. Faunce as one of their number.

But if I sinned in quoting him as I did, surely the doctor "tempted me and I did eat," for about one-seventh of his lengthy article consists of miscellaneous sentences quoted, *in a bunch*, from Science and Health, which sentences he says, "in spite of being torn from their context, represent fairly the whole teaching." I say the same thing as to my quotations from his address, and with this fact in my favor, that he was not competent to judge of his act, for he states he read the book "sometimes with utter bewilderment," whereas I contend that every sentence and paragraph I quoted stands for just as much when in the article as it does when out of it, because, as stated at the time, not one is qualified in the least by its context. And, if, as Miss Vermilye avers, there is "a want of agreement" between certain of his statements, then it were a kindness, were it not, to omit, as I did, the few and minor which contradict the many and major propositions? Let us examine as to this a little. He states as his conclusions:—

"1. This new doctrine, if it be new, must have some truth in it, because of its fruits. Jesus gave his disciples power to heal and that power has never been revoked. It will not do for theologian or historian quietly to assume that Jesus meant such power to fade with the lapse of years or to vanish at the end of the third century. Men will believe either that miracles are continuous throughout the history of Christianity, or that they never occurred in the Christian church. No middle ground is logically or theologically possible. It is absolutely certain that hundreds of men and women in this country have received in the healing of their diseases a demonstration that there is a fundamental truth in Christian Science. Beholding the men who are healed, we must beware how we declare ourselves against it. Even though many have died while hoping to be healed, even though many have forsaken the faith they once held, a marvelous number of cures are being daily performed. It is easy to pronounce this Satan's work; but Satan's work is to bind men not to loose them.

"2. Christian Science has recalled many from agnosticism to a living faith in God. The majority of the believers do not come from the churches. When I asked one man where they did come from, he answered, 'Out of their graves.' Ninety per cent. he averred, had come into the faith through the healing of apparently hopeless disease. Many of them have come out of atheism into radiant religious faith.

"3. The average Christian Scientist does have a victory over fear and care and sin that is not achieved by the average orthodox Christian. To the average church member, Christianity is the acceptance of a series of doctrines and historical facts, and the acceptance of a forensic transaction of nineteen hundred years ago, in consequence of which acceptance he hopes for heaven beyond. But he is a worried and fretted and fearful man; afraid of himself and his propensities, afraid of colds and fevers, afraid of treading on serpents or drinking deadly things, as the apostles of Christ were not. The average Christian Scientist—and in this respect he is like the Keswick disciples—has put all anxiety and fretting under his feet. Christ is to him no distant historic figure, but the incarnation of the divine Idea. God is no mere 'first cause,' but a very present help."

He previously said that "the sale of Bibles at all their book stores is enormous. Every convert must immediately possess a Bible and study it for the rest of his life," and that "in all their churches no sermon is ever heard. The service is conducted by readers, who read alternately selections from the Bible and from that book which is the full expression of Mrs. Eddy's views, 'Science and Health with Key to the Scriptures.' These readings, with hymns and silent prayers, comprise the entire service. Yet rapt congregations of most intelligent men and women hang upon the lips of the reader, as if the words were spoken from the sky, and cures are frequently wrought among the congregation during the progress of the reading."

Think of it! Think of it all!

Are we not then witnessing the dawn of the greatest revelation in thought and deed the world has known in fifteen centuries? Think of Christians being again able to do, even though, as yet, but in a small measure, the works the Master did and commanded his followers to do!

Nevertheless, after writing the foregoing, Dr. Faunce adds:—

"4. We may then say to Christian Scientists, 'Your at-

Digitized by Google

tachment to Mrs. Eddy is a species of idolatry, is bad taste, bad theology, bad morals. Your exegesis of the Scriptures is childish and fanciful. Your whole system of allegorical interpretation is in defiance of modern scholarship. Your denial of some Christian truths is dangerous and deplorable.' "

Having said that the truth the Christian Scientists have is fundamental and *demonstrated* truth, and having in the body of his article considered in detail the question of these denials and himself shown that they are only in the seeming, how can he now say they deny some Christian truths?

If cures are frequently wrought among "congregations of most intelligent people" by simply reading the Bible to them and giving to the reading the Christian Science interpretation, how can such exegesis be childish and fanciful?

Undoubtedly it is in defiance of modern scholarship, but Dr. Faunce cares not a snap of the fingers for modern scholarship when it is opposed to the truth! How about the modern scholarship of Jesus' time, and of many another time since then? And of what significance is a question of taste, or even of theology, in the face of the stupendous fact, admitted by Dr. Faunce, that the healing of the Apostles and of the early Christians is actually being restored to us in this day and generation!

✤

Those Christian Scientists, if any, who worship Mrs. Eddy, do not heal the sick, because they cannot. Perhaps there is nothing in the Christian Science text-book that is made plainer than this, unless it be that "Christ is the way and the only way." People who have been healed and in turn have healed others usually and naturally have expressed the greatest love for and gratitude to Mrs. Eddy for having brought to them the blessed understanding of the Scriptures which works these wonders, and which therefore must be the true understanding, but it is unfair to say they worship her. Who is to judge where love and gratitude end and worship begins? "By their fruits ye shall know them." Now, how can idolaters and people of bad morals "have a victory over sin that is not achieved by the average orthodox Christian"?

Dr. Faunce says, "When Mrs. Eddy was asked if she herself was the 'second Christ,' she repudiated any such claim, yet in a recent address she really makes that claim." He then quotes the passage in which he thinks the claim is made. No one who understands her teachings can fail to understand that she does not make that claim in that passage.

If she is dishonest, how can she have "recalled many from agnosticism to a living faith in God," and "many out of atheism into radiant religious faith"?

Mrs. Eddy increased her charge for teaching until, it is true, it amounted to "$300 for twelve lessons," and then "she closed her college while three hundred students were applying for admission."

Three hundred by three hundred—$90,000—and for twelve lessons! By throwing away, so to speak, this large sum, how or why did she lay herself open to the charge of charlatanism? And is it because of this act he also says, "the peculiar personality which is the main spring of the movement defies analysis"? This was in 1889. She hadn't money enough, I know, nor had she lost her health or her faith in her doctrine. She wanted for the cause every dollar she could get, and nearly every dollar she does get goes to the cause, while she is content to live, as Dr. Faunce states, in a remodelled farmhouse in the suburbs of Concord, N. H. What possible explanation is there, other than that she deemed it to be for the good of the cause to suspend teaching at that time?

✤

My own understanding of it is she found some students, like the one Dr. Faunce cites, were departing from her teachings, and she concluded that "works rather than words" was the need of that hour. She would most surely be greatly astonished to hear a professing Christian Scientist say or imply that because "Christ is dead" he is no longer the way.

He says that Science and Health is to the stranger or beginner a tangled maze, a jargon, a strange compound, couched in a phraseology never before heard, whereas to the initiated—those instructed in the principles—and these he tells us are most intelligent people, the book becomes very rich and beautiful, and is defended by the verse, "They shall speak with new tongues."

How strikingly true all this is of the Bible!

If Science and Health, when it was first published in 1875, was received with shouts of derision by the press, and quite likely it was, so much the worse for the press, for a million people, Dr. Faunce tells us, are to-day in sympathy with its teachings.

Finally he says: "But the truth which you possess is our truth also. If we have neglected it we will do so no longer. We will preach it with joy and power, . . . and no man need leave our churches to hear such truth or live such life." To this all Christian Scientists fervently respond, Amen.

It matters not where or under what name this truth is preached and practised. But until it is preached and practised in the old churches, men will seek it in a new church.

WILLIAM A. CHILDS.

Church Dedicated at Peoria, Ill.

THE dedication of the new Christian Science Church or Temple as it is generally and appropriately called, from the character of its architecture, January 15, 1899, marked an era in the church history of Peoria in several respects. Perhaps the most remarkable thing about it is that it was paid for from foundation to dome before the first service was held in it. The organ is in place, as well as all the chandeliers, pews, and other furniture, and the church is complete in every respect.

The architecture of the building is a radical departure from that of other church structures in the city. It is severely classic, and is Grecian both in its exterior form and its interior finishing. The character of its ornamentation is a relief from the gaudy coloring that is sought after in so many modern American structures. The windows and skylights in the dome are of amber color, and cast a mellow golden light that is exceedingly restful and pleasant to the eyes of the audience.

The decorations yesterday were in harmony with the taste and elegance that marks the interior finishing of the building. They consisted of a modest display of palms and azaleas along the front of the pulpit, and a single spray of magnificent American Beauty roses in the rear. In the rooms below primroses furnished the only floral decorations. There was none of that bewildering profusion of plants and flowers usually seen on such occasions.

The history of Christian Science in the country at large and particularly in Peoria, is a story of phenomenal increase in few years in numbers and influence. It has been thirty years since Science and Health, which, with the Bible, constitutes the text-books of the society, was published by the Rev. Mary Baker Eddy, and it is now in its 158th edition. The Mother Church, which is located in Boston, numbers its members by the thousands, and is the largest single Christian Church in the country. The Peoria association was organized in 1892 with six members. It was without wealth, social standing, or influence, and had hardly a place to hold its meetings. Its members now number one hundred and eight, and the society, culture, and wealth of the city are to be found in its congregation. Despite criticism and opposition the organization has grown apace, and yesterday dedicated to its service a building that is at the same time a monument of art among the churches of the city, and a proud defiance, hewn in stone, to critics and adverse criticism.

Digitized by Google

Special invitations to attend the dedicatory services were issued only to parties living outside the city. The Peoria public was invited en masse through the columns of the morning papers. The response yesterday afternoon to both these invitations was generous. Long before the opening of the doors, the Hamilton Street walks were thronged with an expectant crowd, eager to press in and secure seats, and before the beginning of the service Judge Lovett mounted the platform and requested members of the church to give up their pews for the accommodation of the visitors, which many courteously did. Aside from the crowd from Peoria about two hundred visitors from the churches and associations of the surrounding towns and cities were present. Chicago, Indianapolis, Moline, Henry, El Paso, Bloomington, Fairbury, Canton, Pekin, Normal, Abingdon, Terre Haute, Quincy, Galesburg, Decatur, and Chenoa were among the different places represented.

The services opened with congregational singing. This was followed by a vocal selection, "Fear ye not, O Israel," by Mr. Charles Burdick, whose singing is too well known in Peoria to need comment. Mr. Frederic Root of Chicago was the organist for the occasion. He is a member of the Christian Science Church, and is one of the best-known organists in the West. The entire musical programme was an excellent one.

The Scripture reading consisted of passages from Kings, describing the Temple, and from Revelation in regard to the heavenly city, that was without a temple, and yet was a temple in itself. It was given by Miss Jennie L. Bryan, C.S.B., who is the First Reader or leader of the Church. Then there was a few moments of silent prayer, according to the custom of the church, followed by the audible repetition of the Lord's Prayer with the spiritual interpretation as given in Science and Health, read alternately by R. O. Campbell and Miss Bryan.

This was followed by a vocal solo by Mrs. Elizabeth Levings of Chicago. The audience was particularly pleased with her charming rendition of "Forever with the Lord." Mrs. Levings is a member of one of the leading Christian Science Churches in Chicago, and is well known and very popular among the members of the denomination of the Middle West.

After the announcements a brief address of welcome was read by Miss Bryan. It is as follows:—

"Beloved Brethren and Friends:—In behalf of this Church I welcome you to-day to our new home—this great proof of God's presence among us, of our Father's love and care.

"To you who have come from other cities and towns to rejoice with us and lend your helpful presence in our dedicatory service, showing your good will and kindly concern in our work and your deep interest in the cause of Christian Science, we wish to assure you of our gratitude for your presence and earnestly hope you will realize that it is good to be here.

"To those friends so generously giving their aid in expressing harmony in the musical portion of our exercises, we tender our grateful thanks, trusting the dedication of this house to God will prove a Pentecostal feast to all who participate therein, lifting our thought to a better understanding of ever-present and omnipotent Good, and to a more earnest desire to present our 'bodies a living sacrifice, holy, acceptable unto God, which is our reasonable service.' As Mrs. Eddy has so beautifully expressed in one of her poems:—

> My prayer, some daily good to do
> To Thine, for Thee;
> An offering pure of Love, whereto
> God leadeth me.

"To our home friends who, by their presence here to-day, express their kindly feeling and interest in our work, and a desire to know more of Christian Science, we appreciate your presence. May you feel the welcome of the love symbolized in this house, not only to-day, but every day, and may those thirsting and longing for health, rest, and peace, here find the true understanding of God, the truth that makes man free from the bondage of material sense, from every ill that flesh is heir to; that knowledge of God which is Life Eternal, a refuge and strength, a very present help in time of trouble, and a rest to the weary and heavy laden, fulfilling the prophecy of the Psalmist, 'They shall be abundantly satisfied with the fatness of Thy house; and Thou shalt make them drink of the river of Thy pleasures.' For 'Happy is the man that findeth wisdom, and the man that getteth understanding. . . . She is more precious than rubies: and all the things thou canst desire are not to be compared unto her.'

"Our text-book, 'Science and Health with Key to the Scriptures,' p. 574, defines Church as 'The structure of Truth and Love; whatever rests upon and proceeds from divine Principle.' The Church is that institution which affords proof of its utility, and is found elevating the race, rousing the dormant understanding from material beliefs to the apprehension of spiritual ideas and the demonstration of divine Science, thereby casting out devils, or error, and healing the sick.

"May this branch of the Mother Church, The First Church of Christ, Scientist, in Boston, be a fruitful branch continually proving its faith by its works, obeying the Master's injunction to 'Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven.'

"The theology that Jesus taught and proved the divine Principle thereof, healed the sick as well as the sinful, and he said, 'I am the Way.' 'He that believeth on me, the works that I do shall he do also.' He came to 'destroy the works of the devil.' He said of a sick woman that Satan had bound her. And to a man whom he had healed, 'Sin no more, lest a worse thing come upon you.' Affirming positively that sickness has no divine origin, but is error and must be overcome by the followers of Christ.

"Jesus said, 'Lo, I am with you always.' Then those who truly believe (understand) the Christ, must prove Divine government in the destruction of all the ills of mankind.

"Divine Love has met the great need of humanity in this age in the rediscovery of the healing and saving Truth, by the one whom He hath chosen to be His messenger—Mary Baker G. Eddy, Discoverer of Scientific Mind Healing and author of 'Science and Health with Key to the Scriptures.'

"The Truth gleaned from this divine message demonstrates the Principle of Christian Science, and when humbly and faithfully expressed in compliance with its rules enables man to regain his God-given freedom, dominion over the material senses, and realize the meaning of Jesus' words, 'The Kingdom of God is within you.' Thousands of intelligent people are to-day rejoicing in abundant evidence, proving the truth of these rules.

"This building—completed—is an expression of gratitude, supporting the claim of their adaptability to the varied experiences of life.

"Locally it stands a monument to the healing power of Christian Science—physically, morally, spiritually."

Mr. William Mockridge, who is a member of the leading Christian Science Church of London, England, rendered a selection from the oratorio Elijah, entitled, "If with all your Hearts."

After this selection responsive readings from the Bible and Science and Health, by R. O. Campbell and Miss Bryan occurred. These readings take the place of a sermon in the regular Christian Science service. The text selected was, "God is a spirit, and they that worship Him must worship Him in spirit and in truth." This sermon was especially compiled for the occasion by Miss Bryan, the argument explaining the Christian Science creed.

The Doxology was then sung, and the benediction employed by the Church pronounced.

The Lectures.

Mr. Weaver's Introductory Remarks.

In introducing Mr. Kimball to his audience at Webster City, Iowa, Mr. A. A. Weaver of that city, made the following apt remarks:—

The silent thinker in his closet, the bold reformer in the field, may conceive and enunciate sublimest truths; but rarely does public opinion immediately respond to the messages of God.

Public opinion is right by education, seldom by instinct. It is walled in by prejudices and treasured associations, which it deems sacrilege to scale or destroy; and whoever dares to pull down the imprisoning barriers to let the contented bondman go free does so at his peril: for, instead of being rewarded by those he would deliver and befriend, his life is often sacrificed to their bigoted and malicious hatred.

But let no so-called fanatic falter in his glorious work. His motives may be misapprehended, the truths he presents may not be recognized; but futurity will hold him and them in sacred keeping.

To-day, his contemporaries may offer insult and reproach to his ashes; to-morrow, posterity will stand guard by his tomb, and scatter flowers upon it, in token of grateful remembrance. His words once supposed to breathe the most pernicious heresies, will then take their place among the choicest legacies of thought. Time will unveil what the madness of the hour fails to discover.

The noble few will lose nothing when progress overtakes them. Their cause will have a hearing before an impartial tribune,—the tribunal of a regenerated and disenthralled public opinion.

And the despised and rejected, whose virtues and truthful words were masked to their own age will stand forth in bold relief against the clear sky of God's unchanging Truth.

At Cleveland.

Association Hall was filled to its full capacity the evening of January 13, with persons who wanted to hear E. A. Kimball, a member of the Christian Science Board of Lectureship of Boston, Mass.

Mr. Kimball delivered a very exhaustive discourse upon the subject of Christian Science. He began by saying that he had no proofless theory to advance, but stood before the audience upon the basis of a demonstrable science, verified by incontestable demonstrations.

He referred to the misrepresentations concerning Christian Science, and refuted many of them by explaining that Christian Scientists pre-eminently believe in God, the Bible, and the divinity of Christ, and all the fundamentals of religion. He explained at great length the scientific nature of the healing done by Jesus and the apostles, and presented arguments to show that the Principle which governed that healing is the same which governs Christian Science healing to-day.

He said that such healing was not miraculous or in contravention of law, but was in exact accord with the natural laws of God. The conclusion of the argument was that Jesus presented an unfailing exhibition of Christian Science mind healing, overcoming all diseases in accordance with the will of God.

The speaker said that the discovery of Christian Science involved the discovery of the Principle of this healing and its application to the needs of humanity in this age.

He dwelt at length upon the defects of the theory of the practice of medicine, and declared that the superiority of Christian Science mind healing was attested by the fact that all diseases that had ever been healed by medicine, and many that medicine had utterly failed to heal, had been cured by Christian Science.—The Cleveland Recorder.

At Lynn.

On Wednesday evening, January 11, 1899, a demonstration in Christian Science was completed by the First Church of Christ, Scientist, in Lynn, Mass., and the Rev. William P. McKenzie of Boston, Lecturer.

The temporary place of worship occupied by this society is the property of a sect known as the Christian Church, a pleasing, commodious edifice, with a seating capacity of five hundred.

The church was filled at half past seven o'clock, the Christian Scientists from several adjoining cities were also present, having closed their regular Wednesday evening meetings for the purpose of attending this lecture. The exercises opened with the singing of a hymn written by the Rev. Mary Baker G. Eddy. After the reading of the thirteenth Psalm and a selection from the Christian Science text-book, page 491, line 28, to line 9 page 492, a few moments were devoted to silent prayer, followed by the audible repetition of the Lord's Prayer.

The lecturer, was then introduced by the First Reader, and for one hour, with the sweet simplicity characteristic of this speaker, the message of Love as Christian Science was made plain to an attentive, responsive audience. The clear light in which the author of "Science and Health with Key to the Scriptures" was portrayed as an inspired benefactor to all mankind, was well calculated to incite listeners to read and study the "little book" and find for themselves a Saviour. The meeting was most appropriately closed with the hymn,—

How firm a foundation
Ye saints of the Lord,
Is laid for your faith
In His excellent word.

At Mason City, Iowa.

The Opera House was filled Tuesday evening, December 20, 1898, to hear Mr. Kimball of Chicago, discuss "Facts and Fictions concerning Christian Science."

Hon. J. E. E. Markley presided and introduced the speaker by calling attention, in a short speech, to the accepted fact that there is no universal agreement in the realm of religious thought and in the schools of medicine. There is room for new thought and new discussion in both these fields. Christian Science has entered both, and is rapidly winning attention and adherents.

Mr. Kimball on being presented began an interesting and candid talk about the comparatively new doctrine; the opposition it has met, the persecution it has suffered, and the triumphs it has won. He declared himself a visible example of the power of Christian Science to rescue a man from the grave.

Many lectures might be given on the different phases of the new doctrine, and yet we would be but upon the threshold of the illimitable subject.

The Mason City (Iowa) Globe-Gazette.

At Clinton, Iowa.

Edward A. Kimball, C.S.D., member of the Christian Science Board of Lectureship of the Christian Science Society, delivered an interesting lecture in the Economic here Tuesday evening, January 17, under the auspices of the First Church of Christ, Scientist, to an interested and good sized audience.

He was introduced by the Rev. H. H. Morrill, rector of St. John's Episcopal parish here, who said in substance,—

"Ladies and Gentlemen:—I am requested by the representatives of Christian Science now in your city to introduce to you this gentleman who delivers his address to-night.

"I infer from the large number present that you are here for the improvement of your minds.

"While at his hotel I called upon the gentleman who is to address us to-night, and engaged in conversation with him, asking him many questions about Christian Science, all of which he answered with great readiness, and I must say that

Digitized by Google

I came away with some of my preconceived notions greatly changed.

"Our speaker comes well indorsed, and is an able exponent of the subject."

After a pleasing introductory the speaker proceeded at once with his interesting subject, which he handled with consummate skill.—Clinton (Iowa) Daily Age.

Christian Science in Chelsea.

THE Christian Scientists of Chelsea, Mass, held their first morning service in their home city Sunday, January 15. Fifty or sixty of them had been for some time regular attendants at the Mother Church in Boston, and it was with some questioning as to the number who could be counted on to form the new congregation that arrangements were made for meeting in Gould Hall, on Broadway, near the Postoffice building. But the number of those present when it came time for the service to begin was a surprise and a re-assurance. Not only were the sixty seats that had been first provided quickly filled, but four settees and almost a score of chairs had to be brought in from an ante-room. The hall was filled from platform to rear wall. Where it had been thought that possibly seventy might attend this first service, one hundred and twenty-seven were there. Several of the friends from the Boston Church who have been specially associated with the Chelsea Scientists were present to see the new branch well started, but they, though welcome, were not numerous enough to account for the special size of the gathering. The excess was composed of those who, though interested, have not associated themselves in any way with the Mother Church or been regular attendants there; and their number was taken as an immediate guarantee that the Chelsea Church has a work of its own to do.

Aside from the success in numbers, which carried with it a world of encouragement and cheer, there were other features of the morning that were pleasant. The little hall in which the service was held was perhaps as well adapted to its purpose as any place in the city not already used for religious worship. It is in a good location, and because of the fact that it is the meeting-room of one of the secret orders, it is well-furnished and devoid of a certain bareness that characterizes many halls. On Sunday, moreover, the room was flooded with sunshine, as if to assure a warm welcome to the new occupants. A soloist had been secured, and it was thus possible to follow the same order of service to which all attendants at the Mother Church had been accustomed. The generous offering of money was taken as an indication of the general spirit of enthusiasm under which the start was made. The Weekly and the Quarterly were on sale at the hall, and several copies of each were called for.

After the service the cordial spirit that pervaded the gathering made itself more evident than ever, and it was long after the close of the service before the friends finished their greetings and words of mutual encouragement.

It is hoped that a reading room may soon be opened in the city, where Christian Science publications may be kept on sale. Yet, though there has so far been no special room for this purpose, information on that subject has been spread, for the interest and watchfulness of certain Scientists have kept the reading room tables of the Fitz Public Library well supplied with the literature of Christian Science. The current copies of the Weekly and the Journal have regular places accessible to all readers; while on the shelves of the library are seven copies of Science and Health, three of "Miscellaneous Writings," one each of "The Mother Church," "Retrospection and Introspection," and "Unity of Good," while volumes 13, 14, and 15 of the Journal are preserved for readers. The first copy of Science and Health was bought by the book committee, but all the rest of the literature has been donated by Christian Scientists. The demand for the reading is good. On the evening when this account was prepared, every copy of Science and Health and "Miscellaneous Writings" was out. More copies will soon be added, as well as copies of other of Mrs. Eddy's writings. One copy of Science and Health has been placed in the Soldiers' Home and one in the Old Ladies' Home, while copies of "Miscellaneous Writings" have been accepted by some of the churches of the city for their Sunday School libraries.

Letters from the People.

Has Dr. Douglas Blundered Again.

Editor News-Press:—So far the medical profession in the great poison case has not shown itself in a very brilliant light. Or is it one of those rare instances when it stands revealed in its true colors of inefficiency and pretension? For statistics show that, as yet, it is all at sea as to the origin and treatment of such common and fatal diseases as Bright's disease, consumption, rheumatism, and a dozen others that are not self-limiting and curable by nursing alone.

And even if the most fascinating (because convenient) germ theory be true, it has not yet found the individual germicide for each, or, indeed, any disease.

To those acquainted with the awful death-rate of children under five years of age, and even of adults themselves, it would seem that the conscientious practitioner would go about with bowed head (metaphorically), or with the blush of shame.

Instead of that, one sees dapper little men with shining high hats and a great appearance of haste and responsibility, whose placid faces show that they are at peace with themselves, if not with all the world.

But, ah! that world that they have invaded with their brutal ignorance and death-dealing drugs, leaving behind ruined healths, broken hearts, and desolated homes!

Is it a wonder that thinking people, desperate parents and friends, take up Christian Science, or any kind of advertised healing arts, to escape from those old mossback traditions of the dead and gone ages?

By this time every one is familiar with Dr. Douglas' history in the Barnet poison episode that is under police supervision just now.

How he pronounced the young man's disease "faucial diphtheria," and wrote his death-certificate to that effect, when (as he afterward himself stated) no bacilli were found in the test "culture"—and when, also, he had not even reported a contagious disease case to the health board.

And then, how, when circumstantial evidence pointed to the theory that Barnet, too, as well as Mrs. Adams, might have been poisoned by a cyanide of mercury powder, he (Douglas) acknowledged he had known all along he had been so poisoned. With still another grave dereliction, this fact, too, he had not reported to the proper authorities.

And now, on the top of all this seeming ignorance and criminal neglect of a regular practising physician in New York City, of "good standing," Dr. Douglas, who seems to be hunting trouble, advances an opinion that it would be of no use to exhume the body of Barnet, as has been frequently suggested, to make a post-mortem examination, in the search for mercury, because he himself had treated Barnet with calomel (chloride of mercury), and, of course, it would be found there.

Pray, how much did he give? and could this record be beaten by any so-called quacks in christendom? Here is a man who did not take enough of a deadly mercurial poison to kill him outright (and it only required a grain), and evidently had some chance for his life left. A physician is called in who immediately proceeds to dose him with more mercury, according to his own volunteered statement since.

Bring on your quacks, I say.

What next in the Barnet-Adams-Cornish case?

Another Stomach Excised.

SOME months ago I called attention through the columns of the Christian Science Journal to an operation performed by Dr. Schlatter of Zurich, who removed the stomach from a woman who recovered her health after the operation and continued to live when, according to "medical science," she should have been dead, as it had been held as a "scientific" fact, that without the organs removed from her a person could not live. She disproved the so-called scientific theory by continuing to live, despite the rule laid down in the books from which *materia medica* gets its inspiration.

Now, it would seem, that the law of mortal belief in that line having been broken, other disciples of *materia medica* realized that it never had any real value, and that they had been prevented from saving human life according to their lights by refusing to perform certain operations for fear that death would ensue, yea, from a positive knowledge, as they thought, that it would.

Emboldened by the work of Schlatter, doctors of thought dropped the old idea, and entered upon the new line mapped out by him, and as a result we read in the Boston Herald and other papers of January 11 and thereabouts, that a similar operation has been performed in the vicinity of Boston by one of its best-known surgeons, who has dared to go against the laws which he had thought before could not be transgressed safely, and he in turn has removed the stomach of a woman and she still lives and is comparatively well.

Why should not *materia medica* learn from these isolated cases that they are not infallible, and that laws which have been laid down for them since time immemorial can be broken with impunity, and to the betterment of civilization? Must they not realize that Life does not depend upon structural organism?

Listen to these conclusions of Dr. E. C. Wendt, a famous physiologist, after a careful study of Dr. Schlatter's case:—

"The human stomach is not a vital organ; the digestive capacity of the human stomach has been considerably overrated; the fluids and solids constituting an ordinary mixed diet are capable of complete digestion and assimilation without the aid of the stomach; a gain in the weight of the body may take place in spite of the total absence of gastric activity; typical vomiting may occur without a stomach; the general health of a person need not immediately deteriorate on account of the removal of the stomach; the most important office of the stomach is to act as a reservoir for the reception, preliminary preparation, and propulsion of food and liquids, and it fulfils a useful purpose in regulating the temperature of swallowed solids and liquids; the chemical functions of the human stomach may be completely and satisfactorily performed by the other divisions of the alimentary canal; gastric juice is hostile to the development of many micro organisms; the free acid of normal gastric secretions has no power to arrest putrefactive changes in the intestinal tract, and its antiseptic and bactericide potency has been overestimated."

In the papers of the same date also appears a notice of the passing away of the Hon. Nelson Dingley, that loved son of the State of Maine. He had the services of *materia medica* from the commencement of his illness to the end. Did it save him? Why then are not the doctors blamed for the result as the Christian Scientists who attended Harold Frederic were? In justice they should be. Is it not because *materia medica* loses so many cases that such a termination causes no comment, while the Christian Science healers lose so few that it is a matter of general comment when they do lose one? I realize that this is not the light in which the world views this, but it seems to me that it is a fair way to look at it.

HERBERT S. FULLER.

Brockton, January 11.

Christian Science and Doctors.

To the Editor of the Globe:—

In your issue of January 4, 1899, I noticed the following statement:—

"Atchison physicians are very indignant over the actions of people who believe in Christian Science. They say that in the last hour, the advocates of the religious medicine weaken, and send for a physician, when it is too late. They protest against being called at all under such circumstances."

When I read the above statement, it afforded me much amusement, for the reason that I cannot conceive of anything more helpless for a Christian Scientist to appeal to in such dire necessity, than a doctor of medicine. The fact is, people who have become Christian Scientists, have tried to its utmost capacity, and to their entire satisfaction, the efficacy of medicine, and the unscientific guesswork of those who dispense it.

To illustrate, physicians speak loftily of "our science of medicine." Let us examine this claim to "science." The most attractive feature of any science is that it demonstrates according to certain rules, which are unerring, unchangeable, immutable; made so not by man's opinion, but by the principle they represent, and all results must be demonstrated according to those rules if they would bear the seal of science. Now, you feel sick; you go to a physician of the regular school. He examines the case, says you have an ailment and you need one thing. You go to another of equal standing; he looks wise, diagnoses, and disagrees with his brother physician, and prescribes an entirely different remedy. Not being satisfied you go to a third, and behold! the same contradictory advice. Then you ask yourself, where is this scientific rule? Here are three physicians all claiming to practise the same rule, and no two will agree as to the method to be pursued.

Now take three mathematicians, call their attention to a problem in which you have made a mistake. One tells you that you must multiply where you have divided. You go to another, he gives you the same advice. You go to a third, and the advice is the same. What is the result? When you have taken their advice, your problem is correct, and the product is in perfect conformity with the principle of mathematics. Why did those professors agree? Because they were each demonstrating a science. But how about the three physicians? Only one diagnosis could have been according to science, for the rules of science are intact. How is the public to be protected from the quacks or the unscientific practitioners?

The public should remember that there are two sides to every question, and they are not familiar with the Christian Science side. Every one who says he believes in Christian Science, is no more a Christian Scientist than he who takes medicine, is a physician; neither is he required to be.

I make the following declarations without fear of contradiction: No present member of the Christian Science Church of this city, has ever employed a physician, or taken a dose of medicine; neither has there a death occurred in this Church since its organization, since Christian Science was first introduced in the city, although the Church numbers some seventy members, all of whom have been healed, and restored to health and harmony in Christian Science.

HATTIE E. GRAYBILL, C. S.
First Reader of First Church of Christ, Scientist.
The Atchison (Kan.) Daily Globe.

Another Good Newspaper Friend.

WE cheerfully publish the following friendly editorial from the Farmers' Friend and Grange Advocate of Mechanicsburg, Pa.:—

At different times during the year just closed we have

Digitized by Google

given to the readers of the Farmers' Friend excerpts from the writings of Christian Scientists, so that they might have an opportunity of learning something of a faith that is now sweeping all before it, and is believed in and practised by men and women of great attainments throughout the entire country. We did this the more readily because rural and urban people have had but little opportunity to come in contact with the teachers of this faith or make the acquaintance of periodicals devoted to its exposition. Noiselessly as the bursting of the buds in springtime, costly and beautiful temples of worship make their appearance in intellectual centres, and gathered in them for worship are people of the highest culture, men and women who accept the new only after mature consideration and the most positive and convincing evidence of the excellency of the doctrine taught. To write of the great influence of Christian Science upon the world of religious thought, and the revolution it is effecting in medical practice, scientific thought, literature, business methods, and social conditions is a work of too great magnitude to be undertaken at this time. The age is eagerly discussing Christian Science and crying loudly for more light; its value to the present and future welfare of people can only be estimated when we fully know the number who, through its operations, have been relieved from dread disease, pain, error, hopelessness, and spiritual darkness. Its teachings reveal the promise of, and the way to, a new and higher order of society. That marvelous results have been wrought by Christian Scientists, no one acquainted with the facts will dispute, but as only a few leading papers, the Denver Republican, the New York Sun, the Washington News Letter, and the papers of Concord, New Hampshire, the home of Mrs. Mary Baker G. Eddy, the Founder of the faith, give information concerning the wonderful things done by Christian Scientists, and because a number of our readers have written us for more light on the subject, we have concluded that the readers of the Farmers' Friend shall have opportunity to learn what Christian Scientists are doing.

The Quality of Mercy.

BY W. P. MCKENZIE.

"BECOME compassionate," said Jesus, "as your Father in heaven is compassionate." "He shall have judgment without mercy who has shown no mercy," declared James. In Christian Science we are set free completely from one thing, that is, judging others; we are set free to love our brother. If there be a wrong it is God's to avenge and vindicate the right. Man's way is to take revenge and make the wrong greater. Resentment seems inseparable from human judgment; and such judgment implies the superiority of the judge above the culprit, such as was assumed by Caiaphas, who rent his clothes in pride of his sanctity and separateness from the Christ whom he called a blasphemer. Human judgment is the life and core of Pharisaism. It directs the gaze ever outward to the defects of others, and compares therewith the excellencies of the imagined self. But there is no tenderness possible, but rather hardness of heart, bitter injustice, selfishness, unruly will power, a life of lying, hypocrisy, acting. How can such escape punishment when their own acts against others react upon themselves?

But mercy rejoices against judgment. Mercy sets up one standard, not the self, but God. The merciful man sees how far he is from the compassion of his heavenly Father, and is humble; he seeks to bring others and himself to the right knowledge of God, and so is loving. It is in the very nature of things that the "merciful shall obtain mercy."

Having the human self for standard means gravitation hellward until Pharisaism is purged by retribution. Through making God All-in-all, the heart is melted, man becomes merciful, and finds heaven on earth.

To Leave Concord.

Rev. Mr. and Mrs. E. M. Buswell will Return to Nebraska.

THE Rev. E. M. Buswell, who has been in charge of the Concord Church of Christ, Scientist, since regular services of that faith were instituted a few years ago, is to relinquish his charge here and return at once to his former home in Beatrice, Nebraska. Mr. and Mrs. Buswell will leave Concord on Friday and the testimonial meeting in Christian Science Hall Wednesday evening, January 18, will be the last service at which Mr. Buswell will officiate as a Reader of the Concord Church.

Mr. Buswell has made many friends here, who will regret that urgent personal reasons now impel him to relinquish his work in this city, and they will follow him with their best wishes wherever his lot may be cast. During Mr. Buswell's residence here he has witnessed an increase in his congregations to more than two hundred from something like a dozen, and a handsome and convenient place of worship has been provided for the worshipers through the generosity of Mrs. Mary Baker Eddy, the Discoverer and Founder of Christian Science. Mr. Buswell has endeared himself primarily to his people by his simple and unaffected and sympathetic manner, no less than by his sturdy zeal; and many not of his congregation have joined to testify to their regard for him.

Mr. Buswell will be succeeded here by the Rev. Irving C. Tomlinson of Boston, who is a member of the official Board of Lectureship of the Mother Church in Boston. Mr. Tomlinson was formerly a clergyman of the Universalist Church, as were also his father and grandfather. He has on different occasions preached in the White Memorial Church here in exchange with former pastors. He will conduct services for the first time next Sunday morning.—Concord Evening Monitor.

College and Church One.

THE following article is taken from a recent issue of the New York Sun:—

The Discoverer and Founder of Christian Science, Mary Baker G. Eddy, has conjoined the Massachusetts Metaphysical College with the Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

In the year 1889, to gain a higher hope for the race, she closed her College in the midst of unprecedented prosperity. She left Boston, and sought in solitude and silence a higher understanding of the absolute Scientific unity which must exist between the teaching and letter of Christianity, and the spirit thereof dwelling forever in the divine Mind or Principle of man's being—and revealed through the human character.

While reading "Science and Health with Key to the Scriptures" the light and might of the divine concurrence of the Spirit, and the Word, appeared; and the result is, an auxiliary to the College called the Church Board of Education, the maximum of whose students, taught annually, is less than one half the number formerly contained in one class at the Massachusetts Metaphysical College; thus giving opportunity for the accession of spirit, wherefor the letter should wait.

Our Master said: "What I do thou knowest not now; but thou shalt know hereafter;" and the spirit of his mission, the wisdom of his words, and the immortality of his works, are the same to-day as yesterday and forever.

Independent Statesman, Concord, N. H.

"Doctor, I am in constant dread of getting in a trance or something and being buried alive," said a Peoria lady to a well-known physician.

"Nonsense!" said the latter. "You take what I prescribe and drive such foolish notions out of your head. Such a thing as being buried alive never happens to my patients."

The Peoria (Ill.) Journal.

Miscellany.

Medical Legislation.

In regard to legislation to regulate the practice of medicine, it may be well to observe that the choice of medical attendants and advisers is a matter which each man has a right to make for himself. It hardly comes within the range of subjects to be regulated by law as matters of sanitation or other things affecting public health.

The same principle applies to the theory of medicine to be followed. One person may believe in one theory and another in something very different. The decision of one may be wise and that of the other foolish. Or both may be alike unwise. Schools of medicine are matters largely of prejudice and taste. As a general proposition the person consulting a physician of a particular school knows nothing about the merits of the theory upon which the physician professes to practise his profession. Sometimes the physician himself knows but little more. So, in respect of the choice of schools and theories, it is for most persons a leap in the dark at best.

With all due respect to the medical profession, there is a great deal of guesswork about its practice. The feeling or mental condition of a patient has so much to do with the question of cure, that one doctor is often about as good as another. There is no guaranty in a diploma that the person holding it is qualified to treat diseases, much less effect a cure in a given case. But cure is the object sought by the patient, and it makes little difference to him whether it be effected in one way or in another.

Open and notorious charlatanism should be prohibited. But a doctor is not necessarily a charlatan because he is not connected with a recognized school of medicine. He may be able to effect cures by use of simple remedies, or, for that matter, by the employment of no medicine whatever. It would be carrying matters to an extreme to say that the work of all such medical or alleged medical men is a public evil which should be prohibited by law.

Editorial Denver Republican, January 6.

British Medical Journal.

From the British Medical Journal, a leading publication of the profession in England, we extract the following:—

Disease of the body is so much influenced by the mind that in each case we have to understand the patient quite as much as the malady. This is not learnt at hospitals.

When we remember that mental science is yet in its infancy, it is not surprising that cures are not invariably effected. Allopathy has held the field for many centuries, yet people still die under its treatment. Does it therefore follow that Allopathy is quackery? When we remember how recent discoveries in animal chemistry, bacteriology, etc., have revolutionized medicine, and think of the bleeding and nauseous drugs of a century ago, surely we should remember that healing is not an exact science and suspend judgment. The fact is, the mind and the body are interdependent, the mind has influence over the body and the body over the mind; it is those who lose sight of either of these truths who go astray. It follows, therefore, that professors of the healing art should be trained in knowledge of the mind as well as the body, and *vice versa*.

Not to be Ridiculed.

While some people are disposed to ridicule the Christian Scientists because of peculiarities in their faith, no one yet has dared to ridicule the class of people who have associated themselves with that Church. The Ladies' Literary Club house was well filled recently with the members of the Church, and no more representative gathering of well-known business men, whose shrewdness and good horse sense are undoubted, and of equally well-known ladies, whose standing in social, literary, art, and musical circles is of the very highest, could be asked for. There are portions of the Christian Science doctrine which seem past belief when first heard, but it is a noteworthy fact that in this case unprejudiced investigation is always followed by respect, and in many cases by belief.—The Grand Rapids (Mich.) Democrat.

First Christian Science Services in Cambridge.

The members of the new Christian Science Society of Cambridge, have every reason for congratulation upon the success attending the first service held Sunday morning (January 22), in Brattle Hall, Cambridge. The service, which was attended by two hundred and forty ladies and gentlemen who reside in Cambridge, Belmont, and Arlington, was conducted by the Rev. W. P. McKenzie, C.S.B., and Miss Emma Gould Easton, C.S.B.

The Cambridge society is known as the First Church of Christ, Scientist, Cambridge, and is a branch of The First Church of Christ, Scientist, Boston. For the present, the Cambridge society will hold meetings every Sunday morning and Wednesday evening in Brattle Hall, but, judging from the interest taken in the branch movement, the building of a church is probable in the near future.

Boston Herald.

Smooth Words.

God pity the age or community which demands words as smooth as butter and as sweet as honey from those who are called to speak the truth in public places! There is the power of a strong man in strong words. Let them be heard, and let them ring like hammers on anvils. And let no hearer foolishly consider that man his enemy who speaks against his sins or his errors in words that may be more like hot lava than dead ashes. Martin Luther could denounce wrong like a giant, and then, weeping, put loving arms about the wrong-doer. Henry Ward Beecher could do the same thing. So could Abraham Lincoln. So did St. Paul. It was a trait of Jesus the Christ.—Morning Star.

Varnish instead of Honey.

The postmaster at East Greenwich was suffering from a cold contracted by an excess of ventilation produced by one fresh lad pushing another's head through a large pane of glass in the postoffice window. To relieve the hoarseness he accepted the advice of an old lady of his household to take some honey. She brought the bottle, and he swallowed a spoonful, not of honey, as he supposed, but of varnish. Like Mark Twain, Mr. Keelin felt for a minute as if he wanted to throw up his immortal soul, but he didn't. His hoarseness is relieved, but he isn't taking any more varnish internally, just the same.

From the News Letter.

The News Letter extends its congratulations to the Christian Science Weekly, which comes to us enlarged and improved in many ways. This great journal is the leader in Christian Science thought in the newspaper world, and we are glad to see it rising to the full realization of the situation. We salute it with joy and hearty appreciation.

Washington News Letter.

Hale and Hearty at 103.

Mrs. Lydia C. Tenny celebrated the 103d anniversary of her birthday December 6, at Concord, N. H., at the residence of her son, Daniel C. Tenny, the only survivor of her nine children. She was born in Bradford, Vt. She retains her senses to a wonderful degree, and her general health is apparently good enough to secure her many more years of life.

Testimonies.

I wish to tell of my wonderful healing through Christian Science. I had been suffering for nearly three years with stomach trouble. My food soured and did not digest at all. There would be so much gas in my stomach I could not lie down or get any sleep until I threw it up. So my food did me no good and I was really starving. I was running down as fast as I could; the last year I went very fast. My flesh was nearly all gone; nothing but the skin over the bones remained, and I was so weak I could scarcely walk. I tried drugs until I was tired of them and knew there was no virtue in them. My faith was strong in the Lord to heal me, and I prayed almost continually to be healed, but still was not.

My son requested me to go and consult a specialist, and to please him I went. He put me on a prescribed diet, and gave me medicine, but did not tell me he could cure me. He said my age was against me. (I was sixty-two.) I thought it strange, for Jesus never told people he could heal them if they were younger. The doctor's medicine did me no good. He told my son I had cancer of the stomach. I came home much weaker than when I went away.

My daughter then prevailed on me to try Christian Science. No person could be more prejudiced against Christian Science than I was. I had been a member of the First Day Advent Church and a Bible student for years; but I consented to try it, with no intention of becoming a Christian Scientist, or changing my views in the least. I thought I had the truth, and therefore would not change my theology. I believed in a personal God and a personal devil, and in the literal coming of Christ. I thought I had given up everything for Christ, but I was made to see I had not given up anything, nor was I willing to do so. I had my idols set up in my heart, and I was not willing to give them up.

I wanted to be healed in my own way, and not in God's appointed way. Pen cannot describe what I suffered, or how very low I was. But as soon as I said, Lord, I will give up all my idols, all my preconceived ideas of God and the Bible, I will give up everything for Christ, I was healed. The day before I was healed all but my healer gave me up, and thought I would not live through the day. I was healed of the disease instantly, but was very weak and there was so much to contend with here, that it took me some time to fight the battle with error and come off conqueror through Him who has loved us.

It was in April I went to see the specialist, and the last of June I gave myself into the hands of the Christian Science healer. I was healed and went to Illinois on a visit in August. While there I was taken sick again. My son, unknown to me, called a physician and sent telegrams to my children to come at once. The doctor said I would not live more than four days at the longest. I had them send word to my healer. Strength was given me to go home, although my son hardly thought I would live to get there. Afterward I became so weak that I could scarcely be moved at all without fainting. Truly the last state was worse than the first.

I came home the first of September, and the last of September I was able to do my work, although very weak. That was nearly one year ago. Now I can do as much work as a woman ever ought to do, and truly I can say I have come up through great tribulation. I hope no one will be discouraged if he is not entirely healed instantly. I think sometimes the majority of the people here would rather I had died than been healed through Christian Science. They are willing to say the Lord healed me, but Christian Science must be left out. If I had been healed in ten years by drugs they would have thought it a miracle, but not so now.

Anna Gordon, Webster City, Iowa.

About six years ago I received an injury to my left eye which caused severe pain. An operation was performed which did very little good, and the M. D.s gave me to understand that sooner or later I would have to suffer the loss of the injured eye.

While on a visit to my sister at Independence, Iowa, I became interested in Christian Science. I began to read Science and Health, by Mrs. Eddy. I also began taking treatment from a Christian Scientist, and at the end of three weeks the pain entirely left my eyes, and has not returned.

I was also cured of the tobacco habit during this time. I had not read Science and Health long before the desire to be a better man began to take possession of me. I told the healer that I should like to quit chewing tobacco, and in a week's time I was perfectly cured.

This alone was enough to convince me of the truth of the teachings of Christian Science. My experiences this summer have made me a strong believer in Christian Science. I procured a copy of Science and Health, and it is my daily study, and through its teachings I find that I have been living in darkness all my life. There is a small class of true Scientists here. Meetings are held every Sabbath and every Wednesday evening.—George W. Kays, Villisca, Iowa.

Extract from a Letter.

'A year and a half ago I came here alone and a stranger to all. I commenced the Sunday meetings by reading the Lesson to the first patients who were healed, and thus they have come first for the healing, then to know more of the Truth. We now have an average attendance of fifty. The growth has been quiet and steady. One of the bright features of the work is the little Sunday School class. The children have placed Christian Science literature in the Public Reading Room, and now are keeping a little box supplied with tracts at the street car waiting room. You would enjoy hearing the beautiful demonstrations they have over error. I seldom meet with any who have an understanding of the Science, and I have enjoyed giving this testimony for Truth. I watch the Journal closely for every word of instruction, knowing if I keep close to the fold I am safe.—Lillian V. Weatherwax, Rockford, Ill.

Church By-law.

Duties of Readers.

ARTICLE IV. Sec. 6. Members of the Mother Church who are, or may be appointed, Readers to conduct public services, shall be thorough English scholars. They shall make no remarks explanatory of the Lesson Sermon at any time during the service; but they shall read all notices and remarks that may be printed in the Christian Science Quarterly. This Church By-law applies also to the Readers in all the branch churches.

Notices.

Attention, Subscribers.

ATTENTION is called to the fact that there is now no special price made for the Weekly when subscribed for in connected with the Jounal, as was done previous to the enlargement of the paper. The prices which now govern the Weekly will be found on page four.

No subscriptions for the Quarterly well be received for less than one year. No subscriptions for the Weekly will be received for less than six months. Orders other than subscriptions, for Weekly, Journal, and Quarterly, should be given for current issues and back numbers only.

Number 19 of the Weekly, January 5, is entirely exhausted, so that no further orders can be filled.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text book on CHRISTIAN SCIENCE MIND-HEALING.

Cloth, Price, Single book, Prepaid $3.18
Two to Twelve books to one address, each, Prepaid 3.00
Twelve or more books to one address, each, Prepaid . . . 2.75
Full Sheep, stiff covers, bible paper, marbled edges, each, Prepaid 4.00
Twelve or more to one address, each, Prepaid 3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid 5.00
Twelve or more to one address, each, Prepaid 4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid 6.00
Twelve or more to one address, each, Prepaid 5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (Cloth), each, Prepaid $2.25
Twelve or more books to one address, each, Prepaid . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, Prepaid 4.00
Twelve or more to one address, each, Prepaid 3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, Prepaid 5.00
Twelve or more to one address, each, Prepaid 4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half doz.; $9.00 per doz.; all prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price, 50 cents per copy; $5.00 per dozen.

CHRIST AND CHRISTMAS. An Illustrated Poem.

Single book, Prepaid $3.00
Twelve or more books to one address, each, Prepaid 2.50

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half doz., $9.00 per doz.; all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half doz.; $4.50 per doz. Leather covers (pocket), $1.00 each; $5.00 half doz.; $9.00 per doz.; all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per doz.; prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price by mail, 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents, $2.50 per doz.; prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price by mail, 21 cents; $2.00 per doz.; prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price by mail, 21 cents; $2.00 per doz.; prepaid.

The Secret of Stilwell's Success.

He Has Raised Millions of Dollars for Railway Building Against Almost Overwhelming Opposition.

We take pleasure in republishing from a current number of Success. a weekly publication under the able management of Dr. R. S. Marden, whose headquarters are in New York City, the following article, relating to the successful business career of Mr. Arthur E. Stilwell of Kansas City. It may not be improper for us to remark that Mr. Stilwell is an ardent Christian Scientist. Those who attended the Friday evening meetings in the Mother Church about two years since will remember the impressive testimonial given by Mr. Stilwell, in which he spoke of overcoming apparently insurmountable financial difficulties, through his understanding and practical application of the teachings of Christian Science. Through this understanding, he declared, he had successfully tided over seeming crises in his enterprises, that under ordinary conditions would have been impossible.

Arthur E. Stilwell is another New York boy who, like Governor Fancher of North Dakota, went to Chicago, became a life insurance solicitor, and then went farther west and achieved great success. He was born in Rochester, New York. When twenty-two years of age he went to Chicago and obtained employment with a life insurance company. He was not successful as a solicitor, although his restless mind was always busy devising schemes for improving methods of insurance. He moved to Kansas City, and there formed a trust company. This undertaking flourished, and Stilwell became a man of prominence. His opportunity came when the president of the trust company, of which he was vice-president, brought to his attention an old charter for a belt road around Kansas City. The cost of cutting through the surrounding hills had deterred any attempt at constructing this road. Stilwell immediately responded, "Let's build it." Kansas City financiers sneered at the project, but Stilwell got the money and built the road.

Early in 1892, he secured control of a little railroad running south from Kansas City seventy miles, and almost immediately announced that he proposed to extend it south to the Gulf of Mexico, a distance of nearly eight hundred miles. The Gould lines, the Santa Fé, and the Missouri, Kansas and Texas, all had existing roads from Kansas City to Gulf ports. There did not seem any room for another road, even to the most sanguine, and Stilwell's project was ridiculed. He started construction work in earnest, however, in 1893, the year of the panic, sold his bonds, and then, existing lines finding he meant business, employed against him every weapon that wealth, experience, and ingenuity could suggest. They fought him in the courts, they contested his right of way, and opposed him in the legislature of every state he entered, but Stilwell went steadily forward, buying roads, building the links necessary to connect them, and extending his line south.

Shortly after the Atchison, Topeka & Santa Fé system went into a receiver's hands, with disastrous effect upon the standing of American railroad securities in Europe and this country, Stilwell was obliged to raise ten million dollars. He went to New York and Wall Street laughed at him. The strongest financiers told him to go home and abandon any attempt to borrow money in such a time of disaster. Stilwell reflected, and determined to go to Amsterdam. In that old conservative community, where any financial proposition is scanned from top to bottom and considered for weeks before it is acted on, he found buyers for his bonds. In the summer of 1896, he obtained millions from Holland, and the building of his road went steadily forward, while other new enterprises were forced to stop. He built towns, equipped them with fine new depots, electric light and water plants; secured emigration and opened up timber land and planted vast areas with rice as a new crop. He refused to join the traffic agreements of the roads running to the Gulf, and disregarded their rates. The Gulf Road, as it is called, reached the Gulf of Mexico eighteen months ago. No steamers landed at the point which Stilwell selected as a terminus of the road, and none could, for lack of deep water. He built a fleet of five five-thousand-ton steamboats, to trade with Great Britain, and another fleet to ply to Cuba and Mexico. He induced Congress to appropriate, altogether, three million dollars to deepen Sabine Pass, and he had started to dredge Sabine Lake when an enormously wealthy New York interest stopped him with an injunction.

He did not quietly await the result in the courts, but began a ship canal around Sabine Lake, seven miles long. In the face of litigation and derision, he got the money for it. Three miles of the gigantic ditch, which is cut through blue clay, are finished, and the rest will be done in a year. He did not wait for the completion of the road south to begin its northern extension. By purchase of existing roads he secured a line to Omaha, after announcing that he proposed to tap the wheat-fields of Manitoba. He filed a charter in Missouri a month ago which indicates that the purpose of pushing the Gulf Road up to the snows of the North will not be long delayed. Within two months he has secured a line to Quincy, and, by the building of an extension to Beardstown, can make a connection with the Baltimore and Ohio.

This projector, builder, and operator of huge enterprises is said to be possessed of only a small fortune, although he controls the investment of millions. It is said of him that one secret of his success in securing financial support at times when other men fail is in his enthusiasm, and his power of putting dry details in a novel and original form.

Stilwell, says the Kansas City Star, from which the points of this narrative have been taken, often passes through Chi-

Digitized by Google

cago in his private car, and frequently calls on the one or two life insurance men who encouraged him ten years ago. One day he took half a dozen distinguished European financiers, among them a couple of English noblemen, into the little office of an old fellow-solicitor and introduced him to his party as the man who made him, by encouraging him when everybody else ignored him as an impractical dreamer. He has sought out other old friends and put them in the way to better things. A few months ago, he found one who was selling subscription books. He gave him a preliminary trial as a negotiator of bonds, and then sent him to London to handle a big bond issue under conditions that insured success. Stilwell spends much time in New York nowadays. Although a great talker, he says little about his plans, and the men who would like most to know them understand only that he has created a very big railroad system in six years, and that he means to extend it.

Items of Interest.

Woman Suffragists.

THE Massachusetts Woman's Suffrage Association opened its thirtieth annual meeting in Boston Thursday, January 2, with Mrs. Judith W. Smith of East Boston presiding.

The election of officers resulted as follows:—

For president, Mrs. Mary A. Livermore.

Vice-presidents at large, Mrs. Julia Ward Howe, Hon. George F. Hoar, Hon. John D. Long, Mrs. Quincy A. Shaw, William I. Bowditch, Mrs. Emma Walker Batcheller, William Lloyd Garrison, Elizabeth Stuart Phelps Ward, Colonel T. W. Higginson, Hon. William Claflin, Mrs. Abby Morton Diaz, Mrs. Oliver Ames, Mrs. Mary Schlesinger, Mary F. Eastman, Hon. J. W. Candler, Mrs. Susan S. Fessenden, Hon. W. W. Crapo, Hon. Josiah Quincy, William A. Bancroft, Mrs. Ole Bull, Mrs. Martha Perry Lowe, Miss Lucia M. Peabody, Rev. George Willis Cook, Mrs. Fanny B. Ames.

Clerk, Mrs. Ellie A. Hilt.

Corresponding secretary, Henry R. Blackwell.

Treasurer, William Lloyd Garrison.

Auditors, Amanda M. Lougee, Richard P. Hallowell.

Chairman of Board of Directors, Alice Stone Blackwell.

For Massachusetts member of national American executive committee, Mrs. Judith W. Smith.

Directors at large, Mrs. Esther F. Boland, Mrs. J. W. Smith, Miss Susan L. Whiting, Mrs. Josephine Currier, Mrs. Eleanor A. Noble, Miss H. E. Turner, Mrs. Helen A. Shaw, Mrs. Carrie Anders, Mrs. O. A. Cheney, Mr. W. L. Haskel.

In the opening address, Mrs. Smith said that the Massachusetts Woman's Suffrage Association has had a busy and prosperous year, and has a larger membership than ever before. The fortnightly meetings at headquarters have been well attended.

The Filipinos.

THE members of the Filipinos Junto at Hong Kong have issued the following statement:—

The purchase of the American authorities at Hong Kong of a number of steam launches for river work in the Philippine Islands is high-handed, unnecessary, and vexatious.

Domiciliary visits throughout Manila are exasperating the Filipinos. Their suspicions are aroused by such actions. The dispatch of re-enforcements is incompatible with peace, and the appointment of a commission is only a pretext to gain time. The American secret police is acting offensively toward the Filipinos at Hong Kong, who are British subjects.

The Filipino congress at Malolos has unanimously vetoed annexation.

The following also appears in the Independencia of Hong Kong:—

Reports from the interior indicate that Aguinaldo's authority is now generally recognized. Every available male is being recruited, and arms depots are being established at San Bernandino, Union, Trinidad, and other large towns.

An Interesting Coin.

A COIN recently discovered in Paris, the property of a well-known numismatist, M. Boyer d'Agen, has attracted much attention, as it is believed that it is of the Messianic period, and worn by Jewish Christians in Jerusalem during the first century after Christ. On one side of the coin there is a portrait of the Saviour, with the name of Jesus in Hebrew letters; on the reverse this motto: "The Messiah, the King, will come in peace. He is the incarnate living light of men." Later research shows that there is almost an exact duplicate of this coin in an English collection. This coin has a curious history. It was unearthed in 1812 in County Cork, Ireland, by a girl while digging for potatoes. The piece is of bronze. On one side is the head of Christ; on the other, in Hebrew, "The Messiah has reigned. He came in peace, and being made the light of man, He lives." Numismatists agree that this coin must be of great antiquity, because there is no nimbus around the head, the aureole having come into Christian art after the seventh century.

New York Times.

Postal Earnings.

THE remarkable improvement in business conditions during the closing months of last year is reflected in the postoffice returns of the issues of stamped paper, which have just been compiled. These cover postage stamps, stamped envelopes and all other forms of postage except the pound rates paid by periodicals for distribution to regular subscribers.

The actual issues of stamped paper were larger for the quarter ending December 31, 1898, than ever before in the history of the postoffice department, even without including an allowance for postage on periodicals. The total issues for the quarter had a face value of $24,656,356, of which $19,945,841 was in ordinary postage stamps, $1,950,928 in postal cards and $2,759,587 in stamped envelopes. An allowance of $800,000 for second class postage on periodicals would carry the total for the quarter to nearly $23,500,000. The total earnings are nearly $91,000,000.

A Female Nimrod.

MRS. CROFTS of Cork, Ire., can boast a record of big game which many a sportsman might envy.

During a recent stay in India, Mrs. Crofts had keen sport in the jungles of the Maharav of Kotah and the Maharajah of Thallawar, in Rajputana, a tiger—shot a few yards from the tree where Sir Edward Bradford was mauled and had his arm taken off by a tiger—a panther, four black bears, a wild boar, four stags, two antelopes, a small red deer, a hyena, and a lynx falling to her gun.

In all Mrs. Crofts has seen seventeen tigers killed, and innumerable panthers, bears, and crocodiles. One of her unique experiences was the shooting of two large tigers out of a steam launch on the Cambal River, Kotah.

Mrs. Crofts is as well an accomplished tennis and golf player, and has won many prizes in tournaments.

The Eagan Court-Martial.

THE General Eagan court-martial has been organized, and commenced business in Washington. The court consists of Major-General Wesley Merritt, U. S. A.; Major-General James F. Wade, U. S. V.; Major-General M. C. Butler, U. S. V.; Major-General S. B. M. Young, U. S. V.; Brigadier-General Royal T. Frank, U. S. V.; Brigadier-General George M. Randall, U. S. V.; Brigadier-General Jacob Kline, U. S. V.; Brigadier-General Richard Comba, U. S. V.; Colonel Peter C. Hains, corps of engineers; Colonel George L. Gillespie, corps of engineers; Colonel Charles R. Suter, corps of engineers, and Colonel Francis L. Guenther,

Digitized by Google

4th U. S. artillery. Lieutenant-Colonel George B. Davis, deputy judge advocate general, is judge advocate of the court.

General Eagan pleaded not guilty.

General Guy V. Henry, governor-general of Porto Rico, has issued a statement to the people on the island, in which he said,—

"Porto Ricans will be preferred for office. Those Porto Ricans who have gone to the United States and received an education and are capable of filling places in this island will be selected first; Americans next in order.

"It is not my intention to put in office Spaniards or Spanish sympathizers. This is an island of Porto Ricans, and will be so considered. Americans must understand that this island is not one of conquest, but was surrendered to the United States by the Porto Ricans, who have been loyal to the government of the United States, and I purpose considering them for office as such in the future."

Scandal in Washington Insane Asylum.

WHEN the Senate convened January 24, Mr. Gallinger, through a resolution which he had passed, intimated that there might be a scandal in connection with the management of the Washington Asylum of this city, the responsibility for which he frankly placed at the doors of Congress. The resolution provides for an investigation of the asylum by the committee on District of Columbia.

Mr. Gallinger said there were 826 inmates of the institution. In the workhouse for males there were 216 bunks and 314 inmates. He deemed the situation to be a disgrace to Washington, and calculated to bring reproach upon Congress.

The Doukhobortsi.

TWENTY-THREE hundred Doukhobortsi, members of a Russian religious sect, landed at St. John, N. B., January 23. They are on their way to the Canadian West, where certain territory has been set apart for their occupation, by the English government. Two thousand more Doukhobortsi are expected in about ten days.

Word comes from Manila that Aguinaldo has proclaimed the Philippine republic at Malolos. There was no public demonstration in Manila. The Spanish civil prisoners will be set free by the insurgents.

It is reported from Washington that the peace treaty will probably have to wait for ratification until an extra session of the Senate, which the President will call early in March.

According to present indications, all the expenses of the island of Cuba for January will be met out of the customs receipts during that month.

Concord Items.

New First Reader.

The Rev. Irving C. Tomlinson, who succeeds the Rev. Ezra M. Buswell as First Reader of the Christian Science Church in this city, will begin his ministry to-morrow (January 22), conducting services in Christian Science Hall, corner of State and Second Streets, at 10.30 A.M.

Mr. Tomlinson is a graduate of Buchtel College, Akron, O., where he took his degree in 1880. His theological training was had at the Divinity School of Tufts College, and for some years he was a minister in the Universalist Church. Becoming interested in Christian Science, Mr. Tomlinson severed his relations with the Church of his fathers and became a Christian Science healer. He comes to Concord from The First Church of Christ, Scientist, in Boston. He is a member of the Board of Lectureship.

Concord Evening Monitor.

Christian Science.

A Disciple tells What it is and What it is not.

Editor Courier:—Seeing your kind notice of "Christian Science Propagators" in a Courier of recent date, will you please allow me to say a few words on that subject so that the readers of the Courier may get a more correct sense of what it is as well as of what it is not.

Webster defines medicine as "a drug used as a remedy for disease."

As the only remedy used by Christian Scientists is Mind—God—it can hardly be classed as "a system of medicine."

They recognize God as the only physician, the only healer—"I am the Lord that healeth thee."

It was the blessed privilege of the writer to be invited to a class recently taught by the Discoverer and Founder of Christian Science, the Rev. Mary Baker Eddy, and to hear from her inspired lips the words of love. Why, it was the song the angels sang! "Peace on earth, good will to men."

In that class were ministers, doctors, lawyers, editors, as well as common people, and "they all heard the Word with gladness." Three ex-judges to my knowledge received the benefits of this gracious call.

One of the most common mistakes of the public is to suppose it is only a system of doctoring. Said a physician who had occasion to look into it, "Why, it is not doctoring; it is Christianity." Equally erroneous is it to suppose it is only "a system of religion." It is religion itself.

Conversing with a very intelligent young lady one day on this subject, I said, "As Christian people, is not our daily prayer 'Our Father which art in Heaven, . . . Thy Kingdom come'"? "Yes," she replied; "but we should be awfully surprised if it did come."

This is the trouble with us all. "God—Good—is not in all our thoughts," hence we deprive ourselves of the benefits and blessings which a true knowledge of God brings.

Christian Science is founded on the fact that God is what the Scriptures declare Him to be—omniscient, omnipotent, and omnipresent Love. Jesus demonstrated this fact for the benefit of all mankind, and said, "He that believeth on me, the works that I do shall he do also; . . . I speak not of myself: but the Father that dwelleth in me, He doeth the works." This great truth has been demonstrated in the healing and reformation of hundreds of thousands.

Christian Scientists claim no special "gifts." It is the open fount of Love at which all may drink and be satisfied. In proportion as we become Christ-like, the works follow as a natural sequence.

Take up thy cross, the Saviour said,
If thou would'st my disciple be;
Deny thyself, the world forsake,
And humbly follow after me.

"Now if any man have not the Spirit of Christ, he is none of his. . . . For to be carnally minded is death; but to be spiritually minded is life and peace."

I was not sent to DuBois, as the article might lead the public to suppose, nor do I expect to open the work here. But I do hope the dear hungry and thirsty ones will turn to this ever-present and all-potent fountain of Love, and they will find in it a remedy for every woe.

RICHARD SMITH, C.S.B.

From the Morning Courier, DuBois, Pa.

If.

If men would cease to worry
And women cease to sigh,
Doctors would have to plod afoot
Instead of riding by.

If neighbor spoke to neighbor
As Love demands of all,
Then lawyers would make kindling of
Their shingles on the wall.—Selected.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, C.S.D., Editor. — CAMILLA HANNA, C.S.D., Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.
Ten copies or more to one address, one year, each copy, ninety cents.
Twenty-five copies or more to one address, one year, each copy, eighty cents.
Fifty copies or more to one address, one year, each copy, seventy-five cents.
Foreign subscriptions, one year, each copy, $1.50.
Six month's subscriptions received at half the above rates.

TERMS OF SALE.

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, $1.50.

Entered as second-class matter.

Another Falsehood Refuted.

THERE has been of late such an onslaught upon Christian Science on the part of many members of the Orthodox clergy, that if we were disposed to answer them all we should not be able to do so for want of time and space. We do not care, as a rule, to notice them. Occasionally, however, there comes to us one of so extraordinary a character that we feel called upon to pay some attention to it. Such an one is the sermon recently preached by the Rev. W. A. Bartlett, of Bristol, N. H., as it comes to us, by editorial comment, in the Bristol (N. H.) Enterprise of a recent date.

Inasmuch as the editorial assumes to quote literally from the sermon, we take it for granted that it is a correct quotation, so far as it goes.

We will notice the latter part of the quotation first. Referring to Christian Science it has this to say, presumably of the Rev. Mary Baker Eddy:—

"The woman who stands at the head of this movement, permits herself to be worshiped as a deity, and within a few days has accepted the title of Christ."

What authority the reverend gentleman had for making this assertion does not appear. The same silly slander has recently been repeated in other Orthodox pulpits.

The Rev. Mary Baker Eddy and all the adherents of her teaching, can better afford to be the objects of such malicious attacks, than can those proclaiming them afford to be the authors or repeaters thereof. We believe it to be in strict accord with the teaching of Scripture and with divine law, that every falsehood uttered will sooner or later, and in some form, revert upon the author and utterer of the same.

We notice this utterance of the Rev. Mr. Bartlett, not for any personal reasons, but for the purpose of protecting those who may be innocently misled and deceived by such falsehoods. It is not our province to undertake to control unruly and slanderous tongues. Fortunately, there is a higher law, a higher power in control.

By way of refutation of this falsehood, wherever, whenever, and by whomsoever uttered, we herewith republish a letter written by Mrs. Eddy to the New York World, and published in that newspaper, February 1, 1895. It is as follows:—

CONCORD, N. H., Feb. 1, 1895.

A dispatch is given to me, calling for an interview to answer for myself, Am I the second Christ?

Even the question shocks me. What I am is for God to declare in his infinite mercy. As it is, I claim nothing more than what I am, the Discoverer and Founder of Christian Science, and the blessing it has been to mankind which eternity enfolds.

My books and teachings maintain but one conclusion and statement of the Christ and the deification of mortals.

Christ is individual, and one with God, in the sense of divine Principle and its compound divine idea.

There never was, is not now, and never can be, but one God, one Christ, one Jesus of Nazareth. Whoever in any age expresses most of the spirit of Truth and Love, the Principle of God's Idea, has most of the spirit of Christ, of that Mind which was in Christ Jesus.

If Christian Scientists find in my writings, teachings, and example a greater degree of this spirit than in others, they can justly declare it. But to think or speak of me in any manner as a Christ is sacrilegious. Such a statement would not only be false, but the absolute antipode of Christian Science, and would savor more of heathenism than of my doctrines.

MARY BAKER EDDY.

Mrs. Eddy has never in the slightest degree unsaid a single word of the above.

In her book entitled "Miscellaneous Writings," which has taken its place among her standard works, Mrs. Eddy thus speaks of the worship of personality:—

"Christian Scientists should beware of unseen snares, and adhere to the divine Principle and rules for demonstration. They must guard against the deification of finite personality. Every human thought must turn instinctively to the divine Mind as its sole centre and Intelligence. Until this be done, man will never be found harmonious and immortal.

"Whosoever looks to me personally for his health or holiness, mistakes. He that by reason of human love or of hatred or any other cause clings to my material personality, greatly errs, stops his own progress, and loses the path to health, happiness, and heaven. The Scriptures and Christian Science reveal the Way, and personal revelators will take their proper place in history, but will not be deified." (P. 307, 29th ed.)

Repeatedly in her other writings Mrs. Eddy has refuted such assertions as those uttered by Mr. Bartlett. It is to be hoped that those assuming to be preachers of truth and righteousness and justice and love, will some time learn better to discharge their sacred duties than to stand in their pulpits and malign a lovely Christian woman, who is devoting her whole life to the upbuilding of the Christianity taught and practised by Jesus of Nazareth, and whose whole purpose is to do, and teach others to do, the works that he did. These works he taught should be done through future revelation in even greater measure than he had done them.

There are many thousands of intelligent, thinking, earnest, Christian people who are as absolutely convinced that the revelation which Jesus prophesied has come to this age through the ministrations of the Rev. Mary Baker Eddy, as they believe in the verity of the universe. This conviction comes from their own inner consciousness, from the fact that in their own experience they have been enabled in part to prove the truth of her teaching and ministrations. They have evidence that can never be taken from them nor removed from their consciousness. It is as conclusive in their experience as is the fact that they themselves exist, and they are deeply and sacredly in earnest in their views and in their works.

We notice just one other point in this sermon. The reverend gentleman says,—

"If these healers claim to have power direct from Almighty God, they must be able to cure every time, or they will be pronounced frauds."

This is a bold statement. Suppose Christian Scientists were to retaliate in kind, and say to the gentlemen of the pulpit, "If these preachers claim to have power direct from

Digitized by Google

Almighty God to save sinners, they must be able to save the sinner every time, or they will be pronounced frauds." What answer would they be able to make? How many sinners in their experience have they labored with to convert, who have not responded to their efforts? What percentage do they succeed in converting? And yet they claim their authority, do they not, from Almighty God? Is there not as much reason and justice in submitting this query to the clergy, as is embraced in the pulpit query above quoted?

The truth is, that if it were not for the bitter and unreasoning opposition of those who misunderstand and misinterpret the teachings and mission of Christian Science, the percentage of failure to heal cases of disease would be vastly less than it now is. In view of the prevailing opposition the percentage of success is marvelously great, especially when we consider the fact,—of which we so often have occasion to remind the outside world,—that the great majority of cases coming under the ministrations of Christian Scientists have been pronounced hopeless by the so-called regular curers of sickness.

It is not a pleasure, but a pain, to us, thus to hold the Rev. Mr. Bartlett as a falsifier before the many thousands of people who will read this article. The duty is laid upon us by his own folly. He lives almost a neighbor to Mrs. Eddy, and could, at little pains, have ascertained the truth of this matter. He preferred rather to stand in his pulpit and give out the falsehood as a solemn truth. How long can these members of the clergy expect the people to repose confidence in their word in face of such exhibitions?

Mr. Norton's Reference to Mrs. Eddy.

MR. NORTON concluded his lecture at Carnegie Hall, Pittsburg, Pa., with the following beautiful and truthful reference to the Rev. Mary Baker Eddy:—

The Founder of Christian Science recently stated in a published interview that its adherents number more than six hundred thousand believers. The magnitude of the work of the system, its healing, reformation, and widespread influence upon the thought of the present era, demand that its tenets be soberly investigated. To its Discoverer and Founder the race owes everlasting gratitude. Hundreds of thousands, long bound by chains of suffering and error, now call her career blessed and her mission to humanity divinely ordered. She discourages personal homage. Her strongest characteristic is lofty scorn for mere personal regard or any approach towards hero worship. She is liberal, consistent, and unselfish. As a friend she is constant; as a religious teacher, faithful and untiring; as a philanthropist, liberal and wise, giving in private and public charities large instalments of her time and money. As a Mother in Israel, tender, compassionate, forgiving. As a Reformer, courageous, with prophetic vision of a rare order. As an American woman, patriotic and democratic, yet it can be said of her that "the world is her country—to do good her religion." She stands as she always has done, the friend of the oppressed and downtrodden. Works, not professions, crown her years of toil, and willing thousands, with dignified gratitude, love to call her by the endearing term of Mother, for she has interpreted to a needy world the nature of the divine Maternity, yea, a Father and a Mother God.

Lecture in the Mother Church.

AT the regular Wednesday evening meeting, January 25, 1899, held in the Mother Church in Boston, Rev. Wm. P. McKenzie, C.S.B., delivered an able, helpful, and unusually thoughtful lecture, entitled, "The Health-Giving Theology of Christian Science." Although no previous notice whatever had been given, the auditorium was filled to its utmost capacity, standing as well as sitting room. That the lecture was deeply appreciated goes without saying.

A Correction.

In setting forth the list of places represented by applicants before the Board of Education we unintentionally omitted St. Paul, Minn. The fact is, St. Paul was represented, although, because of the proximity of Minneapolis to St. Paul, where there are several already authorized to teach Christian Science, and in view of the many demands from places more remote from teachers, it did not seem possible for the Board to award a teacher to St. Paul at this time. We regret the oversight, but feel sure that this correction will make all things right.

The establishment of branch churches in some of Boston's more immediate suburbs is another advance movement. The initiatory services have been most successful and encouraging. Expansion is manifestly the order of the day.

Questions and Answers.

What do Christian Scientists mean when they say there is no sin?

Absolutely speaking, they mean just what they say. They do not mean, however, that sin does not exist as a human law and human belief, nor do they mean that mortals, as long as they are under the dominion of sin, are not sinners. As long as they believe in sin and give it power, mortals are sinners. Christian Scientists mean by the unreality of sin that where Good prevails no evil exists. To the extent that Good obtains in human consciousness evil or sin is ruled out therefrom. If the belief in sin predominates in the consciousness of the individual, he is more the servant of sin than of righteousness. If righteousness has the preponderance, he is more a righteous person than a sinner. If a man is less a sinner this year than he was last, he has to that extent overcome sin, and to the extent that he has overcome it he has proved its unreality to himself.

Let us suppose a community of persons, each of whom has so far destroyed for himself the belief that sin has power over him, that he is more the servant of righteousness than of sin. What would be the aggregate consciousness of that community? More righteous than sinful, would it not? If we can go thus far in our supposition, may we not legitimately go farther and suppose a community whose aggregate consciousness is entirely free from sin? In that community then, surely sin would not be real, for it would have no existence.

Now, a community that would submit itself absolutely to the teachings of Jesus Christ, working out their salvation according thereto, would sooner or later become a sinless community; but the community, of course, would become sinless only as each individual thereof had overcome sin in himself. If sin were real in the sense that it constitutes a part of God's divine plan, it never could be overcome, for it would be eternal and indestructible.

Do Christian Scientists believe in punishment for sin?

Most emphatically. The sinner will be punished in due proportion for all his sins. As long as he continues to sin, the punishment will continue. If sin were a part of God's plan and therefore eternal, and the sinner never ceased sinning, his punishment would be eternal; but sin not being part of God's divine plan, sooner or later it must be destroyed in each human consciousness. As mortals awaken to the fact that there is no pleasure in sin, but that it brings certain punishment, they will turn from it; and the only way to overcome sin is to cease sinning. Jesus came to teach mortals how to overcome sin. Had sin been a part of the divine plan, and in that sense real, he would have been violating, instead of fulfilling, God's law, and would not therefore have

Digitized by Google

been "about his Father's business," as he so often declared himself to be.

When the "last farthing" shall have been paid,—that is, when the last sin shall have been overcome by the individual,—the "eternal punishment" for sin will have ceased. Christian Scientists construe the word "everlasting," as used in Scripture, in its strict sense,—that it is age-abiding. When the age of sin ceases in each individual, the "everlasting punishment" will cease.

Do Christian Scientists believe the Scriptures to be inspired?

Whatever is dictated of Good is inspiration. To the extent that Good, or God, is reflected, either in words spoken or written, or in deeds, the person reflecting the same is inspired. The Biblical writers, as a whole, wrote from a high standpoint of spiritual perception, and were inspired in proportion. Their prophetic utterances were divinely inspired, as shown by the fulfilment thereof. God spoke through them of the past, the present, and the future, by virtue of their spiritual understanding. So it has been in all ages. So it is in this age. Spiritually interpreted, therefore, the Scriptures are inspired.

The Lectures.

At Fort Wayne, Ind.

Seldom does the Temple hold a larger audience than assembled January 20, to listen to an exposition of Christian Science from the lips of Mrs. Annie M. Knott of Detroit, a practitioner of this healing process. The audience was attentive from start to finish, and was metaphorically at the feet of the teacher and willing learners of her doctrine. Many of the ministers of the city were present, and not a few of the medical fraternity, who listened with intent ear and with all the respect due a modest, clear-spoken woman. If any had an idea the theories of the speaker would be subjected to the fire of cross-examination by some stalwart practitioner like Dr. Myers, they were disappointed. Dr. Myers was present, and to all appearances enjoyed the disquisition on Christian Science.

Mrs. Knott's treatment of the subject did not differ materially from the usual one based on the proposition that disease is of the carnal mind—is not an entity, and is contrary to divine Will.

Mrs. Knott said she was led to become a believer in the Christian Science doctrine through the recovery of her own child, a boy, who had swallowed carbolic acid by accident and was given up to die by the regular physicians. Christian Science neighbors, however, brought to bear the Truth, as they teach it, upon the child and herself, and whereas the boy had not been able to take nourishment when abandoned to die by the physicians, she was rejoiced and amazed to find the lad, in the course of a few hours, eating an apple. The lecturer closed her discourse with a poetical quotation in the strain of her argument, and a deep silence was maintained by the audience. It was apparent that her quiet conversational manner had not failed to impress the audience with her own mood, and applause would have seemed strained. It was not to be supposed, however, that the audience was not pleased, for all wore a thoughtful look. The address was undoubtedly and distinctly educational in its influence.

Fort Wayne Gazette.

At Arkansas City, Kansas.

The lecture given last night at the Opera House by Alfred Farlow upon the subject "Christianity made more Practical through Christian Science," was well received by a large audience. Rev. William Bird Shaw introduced the speaker in his usual happy manner. Mr. Farlow is a pleasant speaker, and this, together with his easy flow of language and good reasoning ability, pleases the attentive listener. He quoted largely from the Bible to prove his doctrine was the correct one, and the quotations made his arguments strong.

We are sure every one present learned much of the Christian Science doctrine they had never known before, and the arguments that can be produced in its favor. Mr. Farlow was for twelve years under the direct instruction of Mrs. Eddy, the head of the Church, and is thoroughly posted in their faith, and will doubtless strengthen the Church wherever he lectures.

The above clipping from the Arkansas City (Kan.) Daily Traveler of January 11, 1899, only expresses the value of Mr. Farlow's lecture to those not interested in Science. Those who realize the power of the "still small voice" will continue to see the good effects from the lecture for all time. The earnestness and understanding with which Mr. Farlow presented his subject was such as not only to remove many false impressions, but to cause those who were previously antagonistic to Science to inquire into it, and to accept what they previously ridiculed.

Mrs. Rosa Upton, Arkansas City, Kan.

At Pittsburg, Pa.

At the Pittsburg Carnegie Music Hall last evening a lecture was delivered by Carol Norton, of New York, member of the Board of Lectureship of the Mother Church of Christian Science, in Boston, Mass. The speaker took up the subject of Christian Science, starting with its religious basis, treating of its wonderful growth, its legal aspects and responsibilities, and citing instances of its power in healing. He touched on the famous "Harold Frederic case" and gave copious extracts from the opinions of eminent jurists and physicians. In conclusion he gave a brief account of the life and work of Mary Baker G. Eddy, Founder of Christian Science. The lecture was free, and was listened to by an audience numbering about fifteen hundred. Included among the auditors were a number of Protestant clergymen and several Catholic priests. It was in the strictest sense a cosmopolitan gathering. Mr. Norton was presented to the audience by Mrs. Lida Fitzpatrick, of Cleveland, in a few appropriate words, telling the story of his conversion to the Christian Science belief nine years ago. C. H. Miller, of Howe, Brown & Co., this city, also appeared on the stage with Mr. Norton and Mrs. Fitzpatrick, and at the close of Mr. Norton's talk, at the latter's request, told of the services that are conducted each Sunday in the Christian Science Church of Pittsburg. At the close of Mr. Norton's talk an impromptu reception was tendered him.

The Pittsburg Times.

At Galesburg, Ill.

An interested assemblage filled the Auditorium on the night of January 16, to hear Edward A. Kimball of Chicago lecture upon the principles and practice of Christian Science. For nearly two hours Mr. Kimball held his large audience with his plain but pointed discourse. To many he brought a new message, to others an old one in most attractive form.

The gathering was truly democratic in character. All classes and conditions of men were represented, and listened with the same interest. There were no ticket takers or reserved seats. It was free to all, and first come was first served. There were a number of leading physicians, prominent business men, people from the masses and classes alike. It was in itself a most interesting commingling of human elements.

Promptly at eight o'clock P. M. Johnson presented Mr. Kimball to his audience. Mr. Kimball is a prominent member of the Chicago Church of Christ, Scientist. He is a gentleman of fine presence and evident culture. He spoke without notes and without any attempt at oratorical effect;

Digitized by Google

holding his hearers throughout his address without difficulty.—Galesburg (Ill.) Evening Mail.

At Fort Dodge, Iowa.

A good sized audience occupied the Opera House Monday evening, December 16, 1898, drawn there by the announcement of a lecture on Christian Science by Edward A. Kimball of Chicago. This gentleman is one of the number of lecturers now employed in spreading the faith of the order throughout the country, and proved to be a speaker of much ability, his discourse being earnest, thoughtful, and well expressed. Rev. H. D. Wiard introduced the speaker in a few words, complimentary to the speaker, and to Fort Dodge people as a class who sought the Truth in a liberal and broad-minded spirit. He disclaimed being able to accept the views held by the speaker, but anticipated with pleasure their presentation.

Mr. Kimball, whose appearance is that of an unusually healthy individual, prefaced his remarks by the solemn declaration that if it were not for Christian Science he would long since have been dead. He had been afflicted with a sickness which his physicians declared was mortal, but by Christian Science mind-healing he had been restored to health, and thus had been led to dedicate his services to the spreading of the faith.

Fort Dodge (Iowa) Evening Messenger.

At Waterbury, Conn.

January 19,—the first anniversary of the organization of First Church of Christ, Scientist, in Waterbury, Conn.,—about four hundred persons gathered in Leavenworth Hall to listen to the lecture on Christian Science by the Rev. Irving C. Tomlinson of Boston. The lecturer was introduced by Judge Cowell, a man standing high in the esteem of the entire community. The audience listened very attentively to every word of the speaker and the fruits of the lecture are already in evidence. One daily published the lecture in full, another a long abstract, and all showed great consideration in running notices of the event. A large number of the Christian Science Weeklies were carried home by the audience, and an extra issue of seven hundred copies of the daily containing the lecture was exhausted. All are greatly pleased with the success of the demonstration. This Church organized with five members, has twelve at present with an average attendance of about thirty-five. The amount demonstrated for the lecture was $117.50. There is a balance left.—Leon I. Wood.

At Pittsburg, Pa.

The attendance at the lecture on Christian Science in Carnegie Music Hall, Pittsburg, last evening (January 16), was a surprise to those who did not realize how many persons in Pittsburg are interested in this subject.

The Scientists have a Church of ninety-eight members in this city, and a building fund has already been started. The church will probably be erected shortly in the East End, a suitable site being now sought. Among the members of the Church of Christian Science are many prominent women of the city. A few of these are Mrs. William Moorhead, Mrs. David Oliver, Mrs. C. L. Magee, Mrs. J. B. Washington, Mrs. George Darr, Mrs. David Semple, Mrs. Stewart, Mrs. Warwick, Mrs. John Liggett, Mrs. DeWitt Dilworth, Mrs. George Sheppard.—Pittsburg (Pa.) Press.

At Fort Wayne, Ind.

The Masonic Temple was crowded to the doors last night, January 19, with persons who responded to the invitation to hear Mrs. A. M. Knott, C.S.D., of Detroit, explain the principles and doctrines of Christian Science. The crowd was so large that many persons were compelled to stand.

Mrs. Knott was introduced by Mr. Wood, and at once commenced her address. The lecturer has a charming stage presence, and spoke in a clear, strong voice, which was plainly audible to every one in the large auditorium.

Fort Wayne (Ind.) News.

At Junction City, Kan.

Alfred Farlow, C.S.D., delivered a lecture here December 6, 1898. His subject was "Christianity made more Practical through Christian Science," and his apt, clear, and logical manner of presenting it to the public made a good impression and disarmed much prejudice. Those who heard the lecture were greatly pleased, while those who failed to hear it now regret their absence.

From One in the Cause of Truth.

At Oakland, Cal.

Dr. F. J. Fluno delivered a lecture upon "The Mission of Christian Science" at Hamilton Hall Wednesday evening, January 11.—Oakland (Cal.) Enquirer.

What there is in Christian Science.

Note.—This department is conducted by a member of the First Church of Christ, Scientist, Denver.

It is a well-known fact that Christian Scientists, as a class, are the healthiest and happiest people of this age. Yet doctors, preachers, and prejudiced opponents say that Christian Scientists are crazy fanatics. If this be fanaticism, then fanaticism is just what the world most needs.

Why are Christian Scientists so uniformly healthy and happy, and why are so many others who lead, to the best of their ability, moral lives, and have the best of food and all the comforts supposed to be essential to healthful existence, sickly and miserable? Because Christian Scientists realize the important influence of thought on health, and others do not.

To show in a conspicuous manner the advantage one has in his daily battle with fear, when he has some understanding of Christian Science to lean upon, let us take a day out of the lives of two business men and contrast them. We shall suppose that both have about the same conditions to meet, the only important difference in their experience being that one is a non-believer in Christian Science and the other is a sincere believer.

The non-Scientist is about as superstitious about disease as a colored "Auntie" is about "hants." As every noise of a mouse gnawing under the floor, to "Old Auntie" is a "hant," so the average man honors every draft made upon his credulity in regard to disease. As "Old Auntie" seeks to protect herself against "hants" by wearing a rabbit's foot in her bosom to break the spell, so the average man tries to charm away disease by swallowing drugs.

The Christian Scientist refuses to be mesmerized by the thought of disease, whether he finds it in the newspapers, hears it voiced by others, or whether it comes unbidden in his own consciousness. He holds firmly to the realization that if he can shut disease out of his thought, it will not be manifested on his body, and so he is more careful to deny suggestions of disease, than he would be to deny an accusation against his character. He has learned that it is not nearly so harmful to call a man a liar as it is to accuse him of being sick.

When people study their Bibles more closely and learn that sickness is simply the physical manifestation of sin in thought, they will not be continually talking about their diseases, and they will not be so much gratified when friends sympathize with them and comment on their long endurance for sickness. It will finally be recognized that it is not any more creditable to endure sickness for years than it is to endure drunkenness or lust for years, without trying to cure

Digitized by Google

it in the only right way—the way which Jesus practised and taught, and which is being practised and taught in this age as Christian Science.

EDITOR CHRISTIAN SCIENCE DEPARTMENT.

❦❦❦

Non-Scientist.

Wakes up feeling dizzy. Dresses in the cold bedroom and begins to sneeze. Thinks about the grip and wonders if this sneeze is the beginning of it. Hastens with his toilet and breaks a shoestring. Loses control of his temper. Takes a powder to cure the dizziness and wonders whether he hadn't better take something to ward off the grip.

Attempts to shave. Cuts himself. Outbursts of temper.

Arrives in the dining-room in an impatient mood. Frowns at his wife and maintains a sulky silence. Wife says, "John, look at the blood on your face, how in the world did you do that?" John replies gruffly. Wife feels hurt. John feels ashamed and would apologize, but wife says something that makes him provoked, so he picks up the morning paper. Reads about the smallpox and how many thousand people were vaccinated the day before. Reflects that he has not been vaccinated for ten years. Wonders whether he will catch the smallpox. Decides to stop at his doctor's office and get vaccinated.

Sneezes again. Wife says, "Why don't you take something for that cold. First thing you know you'll be down with the grip." Asks his wife what is good for the grip. Says she doesn't know, but quinine is good for most everything like that. Will he take some if she gets it? Yes. Takes ten grains. Tells his wife about smallpox, and advises her to have Tommy vaccinated. Starts down town, leaving wife worried about his cold and the prospect of Tommy catching the smallpox.

Continues reading newspaper on the street car. Sees an account of the death of three doctors caused by the grip. Sees an account of the failure of a bank at C., one of the towns where heavy obligations are due him. Wonders if any of his customers were caught. Stops reading. Man across the way relating his wife's experience with the grip, telling about the terrible after effects. Man back of him telling about an acquaintance who had been taken sick with smallpox. Man in front of him insisting that no child of his should ever be vaccinated, because he knew of a case where the arm was so badly poisoned that it had to be cut off.

Signals the car to stop. As he steps off notices a bicycle at hand. Dances from side to side and drops his hat in the mud. Bicyclist glides on by. Calls on his doctor. Doctor is letting a patient go. Hears doctor tell the patient that he cannot live through the winter and spring. Inquires about the patient. Is told that he had the grip once and it developed into consumption. While the doctor is getting ready to vaccinate him, swallows five grains more of quinine. Has a ringing in his ears and a dull headache. Thinks he must be getting the grip. Is vaccinated. Doctor warns him not to take cold.

Gets into the cold air and sneezes. Thinks about his arm. Gets to the office. Calls for Bradstreet's bulletin to find out about the failure of the bank at C. Sends for a special report, but cannot get definite information concerning his customers. Worries about the failure, the grip, smallpox, and vaccination all the time. Gets anxious to strengthen himself by collecting as much cash as he can, in view of possible loss. Dictates blunt letters to some of his best customers, who always pay satisfactorily, but who are a little slow this month.

Acquaintances tell him he is not looking well to-day. Says he doesn't feel well. Smokes hard. Takes another quinine capsule. Looks at his arm and finds it inflamed. Thinks about what the doctor said and sneezes again. Begins to feel flushed and sore. Tries to keep down his fears, but the harder he tries the higher his fever becomes.

Finally gives up and goes home in a cab. Continues to get worse. Arm swells up and looks very bad. Tommy has been vaccinated and his arm is swollen, too. John and his wife are both scared. Is confined to the house for a week. Gradually pulls through, after taking much nauseating medicine. Gets word that his customers at C. were not affected by the bank failure, and that the customers he sent the curt duns to have forwarded drafts and two have countermanded large orders because his letters offended them.

After a week's absence drags himself to the office and says he has just had an awful siege of the grip and now his wife has got it.

❦❦❦

Scientist.

Wakes up feeling dizzy. Refuses to concur in the report of the senses. Silently treats himself, declaring that matter has no sensation and cannot be dizzy, and that man is the image and likeness of God, reflecting health. Feels better. Begins to sneeze. Declares silently that he has no desire to sneeze and that his body, being unintelligent matter, cannot sneeze of its own volition. Quits sneezing. Thinks about the grip. Declares that sickness is caused by discordant thoughts; that disease is not contagious unless it is allowed to take root in thought. Declares that "in perfect Love there is no fear." Dismisses his fears of the grip.

Shaves himself smoothly. Thinks about the eternal harmony of God's perfect creation, and gets through shaving without being really conscious that the razor was on his face.

Arrives at the breakfast-table feeling refreshed and in a good humor. Comments on the fresh appearance of the roses he brought home the evening before, and compliments his wife on her success with the biscuits. Wife asks John to go with her that evening to a musical at the house of an old friend. John frowns and says testily, "I hate amateur music, and I don't like the people we meet on such occasions. Dear, you are always making engagements of that sort. Why can't we stay at home?" Wife frames a sharp reply, but closes her lips and silently declares that she has no selfish pride to be hurt. Wife says, "We need not go, then, John." John says, "Pardon me, dear, for being cross. I forgot." Wife answers with a smile.

John picks up the morning paper. Reads about the smallpox and vaccination. Suggests to wife that both had better take up the thought of contagion and destroy their fear of it. Wife asks what had better be done about Tommy if the school authorities insist upon vaccinating him. John says, "Don't worry about it. We will realize that God—Good—is the only authority, and that we shall not doubt that He will show us how to meet every problem." Wife feels satisfied and cheerful, and sits down to read the chapter on "Contagion" in "Miscellaneous Writings," by Mary Baker G. Eddy.

John leaves the house and takes the car. Resumes reading the paper. Comes to the item about the three doctors dying with the grip. Declares that the real man is spiritual and not material; that he reflects all the qualities of God, who is his life, and that therefore there is no death; that Jesus overcame death and bade all who should believe his teachings to be doing his works, assuring them that they should be able to do even greater works than he had done.

Reads account of bank failure at C. Thinks about his outstanding accounts there. Realizes that anxiety is a manifestation of fear, and declares that "Perfect Love casteth out fear." Puts the subject out of consciousness.

Man across the aisle is telling about the after effects of the grip. John declares that Mind is the only cause, and that every effect is a phenomenon of consciousness and not of matter. Denies that the thought of the grip can take hold of him. Man back of him telling about the smallpox. Denies fear and declares that God is omnipotent Good and

Digitized by Google

governs all; that God never created the smallpox, and that man, governed by Good, cannot have the smallpox. Man in the next seat ahead telling about vaccine poisoning. Scientist denies that matter has any power to kill; that man is spiritual and cannot be poisoned. Takes a copy of Science and Health out of his pocket and reads in it until he leaves the car. Feels calm and perfectly free from fear.

Sees a bicycle coming. Denies fear and quietly stands still and lets it pass.

Gets to his office. Looks up the bulletin of the previous day's failures. Studies the report of the bank failure closely and sees nothing to arouse fear. To be certain, he sends telegrams to his customers at C. frankly asking if they were involved. He has always dealt with them honestly and in the spirit of good will, and so does not hesitate to ask them. They reply that they were not caught.

Acquaintances talk to him, and seeing him smiling and happy instead of scared and glum, remark how well he is looking. Says he generally feels well. Tells them how he keeps well by governing his life in accordance with Christian Science rules of harmony. A good deal has been said during the morning about the grip and smallpox. He begins to feel hot and queer.. Gives himself a silent treatment for fear, and feels well again.

After a very harmonious, profitable day at the office, where he has had the opportunity of telling several inquirers about the blessings of Christian Science, he goes home and finds his wife ready to receive him with a happy smile, telling him how peacefully she spent the day, and how her heart was full of gratitude for having been able to heal Tommy of a bad spell of fever in less than twenty minutes by reading to him from Science and Health, and both rejoice that they are one in mind and heart, striving to be disciples of Christ.

Denver Republican.

Failures in the Practice.

It is often asked why Christian Scientists are not successful in every case, if their system of healing be divine and therefore infallible. The fact that patients do pass away while under Christian Science treatment is accepted by many as proof positive that the system is either a delusion or a cheat.

Protests such as the following are often voiced by critics: "I am told that Christian Science heals by the power of Christ and is divine. Disease is error, and so on. I deny absolutely such power. I assert most emphatically that there is no evidence of such a power being in existence. I do not believe it ever was. If it is now in existence, in use, it is divine, and therefore infallible. Any one possessing it should be able to avert every ill, but Christian Science patients die right along the same as others. If it be said that this is due to the Christian Scientists not having the full power, or the patient resisting, then the element of failure is admitted, and the divine method is fallible, the same as allopathic, homœopathic, or that late idea, the osteopathic."

Reasoning like this, if valid, would turn all knowledge, human or divine, topsy-turvy. Let us apply it in a few examples. A boy having submitted to him the problem, "What is the sum of two plus two?" answers, "Five." He has failed to prove the truth of the science of numbers, and through his mistake in demonstration the element of failure creeps in, and the science of numbers is no longer infallible.

It has long been generally accepted that music is a science, which, if properly understood and exactly adhered to, must give infallible results. But if its claim to infallibility depend upon the ability of any of the believers in it to prove it in practice, how will it fare? A schoolgirl believing unreservedly in the infallibility of the science of music, attempts to compose a symphony. The result is a riotous succession of notes that are natural enemies to each other, which, when translated into sound, drive listeners to distraction. Is this failure due to the ignorance of the girl? O, no; it is merely a proof that the science of music is fallible the same as *materia medica.*

Orthodox church people, even, make use of the same fallacious argument against Christian Science. Why not apply it to the current theory of spiritual redemption through Jesus Christ. "Is this theory, as taught in thousands of pulpits, divine?" "Yes." "If it is now in existence, in use, it is divine, and therefore infallible?" "Certainly." "Any one possessing (a knowledge of) it should be able to save all sinners within its reach?" "Certainly." "But ministers preach and pray, and sinners continue in their sins much as usual?" "It seems so." "Well, if it be said that this is due to the Christian not having the full power, or the sinner resisting, then the element of failure is admitted, and the divine method of redeeming sinners is fallible, the same as the material methods of healing the sick."

This style of argument is very elastic. It could be warranted to reduce all the arts and sciences to absurdity.

To return to the initial question, "Why are Christian Scientists not successful in every case?" Liszt wrote music for the piano which only he among the great pianists of his day could execute. His rivals heard him play in despairing wonder. It seemed technically impossible to play such pieces. If Rubenstein or Taussig had been asked why they could not play like Liszt, if they pretended to believe in the science of music, it might have been difficult for them to have explained, especially to one who knew nothing about the science of music or the art of piano-playing. Both, no doubt, would have declared that the science of music was not to blame, but that their lack of command of the art of piano-playing was at fault, and that this fault would be corrected when they gained a clearer understanding of the science of music. The science is infallible, but the art and the finite artist are fallible.

Christian Science is divine law, and is infallible. Christian Science healing is an art which becomes infallible only when practised in strict obedience to divine law. The human finite artist or Christian Science practitioner meets with failures until he thoroughly masters the healing art. There has never been but one master of this art, Jesus the Christ.

Denver Republican.

What Fears of Human Mind have to do with Contagion.

The following thoughtful article is taken from the Omaha World-Herald:—

The question is being asked on all sides, "What does Christian Science think of smallpox and vaccination?" And, "Is smallpox all imagination, too?" As many of these are honest and civil inquiries, they would seem to call for a civil explanation.

Under no circumstance does Christian Science depart from its well-established position that disease, of whatever name and nature, is a product of human fear, imaged forth on the body. As human fear is not a creator, its ghosts cannot be reasonably considered a part of creation, and therefore we say they are unreal. Most people misunderstand the scientific usage of the words "real" and "unreal." These words are used in an absolute and final sense, and not in the common colloquial sense. To speak of disease as an unreality simply means that it did not originate in divine Principle, the acknowledged source of all that is real and good.

The beginning of disease is darkness; it is in the general human ignorance of the operations of life, in the unseen or mental realm. A fear conjured up from the very nothingness, is given a name by the doctors, and an outline by fancy, and is thus built up into an awful mind-picture and arouses more fear. This gradually gains control of the thought and

Digitized by Google

soon manifests itself on the body, and shows itself in the form of fever, or eruption, or weakness, or any other symptoms that may be outlined by the doctors and other materialistic wiseacres. And no matter to what extent this disease is carried, it cannot disown its mental parentage, cannot rise above its source, and so can never be more than an unreality.

An epidemic comes about by flaunting the thought of disease before the public mind, and alarming the people with rash measures about vaccination and quarantines. Disease wants no greater assistance in its malevolent work than a few excited doctors to express their theories in a newspaper. The people pore over these stories about contagious disease, and fill their minds full of disease-thoughts. They think disease, talk disease, fear disease, and soon feel it too.

There could be an epidemic of toothache just as readily as of smallpox if the doctors and newspapers would start a theory and push it along a little ways till they got the people to worrying about it and talking it over, and the rest would be plain sailing for the epidemic.

The evidence, when viewed in this light, is so overwhelming to prove that contagion is wholly mental, that the microbe theory and contagion by exposure seem positively silly. All the evidence to prove material theories is swallowed up by the metaphysical theory, or fact—and in addition to this every other action in the universe demonstrates that all is mind.

Vaccination and material remedies are powerless of themselves, even as the strong arm of a Sandow could not lift a feather till bidden by mind; but because humanity blindly believes these beneficial, it satisfies their fears, and lessens their sense of disease; but it does not destroy the disease. It is very superficial to say that because a vaccinated man happens to escape the smallpox that it was the inherent power in the virus that saved him. The deeper view of it is the metaphysical view, which shows that the virus got its supposed power from the mind which applied it. For this reason vaccination is not rational, for it is one error casting out another error, and the stronger error afterwards occupies the field. It may lull to sleep the lion of disease, but it does not kill it by any means.

As may be readily seen, such a subject is too vast in scope to be thoroughly treated in a brief manner. But it may be said that when humanity comes fully to understand the metaphysical facts of creation, contagion and vaccination will be exploded theories, and health will be more "catching" than disease.

WALDO P. WARREN.

Doctors and Christian Science.

IN the Brooklyn Citizen of Sunday, January 22, 1899, appeared an article under the above head, containing the views of a physician and others upon the subject of Christian Science. Among the articles contributed was the following by Mr. Norman E. John, Second Reader in the First Church of Christ, Scientist, Brooklyn, which we take pleasure in republishing.

To the Editor of The Citizen:—

Dear Sir:—Gratefully accepting the courtesy of your columns, I desire to write briefly on the subject of Christian Science, which is rapidly becoming of universal interest. As a preface, permit me to state my early personal experience, which was sufficient proof until I gained by study and practice and by reason of irrefutable logic, reason, and demonstration the convincement of its divine origin and sanction, and the practical utility of Christian Science in ameliorating the sin and suffering of humanity.

My mother was afflicted with sunstroke in 1876, which doomed her in the years to follow to become a hopeless sufferer, the prostration affecting her spinal system, the specialists employed pronouncing her incurable.

The year 1888 found her still a bed-ridden sufferer, unable to lift her head from the pillow. At that time Christian Science was suggested, but we, like many to-day to their loss, refused to entertain it. Four years later found her the same helpless sufferer, my father a discouraged invalid, two sisters and myself physical wrecks from the care and anxiety of many years. Physicians were constantly employed, but were unable to cope with the inroads of disease, anxiety, and suffering. Once more Christian Science was brought to our notice, and this time we turned to it in our dire extremity as a last resort. By the help of Christian Science practitioners and the study of "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy, the text-book of Christian Science, one by one was healed, until the health of the family was completely restored, and for more than six years not a drop of medicine of any kind has been taken. During one of the brightest and hottest days in July, 1898, my mother accompanied me in a walk through Prospect Park, a test which was a remarkable contrast to the constant necessity of having her room darkened during her years of suffering. Thus through the practical operation of the demonstrable Principle of Christian Science the hopeless suffering and the unspeakable anxiety of one home has been transformed into a life of health, unbounded happiness and peace.

Christian Science needs must meet the test that all great truths and discoveries have encountered, the test of ridicule, scorn, and opposition through ignorance of its nature and beneficence. But, if true, no tide of ridicule or opposition can rise sufficiently high to drown it for "Truth (seemingly) crushed to earth will rise again." And if false it were useless to regard it—it would die for lack of support.

By its advocacy that man has a divine right to be well, free, and whole, Christian Science should and does appeal to the justice and common sense of humanity, for without the admission of the truth of this declaration, would it not be insincere to grasp at any and all of the means humanity has conceived of for relief from sickness and suffering? And if it be true that man has the divine right to be well, what system of material agencies has there been discovered or promulgated that has met the needs? What system is there now within the reach of a longing and suffering humanity that exposes the cause of disease and suffering and is thereby operative in destroying both the cause and effect of the misery with which humanity is burdened? Now, if granted that man has the divine right to be well and whole, and if no system or systems combined of material means has been discovered or formulated to meet the appalling presence of disease and suffering, ought we not to welcome and court investigation of a system whose Principle includes the embodiment of that Magna Charta regarding man's inalienable right to freedom from disease and suffering? "God speed the day for that discovery" should be our unceasing prayer. And to the Christian Scientist and the thousands who have experienced the healing proof that prayer is answered. Not through blind faith, but by the understanding of the practical principle which is proven by works.

Very truly yours,

NORMAN E. JOHN.

Churches Unite.

There is great rejoicing in the ranks of the Christian Scientists in our city over the acceptance by the Second Church of the invitation extended to it by the First Church to unite with them. This large addition to the membership of the First Church compels the securing of larger quarters for their meetings, and Linder's Hall has been decided upon until more suitable quarters can be secured. The importance of this step is fully appreciated by the adherents of this cause, and will be of untold good in upbuilding an organization that will manifest to the world the brotherly love and good will to man which is the result of the teachings of Christian Science.—The Evening Gazette, Burlington, Iowa.

Friendly Editorial Comment.

FROM the Pittsburg (Pa.) Daily News we republish the following thoughtful editorial:—

Christian Science.

It was a useful service which the believers in Christian Science rendered in fetching to this city Mr. Carol Norton, who lectured on their behalf in Carnegie Music Hall the evening of January 16. He is an authorized and responsible expounder of it; what he says must be accepted as a trustworthy description of the belief. No person of judgment ever for a moment takes the statement of an average member of a Catholic or Protestant Church as authoritative of its creed, because that involves a body of historical and other learning with which he is unacquainted, to say nothing of the accuracy in the use of words to which he has not been trained. No person of judgment will accept the statement of the average person as to what there is in our most familiar laws. The judge puts a very different face on them. So it is of any of the schools of medicine. We remember when Christian Science began to be talked about in this town, and very distinctly remember that it was jumbled up with faith cure and mind cure and the old mesmerism which the fathers recalled. The people who undertook to explain it off-hand did not know what they were talking about. It was useful to bring here a man who can speak by authority, who, through the studies of years, knows what he is expounding. He took the right course, being purely expository save when he halted a moment to give faith cure and mind cure a Roman thrust, and give the iron-headed Calvinists a resounding blow. At bottom Christian Science is a new creed; about that there can be neither if nor and, according to Mr. Norton's explicit teaching; it is fundamentally theological, being, as he was strenuous in asserting, a new interpretation of the divine; a distinct discovery of that which for ages had been covered up, of the method of the divine operation of healing. He comes not from the mother society nor the mother organization, but from the Mother Church, which is in Boston, or he represents that, as a member of its Board of Lectureship. It was wise in him, as he said, not to attempt to defend it, saying that it needs no defense, but to explain it, and his own confidence in it was testified to best by his self-restraint in the face of prejudices which he had unavoidably to encounter. He did not awaken antagonisms by any serious attacks; as to his blow at the Calvinists, they were delighted by it, because they are so used to that sort of thing that they would think themselves neglected and be unhappy without it. Now that the people of this town, who cared to, know what Christian Science is, let them answer it, if they do not believe in it, and not denounce it. Mr. Norton has set them an example. He gave reasons; let them give reasons, and then stop.

A Remarkable Movement.

The address of Carol Norton, at Carnegie Music Hall, on the evening of January 16, on Christian Science, calls attention to a remarkable latter-day movement which, by reason of its magnitude, its claims, and the high average intellectual rank of its devotees, commands consideration. It has forced itself to be taken into account among the attempts to solve the great mysteries of life and being, and its manifestations cannot be passed over by those who are seriously seeking light on these great questions. Its doctrines are so at variance with all our preconceived notions, both of physical and spiritual things, and there have been so many misconceptions ignorantly spread abroad concerning its true tenets, that it has been vigorously combatted, both by the religious and secular world; but it has made its way, nevertheless, and the figures given in the address of Mr. Norton as to the number of its adherents and of its accomplishments, will surprise those who have not sought accurate information concerning the movement.

It claims not to antagonize Christianity, but to give it a truer meaning; not to controvert the Scriptures, but to interpret more fully the message of the inspired writers and teachers. It claims not to antagonize science, but to bring to bear the very highest attainments of modern science in aid of the spiritual and physical welfare of man. It is attracting its adherents and believers, too, at a time of the highest intellectual development that the world has seen. Whatever we may think or believe, it is certainly a remarkable outcome of the culture and mental development of the end of the nineteenth century, and it is worthy of investigation either to detect the error which has led so many hundreds of thousands astray, or to find in it the long-forgotten truths of Christianity, which its Founder claims to have rediscovered, and which, it is claimed, are conferring so many blessings on the believers in them.—Editorial in Pittsburg Times.

The Holy Shadow.

TRANSLATED FROM THE FRENCH BY RUTH CRAFT.

IN response to repeated requests, we herewith publish the following beautiful little allegory. It was published some years since in the Journal.

Long, long ago, there lived a saint so good that the astonished angels came down from Heaven to see how a mortal could be so godly. He simply went about his daily life, diffusing virtue as the star diffuses light, and the flower perfume, without even being aware of it.

Two words summed up his day: he gave, he forgave. Yet these words never fell from his lips; they were expressed in his ready smile, in his kindness, forbearance, and charity.

The angels said to God, "O Lord, grant him the gift of miracles!"

God replied, "I consent; ask what he wishes."

So they said to the saint, "Should you like the touch of your hands to heal the sick?"

"No," answered the saint. "I would rather God should do that."

"Should you like to convert guilty souls, and bring back wandering hearts to the right path?"

"No, that is the mission of angels. I pray, I do not convert."

"Should you like to become a model of patience, attracting men by the lustre of your virtues, and thus glorifying God?"

"No," replied the saint; "if men should be attracted to me, they would become estranged from God. The Lord has other means of glorifying Himself."

"What do you desire, then?" cried the angels.

"What can I wish for?" asked the saint, smiling. "That God give me His grace; with that should I not have everything?"

But the angels insisted, "You must ask for a miracle, or one will be forced upon you."

"Very well," said the saint, "I ask that I may do a great deal of good without ever knowing it."

The angels were greatly perplexed. They took counsel together, and resolved upon the following plan: Every time the saint's shadow should fall behind him, or at either side, so that he could not see it, it should have the power to cure disease, soothe pain, and comfort sorrow.

And so it came to pass. When the saint walked along, his shadow thrown on the ground, on either side or behind him, made arid paths green, caused withered plants to bloom, gave clear water to dried up brooks, fresh color to pale little children, and joy to unhappy mothers.

But the saint simply went about his daily life, diffusing virtue as the star diffuses light, and the flower perfume, without ever being aware of it.

And the people, respecting his humility, followed him silently, never speaking to him about his miracles. Little by little they came even to forget his name, and called him only, "The Holy Shadow."

Digitized by Google

NOTE.—This article was handed me by an orthodox minister who has filled the pulpit for upwards of forty years, and he assures me that he has gained vastly more in spiritual uplifting in a few month's study of Science and Health, by Mary Baker Eddy, than he ever would in forty times forty years in the old way. You are at liberty to publish it if you desire. Sincerely, A. C. ZIEMER.

Is Christian Science from God?

BY REV. JOSIAH ZIMMERMAN.

The great Teacher, who came from Heaven to instruct the human family, gave us this short, unerring rule by which to test the good and the bad: "By their fruits ye shall know them." "A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit."

Now, what is the known, visible fruit of Christian Science? One of the most remarkable blessings conferred upon mankind is, *healing the sick without medicine.*

This is what Jesus himself did, and considered it a part of his mission. This he commanded the twelve apostles and the seventy disciples to do, as well as preach the gospel.

Now, it certainly is Christ-like to go about doing good and healing all that are "oppressed of the devil."

When the Jews said of the Saviour, "He hath a devil, and is mad; why hear ye him?" Others said, "These are not the words of him that hath a devil. Can a devil open the eyes of the blind?"

When the man who was born blind had received his sight he said, "Why herein is a marvelous thing, that ye know not from whence he is, and *yet* he hath opened mine eyes. . . . If this man were not of God, he could do nothing." So we may justly conclude that if Christian Scientists were not of God they could not heal the sick.

The devil or his agents never heal the sick. But God proclaims himself as the healer. "I am the Lord that healeth thee." He heals through human instrumentality, and if Christian Scientists were not His children he would not honor them by working through them.

Again: Another proof that Christian Science is from God is: *That it gives us enlarged and more spiritual conceptions of God.*

The Christian Scientist realizes that God is an omnipresent reality. Not a God in a far-off Heaven, but that he dwells among men *now*, and is their ever-present help in every time of need. This realization of His presence is a constant source of joy, and comfort, and power to them.

They demonstrate God's power and love to a certainty, whilst others hold it only by faith. There is a marked difference between believing and knowing.

Another proof that Christian Science is from God is: *That it gives us a correct and spiritual conception of man.*

The Bible says that man was created "in the image and likeness of God." Our material bodies cannot be a likeness or image of God. The real man is spiritual, and with this conviction of our real nature we are prepared for real, true communion with God. The material man cannot commune with a spiritual and immaterial God. The vine and the branches must have a similar nature to have a living union, so the spiritual man alone can be one with God.

Christian Scientists know much about silent communion with God, and they have the witness of the spirit that they are truly the children of God. This gives them grace to bear up under the reproaches of their fellow-men, and only moves them with pity towards those who ignorantly and maliciously misrepresent and malign them.

It seems that the doctrine of eternal punishment has not yet been officially relinquished by the Congregational Church. Recently, in Cambridge, Mass., a candidate for ordination to the ministry was rejected because he repudiated this dogma.

Miss Gould Saves a Life.

THE following is clipped from the news columns of the New York Times:—

An interesting story, in which Miss Helen Gould figures, came to light yesterday at St. John's Hospital, in Brooklyn. Albert Duncan, a young soldier in Company D, Second United States Infantry, was brought to the hospital October 3, suffering from fever. He gradually sank, and the hospital authorities became convinced that his death was only a question of time. They wrote to the young man's father, a farmer near Ashland, Ky., saying that if he would see his son alive he must come at once.

The farmer wrote back despondently that he had not money enough, but hoped to raise some and come to Brooklyn soon. Day after day passed by, and still the old father was unable to get money enough together to see his dying son. At last a Miss Andrews, a visitor at the hospital, wrote to Miss Gould asking her to investigate the case. As a result of her investigation, Miss Gould sent money to the Duncans, and the father, mother, and little sister of the soldier, an eight-year-old girl named Minnie, started for Brooklyn on the first train. They reached the city Tuesday night.

The young soldier was overcome with joy at the sight of his family. Within twenty-four hours he began to improve, and last night it was said that Duncan would recover. Miss Gould, starting out with the intention of helping the Duncans to see their son before he died, ended by saving his life.

And here is an editorial in the same paper:—

A correspondent who describes himself as "a daily reader of the Times who has been interested in your campaign against the Christian Scientists," takes us to task because we printed a story about a sick soldier who was supposed to be dying, but who began to get better as soon as his family reached his bedside. Our correspondent sees nothing but nonsense in the idea that a man suffering from fever could be favorably affected by the proximity of those he loved, and concludes by asserting that the line which headed our account of this episode—"Sight of his Family better than Medicine to a Sick Soldier"—was not in keeping with the implied negative in our "All the News that's Fit to Print." This, it seems to us, is most amazing and unreasonable criticism. The tale as told was true, for one thing, and the Times does not make harmony with its theories or beliefs the condition on which facts otherwise acceptable can obtain a place in its columns. But wherein were the facts in this case inharmonious with our views of Christian Science? Never, never, never did we deny the influence of the mind over the body, and never, never, never do we intend to do so. It is a matter of the commonest observation that loneliness and discouragement such as this soldier felt before his friends came decrease an invalid's chances of recovery, and equally well known is it that happiness and relief of anxiety are favorable to the regaining of health.

"Fear Not."

BY E. L. C.

As each receives the light of this glorious Truth of Christian Science and begins to demonstrate or prove it, the temptation often comes to look at things from the material point. How difficult seem the conditions to be met; how stubborn and tenacious the clinging to the material or the false, and with it comes the thought of our weakness or inability to meet and overcome them.

To such comes the helpful experience of Jehoshaphat, King of Judah, recorded in the twentieth chapter of Second Chronicles. The narrative is truly wonderful in the light of Christian Science and will bear much study.

Digitized by Google

Here is a great multitude of mortal beliefs, fear, pride, selfishness, stubbornness—coming against us to battle—to be destroyed. Mortal sense fears before them, but we set our face to seek the Lord and ask help of Him. Is not Jehoshaphat's prayer ours? "O Lord God of our fathers, art not thou God in heaven? and rulest not thou over all the kingdoms of the heathen? and in thine hand is there not power and might, so that none is able to withstand thee? . . . O our God, wilt thou not judge them? for we have no might against this great company that cometh against us; neither know we what to do; but our eyes are upon thee."

Then Truth answers, "Be not afraid nor dismayed by reason of this great multitude; for the battle is not yours, but God's, . . . Ye shall not need to fight in this battle: set yourselves, stand ye still, and see the salvation of the Lord with you: . . . fear not, nor be dismayed; . . . go out against them: for the Lord will be with you." It is to stand and know the allness of God, Good, and the nothingness of error —evil—with the song on our lips, "Praise the Lord; for his mercy endureth forever."

Then we too will see that there is nothing else to do—the demonstration is made; the claims of error can only destroy themselves and none shall escape. Then will come the "rest round about."

In the process of working out of the material into the spiritual, each is working from a different standpoint, no two natures or consciousness of thought being the same. Then it is not strange that we catch the different opinions of what Christian Science is or what constitutes a Christian Science life. Many a time there would have come to me confusion if I had not stopped my ears to the many voices and gone to the books—the Bible and the works of Mary Baker G. Eddy, the prophet of this age—where I heard only the Voice of Truth. This Voice so clear and sweet always helps me to know what is right to do. It says to me, "Love—love unselfishly, love truly, love everybody, love your enemies, love the good, the pure," and then will come through that love a sense of the divine Love that fulfils the law, that corrects and governs aright and meets our every need.

Moderation.

BY S. ACENIA PRICE.

"MODERATION is the silken chain that runs through all our virtues."

In "Miscellaneous Writings," our Leader says that "Wisdom in human action begins with what is nearest right under the circumstances, and thence achieves the absolute."

This article is designed to be a plea in behalf of lovers of art and nature. Wearied of a theology which teaches a revengeful God who tortures his children with eternal punishment for transgressing laws which are too contradictory to be obeyed, many weary searchers for truth turn their gaze toward the beautiful, as seen in art and nature. In "sylvan shades" and "peaceful solitudes" the struggling heart finds momentary rest. The artist seeks a realization of form, tone, and color. These are searchers for the perfect principle of things. Let us not hastily rebuke their sense of harmony.

Preceding my knowledge of Christian Science, my highest idea of harmony was that which was manifest to the senses material. I did not worship this sense of harmony, but it was a promise which made me long for the better reality. Contempt for the beauties as manifest in nature, was to me barbarism, lack of intelligence.

If I had read the article in "Miscellaneous Writings," p. 86, in answer to the question, "Is it correct to say of material objects that they are nothing and exist only in imagination?" I might have been saved the misunderstanding which resulted from my first impression of Christian Science. I thought all the beautiful and perfect things of life were being taken away to be replaced with I knew not what.

Jesus said that he came not to destroy the law, but to fulfil. He came to interpret the better Original of life's beauty and harmony. In "Miscellaneous Writings," p. 72, the paragraph answering "your heavenly Father knoweth that ye have need of all these things," explains this state of thought.

To say of the laws of art that have been established for ages that they are "nothingness," and to condemn the artist for his "materiality," while we are yet "babes in the Truth," some still struggling with physical diseases, is to go beyond our present understanding, and, like Peter, our impetuosity will be rebuked.

There have been radicals and extremists in every age who, however, have not proven their ability to rise superior to life's imperfections. Our Master knew letters, having never learned, but he was sufficient for these things.

The understanding of life's sweeter harmonies makes our work less laborious, but let us not try to dispose of the laws of art until we have fulfilled the intermediate steps, then we shall find that these laws are not destroyed but fulfilled.

Progress in Christian Science, as in anything else, demands order and peace, and let us not seek to climb the hill some other way.

A Lesson from a Plate-Glass Window.

BY A. I. C.

ONE evening as I walked thoughtfully along, revolving and considering the great "Truths of Being," I glanced up at a beautiful dwelling with immense plate-glass windows in every part. Quick came the comparison: even mortals are unconsciously seeking light (God's immutable Truth), for improvement and progression, are calling for and using more light, more transparencies in the homes (dwelling place of a belief of matter as substance). The number of openings called windows is constantly increasing, enlightening, cleansing, and beautifying the interior, until plants and foliage of various kinds can thrive in any part, and now the palm, the "symbol of victory," is considered an almost essential part of the furnishings.

Not long ago, a five by seven pane of glass was indeed a luxury, a wonderful discovery, a progressive step. Then back, farther back went thought to the formation of what is called glass, or transparency for light—to the tiny grains of sand, washed and rewashed by contact with or falling of water, separating from each tiny atom that which was not clear.

Then man takes the clear, clean sand, and after more purifying, it is put in contact with great heat, which fuses the tiny grains into one great transparent mass, and the greater the purifying process the clearer and more perfect the glass.

Quickly Truth brought the lesson home; the tiny grains of sand were likened unto our thoughts in mortal belief, which must be purified and cleansed by the washing of Spirit. As the housewife day by day uses freely the water to cleanse her home of every impurity and imperfection until every part shines clean and free from contact with any foreign nature, so pure and clean must every thought be before it can stand in the presence of God, else it would mar, discolor, make untrue the transparency through which God the Father would shine; the least little flaw would pervert the true idea of God's likeness. Should we murmur, then, when Truth uncovers an error in consciousness, and we seem to pass through trials and suffering? No; rather let us rejoice in the infinite mercy of the "Love Divine" which will admit naught but that which is holy.

This comparison brought out more clearly than ever before the passage, "But we all, with open face beholding as in a glass the glory of the Lord, are changed into the same image

Digitized by Google

from glory to glory, even as by the Spirit of the Lord." Until is brought to pass even this:—

"Behold, I shew you a mystery; We shall not all sleep, but we shall all be changed, In a moment, in the twinkling of an eye, at the last trump: for the trumpet shall sound, and the dead shall be raised incorruptible, and we shall be changed. . . . Then shall be brought to pass the saying that is written, Death is swallowed up in victory," for God is All-in-all.

Christian Science in the Practice of Dentistry.

BY CHARLES G. PEASE, M.D., D.D.S.

HAVING been a student in both the Allopathic and Homœopathic medical colleges, having studied in the dental colleges in New York and Philadelphia, having taught in the colleges of both professions, having been an active member of a large number of professional societies, a descendant of the Friends, educated in early life at the Friends' Seminary, later a member of the Methodist and Presbyterian Churches and actively interested in the missions and Christian Endeavor Society, and life Auxiliary Member of the Salvation Army, my investigation of Christian Science can be said to have been, though critical, without prejudice.

Accustomed to weighing evidence, and having been a close investigator and a broad and analytical thinker in the direction of my professions, I first approached Christian Science from the side of its spiritual teaching, which I absorbed readily, pursuing my investigation in this direction with interest, pleasure, profit, and uplifting. I then included in my investigation the practical application of the truth individually and in my practice of dentistry, which I now practise exclusively, and I have had beautiful and convincing demonstrations of the Truth,—some of them I shall never forget.

I can probably best express my present position by the statement that I have felt like one emancipated, and it is so. To launch out on the ocean of God's love, to understand in some measure the Science of Being, inaugurates a new era in one's experience, brings one into closer touch with the Master, and awakens a realization that the loving promises unto the children of God are all true, and that we can live in the experience of their fulfilment. When we arrive at this understanding do we not see that all is Infinite Mind—Spirit, and that there is no life, intelligence, or substance in matter, that God, Truth, Love is supreme?

The manifestation of the fruits of the Spirit is seen in the life and presence of those who are living in the Truth, and I was forced to exclaim on my introduction into the congregation of Christian Scientists, "Truly this is the evidence of discipleship, 'By this shall all men know that ye are my disciples, if ye have love one to another,' and I have found it here." What a blessing that this Life can be brought into all departments of life, healing the sick in heart and the sick in body in the dental office as well as elsewhere.

I am conscious of a debt of gratitude to Mary Baker G. Eddy for her faithfulness and love in opening the way that we might be partakers of her life work whereunto she was called, making plain the spiritual import of the Master's teaching.

College and Church One.

THE following article is taken from a recent issue of the New York Sun:—

The Discoverer and Founder of Christian Science, Mary Baker G. Eddy, has conjoined the Massachusetts Metaphysical College with the Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

Mrs. Eddy writes:—

"In the year 1889, to gain a higher hope for the race, I closed my College in the midst of unprecedented prosperity, left Boston, and sought in solitude and silence a higher understanding of the absolute Scientific unity which must exist between the teaching and letter of Christianity, and the spirit thereof dwelling forever in the divine Mind or Principle of man's being—and revealed through the human character.

"While revising 'Science and Health with Key to the Scriptures' the light and might of the divine concurrence of the Spirit, and the Word, appeared; and the result is, an auxiliary to the College called the Church Board of Education, the maximum of whose students, taught annually, is less than one half the number formerly contained in one class at the Massachusetts Metaphysical College; thus giving opportunity for the accession of spirit, wherefor the letter should wait.

"Our Master said: 'What I do thou knowest not now; but thou shalt know hereafter;' and the spirit of his mission, the wisdom of his words, and the immortality of his works, are the same to-day as yesterday and forever."

Independent Statesman, Concord, N. H.

We republish the above article, because of an error which crept in by oversight. This error was caused by the use of the word "reading" occurring in the third paragraph of the article; whereas it should have been "revising." It will be seen at a glance that the correction changes the entire sense of the article.—Editor.

Watch and Pray.

BY JAMES J. ROME.

WHEN in temptation's darkest hour,
I heard the Saviour say:
"Watch when the clouds around thee lower,
Be faithful, watch, and pray."

Watch in that darkness for the dawn,
Nor yield to timid fear;
With unseen foes around thee drawn,
An unseen help is near.

When gay prosperity would lay
Her trophies at thy feet,
Be not deceived, but watch and pray,
With panoply complete.

As up the mountain path we climb,
Along the narrow way,
List for that gentle voice sublime,
Beloved, watch and pray.

Testimonies.

For fifteen years I suffered with affections of the eyes. Three oculists said it was a complication of difficulties. That the muscles in both eyes should be cut; that I must wear glasses the rest of my life, and for a year or more must give up the portrait work in black and white which had been my profession for twelve years; that I must lie upon my back most of the time, and never ride in a carriage, because of "spinal congestion and irritation," which, they said, was caused by overwork of the eyes.

I took none of this advice at first, but the *fear* that I *should* have to, and the thought of failure in worldly attainment, brought upon me all that was consciously and unconsciously feared. Finally, as I worked upon portraits, they, and also the faces of people, would suddenly appear the size of an apple and distorted, the next instant wonderfully beautiful and the proper size, then immediately much too large. The physicians attributed this to brain trouble.

Digitized by Google

This, and my right arm becoming disabled, compelled me to give up the work and submit to an operation upon the eyes and wear glasses.

Relief, physical or mental, did not come until four years ago, when I went among Christian Scientists to gain some understanding of the Truth I believed they taught. From this time I was able to lay aside the glasses at intervals, and to work again at pictures successfully. After two weeks' treatment I was told I could continue to progress by reading Science and Health without other help. The glasses had been put by before this, and have never since been used. I have used my eyes for hours steadily, upon taxing work, so called. The disabled arm is well, as are all other physical and mental conditions from which the physicians said I could never recover.

After anxiety and discouragement for more than three years previous to this healing, conserving the mortal law that we must keep in practice or lose our ability in any line of work, even better work resulted at once. And whereas I had never worked in colors, thinking it had been proven I had "no eye for color," I now find it possible to reproduce nature so that the result gives more or less pleasure.

N. M. Dunn, Boston, Mass.

The following notes from the experience of two Scientists who have gone from Boston to live in a Western town may be interesting to some readers.

"One pleasing incident of our trip, and one that shows the widespread interest in Christian Science occurred on the sleeper west of Chicago. As is now usual with us, we had finished our little morning service when the colored porter came to us, saying, 'I was glad to see you reading out of the good little book, it did me good, and I feel better for it.' We had a very interesting conversation with him, and were surprised to find the real interest that he manifested in the 'good little book,' as he called it.

"Compared to the well dressed and crowded church in Boston, it would take but a slight stretch of imagination to fancy one's self in a conventicle of the old Scotch Covenanters. Instead of a Claverhouse to fear this little band has to contend against the united opposition of ministers, churches, and doctors, and in a small, isolated place like this where each individual is known, the warfare is more bitter than in larger places. We enjoyed the simple, earnest service. The brotherhood of man was well illustrated by the cordial greetings we received after the service, nearly all came to take us by the hand; some were introduced, some not, but that made no difference in the hearty welcome extended to us; it made us feel as though we were not strangers in a strange land."

I was afflicted with sciatic rheumatism for seven months. My family physician attended me alone for some time, then in consultation with another doctor, but I gradually grew worse. Then a physician who made a specialty of rheumatism tried galvanic batteries, various kinds of medicines, and all kinds of experiments on me, but no relief. I tried other leading physicians until I had tried seven, and suffered so much that I had almost lost my reason. My pain was so great that I have taken six hypodermic injections of morphine in seven hours, before the pain would be subdued enough for me to sleep any length of time.

I was prevailed upon to try Christian Science. I was told how others had been healed, and if God would heal others He would heal me. So I put aside my medicine and morphine, and thought I would give Science a fair chance for a period of ten days, if I lived that long. Monday noon I began treatment, and on Saturday night the pain left my limb, and has never appeared since, and that was almost five years ago. The doctors had said that I would have to have an operation performed on my limb, and that I would always be an invalid. But I was cured without the operation and without being an invalid. I am stout and hearty, have made an earnest study of Christian Science, and have seen some wonderful cures performed since my healing.

A. A. Campbell, St. Joseph, Mo.

It may interest the Field to know that near our city, Dayton, Ohio, is located a Shaker settlement known as the Watervliet Village, where Christian Science has been introduced. The following letter from Sister Hester, the eldress of the village, is self-explanatory as to their appreciation of the Christian Science Journal donated to them by our Church. Also letters from some inmates of same home. They have been present at our services at different times, and were among the eager crowd of listeners at Mr. E. A. Kimball's lecture in the Grand Opera House.—Lloyd B. Coate.

WATERVLIET, O., September 4, 1898.

Mr. Coate:—Yours dated August 27 received. Glad to hear from you. We receive the Journal every month, for which we feel so thankful. We look for its coming with great interest. We all, that is, the Sisters, take pleasure in reading every article. O, yes, there is nothing better than a perfect understanding of Science. I thank the good friends of Dayton for the help they have given us, and we can assure you it is doing a good work among our people. Words fail me at this time to express my thoughts. God is All-in-all. Oh, what joy, what peace of mind! I thank the dear Science friends for all favors. God bless you all.

From your Shaker Friends,
Elds. HESTER and MARY.

Extract from a letter from Howard, Pa.

IN this little, obscure spot is a small band of faithful Christians, poor and struggling against big odds. Last Sunday after two services and Sunday School, we gathered in the cheerful Christian Science Room to read the article by John Gillespie entitled, "Scriptural References sustaining the Doctrines of Christian Science," in December Journal.

One brother read the article, and I read the Scripture references, which were listened to with profound interest till ten o'clock, then we sang a hymn before parting.

For myself will say, and may safely say for each one present, that we retired from the sacred place with a song of thanksgiving welling up from the depth of our inmost being to Mr. Gillespie for his labor of love, and to the Father of all, the Source of his inspiration.

From Washington.

1511 Twentieth Street, WASHINGTON, D. C.

Dear Sentinel:—The cause of Christian Science is prospering in this city. Our meetings are well attended, and our trustees are now looking about for larger quarters which we shall soon need for our Sunday and Wednesday evening services. The healing is good, and the testimonies are inspiring—a proof that "God is our ever-present help" the only power and the true Physician. The Christian Science Sentinel is a most welcome guest each week, and in its new dress reflects great credit on our Publishing House.

E. B. LINSCOTT.

Notices.

Attention, Subscribers.

ATTENTION is called to the fact that there is now no special price made for the Sentinel when subscribed for in connection with the Journal, as was done previous to the enlargement of the paper. The prices which now govern the Sentinel will be found on page four.

Numbers 19 and 20 of the Weekly for January 5 and 12 are entirely exhausted, so that no further orders can be filled.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Price, (cloth), each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen; all prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price 50 cents per copy; $5.00 per dozen.

CHRIST AND CHRISTMAS. An Illustrated Poem.

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price by mail, 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

Friendship for America.

First Lord of the British Treasury Speaks of the Binding Ties.

THE Right Hon. Arthur James Balfour, First Lord of the Treasury and leader of the Ministerialists in the House of Commons, delivered his annual address to his constituents at Manchester, January 30, 1899. After speaking of the "intrinsic difficulty which Continental nations find in understanding Great Britain's aims," he continued as follows:—

"But there is surely one great country which, by community of language, religions, blood, origin, and even institutions, is well fitted to understand us, and a country which we should be well fitted to understand. Need I say that the country to which I refer is the United States? Some foreign critics, cynical by profession and training, hold the view that the friendship now happily subsisting between the English-speaking peoples on both sides of the Atlantic is but the growth of the moment and depends upon a transitory community of interests. They affect to believe that when this disappears friendship also will disappear. They hold that, if British trade should feel injured by some inconvenient tariff, immediately the sentiments so generally felt at this moment in Great Britain toward America would vanish like the leaves in autumn.

"According to my observations," said Mr. Balfour, "the world of cynics is always wrong. I believe the cynics wrong in this case. If our good relations really depended upon those fortuitous circumstances, while the latter might be the foundation of an alliance, they could not be the foundation of what is infinitely more important—of that species of friendship which, in season and out of season, through good report or ill, is not to be shaken by mere circumstances. It was in this hall in 1896 that I first spoke of the international relations between the United States and England—in those dark days of the Venezuelan controversy, when public feeling in America had been aroused by the wholly unfounded suspicion that we had some designs of empire in South America, and when, by a natural re-action, we felt that our brethren on the other side of the water had neither judged nor treated us with knowledge and fairness. I then expressed my firm faith that the time would come when all speaking the English language and sharing the Anglo-Saxon civilization would be united with a sympathy which no mere political divergencies could permanently disturb.

"I felt then, though I spoke my inmost convictions, that I must impress my hearers as something of a dreamer and an idealist, or as a prophet only hoping for what he himself can hardly expect to see realized. But the three years that have elapsed since have wrought a surely marvelous change in the relations between the two countries, a change which I believe is not destined to be reversed, a change which has brought back these two great communities to their normal relations, disturbed as those normal relations were by more than a century of unhappy discord; a change which, once made, is a change that ought to be permanent, for it is founded, as I hope, upon mutual sympathy, mutual comprehension, and the mutual belief that each great and free community desires to see the privileges it enjoys extended far and wide to all continents and among all nations.

"And if I am right, and that common sympathy be implanted deep in the breasts of these two great nations, there cannot be a greater guarantee for future peace, freedom, progress, and civilization, not only of this or that country or community alone, but of the whole human race."

Items of Interest.

Clash of Arms.

Reports from Manila are to the effect that a battle was precipitated by the Filipinos on February 4. The following despatch from Admiral Dewey dated Manila, February 5, 1899, in part tells the story of the engagement:—

To the Secretary of the Navy, Washington:—

The insurgents here inaugurated a general engagement yesterday night, which was continued to-day. The American army and navy are generally successful. The insurgents have been driven back and our line advanced. No casualties to the navy.—Dewey.

Further newspaper despatches are to the effect that the Filipinos made a desperate effort to break through the American lines and enter the city of Manila. The insurgent forces after fourteen hours of continuous fighting have been driven from the villages of Santa Anna, Paco, and Santa Mesa. They were compelled to retreat to a position quite a distance farther out in the suburbs than the one they held before taking the city. The casualties on the American side are reported to be upwards of one hundred and seventy-five. Those on the other side are as yet unknown but it is estimated that they run up into the hundreds. The fighting of the Filipinos was fierce, but the steady fire and dauntless courage of the American troops forced them to flight.

Aguinaldo Defended.

In a recent speech Senator Hoar openly championed Aguinaldo, and declared that he was a good and an able man, fully competent to be placed at the head of the Filipino government. He declared that what that leader had done up to this time proved his capacity for government, and that, if a native government were established with Aguinaldo at its head, he believed it would be able to maintain itself.

Mr. Hoar pleaded strongly for the independence of the islands, and said that if this government took possession there would be no end to the trouble that would ensue. For his

Copyrighted, 1899, by Mary Baker G. Eddy.

Digitized by Google

part he would rather pay Spain $20,000,000 to take the islands off our hands than to pay her that sum of money and keep them ourselves.

Mr. Hoar declared that he wished to see the treaty amended so as to put the islands on the same basis as Cuba. He believed it to be the duty of the United States to see that a stable government was established in the Philippines; that after that was done we should recognize the independence of the islands, and with such action our duty would be done.

If this could not be done, then Mr. Hoar insisted that a resolution be passed declaring to the world that it was not our intention to retain permanent sovereignty of the islands nor to set up a colonial policy.

Crisis in the English Church.

The Royal Albert Hall, London, was recently the scene of a great demonstration on the part of ten thousand Protestants, including representatives of fifty Protestant organizations connected with the Established Church in England, Scotland, and Ireland.

Baron Kinnaird presided, and the proceedings were marked by the utmost enthusiasm.

Resolutions denouncing "Romish practices in the Established Church of England" were carried, and a telegram was despatched to the Queen praying her to direct Lord Salisbury, the Premier, to take legislative steps to suppress the practices condemned.

At the confirmation of Dr. Watkin H. Williams, as Bishop of Bangor, at the Church of St. Marylebone, John Kensit, the anti-ritualistic agitator, made a scene, protesting against the "Romish tendencies" of the bishop. The protest was received with cheers, and there were some hisses from others among the congregation. The ceremony then proceeded and the election of the bishop was confirmed.

New York Herald.

World's Longest Steel Shaft.

The Bethlehem Iron Company has just scored another triumph in modern steel making by the completion of the longest steel shaft ever made in the world. It is for the Boston Elevated Railroad Company, and will be used at its Albany Street station.

The company is engaged on eleven similar shafts for the Metropolitan Traction Company of New York.

The Boston shaft, with the fly wheel, generator hub, and two crank discs which will be forced on it before shipment from here, will weigh one hundred and seventy thousand pounds. It is 27 feet, 10 inches long, 37 inches in diameter, with an axle hole of 17½ inches. It is of fluid compressed steel, with an elastic limit of fifty thousand pounds. When is reaches Boston it will have to be skidded half a mile from the railroad station to the power house. The Pennsylvania Railroad car, that was used to haul the Krupp gun to the World's Fair, will be used in the shipment of the shaft.

The Progress of Imperialism.

[Current Comment up to Date.]

The Anglo-Saxon advances into the new regions with a Bible in one hand and a shotgun in the other. The inhabitants he cannot convert he gets rid of with the shotgun.—Congressman Sulloway of New Hampshire.

We must hold (permanently) our new possessions under military government.—Captain Mahan.

We have outgrown the Constitution. It is not worth while to discuss it.—General Merritt.

The Constitution must bend.—President E. H. Capen of Tufts College.

Governments derive their just powers from the consent of some of the governed.—Senator Platt of Connecticut.

My plan would be to disarm the natives of the Philippine Islands even if we kill half of them in doing it.—General Shafter.

We will whip them to death.—Senator Carter of Montana.

Doctors Experimenting.

The Vienna correspondent of the Morning Leader (London) says:—

"It has been discovered that the physicians in the free hospitals of Vienna systematically experiment upon their patients, especially new-born children, women who are enciente, and persons who are dying. In one case a doctor injected the bacilli of an infectious disease from a decomposing corpse into thirty-five women and three new-born children. In another case a youth who was on the highroad to recovery was inoculated, and he died within twenty-four hours.

"Many dying patients have been tortured by poisonous germs, and many men have been inoculated with contagious diseases. One doctor, who had received an unlimited number of healthy children from a foundling hospital for experimental purposes, excused himself on the ground that they were cheaper than animals."

Increase in Pig Iron Output for 1898.

The bulletin of the American Iron and Steel Association of Philadelphia, says the total production of pig iron in 1898 was 11,733,934 gross tons, an increase of 2,121,254 over 1897. Production in the second half of the year exceeded that of the first half by 34,528 tons. The production of Bessemer pig iron was 7,337,384 tons, an increase of 1,541,800 tons; of basic pig iron 785,444 tons, against 556,391 tons; spiegeleisen and ferromanganese 213,769 tons, against 173,695 tons; charcoal pig iron 296,750 tons, against 255,211 tons; stocks of pig iron unsold in hands of manufacturers December 31, 291,233 gross tons, against 656,489 tons.

No Protestant Clergy Allowed.

Bishop Santander has served notice that no Protestant clergyman can take an active part in the ceremonies over the graves of the Maine's dead who are buried in the Cristobal Colon Cemetery.

Bishop Santander, speaking of February 15, said, "The Colon Cemetery has been blessed according to the Catholic ritual. I can no more permit a Protestant ceremony there than I would allow one in the Catholic church. Many of those who died when the Maine was destroyed were Catholics. It would offend their memory to permit a Protestant ceremony, and none can take place within the cemetery."

Slight Increase in Value of Live Stock.

The Department of Agriculture at Washington has issued the following: The returns of the number of live stock on farms in the United States, January 1, 1899, show there were 13,665,307 horses, 2,134,213 mules, 15,990,115 milch cows, 27,994,225 oxen and other cattle, 39,114,453 sheep, and 38,651,631 swine. These figures show a decrease of 295,604 in the number of horses, 56,069 in that of mules, 1,269,972 in that of oxen and other cattle, and 1,108,362 in that of swine. There is an increase of 149,229 milch cows and 1,457,493 sheep. The average farm value of every description of live stock is higher than on January 1, 1898.

Anti-Vaccination Crusade.

London, February 3.—General Phelps, president of the Anti-Vaccination League has given notice that an international Anti-Vaccination Congress will be held in Berlin in June. In the mean time, the German League is actively petitioning the Reichstag for the abolition of compulsory vaccination.

William Tebb has just completed a two months' tour of the United States for the purpose of conferring with the leaders of the movement in America, where there is to be a renewed crusade. It is intended that American delegates shall be present at the Berlin conference.

Gomez Becomes Our Ally.

General Maximo Gomez, the commander-in-chief of the Cuban army, placed himself squarely in position, February 1, as an active ally of the United States Government in the work of the reconstruction of Cuba.

As a result of the conference which Mr. Robert P. Porter, the special commissioner of President McKinley, has had with General Gomez, the latter cabled to President McKinley assuring him of his co-operation in disbanding the Cuban army and in distributing among the Cuban soldiers the three million dollars appropriated for the purpose of enabling them to return to their homes.

Our Minister to Honduras Recognized.

The State Department has been informed that the president of Honduras has formally recognized Dr. Hunter as United States minister to that country. This is the last chapter in a series of petty diplomatic incidents resulting from the formation and dissolution of the Greater Republic of Central America. The outcome is regarded as abundantly justifying the course of the State Department in consistently ignoring these quickly formed unions, before they had established a reputation for stability.

New Collections in the Peabody Museum.

Professor F. W. Putnam, curator of the Peabody Museum at Harvard, has announced that within a short time there will be acquired a collection of models of the permanent huts used by American Indians. These models, which were constructed under the supervision of the Indian Bureau at Washington, are probably the only correct models ever made, although many attempts to produce them have been made before from the remains of Indian villages still to be found in many parts of the West.

Army Re-organization Bill.

January 31 the army re-organization bill passed the House by a vote of 168 to 125. The bill provides that the regular standing army shall be not less than fifty thousand men nor more than one hundred thousand, at the President's discretion.

It is not thought that the bill can pass the Senate in its present form at this session. The time is brief and the power of the minority so great that probably only some temporary measure will now be provided, the real question of the reorganization of the army going over until the next Congress.

Unique Verdicts of Coroners.

A correspondent sends the London Chronicle the following unique certificate, given by a Welsh coroner on the death of a woman: "Fell into the Glamorganshire Canal, whereby she died, and being of unsound mind, did kill herself." This is nearly as good as the verdict once rendered by an old-time Buffalo coroner, who found that his "subject" died "from intemperance, chronic asthma, and the visitation of God."

The Merrimac.

The navy department has finally decided to remove the Merrimac from the edge of the channel in Santiago harbor by means of explosives. Lieutenant Blow, who was for a time in charge of the wrecking operations there, has reported that the vessel is not worth the money it would cost to raise her, and has recommended the destruction of the hull by explosives.

Blind Tom.

Blind Tom, the celebrated negro musician, recently gave two concerts in the Boston Theatre. He sang "Rocked in the Cradle of the Deep" to his own accompaniment. He played "The Rain Storm," a composition of his own, and his latest descriptive piece entitled, "The Battle of San Juan Hill." He is certainly a musical phenomenon.

Last Year's Export Figures.

The export figures for the calendar year 1898 have just been completed by the Treasury Bureau of Statistics. The revised figures show the total exports of domestic products to have been $1,233,564,828; of foreign, $21,929,530, making the grand total exports of the year 1898, $1,255,494,358, against $1,099,743,554 for the year 1897.

Honors for Judge Brewer.

London, February 3, 1899.—Judge David J. Brewer, Associate Justice of the United States Supreme Court, who has been in Paris for the purpose of attending the meeting of the Venezuelan arbitration tribunal, of which he is a member, was given a seat on the bench of the First Appeal Court here to-day.

A Magazine to Which Royalty Will Contribute.

Lady Randolph Churchill, formerly Miss Jennie Jerome of New York, is preparing for the production of a periodical magazine in sumptuous form, which will cost five dollars a copy. The magazine will be handsomely bound. Emperor William and other royal personages will be among the contributors.

American Goods in the Baltic Provinces.

The United States consul-general at St. Petersburg, Mr. W. R. Halloway, announces the establishment of trade agencies and permanent exhibitions of samples of American goods in the Baltic provinces and in southern Russia.

The Republic, official organ of the native government, announces that the congress at Malalos has adopted the Philippine constitution, prepared a vote of confidence in Aguinaldo, and empowered him to declare war on the Americans whenever he deems it advisable.

As a result of the Cabinet's discussion of General Eagan's case, it is learned that the President will impose upon the commissary-general suspension from rank and duty for six years, ending with his retirement from active service January 16, 1905.

Addison G. Foster was elected United States Senator from Washington at Olympia, Washington, February 2 on the twenty-fourth ballot. Mr. Foster has never taken any active part in politics, and was elected on his merits as a business man.

Rudyard Kipling was among those who arrived at New York on the steamship Majestic, from Liverpool, February 2.

Elias H. Cheney of New Hampshire has been nominated for consul at Curacoa, West Indies.

Admiral Sampson recently visited Boston.

Concord Items.

For the first time since the Hon. Nathaniel E. Martin vacated the office of solicitor of Merrimack County, ten years ago, Concord is yielding obedience to the prohibitory laws, and is essentially a dry town. When Mr. Martin assumed the office of mayor on Tuesday, he stated in his inaugural address that he should see that the temperance laws were enforced during his term of office, and almost the first official act to signalize his administration was to make good that promise. And so well has he fulfilled his pledge that not one of the many saloons that were running with wide open doors yesterday now ventures to continue in the interdicted business.

Entered as second-class matter.

What our Leader Says.

Beloved Christian Scientists:—Keep your minds so filled with Truth and Love that sin, disease, and death cannot enter them. It is plain that nothing can be added to the mind already full. There is no door through which evil can enter, and no space for evil to fill in a mind filled with goodness. Good thoughts are an impervious armor; clad therewith you are completely shielded from the attacks of error of every sort. And not only yourself are safe, but all whom your thoughts rest upon are thereby benefited.

It is the evil-thinker who injures himself with what he would have harm others. Goodness involuntarily resists evil. The evil-thinker takes his own dose and dies of his own physic. The right thinker is safe, and abides under the shadow of the Almighty. His thoughts can only reflect peace, good will, health, and holiness.

MARY BAKER EDDY.

Pleasant View, Concord, N. H.

Reply to Dr. Huber.

THE following article was written by the editor of the Sentinel for publication in the New York World, he having been called upon by a representative of that paper. It is herewith published, as it contains matter of general interest.

I am asked by a representative of the New York World to reply to an article appearing in that paper January 30, entitled, "Christian Scientists denounced by Dr. Huber."

I comply simply because I am requested to, not because I desire to enter into any controversy with Dr. Huber.

I notice first, what he is reported to have said about me. After stating that he had submitted certain questions to the Rev. Mary Baker Eddy, he continues: "Mrs. Eddy did not deign to reply. She referred the matter to Septimus J. Hanna of Boston, her counsel. After a long time he sent an evasive letter."

It is true that Mrs. Eddy referred the doctor's list of twenty-nine questions to me to answer or not, according to my best judgment, as she is in the habit of doing, not as her counsel, but, I suppose, because I edit the Christian Science publications,—a monthly called the Christian Science Journal, and a weekly called the Christian Science Sentinel. Although a lawyer by profession, I am not in the practice of the law in any sense whatever. I retired from practice nearly ten years ago to devote my entire time to Christian Science work, which I have been doing. Mrs. Eddy is too busy a woman to undertake to reply to the communications addressed to her from all parts of this country and other countries. It would be a matter of physical impossibility under the circumstances for her to reply to more than a tithe of those she receives; and even if she were to do this, it would seriously interfere with her other work. The outside world little knows the demands upon her time, supervising, as she does, an immense field of labor. She labors incessantly, daily and nightly. It is not strange, therefore, that she should have referred Dr. Huber's long list of questions to some one else. She was under neither legal nor ethical obligation to answer his questions, asked in behalf of a medical fraternity, many of whom are essentially hostile to Christian Science, as evidenced by the doctor's bitter and denunciatory statements published. Neither was I under such obligation. Nevertheless, although exceedingly busy, as soon after his list was referred to me as I could possibly find time, I gave it careful examination. After some time had expired I received a letter from the doctor, in which he acknowledged the receipt of a former letter written for his information, from which he makes garbled extracts in his article published in the World. The concluding part of the letter from him is this: "I wish to thank you kindly for this communication." In reply to this letter I wrote the doctor as follows:—

Boston, Mass., December 5, 1898.

Dr. John B. Huber, New York City.

My Dear Doctor:—Your very kindly and courteous note is received. I gave the paper prepared by you, and referred to me for consideration, the best care and attention I could under the circumstances. I should have been very glad if I could have seen my way clear to answer your questions in such a way as would have been intelligible and satisfactory. But it was impossible for me to do so. Your questions reach the entire subject of Christian Science, and it is too large a subject to be covered briefly. The fact is, it requires the same investigation, study, and practical experience that other systems require, and in one sense may be said to be different from all other systems, in that it is based on wholly spiritual premises, and is, therefore, more difficult of expression in ordinary language than the material sciences. If you pursue your investigations of the subject further, you will see more clearly my reasons for not attempting to answer your questions.

I am, with very great respect,

Yours truly,

S. J. HANNA.

Certainly, no reasonable person will find fault with the general tenor of this letter, nor will any one who will stop to think, take exceptions to my conclusion in the matter. The list of questions submitted having sounded the depths of Christian Science, both in its theological and therapeutic aspects, the impossibility of answering them for use in a medical magazine or journal, is at once apparent. Besides, it is equally impossible to explain in a few words or short space that which requires years of study, investigation, and practical application to understand.

✤

The teachings of Christian Science, as is well known to every sincere student thereof, are based upon Scripture. To elucidate it in anything like its fulness requires an interpretation of Scripture. It has its text-book, called "Science and Health with Key to the Scriptures," written and revised by Mrs. Eddy, which has passed to its one hundred and sixtieth edition. This book must be thoroughly and conscientiously read and studied, as must be the text-books of any other system, in order to an intelligent understanding thereof. Some years ago Mrs. Eddy directed that the sermons of all Christian Science Churches should consist of selections from the Bible and correlative passages from the Christian Science text-book, to be read in the church services in lieu of a sermon. This is a part of the method of promulgating this Science. It has no secrets. Its entire purpose is that the whole world should know its teachings, and it is resorting to every legitimate means of making known this system. It seems not necessary further to elaborate the

Digitized by Google

unreasonable position Doctor Huber assumes with reference to his categorical questions. As well might we (Christian Scientists) call upon him for the entire exposition of the system of *materia medica* for publication in the Christian Science Journal. Suppose we were to do so, is he ready to reply to our questions? Could he do so, so that all reading his explanations would understand all there is in connection with the medical profession? Could the theologian answer in a single article a list of questions covering the entire theological ground?

Both these professions have for ages been endeavoring to answer questions, and to prove their systems, but have they succeeded? Are there not any questionings concerning the efficacy or otherwise of the medical profession? Are there not any questionings concerning the system of theology? Are these matters absolutely settled? If so, why are the medical profession so exercised about Christian Scientists and their methods? And why the necessity of submitting a long list of questions for the information ostensibly of the medical profession and the outside world?

I assumed, upon receipt of Dr. Huber's questions, that they were asked in good faith and in a friendly spirit. I now see, from his published statements, that his motive was the very reverse of this. Otherwise he would not so vehemently inveigh against Christian Science and those representing it.

He complains of not having been cordially received by all upon whom he called. Inasmuch as many Christian Scientists have had experience with persons assuming to be friendly, but who later have proved otherwise, it is but natural that they should be somewhat hesitant when called upon by a member of a profession many of whose members are known to be antagonistic. But, notwithstanding the doctor's complaint, I have been informed by persons in whose word I have the utmost confidence, that by a number of Scientists at least he was very cordially received and given all the information that could consistently have been given him. One in so belligerent a state of mind as the doctor now shows himself to have been, was scarcely competent to judge judicially of either the Christian Scientists or their methods. All know that prejudice and hostility are not favorable to fair and impartial judgment. A man who reads the Bible in this spirit finds in it much that antagonizes and little, if any, that informs or helps. There must be a measure of spiritual attainment before there is a receptive attitude to spiritual truth; and Christian Science is an explanation of the spiritual truth of the Bible or it is nothing.

Not all the members of the medical profession are opposed to Christian Science. Some of its most celebrated members are in the habit of sending cases incurable by their treatment to Christian Scientists. This is a fact existing in Dr. Huber's own city, as well as in many other places. A number of physicians of large practice and good standing, upon coming into an understanding of Christian Science, have abandoned their profession and taken up the Christian Science method of healing. I do not feel at liberty to publish the names of those who have taken this stand, but I will furnish a list to any sincere inquirer.

✠

The fact is, that many, many thousands of people of equal intelligence, I believe, with Dr. Huber, have found in it a means of healing every form of disease, as well as an entirely satisfactory revelation of religion or Christianity. The experience of any given one of these persons in the affirmative is certainly more valuable than the doctor's hostile negations.

The doctor's attempt at setting forth a formula of treatment which he claims to have gotten from Christian Scientists, is sufficient evidence to any one having the slightest knowledge of the Science, of the profundity (?) of his understanding of the subject. It will be read by all Scientists with a smile of amusement.

If Christian Science is the ridiculous thing that the doctor and others of his profession seek to make it appear to be, it seems strange that they should honor it with so great notice. Silly and ridiculous things do not usually receive so much attention at the hands of the great professions of the world as Christian Science has recently been receiving.

I of course do not know upon whom Dr. Huber may have called for facts and data, in the course of his so-called investigation, but I do know, and abundant proof is at hand, that there are thousands of people in New York City who will testify to him, or to any other honest inquirer, to having been healed through Christian Science after all other known remedies have been exhausted and failed. I am aware that he met in New York a prominent business man of Boston, an old citizen here, who has been engaged in extensive and active business for many years, a man whose standing is of the highest and whose integrity is unquestionable, who might have informed the doctor that his wife was raised through Christian Science from an invalidism of many years' duration after the best physicians to be had had pronounced her incurable. She is a well and active woman to-day. Dr. Huber will at once recognize the gentleman to whom I refer.

If the doctor is not satisfied with his investigations in New York and will come to Boston as a fair investigator and not as an emissary representing that part of the medical profession whose sole purpose seems to be to arouse prejudice against Christian Science, with a view to obtaining prohibitive legislation, we will make him acquainted with very many persons who will satisfy him, if it be possible to satisfy one in his state of mind, that they have been healed through Christian Science in a way that, from any ordinary standpoint, would be deemed miraculous. I very much fear, however, from the tone of the doctor's article, that he is in the mental attitude toward metaphysical healing, so graphically described in the last verse of Luke, 16, "And he said unto him, If they hear not Moses and the prophets, neither will they be persuaded, though one rose from the dead."

✠

The doctor's article closes with a repetition of one of the twenty-nine questions submitted by him, "Do you isolate a patient suffering from an infectious disease?" And this, he said, was evaded by Mrs. Eddy and every other Christian Scientist. There are many instances where infectious diseases have been reported to the authorities, but I will refer to only one that has recently come to us for publication. Our authority for this testimony is N. M. Dunn, 313 Huntington Avenue, Boston, Mass., whom we know to be thoroughly reliable. The case is briefly this:—

In the city of Berlin, Ontario, last February, a Christian Scientist was called to a family of thirteen children, one of whom had diphtheria. The parents notified the Board of Health, and a doctor came and said, "Examination proves it to be diphtheria and a very bad throat." The Scientist said to the mother, "Which do you want, Christian Science or *materia medica?*" The mother said, "Christian Science." The doctor, upon returning to his home, remarked to his sister, who is a Christian Scientist, "There will be a funeral at the S—— home." This was Saturday afternoon. The Tuesday following the boy was well, playing in the back yard,—all the outing allowed the family while in quarantine. The second day two more of the children complained of the same symptoms that the others did at first. The next day two more, and the next one. But these conditions were met by the Christian Scientist in a few hours. Three days after the first examination by the physician, another physician was sent by the Board of Health; he said, "I am to swab the throats of all the children, and each swab, with the child's name attached, will be sent to a specialist at Toronto. If the report of diphtheria is returned, the swabbing will be repeated in a week, and every week until no germs are found; then disinfecting will be done and the card removed from the house." The doctor said to the Scientist, after swabbing the throats, "I have looked into Christian Science, and it is bene-

Digitized by Google

ficial in some cases, but this is different." The doctor then continued, "That child needs attention. His throat looks all right, but it has gone down. It is a serious thing to tamper with a human life." "Yes," replied the Scientist, "that is why we leave the child in God's hands." At the last swabbing the doctor acknowledged to the parents, "They have recovered very nicely." Outside he said, "You could not kill one of those S—— children anyway." In all there were three advanced cases healed, and four relieved in a few hours after the first symptoms appeared, and one relapse. At the same time, there were four more healed in another home not far away through Christian Science, and this notwithstanding the town's predictions that it would not be accomplished.

Many other cases were healed during the season by Christian Science, only one dying. At the same time a little girl having the same disease died in a closet filled with steam, where an allopathic physician had placed her, depending upon his method for her recovery. Not long before this, five cases had proved fatal under medical treatment, in this small city of Berlin. The doctor examining the first two cases, Freddie and Lucy, said Freddie's case was an advanced case of diphtheria with very bad throat, and he would undoubtedly die, and Lucy had the fever and spots on her throat. Three days later another doctor swabbed four, the above two and Eddie and Nelson, and said, "I do not see much the matter with their throats," but added that it had "gone down" in Nelson's case, and that he needed immediate attention. When the report came from the specialist in Toronto, that Eddie and Lucy had the above malady and the rest did not, Freddie's fever had been met in a day and night, and he had been free and skating for two days; but when he heard that he had diphtheria he relapsed, and it was several hours before it was met.

The writer of this article significantly adds: "The healing of the cases above referred to was made possible through 'Science and Health with Key to the Scriptures,' and other writings by Rev. Mary Baker G. Eddy, which prove the truth in the Scriptures to be practical."

I could cite almost innumerable cases. Every month in our Journal and every week in the Sentinel we publish well-authenticated cases of healing after drugs and medicines and all material means had failed, a very large percentage of which have been given up by physicians.

These facts are open to Dr. Huber and to every citizen of the world. The text-book and all other writings upon this subject are available to him and to all others. He has the same opportunity of informing himself that I had when I began my investigations about thirteen years ago, and even greater opportunities, because of the accumulated writings and evidence since that time. It is only necessary to lay aside prejudice and investigate in a candid spirit, to learn what Christian Science is, and what it does.

Questions and Answers.

In compliance with requests, we republish the following from the Christian Science Journal:—

We endeavor below to answer some of the questions that are most frequently propounded to Christian Scientists.

We may remark, by way of preface, that it is much easier to ask questions than to answer them, especially when a single question may sound the depths of an infinite subject. A child can easily ask, What is God? but the answer has not yet been made to the satisfaction and comprehension of most of mankind. So with some of the questions asked us: the answer cannot be made, to the satisfaction of most persons, briefly or through the columns of a magazine or newspaper; yet, appreciating the spirit of the inquiries, we shall endeavor, in the same spirit, to make such effort at answering as the circumstances afford.

What is the difference between Christian Science and faith healing?

Christian Science is based upon the immutable law of God. Its conception of God is that He is greater than personality as that term is commonly used and understood. He is personal only in the sense that Supreme Intelligence, Infinity, Eternity, Boundlessness, and Limitlessness are personal. His is the personality of Love, of Life, of Truth, of Good. Love is infinite and eternal; Truth is infinite and eternal; Good is infinite and eternal,—hence God is infinite and eternal, and this destroys the belief in His personality as a corporeal being, an anthropomorphic individuality, or a magnified mortal.

Love is not His attribute,—He is Love. Life is not His attribute,—He is Life. Truth is not His attribute,—He is Truth. Good is not His attribute,—He is Good. His is the personality of the I AM (Exodus, 3 : 14), and of the repeated definitions of the Old Testament, such as, "I am God, and there is none beside me," and of Jesus in his frequent declarations such as, "The Father is greater than I;" "The Father and I are one." This leads, by logical deduction, to the further and larger definition which Christian Science gives of God, viz., divine Principle.

Take, for instance, the Websterian definition of Principle: "Beginning; source or origin; that from which anything proceeds; fundamental substance or energy; ultimate end or cause."

If God is Creator, He is Cause. God is He from whom all things proceed, therefore, He is "fundamental energy or substance." As divine Principle His Omniscience, Omnipresence, and Omnipotence may be easily comprehended; as personality, in its ordinary or limited sense, His all-power, all-presence, all-wisdom are inconceivable and impossible. He is the "same yesterday, to-day, and forever;" therefore that divine Law or Principle which is the Supreme Intelligence of the universe, the God-head, the Father of all, in so far as He is known or comprehended, may be appropriated or applied, at all times and under all circumstances. There is as much Truth to-day as there ever was; there is as much Life to-day as there ever was; there is as much Love to-day as there ever was; there is as much Good to-day as there ever was.

It is evident that the method of applying the divine Law to human necessities rests, not upon faith, but upon understanding. In the measure in which Godness—Goodness—is understood it may be demonstrated. Whatever measure of understanding there is, however small, rises above the quality of faith.

Yet Christian Science by no means undertakes to abrogate faith; it seeks rather to ripen it into understanding. It knows that if God is Life, He must be the author of, and can reflect only, Life; therefore death becomes a delusion of human, material sense. It is that which, "seemeth to be, but is not." It is real to mortal sense, but unreal in the realm of the divine Law which is Life. It knows that Life is Health; hence sickness is not of divine Law nor origin, but of human. God not being the author of sickness, it must be of human origination; this is why it can be measurably overcome by human methods; but it has its basis in sin,—the law of transgression of the divine Law, and sickness, as effect, cannot be destroyed until its cause has been annihilated. It follows that sin must be overcome before its sequence, sickness, can be fully destroyed, and this requires the application of the law of God. The divine Law is unchanging, limitless.

If God is Life, Life cannot change into death. If God is Love, Love cannot change into hate. If God is Truth, Truth cannot change into error. If God is Good, Good cannot change into evil. Hence, death, hate, evil, error, pertain not to God's eternal and infinite economy, but belong on the side of humanity; they are the result, not of divine Law, but of the transgression of divine Law, and the

Digitized by Google

only true and permanent cure for sickness is the destruction of its cause, transgressed law,—sin. It requires more than blind faith to remove sin. Sin is removed by *overcoming* it. To "overcome evil [sin] with Good," is the Scriptural edict. A knowledge of the fact that sickness is not of God, but is of human origin, coupled with an understanding and continual realization of God's power as greater than human power,—nay, strictly speaking, as the *only* power, for His almightiness, His omnipotence, omniscience, and omnipresence make Him so,—the repeated declaration, accompanied with such relative understanding as is now possible to finite comprehension, that God is our Life, our Strength, our Health, our All,—these remove pain and sorrow and disease, and bring one up toward that heaven of peace and joy and contentment for which all are hoping and seeking.

All this, as will be readily observed, implies more than faith as that term is understood and defined; yet, in so far as faith or trust in God brings with it improved health or better physical and mental conditions, Christian Science has no fault to find with it. In so far, however, as God is believed to exercise a merely judicial discretion in each particular case which appeals to Him, healing or refusing to heal as the Divine fancy dictates, or the circumstances of the case warrant, Christian Science has nothing in common with faith cure. Christian Science rests upon the immutable law which declares that the divine Will is that of health, happiness, and harmony to all His creatures; and that in the measure in which mankind brings itself into true relation with the divine Will, by yielding faithful and implicit obedience thereto, health, happiness, and holiness (wholeness) follow as a natural sequence.

❧❧❧

What are the points of difference between the school of Christian Science headed by Mrs. Eddy, and other schools of Christian Science which do not accept her leadership?

A question, the most satisfactory answer to which, from our standpoint, would be that there are no points of difference, because there is no school of Christian Science. This answer would be a strictly correct one, but we are aware that it would not meet the spirit of the inquiry.

There is no school which teaches the principles of Christian Science as laid down in its text-book, "Science and Health with Key to the Scriptures," whose author is Mary Baker G. Eddy. Many of the so-called schools do not even assume to do so, although claiming the name of Christian Science. Others, assuming the name, expressly repudiate both its teachings and its author. It is safe to say that the great majority of these schools teach the very antipodes of genuine Christian Science. Many of them teach all sorts of ologys and isms, which are alike atheistic and pantheistic, having neither reason, right, nor religion as their basis. Some of them are worse than Pagan in their interpretations of the Bible, and if Christian Science were, in fact, what they teach, it would merit all the criticism and condemnation which have been, or could be, heaped upon it. It is one of the persecutions to which the Rev. Mary Baker Eddy and her followers are subject, that her system is made to bear the brunt of the many attacks made upon everything bearing the name Christian Science, the so-called as well as the genuine. Many suppose it is what the various "schools" claim it to be, and they attack, indiscriminately, everything bearing the name, under the supposition that it is all one and the same thing.

The only strictly correct answer, however narrow or bigoted the assertion may seem, is that there are no schools of Christian Science; there is only one Christian Science as there is only one Truth. Speaking by way of analogy, one might as truthfully and consistently claim to be a Presbyterian who repudiates Calvin or denies his authorship of the Calvinistic faith, or a Methodist, while denying that Wesley was the founder of Methodism, or a Swedenborgian, while denying the writings of Swedenborg, as to claim to be a Christian Scientist and yet refuse to acknowledge Mrs. Eddy's leadership thereof.

Medical Legislation.

We herewith publish interesting extracts from a vigorous article by Dr. Delap, a prominent homœopathic physician of Kansas City, by way of protest against proposed medical legislation in Missouri. Much of his argument is good anywhere, and the whole is well worthy of perusal. The proscriptive and inquisitorial character of this kind of legislation would have done credit to the Roman Inquisition. Manifestly the medical trust is one of the serious menaces of liberty and free government in these days of growing monopoly.

Following are the extracts:—

With the annual or biennial meeting of the legislatures of the various states, there comes the usual January grist of medical bills. In Kansas some of the members are evidently endeavoring, one to outdo the others, in the radical measures introduced for the purpose of aiding a coterie of doctors to get at the throat of the medical profession. Indeed, they are not confining their operations to that of creating a medical monopoly, but are proposing the same methods of regulating the plumbers and barbers by proposing the enactment of a law for the creation of state boards, whereby the barbers and plumbers may be enabled to throttle competition by a successful effort to keep all new-comers out of the State. We are disposed to look with complacency at this scramble of the various trades to align themselves with the medical profession in a struggle against the new-comer, who is yet to be, and who has no means of defending himself against attacks of those who hold the fort and stand ready to assault him as soon as he shall have the temerity to set foot upon forbidden ground. We are disposed to think that this phase of the question will appeal to his sense of justice, for the average legislator is generally found to be desirous of recording his vote in the interests of justice and against oppression, when he is really enlightened upon the various subjects of legislation. Any man, not of the medical profession, only needs to investigate thoroughly this question of medical legislation, to be convinced that all bills that give to a few medical men, without responsibility to the profession or to any one but themselves, the exclusive right to say who shall practise medicine in the states, and the power to revoke the license of any physician whom they may be pleased to dub "unprofessional" or "dishonorable," should be promptly buried under large majorities.

. . . . . .

It is highly improbable that the homœopathic profession will get more than one representative on this board of seven, and his influence will be utterly without avail in any question of school that may arise. In case it should be determined that the religious affairs of the people should be protected by a state board of theology, and by the provisions of the bill it were possible for the Catholics to be confined to one member in a board of seven, would any sane man entertain any confidence that the Catholics of the State would be treated justly, and would the liberty-loving people of the State be willing that a continuance of a license to remain in the office of the priesthood should depend upon what this board might regard as "professional" and "honorable"? The make-up of the board, viewed in the light of section ten, ought alone to be sufficient to kill the monster during parturition. Then to think of the irrelevant sop that not more than four members shall belong to the same political party!

The legal profession would not tolerate the existence of an irresponsible board, with power to prohibit a lawyer from engaging in a single act of legal practice after it had decided that the lawyer was "unprofessional" and "dishonorable." The history of the medical profession is such that no one who

Digitized by Google

is in the least informed will doubt for a single moment the abuse of such power, even if entrusted to the profession, to say nothing of a few irresponsible individuals who may be among the most bigoted of mortals.

But there is a broader view to take of this whole question. It is the paternalism of government. Germany, through its autocratic head, may wish to know every act of its citizens, and may endeavor to dictate by law what each one shall do, leaving little for individual effort in carving out a future career. Russia may likewise seek to know the thoughts of her people and proceed to throw around each one the protecting arm of the law. But in this country we regard the law as the rules adopted by an intelligent people for their sole benefit, without reference to him who, for a time, may perform the functions of the executive. We have laws against fraud, but the arm of the law has never yet undertaken to point out to the would-be purchaser where he can buy cheapest and best, and the class of dealers he must patronize. There are some things to be left to individual judgment. The people who patronize the fakir and mountebank are the same ones who are attracted by "fire sales," and to whom appeals are made by goods "marked down one-half," in the show window. And it sometimes happens that the man whom a coterie of doctors dub a "quack" has merits superior to his traducers. And not all doctors are quacks to whom this sobriquet is given, else many of the greatest discoverers in medical science would not have been obliged to listen to this word of contempt. Let the physician be obliged to record his evidences of medical education, and any other documents that may be required, under oath, as matters of public record. These will be supplemented by the evidences of skill he has shown in his community. If the people are satisfied with all these, it is no further the affair of other doctors or the State. A man can choose his own physician better than can be done by a state board in the capacity of a trades-union committee, bent on taking care of the craft against all others, and especially solicitous of themselves.

While the foregoing constitute the most objectionable features of the bill, there are others similarly vicious in their tendencies.

For the State to permit each young medical graduate who enters the State to be taxed twenty-five dollars for the sole benefit of this board and its rule over the medical profession, amounts almost to the collection of blood money. Seventy-five to ninety per cent of the medical graduates are pinched to the last degree to obtain money enough to complete their course. The privations they often endure are known only to themselves. Then to lay a tax of twenty-five dollars upon his head before he is able to earn enough to maintain an existence, is an outrage that no State ought to tolerate for a single day. This provision will have the effect sought by the framers of the bill, of keeping all out of the State except the sons of the wealthy. It will thus happen that the chief revenue of the board will be obtained from fines and that intangible source traceable to the individual who is willing and finds it necessary to purchase his professional freedom. It would be a gross wrong to the physicians of this State were the bill to become a law, in that a premium would be placed upon malicious prosecutions for the fines that would accrue to the board. It was found in Kansas City that so long as the justices of the peace were paid out of the fees collectible from litigants, that a premium was placed upon litigation, and many suits were begun solely for the fees. The custom reached such a point of abuse that the Legislature found it necessary to have all fees paid into the treasury, and the justices are now paid an annual salary. The change in the law has wrought a most desirable reform in pernicious litigation. The proposed medical bill should embody this reform, that has been demonstrated a necessity, if the State wishes to avoid becoming a party to malicious prosecution. And it is safe to assume that the men who propose such legislation are totally unfit to be entrusted with any powers delegated by the State.

The bill is also objectionable in the fact that it permits the board to fix the salary of the secretary of the board. This should be fixed by the State. As it stands, the secretary will find it very desirable to institute prosecutions under the law and thus obtain fines sufficient to pay himself a liberal salary. With such a temptation before him, few would be found morally strong and generous enough to resist the temptation.

No other profession except that of medicine attempts to cast discredit upon its educational institutions. In medicine it is only attempted by the unduly ambitious doctor, who is desirous of obtaining political control of his fellows, and the bigot who wishes to crush out other schools, or systems, of medicine.

. . . . . .

The requirement of evidences of preliminary education is one based upon impossible conditions. The branches enumerated are English grammar and composition, arithmetic, United States history and geography. For these the applicant must bring, not only a diploma from a college or high school, but the institution must have the approval of the board, or in lieu thereof, a certificate from the State superintendent of public schools. In many of the states the State superintendent does not conduct examinations in the branches named; in some he does not conduct examinations of any kind in the branches of a literary course, and in probably all the states the applicant could not get a State certificate, irrespective of his attainments, unless he had experience in teaching. There are many eminent practitioners of medicine all over the country who are the possessors of a good literary education yet they are not graduates of a literary college, or of a high school, and have never taught school. By the enactment of this bill, all these men are barred from entering the State. They are unqualified even to apply for an examination by the State Board. And then the framers of this bill face about and declare when it comes to the question of how the applicant became sufficiently proficient in medical work, "the State Board of Medical Examiners shall not be permitted to inquire the source of information of any applicant for a certificate to practise medicine or surgery." If the ear-marks of a job are carefully concealed in the other sections of the bill, it is here in the fifth section where they become manifest.

The penalties are out of all proportion to the criminality of the offense. This bill reminds one of the penalties he reads as having been inflicted in Cuba or the Philippines while Spain mercilessly oppressed the natives. These severe penalties are only another illustration of the abuse of power that would soon follow in the wake of this board.

The Little Church Built by Children.

In the February, 1899, Journal, we published Judge Ewing's very interesting account of the building and dedication by children of a church at Schofield, Wis. We have since received a letter from Mr. Ira C. Hubbell of Kansas City, Mo., relating to the same church, which is as follows:—

Office of Ira C. Hubbell,
Purchasing Agent, Port Arthur Route.

Kansas City, Mo., January 27, 1899.

Dear Brethren:—I send you in to-day's mail a marked copy of the Wausau Pilot, published at Wausau, Wis., under date of Tuesday, January 3, 1899, which relates to the dedication of the Christian Science church built by the Sunday School children of Schofield, Wis.

It was my pleasure recently to meet Mr. E. W. Brooks, who is referred to in this article, and who is, I understand, a member of our Church in Chicago. This gentleman told me that for several years past various other denominations had undertaken the construction of a church in this lumber camp, but were not successful in their efforts. The success of the Church described in the article herein referred to is covered

Digitized by Google

entirely by the realization that, "Divine Love has always met, and always will meet, every human need" (see Science and Health, page 490), which is only an expression in the language of our thought of to-day as covered by Jeremiah, 33 : 3, which is, "Call unto Me, and I will answer thee, and show thee great and mighty things which thou knowest not." Literally, in our day, the Scripture contained in Hebrews, 9 : 28, is fulfilled, and we have the second appearing of our Saviour: "And unto them that look for him [Christ] shall he appear the second time."

I thought perhaps you might not have seen this article, and as it is such a beautiful illustration of the Truth, I felt that the Field would be benefited by its reproduction, if you can give it the space. Yours in Truth,

IRA C. HUBBELL.

Mr. Hubbell's letter gives additional significance to this very beautiful bit of history in connection with the Christian Science movement. In still further emphasis of the event, we herewith republish from the Wausau (Wis.) Pilot the following account of the building and dedication of the little church referred to in Mr. Hubbell's letter:—

New Year's Day the church built by the Christian Science Sunday School at Schofield was dedicated. Two services were held during the day. Miss Margaret Scholfield rendered a vocal solo entitled, "Love Watches over All." The children were then asked questions by the First Reader, and they answered, repeating separately or in concert passages from Scripture and Science and Health. After another hymn, the morning lesson on the subject of "Christian Science" was read. A short history of the growth of Christian Science in Schofield was then given by the First Reader.

At three o'clock the church was again filled. This time the services were more informal. They were conducted by Mr. Hugh McDonald of Green Bay, who read passages from Luke, 21, and Revelation, 21. Judge G. W. Ewing and Adlai Ewing of Chicago, and E. P. Arpin of Grand Rapids, each spoke for a few moments of the practical good of Christian Science in business and social life, in healing and preventing disease, and in destroying sin, and all complimented the Sunday School upon its success in building and paying for the church. At the close of the service a telegram of congratulations from the First Church of Christ, Scientist, of Sheboygan, was read. Miss Jessie Graves presided at the organ during both services.

Mr. E. W. Brooks, of the Brooks & Ross Lumber Co., who has been greatly interested in the building of the church, came up from Chicago to attend the services, bringing with him his friends, Judge Ewing and Mr. Adlai Ewing. Mr. Hugh McDonald of Green Bay, Mr. E. P. Arpin of Grand Rapids, and the members of the First Church of Christ, Scientist, of Wausau, also accepted invitations, and attended the dedicatory services.

The church stands on a lot adjoining the Town Hall, and is the first church ever built in the village. The building is painted white, is twenty by forty feet in size, and will comfortably seat about one hundred people.

From the vestibule one enters first a pleasant room which will soon be opened as a free reading room; this room is divided from the main room of the church by large doors, and by opening or shutting these the interior of the church can be used as two rooms or one as desired. The pulpit faces the door, and over the pulpit in gold letters against the white wall are painted the words of Jesus: "Suffer Little Children to Come unto Me, and Forbid them Not, for of such is the Kingdom of God." Within and without, the church is simple in design, but substantial and harmonious in all ways. For this occasion the chandelier was trimmed with holly, and smilax and roses adorned the pulpit and table.

The first copy of Science and Health was brought to Schofield by Mrs. George Reed, early in 1885, and during that summer Mrs. Hugh McDonald, a graduate of the Massachusetts Metaphysical College, came to the village and gave informal talks upon the subject. In the fall of 1886, Miss Mary E. Graves entered a class taught by Rev. Mary Baker G. Eddy. The present Sunday School was organized in 1896, and met at first from house to house. Finding larger quarters necessary, the village schoolhouse was used, and that has been their meeting place until Christmas Day, when the first service was held in the new church.

The church cost about $600, and is insured for that amount. When dedicated it was entirely paid for. This seems quite an accomplishment, when it is known that three months ago when this little band of workers, numbering about twenty, most of whom are little children, started out to build their church, they had less than ten dollars in their treasury, a chandelier which had been donated to them, and a small amount of cull lumber for beams, rafters, etc. This is absolutely all there was in sight in the way of material and means, and at that time there was no hint of help from any person except the promise of a lot upon which to build. But they knew the need existed, and they knew that "Divine Love always has met, and always will meet, every human need" (Science and Health, page 490). So, trusting in the loving Father as the source of all supply, they learned the definition of Church from their text-book, bought the rock for the foundation, and wrote for plans and specifications with all the assurance of millionaires. Without solicitation, gifts of money or material came every week, and at no time were they embarrassed for funds. And now that their church is completed, they feel that it is indeed, as they learned it would be, "the structure of Truth and Love."

What there is in Christian Science.

FEAR rules the human mind, and it is always expecting trouble. Bad news hardly ever needs a corroborating witness to be believed. Good news must be vouched for by many witnesses before people will even investigate. This bent of the human mind must be changed, so that people instead of looking for sickness, sin, death, and disaster, will look confidently for health, goodness, enduring life, and peace.

Tell a man that the bank where all his money is deposited has failed, and he will believe you. Tell him that a big vein of rich ore has been struck in his mining claim, and he will doubt it.

Tell a man that his boy has swallowed a table fork and died, and he will believe you. Tell him that his little boy who has always been deaf has suddenly had his hearing restored, and he will not believe you.

Just at this time, tell a man that his daughter has caught the smallpox, and he will say, I was afraid she would. Tell him that smallpox can be rendered harmless by Christian Science treatment, and he will say, What are you giving me?

Tell a man that evil is ever present, and that it has irresistible power over men, and he will say, I know it. Tell him that God is Good, and is just as near to man now, and just as powerful to save him from sickness, sin, and death as He was nineteen hundred years ago, and he will say, Perhaps He is, but I don't believe it.

Let a man climb a tree, expecting every moment to fall, and his expectations are almost sure to be realized, but let another climb fearlessly and confidently, thinking nothing about falling, and he will not fall as a usual thing. When all the faculties of the human mind are attuned to fear, this extreme sensitiveness makes it impossible for one to escape having grip, smallpox, diphtheria, colds, and every ill that is much talked about—and many people seem unable to talk of anything but sickness, death, and bad weather.

I think it is related in one of Herbert Spencer's books that a traveler in Africa found a hardy tribe in one of the elevated portions of the continent the members of which were singularly free from fear of illness. They wore no clothes and usually slept with no covering but the blue sky. At certain

Digitized by Google

seasons of the year it grew very cold in the night, and these naked savages on waking in the morning would be covered with frost. They never took cold or contracted chills and fever from such exposure. Yet these people were flesh and blood human beings. What gave them such immunity from colds, sore throat, consumption, and ague? Was it not the absence of fear?

Doctors have a thousand times as much faith in disease to kill as they have in their drugs to cure. Orthodox Christians seem to have far less faith in the power of God to save than they have in the power of whiskey and evil passion to damn. What the despondent, helplessly fearful world beings need is robust reason, and a wholesale faith in Good to give them moral courage to overcome this blighting dread.

Christian Science is good news. It is a light to show the way out of the darkness of fear, disease, and sin. If a report were printed in the newspapers of Denver that there was to be an awful earthquake at a certain hour which would engulf the whole city, everybody would quit work to watch for it. They accept such reports with unreasoning faith. But here is Christian Science with its good news of Life, Truth, and Love; health, harmony, and mastery of sin, and in spite of its daily proofs of healing, men will not take time to inquire about it. Christian Science offers just what men have for ages been longing for, and if they could believe the reports they hear they would not rest day or night until they found out about it, but they think that nothing so good can possibly be true, and go on fearing, suffering, sinning, and dying.

The good news proclaimed by Mary Baker G. Eddy in Science and Health is true. Do not listen to the bad news of sin, sickness, and death a minute longer.

Denver Republican.

Address to Mechanical Engineers.

Mr. C. W. Hunt, on retiring from the presidency of the American Society of Mechanical Engineers recently, delivered a most interesting address, an extract of which we republish from an engineering journal published in New York, called "Power." Speaking of the labors and achievements of the mechanical engineers, Mr. Hunt gave expression to the following philosophical thoughts:—

Working in a field and in touch with a body of his fellowmen having similar tastes, he sees on every hand scenes of engrossing interest. The telescope recording the position and motion of stars which no human eye has ever seen; the spectroscope analyzing the materials of the sun and stars with all the accuracy which it would show if the articles were in the laboratory. Looking with Roentgen rays through a double-barreled rifle he sees not only the leaden bullets within the steel barrels, but also the wads and the charges. He photographs lines in the ultra-violet spectrum far beyond the reach of our vision. He stands by a quartz filament galvanometer which indicates an electric current so minute that if it should be increased in magnitude eight hundred thousand times it would still be only the one-millionth part of an ampere, and on the other hand he sees the Niagara electric generator of five thousand horse power, with a current so much larger than that of the galvanometer that the difference can only be expressed mathematically, not in colloquial language. He sees with entrancing interest the liquefaction of hydrogen by the physicist at a temperature of only twenty-three degrees centigrade above actual zero. He shares in the enthusiasm at the results of two years of unremitting work in the photo spectrum in isolating a new element—monium, in the Hertz electro-magnetic waves now applied in wireless telegraphy; and in the newly discovered element in the salts of Uranium, whose radiations make the air through which they pass a conductor of electricity. More nearly touching him personally comes the work of the biologist, whose quest for the thing we call life has continued from the primitive man to the present time. Constantly flitting from his grasp, it has seemingly passed from fire and storm to mountain and deep, from animal and plant to seed, to cell, and now it has been followed to the molecule or the atom, and yet it as completely eludes his grasp or even his comprehension as ever it has. But followed it certainly has been, by all the laws and forces of nature at the command of man, until the search for it is now in the molecule or the atom, a space physically so small that only the trained imagination can even faintly comprehend its minuteness.

And there, on the outskirts of this unexplored world, stands man, with spectroscope and polarized light, peering over the sphere of action, which we call an atom, well knowing that therein lie wonderful forces, activities, and at least the effects of that mysterious entity, life itself. He sees a field for investigation so fraught with possibilities, so infinitely beyond the comprehension of any conception of the capacities of the human mind that he stands gazing into the abyss with the same devout wonder and awe as does the astronomer when viewing the illimitable heavens. The two are standing as it were, back to back, and each gazing into an infinity—one into the infinitely great, and the other into the infinitely small.

Thus stands the engineer in the midst of a countless number of earnest explorers in the field of unrevealed nature, and so to speak, sees the tools forged and the materials discovered with which he is to work. Cheerfully can he enter upon his daily tasks with the consciousness that his application of these discoveries is of real service in lightening the burdens of life, as well as elevating and ennobling his fellow men.

Cullings from the News Letter.

Texas Doctors Desperate.

We have been forwarded a bill which is now pending in the legislature of the State of Texas, regulating the practice of medicine, so-called. The Medical Trust in that state, not being satisfied to control the action of those who practise medicine, has gone farther and entered into the domain of thought, and seeks to control by legislative enactment the actions of all who attempt, directly or indirectly, by "medicine, mind, or otherwise, to heal the sick." This means that if a person should pray to God for the recovery of the sick, that person will be amenable to the laws of Texas and subject to fine and imprisonment for thus invoking the aid of Deity.

Texas is a grand state and, with its thirteen representatives in the lower house and two in the upper house of Congress at this capital, presents a spectacle of which any person might justly be proud. Many of her representatives here are men of more than ordinary ability, gentlemen of wide understanding, comprehensive learning, broad statesmanship, and they are a credit to the government of the United States, of whose law-making power they form a part. Texas, heretofore, has proven too liberal, too broad, and too just to allow the Medical Trust to take possession of its law-makers, and it has not as yet been able to bribe, intimidate, or control the legislature of that state to the extent of obtaining prohibitive, un-Christian, and unconstitutional laws regarding the practice of medicine, and it is now believed by those who are informed that the passage of such a bill as is pending before the legislature is an impossibility, because of the superior enlightenment, statesmanship, and fairness of the people and the members of the legislature of that state.

When a profession becomes so far degenerate or in such straits as to solicit the passage of laws prohibiting the worship of God in accordance with those rights guaranteed by the Constitution of the United States and of the different states, it is time for that profession to die. The practice of medicine is a rank farce, bound up in ignorance and superstition.

It is a well-known fact among physicians that medicine

Digitized by Google

given at one time will have a different effect when given at another time. In other words, that the whole system of *materia medica* is a system of guesswork and not of science. You take the three prominent schools of medicine, allopathic, homœopathic, and eclectic, and they are as wide apart in their systems of treatment as was the old Hindoo practice from the supposed enlightened practice of to-day. In fact, what is good practice in one is rank quackery in another, and they join each in condemning the other, and then combine to destroy the liberties of the people in a community of rascality and of public plunder.

The legislators of Texas and other states cannot fail to see that every indictment and every charge which we make against the profession of *materia medica* is well founded, and that these iniquitous laws should not be allowed to be put on the statute books, while the repeal of those in force must, and will, be demanded by the people.

The time of rule of the Medical Trust is nearing its end; its grave is dug; its tombstone is engraved, and all the ceremony yet to be performed is to hide its unholy carcass beneath the sod of oblivion.

Those Spoons.

Noting the Mother's request that we should obtain a Souvenir Spoon, the editor of the News Letter sent for nine, being one for each member of his and his children's families.

Sunday morning at breakfast these spoons were used for the first time. They preached a sermon with the lovely motto, Mrs. Eddy's autograph, and the likeness of her blessed, beautiful face.

One's thoughts took in the past of humanity, the great Discovery of 1866, the advancement of the present and the infinity of happiness, Love, and Truth in store for the human family in the future because of the blessed religion—"Love God, Love Man"—known as Christian Science. We thank the Mother for the beautiful idea of the spoons.

Christian Science Sentinel.

Again the great weekly devoted to the cause of Christian Science comes to us improved. This time the name is changed from Weekly to Sentinel, with the motto, "What I say unto you I say unto all, *Watch*."

We are proud of the Christian Science Sentinel, and shall look for its weekly visits with pleasurable anticipation.

A New Richmond.

The Daily Reform Press of Pueblo, Colorado, is another influential journal which has opened its columns to the cause of Christian Science. Come on, brothers!

Words of Gratitude.

Philadelphia, Pa.

Dear Sentinel:—I feel that I must send a few words of greeting and grateful thanks to God and our beloved Leader and Teacher, for the Christian Science Sentinel with its new dress and helpful motto.

Our beloved Mother is *ever* on the watchtower sending her loving, inspiring words to us her children. Through her pure thought God speaks. When the Truth first appeared to conscious mortal, the Virgin Mary, consecrated to the service of God, in the temple from her birth, was the purest type, in that age, to bring forth the child Jesus. So our Mother, when she brought forth the impersonal Truth, must have been in the sight of God the purest and best. We are accused of worshiping *her* personality. We who are striving to follow in the way she has pointed out for us, *love* her for her courage, her life of self-abnegation, her constant sacrifice, and untiring devotion to the Cause of God. We love her for the grand work she has done, and is doing. Thousands of grateful hearts throughout our land and elsewhere are blessing her for their freedom from suffering and from the slavery of the senses that bound them. She is, after many years of unceasing toil, beginning to reap what she has so long and so patiently been sowing, and, thanks to God, the crown of rejoicing is hers.

Sincerely and gratefully in Truth,

HENRIETTA E. CHANFRAU.

Chicago, January 30.

Dear Editor:—When I received the first copy of our own little paper, I felt that another human need had been met. The brief summary of things worth knowing, and the condensed items concerning the Field, seem like a supplement to our Journal. To-day the *Christian Science Sentinel* arrived. How that name and quotation remind me of the patient, loving, watchful Mother, ever on guard, and ever giving us of her richly endowed, God-inspired wisdom. Every blessing I have I owe to Christian Science. May I be worthy to work "in the Master's vineyard."

JULIA TOMLINSON.

Kansas City, Kan., January 16, 1899.

REV. MARY BAKER EDDY.

Dear Mother:—As one of your children in Christian Science, I would oft have answered the impulse of my heart to write you of my deep and sincere gratitude for the practical revelation of man's relation to God, so fully and so completely set forth in your works, and bequeathed to us as a life heritage, and also for the tender and loving admonition to hungry hearts looking heavenward; for the pitiful patience and forbearance with those seeking Christian Science, but "for the loaves and fishes." But words that would express what I felt failed me.

The present hour, however,—one made full by the blessed privilege of attending the sessions of the Board of Education,—impels me to express to the best of my ability my true sense of this great blessing.

No one that was concerned can doubt that this occasion was but the fruit of your self-less toil and love; a means to the end, in the interest of the genuine spiritual growth of Christian Scientists.

The happy and more than satisfactory result was mainly due to the marked obedience of your faithful lieutenants whom God ordained for the purpose.

Words fail me to express how important it was to me. So I must leave at God's altar my unvoiced thanks for this priceless boon. This, "God's hour," that only Mother knew how to prepare for her loved ones.

But I would say, that the only feeling that constantly animates my thought, is, "so to live that my life attests my sincerity."

Gratefully Yours,

JNO. H. WHEELER.

The Lectures.

At Louisville, Ky.

Mrs. Sue Harper Mims of Atlanta, Ga., delivered a lecture on Christian Science Thursday evening, January 19, at Library Hall.

The audience was a large one, comprising many of the most prominent and cultured people of the city, among whom were judges, lawyers, ministers, and physicians.

The lecture was most enjoyable and instructive to all present, the charming manner and exquisite voice of the speaker lending beauty to the powerful, concise handling of her subject.

She held the undivided attention of her audience through-

Digitized by Google

out, and received an appreciative outburst of applause at the close.

The newspapers were all very favorable in their comments on the lecture, and it is published in full in the Louisville Dispatch.

Mrs. Mims was introduced by Mr. T. M. Gilmore, a gentleman well known in business and literary circles, who spoke as follows:—

"Standing on one of millions of worlds, whirling through space, little atoms, and yet possessed of God-like powers; standing there with a vast eternity stretching behind us, of which we know nothing, and a vast eternity stretching before us, and into which we are plunging, but of which we know nothing, overwhelmed by the mystery of being and by the certainty of dissolution, is it any wonder that mankind cries aloud for truth, for light, and guidance?

"It is a cry that has ascended from all peoples and tribes in all times, nor have there been wanting those who profess to be able to guide into truth and light.

"Of prophets and preachers there is no lack, but the cry goes up as strong as ever, for the world demands demonstration of faith and power.

"We call ourselves a Christian people, and we point to the Bible as the word of God, but how few of us prove by our lives that we believe its teachings.

"It is true that we build magnificent churches, and some few attend them to hear the music, and, at times, the preacher; but these fine temples have always seemed to me like stones that we give to God, while his poor cry for bread all about us. We read in the Bible that a faith, as a grain of mustard seed, will remove mountains, and yet were a man to offer in this day to remove a mountain by the exercise of his faith, would he not be laughed to scorn by those who profess to believe in Christ?

"'What is Truth?' cries the world, and philosophers, astronomers, naturalists, and theologians are striving to answer the question.

"The world is not satisfied, however, for it wants something else than mere assertion.

"We have with us to-night one who professes to be able to answer this momentous question, 'What is Truth?' one who holds that faith is as potent to-day as it was nineteen hundred years ago; one who represents a movement that seems destined to become a tremendous factor in our civilization; one who will speak to you, not of the natural law in the spiritual world, but of spiritual law in the natural world. I have the honor, ladies and gentlemen, to introduce Mrs. Livingston Mims of Atlanta, Ga., who will speak to you of Christian Science."—From Courier Journal, January 20.

At Rock Island, Ill.

The Rock Island Argus of January 20, thus speaks of Mr. Kimball's lecture at that place.

Mr. Edward A. Kimball, of Chicago, appeared at Harper's Theatre Thursday evening, January 19, as a witness to the efficacy of the healing art as practised by Christian Science proficients, he having been recalled from the verge of the grave by its aid some twelve or thirteen years ago. The house was crowded, both main floor and gallery, the lecturer being moved to ask that no more be sent up-stairs before he began his discourse. He was introduced by Mr. Charles K. Mixter, and after opening his subject found it desirable to stop until the people who were a little late in arriving had disposed themselves to listen. Then he launched into his discourse, the main portion of which was devoted to the reality of the healing work done by the Church, that extends into fields not entered upon by medicine.

Mr. Kimball said: "Although I have been announced as a lecturer I prefer to speak of myself as a witness, for if it had not been for the intervention of Christian Science in my behalf I should have been dead years ago."

Note.—We are specially pleased with what Mr. Kimball said, as to his being a witness of the healing efficacy of Christian Science. The healing work of Christian Science should not be overlooked or belittled by our public lecturers or any one else. It is too important, in connection with the work and to the human race to be in any sense under-rated.

Editor.

The Rock Island Union of same date has the following to say of the lecture:—

Christian Science was intelligently explained at Harper's Theatre last night by Edward A. Kimball, C.S.D., of Chicago. The house was filled to overflowing. The audience was in the highest sense representative, and such an audience as was, indeed, in itself a great compliment to the lecturer. Charles K. Mixter introduced the lecturer, who, on noticing that the theatre was already taxed to its capacity, requested that no more people be admitted to the gallery. Mr. Kimball said that instead of a lecturer he would rather appear as a witness of the curative power of Christian Science, which he said rescued him from what he was told by his medical advisers was sure death some twelve years ago.

At Madison, Wis.

An overflowing house greeted Mr. Edward A. Kimball of Chicago, the Christian Scientist lecturer, at the Fuller Opera House, recently. The entire lower part of the house as well as the balcony was filled. The audience was also most attentive throughout. Professor D. B. Frankenburger introduced the speaker in graceful terms. He reminded his hearers that there are about one hundred and seventy-five Christian sects, and that the Scientist has shown a most remarkable growth in its thirty years of existence. While a Unitarian himself, he was glad of the opportunity to hear any new doctrine, and particularly whatever pertained to a broadening of soul and the projecting of the spiritual into life.

The Madison (Wis.) Democrat.

The following is an extract from the Wisconsin State Journal of January 25.

"It was a mingled crowd that attended 'Fuller's' last night to hear Edward A. Kimball of Chicago expound Christian Science doctrine. Except for the upper gallery, the Opera House was comfortably filled. Probably eight hundred people were present. They came with a wide diversity of motive: some merely attracted by curiosity for what to them seems an odd combination of a religious and medical schism; some from real desire to learn more of the doctrines and beliefs of what they know to be a serious and growing sect; and then those (of whom the number is apparently not small in Madison) to whom Christian Science is a new light, a refuge from the woes of this world and an answer to the religious craving in the hearts of men and to the tantalizing mystery of this life and the hereafter."

At Eau Claire, Wis.

Every seat in the Christian Science church was occupied last night to listen to E. A. Kimball, C.S.D., of Chicago, the great exponent of Christian Science. It was a large, a respectable, and intelligent audience, composed of the best classes of our citizens. Mr. Kimball is a gentleman of a fine presence and a powerful and fascinating voice. He was neatly attired and looked like a prosperous banker or wholesale merchant. He used choice language, and his diction was remarkably clear and impressive. He was well received, and those who heard him came away much pleased and benefited by the lecture. As in the time of St. Paul, when he stood on Mars Hill at Athens, and for the first time expounded the Christian religion to the idolatrous Athenians, many last night said in their hearts as the great apostle's audience did then, "We will hear thee again of this matter."

Digitized by Google

Mr. Kimball was a prosperous hardware merchant in Chicago. Some seventeen years ago he became afflicted with an incurable disease. The Christian Science people healed him. Since that time he has been a devout believer, and has dedicated his life to the propagation of Christian Science doctrine without fee or reward.—Eau Claire (Wis.) Daily Leader.

At Eel River Valley, Cal.

Dr. F. J. Fluno, M.D., C.S.D., who is a member of the official Board of Lectureship appointed by the Mother Church of Boston, Mass., addressed a very large and attentive audience on the subject of Christian Science at Hunt's Hall, Fortuna, on the night of January 17. The speaker was introduced by Mrs. D. S. Newell, who is one of the most ardent workers in the Christian Science field in this valley. The lecture was under the auspices of the First Church of Christ, Scientist. Dr. Fluno explains that the object of these lectures is to destroy erroneous impressions which may have been entertained concerning the Christian Science doctrine. The large audience listened with attention and the greatest respect to his expositions of Christian Science teachings and his exposure of fallacies which are urged against them. It was a most satisfactory effort to the adherents of a faith which boasts a large following in this valley, and those who listened, yet have not adopted it, gave the speaker respectful and candid attention. He teaches that in common with all theories in comparative infancy, whether of religious or other nature, time must be given for education, and that hastily formed judgments should, as far as possible, be avoided.

Eel River Valley (Cal.) Advance.

In New York City.

Sunday evening, January 29, a large and representative audience gathered in the auditorium of West Side Church of Christ, Scientist, West 82nd Street, New York City, to hear a lecture on "Christian Science and Common Sense," by Carol Norton, C.S.D., of the Board of Lectureship, and Second Reader of West Side Church of Christ, Scientist. The audience was thoroughly cosmopolitan, and among the most attentive listeners was a prominent Jewish Rabbi, one of the city physicians, the president of one of the largest Western railroads, and many of the workers in the world of thought in the metropolis. Mr. Norton was introduced by Mrs. Caroline W. Frame, C.S.D., First Reader of the Church, with the following appropriate words:—

"As I look over this sea of faces my heart is filled with gratitude to God and with tenderness unutterable to the woman who, through divine obedience, was found worthy to give to a suffering and waiting world this health-giving Christian Science. I take pleasure in introducing to you," etc.

The audience listened to the lecture throughout with marked attention, and one of the first persons after the lecture to make an appointment with the lecturer for an interview was a regular physician.

At Guthrie, Okla.

On Thursday evening, January 19, Mr. Alfred Farlow, C.S.D., a member of the Christian Science Board of Lectureship, delivered an interesting lecture on "Christianity made Practical through Christian Science."

The McKenson Opera House was filled with people anxious to hear what might be said on the subject. They came from all parts of the territory, and some traveled many miles. In this we have encouraging evidence of the far-reaching influence of Christian Science in our community. Some that were in doubt, are now convinced that Christian Science is Christian, and founded on the Bible.

If the grave is the gateway to immortality, then immortality is the child of mortality, or Life the child of death. Can this be?

Miscellany.

The Religion of the Future.

An address was delivered before the Church Congress, recently held at Bradford, Eng., by the Right Rev. W. Boyd Carpenter, Bishop of Ripon, containing some passages which have excited a great deal of comment. Bishop Carpenter was president of the congress, and his subject was, "The Opportunities, Needs, and Characteristics of Our Age." The closing passage, on "The Religion of the Future," which is copied from the report of the London Chronicle, is as follows:—

"The future of the world does not belong to sectarianism, and so the dream of catholicity will be fulfilled. Of another thing I am certain. As increasing light falls upon great problems, and men begin to realize how much of Judaistic, pagan, and scholastic thought is mingled with popular Christianity, how many accretions due to human weakness and race prejudice have been incorporated in our conceptions, they will distrust the Church. For every new epoch has added new dogma to faith, and with every new dogma has gone further from the simplicity of Christ. The future of the world does not belong to Latinism, and so the vision of Protestantism will be fulfilled. But of a third thing I am convinced even more surely. The religion of the future will neither be Protestant nor Catholic, but simply Christian. The dogmas of the Churches which have separated communion from communion will fall off as autumn leaves before the fresh winds of God. Many views which in the very Providence of God have played their part in clearing the thoughts of men will pass into forgetfulness. Men will not grieve to see the old things go, for a larger faith will be theirs; they will not think God's world will fall apart because we tear up parchments more or less. The Church of God will renew its youth. It will be content with a simpler symbol because it will have learned Christ. It will not need any longer Trent, or Westminster, or Lambeth, or the Vatican to lead it. It will be satisfied with simpler thoughts and a purer faith. It will be satisfied to realize that there is one Lord, one faith, one baptism, one God and Father of all."

Literary Digest.

About Vaccination.

The published accounts of the continued progress of smallpox in Manila shows that it pays no more attention to our vaccinated and re-vaccinated troops than it does to the uninoculated public. According to the medical philosophy of provaccinationists and their solemn assurances reiterated for a century past, it ought not to be possible for a case of smallpox to exist, much less for a person to die of it after having received the alleged Jennerian "protection." Still, in spite of the special "protection" received by our soldiers, they continue to have smallpox, and die of it, too, while there are constantly recurring outbreaks of the loathsome disease among the "protected" people. And yet, in spite of these hard facts, the doctors continue to preach and practise what has been aptly designated a "grotesque superstition," and the people still continue to put faith in this medical fetish.

The absurdity of the thing would be manifest to the dullest of dull minds were it not for the fact expressed in Shakespearean brevity and force concerning the folly of mortals, of whom doctors form so large a portion. There is about as much relationship between inoculation and smallpox as there is between gravitation and Barnum's white elephant, but the people love to be humbugged, and are willing to pay for it, too.

Testimonies.

To constantly absorb the good things that appear with each issue of our Journal and Sentinel, and give nothing in return, is not consistent with our teachings, so I want to give this little tithe from my storehouse.

If there is any one class of unfortunates (according to sense testimony) that ought to be more grateful than another for the blessed revelations of Christian Science, it is that one which finds their "teeth set on edge" because their parents, their parents' parents, or some other progenitor betwixt them and Adam, have "eaten sour grapes." And of this class, those that mortal mind condemns to die quickly are to be envied when compared with the nervous prostration sort, that grow fat suffering torture. The isms and ologies are all very glib with their various explanations of the whys and wherefores, but not one of them could controvert the laws of heredity or set up a defense against them, until it was revealed to our dear Mother, who our true Father and Mother are, and what Jesus meant when he said, "Call no man Father." Who but those who have participated in the "new birth," wherein we learn that instead of being heirs to sin, sickness, and death, we are "joint heirs with Christ," and that our only ancestry is Life, Truth, and Love, can appreciate the burden that is lifted, when this great fact is unfolded as a reality in consciousness?

Christian Science found me twelve years ago, suffering as indicated in the foregoing, and after about five months' treatment lifted me out of my misery. However, the healing was so slow that I doubted that Christian Science had healed me, and was inclined to think that I had simply worn the disease out; hence, like the nine lepers, I hardly returned to give thanks. Is it surprising that five years later I had to be whipped even more severely with the same trouble? Proving that mortal mind doesn't even know itself, I was not long getting back to the dear Scientist again, whom I had not seen nor hardly thought of during the intervening time, and there I found her, still working for God, the same loyal, self-sacrificing standard bearer that I have always found her.

After this second lesson the soil was ready, and the seed of Christian Science has sprung up in my consciousness, and, although I have since had this same battle to make through my own demonstration, it has been more than compensated for by the heightened understanding, and while the old has been emptied out the new has been poured in. Furthermore, by this process of weaning, we are able to have some little measure of appreciation of what the Mother has undergone to make this Truth possible to us.

I have brought Christian Science into practical operation in almost every phase of every-day life, and have yet to see it fail. Particularly in the business field has Principle solved many perplexing problems. Not always in the way that sense would have them, but after a manner that proved to me that "Principle makes no mistakes." Many of us have to learn, in the application of Christian Science in business, to let Principle govern, and not try to govern Principle. Or, as the Mother has so clearly illustrated in "Miscellaneous Writings," we must not try to "tend the regulator."

Above all, is the constant joy and peace of knowing that God is all, and that there is no power opposed to Good. That no matter what discord seems to comfort us, it is no-thing, and we have our remedy right at hand. Can any service we can perform repay for this "pearl of great price" that is ours? May our works rather than our words evidence our gratitude.

JAY G. ROBINSON.

We send to you a sketch of the work in Lima, Ohio, that when enumerating the organized Churches of Christ, Scientist, we may be included, and thus share to a degree the realization of what "Church" means in the scientific sense.

It is ten years since the first case of healing was demonstrated in our city; and through this, a family of five were awakened to inquire into the means by which it was accomplished. In the succeeding year another case, just as remarkable, brought another family of three into the same light of spiritual life. The seed had been sown and had fallen in soil, prepared by suffering, where it took deep root, for though it seemingly had many vicissitudes and hindrances, it grew.

In March, 1897, a hall was secured and public meetings started. In a few months we secured and furnished rooms of our own. In October, 1898, the First Church of Christ, Scientist, of Lima, Ohio, was organized and chartered, with twenty-two charter members, twelve of whom are members of the Mother Church.

Through the realization that our supply is infinite and inexhaustible, we have been able to demonstrate the financial problem in a manner wonderful, seemingly, even to us who know that others have done marvelous things in this line.

There is much room for growth, individually and collectively, among our members, but we realize that this demand of God is being met in each consciousness, and will of necessity manifest itself in the growth of our Church.

God grant the daily prayer,—"Thy kingdom come,"—with a glimpse of its glorious fulfilment, may be more and more realized by all who have named the name of Christian Science.

We are ever grateful to those at the helm, the Lesson Committee, who guide us into the security of the "Harbor of Love" every Sunday, where we renew our stores for the coming week's voyage. Our work is so systematized that it is a delight to know and follow the leadings of those of greater experience and understanding. And our Journal, and the new child of Love and Life, the Sentinel, such dear good friends—we greet their every appearance with renewed inspiration. It is with humble hearts we express our loyalty and deep sense of gratitude to the beloved Mother in Israel. We were rejoiced to know that many were called to receive the blessing of her teaching. Every demonstration of Love is for each loyal, patient worker in the vineyard of the Master.—Florence E. Fullerton, Lima, Ohio.

I recall a time, when in stepping down from a stool in order to prevent falling, I stepped on the edge of a platform, turning my ankle. The manifestation of fear and pain was such that I began to faint. Applying Christian Science immediately, I was soon able to stand and walk. Then the ankle commenced to swell, but Christian Science stopped the swelling at once. After a few minutes' silent mental work in an out-of-the-way corner, I used my foot; and at that time I had to be on my feet a great deal. The third day after, I looked at the foot for the first time since the occurrence, and was surprised to see several black and blue places on it. These impressed me more strongly with the severity of the sprain and the powerfulness of Christian Science in destroying it. What a great power and blessing is Christian Science, which in a few minutes enables a man to resume action, whereas, without it, he would be confined several weeks!

At another time, I had typhoid pneumonia so severely that I was in a critical condition. The Truth, through one of the Leader's loyal students, healed me, and I returned to my business in less than one half the time decreed by physicians in similar cases, and with no consequent ill effects.

Henry F. Whittier, W. Somerville, Mass.

Ludington, Mich., January 26, 1899.

At last a Church of Christ, Scientist, is added to the great number in our land. We organized December 10, 1898, with twenty charter members. The trustees are negotiating with parties for a place of worship that is better than the one we have now. We hope the deal will soon be closed satisfactorily to us all, and that we can get to work, for this field is white and ready for the harvest. Only four of us

Digitized by Google

have been taught personally, but all are loyal students of Mrs. Mary B. G. Eddy's works. All pseudo-literature has been cast out.—SARAH A. WEBB, Clerk.

Collingwood, Ont., January 24, 1899.

We have a church membership of seven; have held services in a hall for nearly two years; our progress has been seemingly slow, but knowing in whom we trust, and that "God giveth the increase," we are encouraged to work on, gaining a clearer understanding of God, "whom to know aright is Life eternal." We have had some good demonstrations. Claims of erysipelas, rheumatism, clots of blood on brain, blood poisoning, congestion, and many other diseases have yielded to Truth. The Church has lately placed Science and Health in the public library, and the Sunday School is pledged to keep the Quarterly with it. We have met the usual opposition, but God is for us, and has met our need.

CHATLEE CUNNINGHAM, Clerk.

Souvenir Spoons.

582 Monroe St., Brooklyn, N. Y.

C. S. Souvenir Co., Concord, N. H.

Gentlemen: — Will you kindly inform me the price of the Souvenir Spoons? I have observed that sometimes when we did not obey promptly we have forgotten to be obedient. Many are awake now to the request to purchase the spoons but do not know the price, and a little delay may leave them somewhat indifferent. Error is so deceiving.

Sincerely yours,

M. A. WORTHINGTON,

January 25, 1899.

For the information of Christian Scientists we will herewith give the

PRICE OF SOUVENIR SPOONS.

Silver, prepaid, each . .	$4.00
Gold, prepaid, each . .	$5.00

Stanzas on Freedom.

MEN! whose boast it is that ye
Come of fathers brave and free,
If there breathe on earth a slave
Are ye truly free and brave?
If ye do not feel the chain,
When it works a brother's pain,
Are ye not base slaves indeed,
Slaves unworthy to be freed?

. . . . . .

Is true Freedom but to break
Fetters for our own dear sake,
And, with leathern hearts, forget
That we owe mankind a debt?
No! true freedom is to share
All the chains our brothers wear,
And, with heart and hand, to be
Earnest to make others free!

They are slaves who fear to speak
For the fallen and the weak;
They are slaves who will not choose
Hatred, scoffing, and abuse,
Rather than in silence shrink
From the truth they needs must think;
They are slaves who dare not be
In the right with two or three.

JAMES RUSSELL LOWELL.

The Board of Lectureship.

THE following notice has already been given by our Leader, the Rev. Mary Baker Eddy:—

"The Christian Science Board of Directors of the Mother Church, and the branch churches of Christ, Scientist, may apply to the Board of Lectureship for lecturers, within the bounds of their sections or precincts in the United States, Canada, or Great Britain."

Applications from branch churches to the lecturers should be made through their clerks.

Lecturers may not be able to respond to such calls immediately, because of other engagements, but will as soon as possible arrange for a date that shall be mutually convenient.

Sections and Lecturers. The churches are requested not to address correspondence concerning this subject to the Editor or the Publisher of the Journal or Sentinel, or to the Clerk of the Mother Church, but to lecturers in their sections.

Eastern Section.—The lecturers for the New England States and Great Britain, are, Rev. Irving C. Tomlinson, C.S.B., Concord, N. H.; Rev. William P. McKenzie, C.S.B., 367 Harvard St., Cambridge, Mass.

Maritime Provinces, Rev. William P. McKenzie, C.S.B., 367 Harvard St., Cambridge, Mass.

The Province of Quebec, the city of Ottawa, and Kingston, Rev. Irving C. Tomlinson, C.S.B., Concord, N. H.

Middle Section.—For the states of New York, Pennsylvania, New Jersey, and Delaware, and the Province of Ontario, Carol Norton, C.S.B., 170 Fifth Ave., New York, N. Y. Rev. Arthur R. Vosburgh, C.S.B., Powers Block, Rochester, N. Y.

Southern Section.—Kentucky, Tennessee, Georgia, Florida, South Carolina, Alabama, Mississippi, Louisiana, Mrs. Sue Harper Mims, C.S.B., 575 Peachtree St., Atlanta, Ga.

District of Columbia, Maryland, Virginia, West Virginia, North Carolina, Mr. Edward H. Hammond, C.S.D., 1900 Bolton St., Baltimore, Md.

Western Section.—For the Western States and all Southern States west of the Mississippi River, Edward A. Kimball, C.S.D., 5020 Woodlawn Ave., Chicago, Ill.; Mrs. Annie M. Knott, C.S.D., 759 Woodward Ave., Detroit, Mich.

Pacific Coast Section.—F. J. Fluno, M.D., C.S.D., 1319 Grove St., Oakland, Cal.; A. A. Sulcer, M.D., C.S.B., 1062 Ninth St., Riverside, Cal.

Notices.

Lecture in Boston.

Rev. Irving C. Tomlinson, C.S.B., will lecture in the Parker Memorial, Berkeley St., Boston, Monday evening, February 27, upon the subject, "The Claims of Christian Science on People of Liberal Thought." This lecture is one of a series of public meetings on public questions arranged for by Rev. B. Fay Mills.

No subscriptions for the Quarterly will be received for less than one year. No subscriptions for the Sentinel will be received for less than six months. Orders other than subscriptions, for Sentinel, Journal, and Quarterly, should be given for current issues and back numbers only.

PER CAPITA TAXES and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

ALL correspondence with the clerk of the Mother Church on matters pertaining to his office, should be addressed to William B. Johnson, C. S. B., 95 Falmouth St., Boston, Mass.

A perusal of the article on the Board of Lectureship will disclose the fact that the Rev. Arthur R. Vosburgh, C.S.B., has been added to the Board.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Price, (cloth), each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen; all prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price 50 cents per copy; $5.00 per dozen.

CHRIST AND CHRISTMAS. An Illustrated Poem.

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5 co half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price by mail, 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

Joseph Armstrong, C. S. D., Publisher,

95 Falmouth Street, Boston, Mass.

Published by the Christian Science Publishing Society.

The Christian Science Journal.

Founded April, 1883,

By the author of "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," THE REVEREND MARY BAKER G. EDDY, Discoverer and Founder of CHRISTIAN SCIENCE.

Official Organ of The First Church of Christ, Scientist, in Boston, Mass.

The Journal is published on the first of each month, and contains interesting reports of cases of Spiritual and Physical Healing, as well as instructive discussions of the Principle and the Practice of Christian Science.

Terms of Subscription:

Payable in advance, postage free, to any part of the United States and Canada. Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscriptions, $2.40 per annum; $1.20 for six months.

Christian Science Bible Lessons.

The Christian Science Quarterly.

Published January, April, July, and October.

Contains the Lesson-Sermons which are read at the Sunday Services in all the Christian Science Churches throughout the year.

Terms of Subscription:

One Copy, one year, 50 cents; Fifty Copies or more to one address, one year, each, 50 cents. Foreign Subscriptions, one copy, one year, 60 cents. Postage prepaid to any part of the United States and Canada.

Terms of Sale:

One or more copies, postage paid, each, 15 cents; Fifty copies or more to one address, postage paid, each 12½ cents.

Miscellaneous Publications.

CHURCH MANUAL. Containing the By-Laws of the Mother Church, also list of members. Price, one copy, $1; six copies to one address, $5; twelve copies to one address, $9.

THE CHRISTIAN SCIENCE HYMNAL. Bound in two styles — cloth and leather. Cloth, per copy, prepaid, $1.15 each; per dozen $9; per half dozen, $5. Leather, per copy, prepaid, $1.40 each; per dozen, $12.00; per half dozen $6.50.

THE MOTHER CHURCH. By JOSEPH ARMSTRONG. A History of the Building of the Mother Church. The First Church of Christ, Scientist, in Boston. 103 pages. Illustrated. One copy, $1.50; Six copies, $7.00; Twelve copies, $12.00.

THE NEW WORLD, 1492, 1866, 1892. A Poem by CAROL NORTON. Illustrated in photogravure. Bound in cloth, 75 cents.

WOMAN'S CAUSE. By CAROL NORTON. A review of the work of the women of history. Paper, 32 cents. Cloth binding, 45 cents.

COMMUNION HYMN. "Saw Ye My Saviour." Words by REV. MARY BAKER G. EDDY, music by WILLIAM LYMAN JOHNSON. Price 50 cents per copy; $5.00 per dozen. Words used by special permission of Mrs. Eddy.

Pamphlets.

HEARINGS ON PROPOSED MEDICAL BILLS in Massachusetts and New York. 23 pp.

ANSWERS TO QUESTIONS IN CHRISTIAN SCIENCE. By EDWARD A. KIMBALL. 24 pp.

THE BUSWELL TRIAL. 24 pp.

REPLY TO SERMON. By SEPTIMUS J. HANA. 30 pp.

THE CHRISTIAN SCIENCE MOVEMENT. 22 pp.

HEALING THROUGH CHRISTIAN SCIENCE. By SEPTIMUS J. HANA. 32 pp.

"WHAT I SAY UNTO YOU I SAY UNTO ALL, *WATCH.*"—*Jesus.*

Published Weekly at 95 Falmouth Street. | BOSTON, MASS., FEBRUARY 16, 1899. | Vol. 1 No. 25

Our New Territories.

In order intelligently to answer the question of the standing of our new territories under the Federal Constitution, Professor Langdell ascertains that there are three meanings of the term "United States."

First. It is the collective name of the states united together by and under the Constitution, or, in other words, it means the same as the forty-five United States.

Second. It is the name of a sovereign, the body politic, a corporation aggregate.

In the first sense, the term "United States" is always plural; in its second sense it is, in strictness, always singular.

Then there is a third sense in which the term "United States" is used, namely, to designate as well the territories of the United States as the states themselves. This third use shows plainly the need of such a word or term as would signify directly not territory but sovereignty, sovereignty being the only thing that can be predicated alike of states and territories.

Professor Langdell points to the importance of understanding that the use of the term, like the similar use of the word "empire" in England, is "purely conventional, and that it has no legal or constitutional significance. Indeed, this use of the term has no connection whatever with the Constitution of the United States, and the occasion for it would have been precisely the same if the Articles of Confederation had remained in force to the present day, assuming that in other respects our history had been what it has been."

Professor Langdell's "conclusion, therefore, is that, while the term 'United States' has three meanings, only the first and second of these are known to the Constitution; and that is equivalent to saying that the Constitution of the United States, as such, does not extend beyond the limits of the states which are united by and under it—a proposition the truth of which will, it is believed, be placed beyond doubt by an examination of the instances in which the term 'United States' is used in the Constitution."

Professor Langdell then gives an exhaustive, detailed examination of these instances, clearing away by his keen observation and logic all doubts on the question.

As to the expediency of the acquisition of the islands, Professor Langdell contents himself with a few brief comments, but emphasizing the opinion that to each of the groups of Hawaiian and Spanish islands there should not be extended the revenue system of the United States, but that each should be given a revenue system of its own.

Professor Langdell concludes with these sage observations:—

"If we are to undertake the government of dependent countries, with any hope of gaining credit for ourselves, we must enter upon the task with single eye to promoting the interests of the people governed, and we must content ourselves with such material advantages as may accrue to us incidentally from a faithful discharge of our duty. Does the Constitution of the United States prevent our attempting such a role? If it does, one will be driven to the conclusion that the authors of that instrument were either less successful in saying what they meant, or else were less sagacious and far-sighted than they have had the reputation of being."

Harvard Law Review, February, 1899.

Items of Interest.

War Inquiry Board Has Finished Its Task.

The war investigating committee has finally completed its labors and sent its report to the President.

The report makes an important feature of the beef issue, and dismisses, as a general proposition, the charges that have been made against the beef furnished the army. It finds, it is understood, that most of the beef was such as could be properly furnished as an emergency ration, pointing out that the evidence showed it was never intended to be anything but an emergency ration. It says there were only two witnesses who really testified against the beef, General Miles and Major Daly, the chief surgeon, who made the report regarded as the most sensational, forwarded to the commission by General Miles.

As to the testimony of these two witnesses, the commission, it is understood, goes on to point out the mass of evidence submitted to the contrary, as offsetting this testimony.

As to such of the canned beef as was found to be objectionable, the commission points out the effect of the tropical climate in producing liquefaction of the fat in the meat, and the consequent rendering of the contents unpalatable. Most of the beef, though, is found to have been satisfactory for emergency use, where fresh beef or beef on the hoof could not be procured.

The report finds that the statement of chemical treatment made by General Miles, on the authority of Major Daly, are not borne out by the chemical experts who were also placed on the stand. It quotes from Major Daly's testimony, and then takes up the testimony of Chemists Clarke of the geological survey and Bigelow of the agricultural department, who examined an analysis of the beef submitted, and finds that as a chemical expert Major Daly is not supported by other chemical authorities, and therefore his testimony is regarded as not worthy of credence.

Eagan Will Go to Hawaii.

Brigadier-General Eagan is going to Hawaii to live next spring. His son has a plantation there, and General Eagan wants to get away from Washington. Before he goes he may ask to be placed on the retired list, out of consideration

Copyrighted, 1899, by Mary Baker G. Eddy.

Digitized by Google

for his subordinates, and especially his friend, Colonel Weston, who would have to wait six years for promotion otherwise. In this way, too, he would obtain immediate remission of his commuted sentence of suspension.

It would be a distinct saving in money to the government to have him transferred to the retired list at once, and would also be in the interest of his subordinates.

A Court of Inquiry.

The President has appointed a court of inquiry to examine into the charges made by General Miles touching the meat furnished the American army during the war with Spain. The court will convene in Washington, February 15, and will consist of Major-General Wade, Colonel George W. Davis, Ninth Infantry, and Colonel Gillespie, Corps of Engineers, now stationed in New York.

General Miles when seen had nothing to say respecting the appointment of the court. He has been accumulating a large amount of evidence along the lines of the inquiry, but he has not chosen any counsel, and a large part of his evidence has been already transmitted to the War Investigating Commission.

Filipinos' Fatal Haste.

The following cablegram has been received from Manila at the War Department from General Otis:—

"It is reported that the insurgent representative at Washington telegraphed to Aguinaldo to drive out the Americans before the arrival of re-inforcements. The despatch was received at Hong Kong and was mailed to Malolos, and Aguinaldo decided on an attack to be made about the 7th instant. The eagerness of the insurgent troops to engage precipitated a battle.

Armor for Warships.

The question of armor for the battleships and cruisers is practically settled. The appropriation bill will call for the best armor made without naming it, at a limit of $545 a ton. The expectation is that the amount allowed will supply Krupp armor, to be made in this country. The amount is made large enough to cover the cost of the armor and the payment of the royalties on the Krupp patents.

Admiral Cervera to be Prosecuted.

The Supreme Military Court, which has had under consideration the loss of the Spanish squadron at Santiago de Cuba, on July 3 last, has decided to prosecute, in connection with the disaster, Admiral Cervera and Commandante Emilio Diaz de Moreu, formerly captain of the destroyed cruiser Cristobal Colon.

Secretary Alger on the Treaty.

Secretary Alger, after the ratification of the peace treaty, said, "The ratification of the treaty, while rather tardy, is a source of gratification. The Senate's action greatly simplifies matters and clears the way for a peaceful and satisfactory settlement of affairs in the islands."

The President has sent the following nominations to the Senate: Charles J. Bell, to be assistant treasurer of the United States at New Orleans, La.; Fenton W. Gibson, surveyor of the port of New Orleans; Frank N. Wicker, appraiser of merchandise for the district of New Orleans.

An amendment to grant full suffrage to women has just passed the Oregon Legislature by a vote of 50 to 6 in the House and 25 to 1 in the Senate. Oregon women are calling Senator Fulton, who introduced the measure, "The Theodore Roosevelt of Oregon."

The nomination of the Hon. George A. Marden of Lowell, Mass., to be assistant United States treasurer at Boston, and that of Major C. K. Darling of Boston to be marshal of the district of Massachusetts, have been confirmed by the Senate.

The Senate has finally ratified the treaty without amendment, by the small majority of three votes. It is thought that the recent battle at Manila had a tendency to hasten the ratification.

Miscellany.

About Disinfectants.

As to whether infected school books can be sterilized authorities disagree, as they do on a great many other questions relating to the preservation of the public health. The agitation of this and other problems touching sanitation in the schoolroom is happily hit off by the following dialogue which we clip from an exchange:—

Teacher (to applicant for admission): "Johnnie, have you got a certificate of vaccination for smallpox?"

"Yes, sir."

"Have you been inoculated for croup?"

"Yes, sir."

"Been treated with diphtheria serum?"

"Yes, sir."

"Had your arm scratched with cholera bacilli?"

"Yes, sir."

"Have you a written guarantee that you are proof against whooping-cough, measles, mumps, scarlet fever, and old age?"

"Yes, sir."

"Have you your own private drinking cup?"

"Yes, sir."

"Do you promise not to exchange sponges with the boy next to you and never use any but your own pencil?"

"Yes, sir."

"Will you agree to have your books fumigated with sulphur and sprinkle your clothes with chloride of lime once a week?"

"Yes, sir."

"Johnnie, you have met the first requirements of the modern sanitarians and may now climb over yonder rail, occupy an isolated aluminum seat, and begin making P's and Q's as your first lesson."

Religion before Business.

The action of the merchant down in Kentucky, who a few days ago sacrificed a large and valuable stock of tobacco and cigars because their use was contrary to the tenets of his religion, has caused a great deal of comment all over the country, but he is not the only business man who has sacrificed his property because of his religious belief. There is one man in Milwaukee whose self-sacrifice goes to greater lengths than that of the Kentucky man, because the Kentuckian is wealthy and the burning of his stock cannot be said to have entailed a real sacrifice, according to the ecclesiastical view, on his part. But there is in Milwaukee one who is slowly but surely stifling his own trade through his voluntary actions and with a full knowledge of what he is doing. He is a druggist and a firm believer in the principles of Christian Science, and, to his credit be it said, he practises his belief. To such extremes does he go that when his patrons come to him with prescriptions to fill and for medicines of different sorts, he frankly tells them that the medicines will do them no good, and that they are simply wasting time and money. To the stranger this advice is hardly reassuring, but it is the doctors who find the greatest objection, and in consequence his drug store is avoided by them, so far as possible. The physicians claim that without the confidence of their patients they are powerless to help them, and the druggist by his advice tends to destroy this confidence,

Digitized by Google

so that some of the doctors are up in arms against him. It is the confidence of the patient that makes efficient the remedy of the Christian Scientist, so that, after all, there is much in the belief of physicians that savors of Christian Science, although doctors as a rule will not admit it.

The Evening Wisconsin, Milwaukee, Wis.

We know of a druggist in Boston, who takes the same position as the Milwaukee druggist above mentioned.—Editor.

The Mind's Capacity for Activity.

"The activity and capacity of the mind is past human comprehension," observed a locomotive engineer to a Washington Star reporter. "I had an experience in connection with my own mind which convinces me that the speed of a locomotive is as nothing compared with it. I was running on the road between here and New York, and it fell to my lot, in consequence of a misplaced switch, to be pitched over into a creek, locomotive and all, from a bridge. I knew exactly when the locomotive left the track, and it was not long, I assure you, before the locomotive and I reached the bottom, and yet during that time hundreds of occurrences in my life were vividly flashed through my mind. Things that I had not thought of for years passed through my mind, and appeared to remain there long enough to have had consideration. I thought of all my family, my own family, and of my father, mother, sisters, and brothers. I even thought of some children I had buried years before, and could see them as plain as if I saw them in real life. I thought of every passenger and railroad employe on the train; of the events of my whole life; how glad I was when I was given my first locomotive to run, and how proud my dear old mother was when I told her of my good fortune; of her trip from Jersey City to Philadelphia in a train that I pulled, and of what she said about it to her friends in Philadelphia and elsewhere, and of her trip back to Jersey City again; how she got out of the car at each station and came up to the locomotive to see me. All of this happened, remember, from the time the locomotive left the track till it struck the ground below—not over a few seconds."

Scientists' Annual Meeting.

Directors Elected and a Movement Started for Building a Church Edifice.

The annual meeting of the Church of Christ, Scientist, was held last Thursday evening, January 26, in the church hall, ever the Wells-Fargo Express Company office on North Cherry Street. Almost the whole membership of the church was present. The annual election of directors was held, those chosen being as follows: P. M. Johnson, Mrs. Phil Seridan, Miss Mary Hunt, Mrs. Laura Hearin, and Sam B. Jordan. Mr. and Mrs. P. M. Johnson were elected First and Second Readers, respectively.

There was started in the meeting a movement toward the erection of a church building. This matter has been considered in a general way by the church members for some time past, but no formal action has ever been taken on it. The membership of the church is not large, but there is a keen desire on the part of the congregation to secure a suitable and comfortable edifice, and accordingly the first steps were taken in Thursday's meeting. A subscription was started, and within a few minutes $225 was pledged to the building fund. An active canvass for the enlargement of the fund will be carried on. The members of the church hope to be able to build within a year or two.

Galesburg (Ill.) Republican Register.

"Apologizing to God."

Rev. F. S. C. Wicks Compares Many Over-Modest People with Moses.

"When Moses received his commission to become the leader of his people he attempted to excuse himself, saying: 'Lord! I am not eloquent, for I am slow of speech.' A divine commission is laid upon us, and we make the same evasions. We are asked to champion a righteous cause; to speak a word for truth, freedom, justice.

"We begin by stammering excuses for evading duty. We are called upon to do God's work, and we try to evade it. God's work is man's work divinely done. All honest work is God's work. If God waited for perfect men to do His work, mighty little of it would be done. It is the glory of God that He can take such poor stuff as we and do such wonderful work with it. And He could not do it unless there was something great beneath our apparent littleness.

"If you can do nothing but a worm's work, that is all that is expected of you. Do it, and don't apologize for it. Our trouble is that we are conceited when we ought to be modest, and modest when we ought to be conceited. If we only knew how great and strong and rich we are in resources, we would not be so niggardly in drawing upon them. We never know what is within us until we make demands upon ourselves."—Boston Transcript.

Peace and War Strangely Associated.

At the very moment when, after weeks of needless delay and mistaken opposition, the Senate of the United States confirmed the treaty of peace with Spain, which was negotiated at Paris, an American army was facing insurgents on the battle line in the Philippines. Surely never were peace and war so strangely associated on a single day. Surely never before in the history of the world did "manifest destiny" show itself in two such opposed manifestations on the stage of nations. Earlier ratification would have prevented, in all probability, the outbreak on the part of certain Philippine islanders. But it is certain that nothing could have so strongly influenced Senate sentiment in favor of the ratification which was agreed upon as the tidings that came on the very eve of the day appointed for the vote, of open and overt attack upon the flag and the forces of the United States by the adherents of Aguinaldo.—Boston Globe.

Services at Berlin.

It may be of interest to know that Sunday Services have been commenced in Berlin, Germany.

Among the students of the various arts and professions, were found eight Scientists, who were glad to establish a regular service. One gave the use of her home for the gatherings; and another, from the one Hymnal in the American colony, copied the words of Mother's Hymn—"Shepherd, show me how to go."

On the first Sabbath morning there were sixteen who attentively and thankfully listened to the readings from the Bible and Science and Health.—H. W., Chicago.

He Demonstrated Over It.

Our friend, Jurgen Renken, says The Mail of Tuesday, erred in saying he had the grip. Brother Renken adheres to the faith which teaches one how to triumph over the ills of the flesh, and he says if he had the grip he "demonstrated" over it and has since had a firm grip on the grip. As Jurgen seemed to be wholly free from every ache and pain we hasten to make the correction and set him right. A fellow who can down the grip as he says he did or can, has something which many other good people might well wish to have.—Sheldon Mail, Sheldon, Iowa.

An amusing little incident prefaced the Christian Science lecture at Columbia Hall recently. Just before it began the large audience was amazed to hear one of the ushers call out loudly, "Is Dr. Fox in the room? He is wanted at the door immediately." It came as a gleam of comfort to the medical profession, telling them they could have butter on their bread for a short time to come at least.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, C.S.D., Editor. — CAMILLA HANNA, C.S.D., Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.
Ten copies or more to one address, one year, each copy, ninety cents.
Twenty-five copies or more to one address, one year, each copy, eighty cents.
Fifty copies or more to one address, one year, each copy, seventy-five cents.
Foreign subscriptions, one year, each copy, $1.50.
Six month's subscriptions received at half the above rates.

TERMS OF SALE.

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, $1.50.

Entered as second-class matter.

Falsehoods Refuted.

In view of the recent revival of the old, and, as we had hoped, outworn falsehoods as to the authorship of the Christian Science text-book, "Science and Health with Key to the Scriptures," we herewith republish certain articles heretofore published in the Boston Post and the Christian Science Journal.

The Rev. Mary Baker Eddy is so generally known and so universally recognized as the author of Science and Health, that it seems incredible that persons at this late day should have the hardihood to raise any question relative to such authorship. Nevertheless, there are those who are persistently publishing, in newspapers and elsewhere, the ancient fable that Dr. P. P. Quimby is the originator of Christian Science, and that Science and Health is a plagiarism of his writings.

It is true that the origin of this fiction is traceable, in every instance, to those too wicked and dishonest to meet the strict demands of Christian Science, or whose ambitions have been thwarted because they have not been able to carry out their purposes within the ranks of Christian Science, and have, in consequence, broken away therefrom, in the hope of building up for themselves a personal following. The desire for leadership, independently of the leadership divinely bestowed on Mrs. Eddy and by virtue of her labors and achievements—such leadership growing out of the very necessity of the situation—lies at the root of the varied and persistent attacks of a personal kind upon Mrs. Eddy. This is the mainspring of the malicious fabrications which have been so industriously put into circulation in the past, and which are again coming to the surface from a similar source.

Letters to Boston Post.

First: we republish two letters which appeared several years ago in the Boston Post.

The Founder of the Mental Method of Treating Disease.

To the Editor of the Boston Post:—

We were interested in your late article on mental healing, having been acquainted with the late Dr. Phineas P. Quimby, who died many years ago, and whom we regarded highly. He was a contemporary of the noted mesmerist, Dr. Newton, and often amused us with his unique descriptions of their mesmeric performances. He, Dr. Quimby, told us one evening, on our way to a lecture at the city hall in Portland, Me., that he would exhibit some of his power to us in the hall. Accordingly, after we were seated, he said to us, "I shall set them to coughing," and immediately one after another commenced coughing, until the assembly in general joined in chorus, longer or shorter, according to directions. Then all of a sudden the coughing stopped, but our laughter was not over, for immediately the people commenced sneezing as if a sudden coryza had seized them, and pocket handkerchiefs were in quick requisition.

Dr. Quimby's method of treating the sick was manipulation; after immersing his hands in water he rubbed the head, etc. He never called his practice a mental method of treating disease, to our knowledge; and we knew him and his history. He was very successful in many cases of lameness. We asked him several times if he had any system of treating disease aside from manipulation and mesmerism, and he always evaded the subject. We were his patient, but he never gave us any further information relative to his practice, but always said, "It is a secret of my own, and I have thought best not to divulge it." After treating the sick he would retire to a side room and note with pen the especial case, with such other paraphrase as he thought best. This copy he gave to certain individuals to bring out, or, as he said, "put into shape." His scribblings were fragmentary, but sometimes very interesting. He requested us to transform them frequently, and to give them different meanings, which we did. He never took a student, to our knowledge, or gave information of his healing that was practical. He called his scribblings, essays, but never the "Science of Health." Science and Health is a work by Mrs. Mary B. G. Eddy, issued in 1875. She discovered the science of healing embodied in that work, after years of practical proof through homœopathy, that Mind instead of matter is the Principle of pathology, and finally sealed her proof by a severe casualty, from which she recovered through her exercise of mental power over the body, after the regular physicians had pronounced her case incurable.

For eighteen years Mrs. Eddy has been toiling with pen and tongue to explain her discovery of the science of mental healing, and thousands owe their recovery from hopeless suffering and their knowledge of mental healing to her unselfish labors. Her books have been widely circulated. Science and Health is in its fifth edition, and the first edition was one thousand copies. A grateful multitude acknowledge the blessings of her mental system of treating disease. Perhaps the following, in the words of her husband, the late Dr. Asa G. Eddy, best expresses it: "Mrs. Eddy's works are the outgrowths of her life. I never knew so unselfish an individual."

The last time Mrs. Eddy saw Dr. Quimby, and a short time before his death, he said to her, "I owe to you all the popularity I have in Portland." She had sent some leading articles through the press that helped destroy the prejudice against Dr. Quimby, and announced his practice an improvement on animal magnetism. Mrs. Eddy has established a Metaphysical College in Boston, chartered by the Commonwealth in 1881, where the mental treatment of disease is taught on the strict principle of Christian Science.

Eugene Greene, Providence, R. I.

To Whom it May Concern.

Mr. George A. Quimby, son of the late Phineas P. Quimby, over his own signature and before witness, stated in 1883, that he had in his possession at that time all the manuscripts that had been written by his father. And I hereby declare that, to expose the falsehood of parties publicly intimating that I have appropriated matter belonging to the aforesaid Quimby, I will pay the cost of printing and publishing the first edition of those manuscripts with the author's name:

Provided, that I am allowed first to examine said manuscripts, and do find that they were his own compositions, and not mine, that were left with him many years ago, or that they have not since his death, in 1866, been stolen from my published works. Also that I am given the right to bring out this one edition under the copyright of the owner of said manuscripts, and all the money accruing from the sales of said book shall be paid to said owner. Some of his purported writings, quoted by J. A. Dresser, were my own words, as near as I can recollect them.

Digitized by Google

There is a great demand for my work Science and Health, hence Mr. Dresser's excuse for the delay to publish Quimby's manuscripts, namely, that this period is not sufficiently enlightened to be benefited by them (?), is lost, for if I have copied from Quimby, and my book is accepted, it has created a demand for his.

MARY BAKER G. EDDY.

Boston Traveler, May 21, 1887.

Letter from a Student.

Second: we republish from the Christian Science Journal an extract from a letter written to Mrs. Eddy by one of her students.

Uncovered.

BY REV. MARY B. G. EDDY.

The following extract copied from a letter to me recently received from a well-known Christian Scientist, may at least amuse the readers of our Journal.

After doing justice to this subject, I had dropped it, as we naturally turn away from a fossilized falsehood. But evidence and testimony on the side of Truth are always in order, and proverbially better late than never.

"It might be interesting for you to know that Mr. A. J. Swartz of Chicago, went to see the late Dr. P. P. Quimby's son, and procured his father's writings for the purpose of having them published in order to show the world that your ideas were borrowed from Quimby. After having examined them, to their utter disappointment, it was found there was nothing that would compare in any way to Science and Health; and he, Swartz, concluded that it would aid you too much to publish them, so they were returned to the owner.

"Mrs. Swartz saw and read these MSS. and she gave me this information. MARY H. PHILBRICK.

"Austin, Ill., May 18, 1892."

Decision of United States Court.

Third: we republish from the Journal of Christian Science of October 6, 1883, parts of a decision of the United States Circuit Court at Boston, bearing essentially upon the subject in hand. The defendant in the action having since deceased, by request of Mrs. Eddy we do not publish his full name—"Tread lightly on the ashes of the dead." The article was written by the Rev. Mary Baker G. Eddy, and is thus entitled,—

Infringement of "Science and Health," etc. The Decision of the United States Circuit Court.

This decision was based upon a proceeding instituted by Mrs. Eddy against one E. J. A—, to restrain him from publishing a pamphlet printed and issued by him, which, for the most part, contained matter pirated from the works of Mrs. Mary Baker G. Eddy. Some time later, the said A— having published another pamphlet differing a little from the first one, the bill was amended to include this second piracy. A—, in his answer, alleged that the copyrighted works of Mrs. Eddy were not original with her, but had been copied by her, or by her direction, from manuscript originally composed by Dr. P. P. Quimby; further stating, that he had not published nor distributed any of the pamphlets complained of for more than a year previous to the time of his answer.

Testimony was taken on the part of Mrs. Eddy, the defendant, A—, being present in person and by counsel, which testimony showed that the sworn answer of A—, in which he averred that he had not distributed any of such pamphlets within the past year, was wholly untrue; and also showed a gross and wholesale piracy committed by A— on the copyrighted works of Mrs. Eddy, as set forth in her bill of complaint.

The time for taking testimony on the part of the defendant, A—, having nearly expired, he gave notice, through his counsel, that he should not put in any testimony, and a stipulation for a judgment and decree in favor of Mrs. Eddy was drawn up and signed by his counsel. [NOTE. Mrs. Eddy in her "Miscellaneous Writings," page 381, referring to the failure on the part of defendant A—'s counsel to introduce proof in support of his answer, says: "Mrs. Eddy requested her lawyer to inquire of defendant's counsel, why he did not present evidence to support his claim that Dr. Quimby was the author of her writings? Accordingly, her counsel asked the defendant's counsel this question, and he replied, in substance, "There is no evidence to present."—ED.] Upon the filing of this stipulation, the following decree was made by the Court:—

CIRCUIT COURT OF THE UNITED STATES.
DISTRICT OF MASSACHUSETTS.

Decree for perpetual Injunction.

Sept. 24, 1883. It is ordered, adjudged and decreed as follows: that the copyright heretofore obtained by the complainant under the name of Mary Baker Glover, upon the book entitled "The Science of Man, etc.," and the copyright upon the book entitled "Science and Health," Vol. 2, by Mary Baker Glover Eddy, whereby there was secured good and valid copyrights, that the said complainant has infringed the said copyrights and upon the exclusive rights of the defendant under the same, by publication, sale, and distribution of the works "The Understanding of Christianity, or God, etc.," and "Christianity, or the Understanding of God, etc.," by E. J. A—.

And it is further ordered, adjudged and decreed, that a perpetual injunction be issued against the defendant according to the prayer of the bill.

And it is further ordered, &c., that the complainant recover of the defendant her cost of suit taxed at ($113.09) one hundred thirteen and 9-100 dollars.

By the Court,

ALEX. H. TROWBRIDGE,
Deputy Clerk.

And upon such decree the following injunction was issued and served upon A—:

UNITED STATES OF AMERICA.
MASSACHUSETTS DISTRICT, ss.

The President of the United States of America to
E. J. A—, of Boston, in the
State of Massachusetts.
Your Agents and Servants send
GREETING.

WHEREAS

MARY B. G. EDDY, of said Boston, has exhibited her Bill of Complaint before the Justices of our Circuit Court of the United States for the First Circuit, begun and holden at Boston, within and for the District of Massachusetts, on the Fifteenth day of May, A.D. 1883, against you, the said

E. J. A—,

praying to be relieved touching the matters therein complained of; and whereas, by an Order from said Court, made on the Twenty-fourth day of September, A.D. 1883, it was ordered that a Writ of Injunction issue, under the seal of the said Court, to restrain you, and each and every of you, from doing all the matters and things, from the doing of which you are prayed to be restrained in said Bill, according in full with the prayer of said Bill.

We, therefore, in consideration thereof, enjoin and command you, each and every of you, that from, and immediately after the receipt and notice of this, our Writ, by you, or any of you, you shall not, directly or indirectly, print, publish, sell, give away, distribute, or in any way or manner dispose

Digitized by Google

of a certain work or book entitled "The Understanding of Christianity or God, etc.," by E. J. A—: or a certain work or book entitled "Christianity, or the Understanding of God, etc.," by E. J. A—: which said books are copies from, and infringements of the copyrighted works of the complainant, as set forth in the Bill of Complaint in this cause.

Whereof, you are not to fail, on pain of ten thousand dollars, to be levied on your and each of your goods, chattels, lands and tenements, to our use.

Witness:

The Honorable Morrison R. Waite, at Boston, this twenty-seventh day of September, in the year of our Lord, one thousand eight hundred and eighty-three.

Alex. H. Trowbridge,
Deputy Clerk.

UNITED STATES OF AMERICA.

Massachusetts District, ss:

Boston, Oct. 4, 1883.

I hereby acknowledge personal service of the within injunction.

E. J. A—.

On Friday, October 5th, 1883,—fitting day, one usually adopted for the execution of criminals,—the infringing books, to the number of (3800) thirty-eight hundred or thereabouts, were put under the edge of the knife, and their unlawful existence destroyed.

For two years past the aforesaid E. J. A— has claimed to teach—with what the law has declared pirated pamphlets—a higher order of morals and Christianity! The following is one of the sentences palmed off on his students and the public as his own: "It is Truth that heals the sick and honors God, and the work to be well done must be done unselfishly." With such sentiments, earned from the life of their real author, strange to say, E. J. A— won for a time his way into the confidence of some of the good people of Boston, while we in turn waited two years before entering a suit against him, hoping that with time he might catch the spirit of our words, reform, and stop his purloined publications.

The Public Library of Boston has the book referred to, containing the wise axioms that said A—, in over two printed pages, gave as his "Metaphysical Alphabet." What would the reverend gentleman say, if on earth, of the ability of that man to *teach his morals*, who, assuming his ethics, publishes them as his own; one of which maxims is the following: "No other man's good things shall ye desire, be they what they may, corporal or spiritual." Such a craven might crawl out of it, for a time, by a million more feigned originals, lectures or pamphlets; but his own morals would sooner or later be unmasked.

MARY B. G. EDDY.

It seems scarcely necessary to add, that Mr. A—'s defense, as set forth in his answer, having been that the works, the copyright of which he infringed, were not original with Mrs. Eddy, he would, had it been possible, have produced the proof necessary to support his answer. It is evident that this defense was vital in the case, as he apparently had no other. The fact that he failed to produce his proof is conclusive evidence that no such proof existed.

No honest or disinterested person, in the face of this record, would undertake to falsify the record by insisting that Mrs. Eddy's works were plagiarized from Dr. Quimby's writings. The absurdity, as well as the utter falsity of this claim, are at once apparent. Let us hope that, as a mere matter of self respect, if for no other reason, the persons now lending themselves to the circulation of the falsehood, will awaken to their error, and see that they are merely stultifying themselves.

Extracts from Dr. Quimby's Writings.

Fourth. Apropos of the foregoing we publish herewith some extracts from a manuscript of Dr. Quimby, which he permitted one of his patients to copy. This patient resided not far from Belfast, Maine, the home of Dr. Quimby. The copy in our possession is duly authenticated, and comes to us under such circumstances that we know it, as well as the original, to be genuine. Names are withheld because we have not permission to make them public. The copy in question—that is, the one made by the patient—was made in the year 1865. The manuscript is headed, "Questions and Answers."

In his answer to one of the questions, Dr. Quimby gave the following definition of God: "God is Truth, and there is no other truth, so if we know God, the same is known to us. I will now try to attach your senses to God, not the God of this world; not the Christian's God, but the God of the living and not of the dead. My God is my standard of truth, and as I know God the same is known to me. . . . Man's God is all the time listening to our prayers and settling all sorts of troubles. *My* God does not act at all. He has finished His work and leaves man to work out his happiness according to his own wisdom. I will give you the attributes of my God. The wisdom of God is in this letter, and if you understand you will hear his voice saying, 'I understand this.' So the understanding is God; for in *that* there is no matter; and to understand His wisdom is to know God, for that *is* wisdom."

Compare this definition with the glossarial definition of God found on page 578 of "Science and Health with Key to the Scriptures."

"God. The great I am; the all-knowing, all-seeing, *all-acting*, all-wise, all-loving, and eternal; Principle; Mind; Soul; Spirit; Life; Truth; Love; Substance; Intelligence."

The most casual glance at the two definitions shows them to be diametrically opposite. The definition of God constitutes the very groundwork of Science and Health. Every deduction contained therein is made from God as its premise. This glossarial definition is but an epitome of the elaborated definition of God running all through this book, and His supremacy is the keynote thereof. It will be seen at a glance that Dr. Quimby's God is not the supreme, all-present, all-acting, all-wise, and eternal Principle, Substance, and Intelligence, but his *understanding* of truth or God, and his God "did not act at all." His was a non-acting God; while the God defined by Mrs. Eddy is the all-acting and always-acting God.

It is difficult to see, then, how Science and Health should be a plagiarism of Dr. Quimby's writings, when the basic principle of each—that is, the definition of God—is directly the opposite of the other. Dr. Quimby's God was the human or mortal mind, the old conception of gods many; while Mrs. Eddy's God is the one universal Mind,—a vital and wholly irreconcilable difference. And Dr. Quimby adds: "All sciences are a part of God, and when a man understands science the same is known to God."

Mrs. Eddy recognizes but one Science, the Omni-Science, All-Science, which is God. Here is another vital difference.

The claim has been made that Dr. Quimby asserted the non-existence of matter. It will be noted that, in the above quotation, he simply says, that there is no matter in the understanding that is God. In other words, no matter in the mind which dictated the letter he was writing. This, however, is not maintaining the non-existence of matter. His conception of matter is still further given in another part of his manuscript. Speaking of Jesus' re-appearance to his disciples, he says: "The Christ that acted upon the idea, Jesus, admitted flesh and blood as well as his enemies; but his *wisdom* knew it was only the idea, that he could speak into existence and out. So when they destroyed the idea, *Jesus*, they destroyed to *themselves*, Jesus Christ; or mind and matter." But the matter remained as entity.

A yet more explicit statement of his conception of matter

Digitized by Google

is found in these words, which were uttered in answer to the following question:—

"How is matter made the medium of the intelligence of man? Answer. There are two ideas, one spirit and one matter. When you speak of spirit you speak of knowledge that will live after matter is destroyed or dead."

Again he says: "For Jesus only means the idea, flesh and blood, or senses, or all that we call man. Now, Christ retained all these, and to himself he had flesh and blood."

It is impossible to find in this language a conception of the unreality or non-existence of matter. Careful analysis, as well as candor, requires us to assert that between Science and Health and Dr. Quimby's writings there is also an irreconcilable difference on the other fundamental point of Science and Health—the unreality or non-existence of matter.

It is evident that Dr. Quimby was a believer in modern spiritualism, as witness the following quotation from his manuscript: "The spiritual senses have their spiritual world, with all the inventions of the natural world, but the communication is not admitted by the natural mind, except as a mystery. There is just as much progress in the spiritual as in the natural world, and the science I teach is the wisdom of my God to the senses in the spirit world. So it requires a teacher to teach the wisdom of God in the spirit world, as well as that spiritual wisdom that has been reduced to man's senses in the so-called sciences."

Compare that statement with this, contained in Science and Health, pages 238 and 239—the chapter on "Christian Science and Spiritualism:" "The notion that there can be a union of such opposites as Spirit and matter, the Infinite and finite, leads to the error seen in sin, disease, and death, and is exemplified in the mistakes of Spiritualism. As readily can you mingle fire and frost as Spirit and matter. In either case, one must destroy the other.

"Spiritualism calls one person, living in this world, *matter*, but another, who has died, but inhabits earth, it calls *spirit;* when the fact remains that neither the one nor the other corporeality is spiritual, for Spirit is one, and is God.

"The belief that one man, as spirit, can control another man, as matter, upsets both the individuality and Science of man. God controls all, as manifesting Mind, not matter. He is the only Spirit. Any other control or attraction of so-called spirit is a mortal belief, an error which ought to be known by its fruits, the perpetuity of evil."

In her work entitled "Miscellaneous Writings," page 379, Mrs. Eddy says: "After treating his patients, Mr. Quimby would retire to an ante-room and write at his desk. I had a curiosity to know if he indited anything pathological relative to his patients, and asked if I could see his pennings on my case. He immediately presented them. I read the copy in his presence, and returned it to him."

It is evident that in this manner the manuscript from which we are quoting was written. On this subject Mrs. Eddy further says of Dr. Quimby: "He was neither a scholar nor a metaphysician. I never heard him say that matter was not as real as Mind, or that electricity was not as potential or remedial, or allude to God as the Divine Principle of all healing. He certainly had advanced views of his own, but they commingled error with truth, and were not Science. On his rare humanity and sympathy one could write a sonnet."

In the same article Mrs. Eddy says that Dr. Quimby was a magnetic practitioner. She asked him "how manipulation could benefit the sick. He answered kindly and squarely, in substance, 'Because it conveys *electricity* to them.' That was the sum of what he taught her of his medical profession."

The following from the doctor's manuscript corroborates the statement that he was a magnetic practitioner. The question is asked in the manuscript, "Suppose a person were kept in a magnetic state; what would be the result?" etc. The answer is: "I think I understand your question. God is the great mesmerizer or magnet." (Here is another vital difference between his conception of God and that set forth in Science and Health.) "He speaks man or the idea into existence and attaches his senses to the idea, and we ourselves are just what we *think* we are. So is the mesmerized subject,—they are to themselves matter. You may have as many subjects as you will, and they are all in the same relation to each other as they would be in the state we call waking. So this proves that we are affected by one another, sometimes independently and sometimes governed by others, but always retaining our own identity, with all our ideas of matter and subject to all its changes as real as it is in the natural or waking state."

Every precept of Science and Health is opposed to mesmerism, thought-transference, hypnotism, and every kindred ism, as any one at a glance will see.

The doctor's manuscript is too voluminous to warrant full quotation, but we have quoted enough to indicate the tenor of the whole.

On the question of curing disease he made this statement: "Now, if you can face the error and argue it down, then you can cure the sick."

It will be readily seen that this is mind-cure, or one human mind operating upon another to destroy the error of sickness. The whole teaching of Science and Health is, that error can be destroyed only through the action or realization of the one divine Mind. This is where the line is sharply drawn between Christian Science and mind-cure, mesmerism, hypnotism, etc.

Mrs. Eddy in her "Miscellaneous Writings," page 379, further says: "It was after Mr. Quimby's death, that I discovered, in 1866, the momentous facts relating to Mind and its superiority over matter, and named my discovery Christian Science. Yet, there remained the difficulty of adjusting in the scale of Science a metaphysical *practice*, and settling the question, What shall be the outward sign of such a practice: if a divine Principle alone heals, what is the human modus for demonstrating this,—in short, how can sinful mortals prove that a divine Principle heals the sick, as well as governs the universe, time, space, immortality, man?" She adds: "But an unlooked-for, imperative, call for help, impelled me to begin this stupendous work at once, and teach the first student in Christian Science. Even as when an accident called fatal to life, had driven me to discover the Science of Life, I again, in faith, turned to Divine help,—and commenced teaching."

The results of that first teaching have spread over the world, and are too well-known to require recapitulation here.

Fifth: We republish from The Christian Science Journal of November, 1886, the following attested statement in reference to Dr. Quinby's method of healing the sick: —

I was treated by Dr. P. P. Quimby, in Portland, for neuralgia in the head. Mrs. Eddy was also a patient of his. I first met her there, and it was in the summer of 1862. His mode of treating the sick was to immerse his hands in water and manipulate their heads. My father (W. P. Morgan) offered him one thousand dollars ($1,000) to explain his method of treating disease; to which the doctor replied: *"I cannot; I do not understand it myself."* I never knew of his attempting to *teach* any one. His method was entirely different from Mrs. Eddy's system of Christian Science.

(Witness) MRS. E. A. THOMPSON.

We concur in affirming the known truth of the above statement.

MRS. A. D. MORGAN.
W. P. MORGAN, A.M.
MRS. A. R. RUTTEN.

Minneapolis, Minnesota, September, 1886.

We, the subscribers, hereby testify that the testimony signed by Mrs. E. A. Thompson, Mrs. A. D. Morgan, Mr. W. P. Morgan, A.M., and Mrs. A. R. Rutten, was spontaneously

uttered in Mrs. Eddy's class, was heard by the class of about thirty members, and was elicited accidentally.

PROF. E. J. FRENCH.
M. ANNA OSGOOD.
J. A. D. ADAMS, M.D.

From Mrs. Eddy's Pen.

Sixth: To the foregoing we are glad to add the following from the pen of Mrs. Eddy:—

"In 1861, when I first visited Dr. Quimby of Portland, Me., his scribblings were descriptions of his patients; and comprised the manuscripts that, in 1887, I advertised I would pay for having published. Before his decease, in January, 1866, he had tried to get them published and failed. The quotations contained in the article above—purporting to be Dr. Quimby's own words—were written while I was his patient in Portland and holding long conversations with him on my views of mental therapeutics. Some words in these quotations certainly read like words that I said to him, and, at his request to correct his copy, had added thereto. In his conversations with me, and in his scribblings, the word Science was not used at all, till one day I declared to him that, back of his magnetic treatment and manipulation of patients, there was a Science, and it was the science of Mind, that had nothing to do with matter, electricity, or physics. After this I noticed he used that word, as well as other terms which I employed, which seemed at first new to him. He even acknowledged this himself, and startled me by saying, what I cannot forget—it was this: "I see now what you mean, and I see that I am John, and that you are Jesus." At that date I was a staunch orthodox, and my theological belief was offended by his saying, and I entered a demurrer that rebuked him. But afterwards I concluded that he only referred to the *coming* anew of Truth, which we both desired; for in some respects he was quite a seer, and understood what I said better than some others did—and, for one so unlearned, he was a remarkable man. Had his remark related to my personality, I should still think it was profane. At first my case improved wonderfully under his treatment, but it relapsed. I was gradually emerging from *materia medica*, dogma, and creeds and drifting whither I knew not; this mental struggle might have caused my illness. The fallacy of *materia medica*, its lack of science, and the want of divinity in scholastic theology, had already dawned on me. My idealism, however, limped, for then it lacked Science. But the divine Love will accomplish what all the powers of earth combined can never prevent being accomplished—the advent of divine healing and its Divine Science."

Refutation of another Falsehood.

Seventh: In refutation of the oft-repeated falsehood that Mrs. Eddy courts deification or claims to be Christ, we republish a telegram from Mrs. Eddy to the New York World, published in that newspaper February 1, 1895, as follows:—

Concord, N. H., Feb. 1, 1895.

A despatch is given to me, calling for an interview to answer for myself, Am I the second Christ?

Even the question shocks me. What I am is for God to declare in his infinite mercy. As it is, I claim nothing more than what I am, the Discoverer and Founder of Christian Science, and the blessing it has been to mankind which eternity enfolds.

My books and teachings maintain but one conclusion and statement of the Christ and the deification of mortals.

Christ is individual, and one with God, in the sense of divine Principle and its compound divine idea.

There never was, is not now, and never can be, but one God, one Christ, one Jesus of Nazareth. Whoever in any age expresses most of the spirit of Truth and Love, the Principle of God's idea, has most of the spirit of Christ, of that Mind which was in Christ Jesus.

If Christian Scientists find in my writings, teachings, and example a greater degree of this spirit than in others, they can justly declare it. But to think or speak of me in any manner as a Christ is sacrilegious. Such a statement would not only be false, but the absolute antipode of Christian Science, and would savor more of heathenism than of my doctrines.

MARY BAKER EDDY.

The above definition of her relation to Christian Science and the world has never been changed in the slightest degree by Mrs. Eddy. If anything has been said to the contrary, either by her students or others, it has been mistakenly said. This statement is republished as a matter of simple justice to one who, so far from claiming to be a Christ, or the Christ, is constantly, in a spirit of meekness and humility, affirming and re-affirming the allness and absolute supremacy of the one and only God.

The height of Mrs. Eddy's ambition is to serve God by bringing humanity into such a relationship with Him and His law, that all the prevailing discordant conditions of humanity may be wiped away, the promises of the prophets of old fulfilled, and the teachings and works of Jesus the Christ so understood that they may be practically applied to all human conditions. This is her motive, her desire, her constant prayer, as all know who are brought into such contact with her as to be able intelligently and truthfully to state her position.

In the name of the God whom she serves, and of the humanity she desires to serve, and to the best of her ability is serving in so large a measure that untold thousands are calling her blessed, should she be stoned and maligned therefor? Let the sense of justice, which surely prevails in the human heart, candidly answer this question.

What there is in Christian Science.

What is Christian Science?

It is Christianity in its primitive form, as taught and practised for the first three centuries after Christ.

Was primitive Christianity any different from the orthodox Christianity of this period?

Yes. The primitive Christians trusted wholly in God, while orthodox Christians divide their trust between matter, money, and drugs—and God. Primitive Christians healed the sick by means of their religion. Modern orthodox Christians try to heal the sick with drugs and pray to God to help the medicine do its work.

It is often said, "Christian Science may be a very high form of theology, but I think its adherents are visionary when it comes to healing bodily diseases. Theology is one thing and doctoring is another. I think theology should be confined to its proper sphere, the salvation of souls."

Jesus did not think so. Neither did Paul nor the other early leaders. Their theology saved the sinner from his sins and healed him of his diseases by the one method of treatment. The theology of Jesus was not a system of doctoring, for he gave no medicine except divine Love, but his medicine of Love healed the sick who were beyond the help of drugs, even the lepers, the palsied, and those who had been blind from birth. Christian Science has nothing to do with doctoring, but it is the divinely appointed way of healing, for its medicine is God's love.

But it is objected, "The churches of recognized standing do not teach that the sick are to be healed by their theology. If Christian Science is right, why have the other denominations not been healing the sick for all these ages?"

Digitized by Google

That is a question they must answer for themselves. It is a question that the members of all orthodox churches are beginning to ask, and as they learn from time to time of friends healed in Christian Science, they will insist on having the question answered. Jesus never forbade orthodox Christians healing the sick, and the only reason they do not heal the sick must be that they do not know how.

Jesus did not try to keep his method of healing a secret. In Luke, 9 : 1, 2, and 6, we read, "Then he called his twelve disciples together, and gave them power and authority over all devils, and to CURE DISEASES. And he sent them to preach the kingdom of God, and to HEAL THE SICK. . . . And they departed and went through the towns, preaching the gospel, and HEALING EVERYWHERE."

Is Christian Science practical?

Eminently so. Since the writer has been interested in Christian Science he has not been sick a day; he has not tasted medicine of any description; he has entirely abandoned the liquor habit; he has entirely abandoned the smoking habit of fifteen years' standing; he has entirely abandoned the swearing habit; he has gained in fifteen months thirty-three pounds in weight, having all his previous life been unable to attain to the normal weight of a man of average height; he has gained peace of mind and courage to work out the problems of life, which at one time he felt were too difficult to warrant further effort.

The writer knows other trustworthy people in Denver who have been healed of such diseases as consumption, various bad forms of stomach trouble, sciatic rheumatism, rupture, contagious blood poisoning, defective vision, and other ailments equally serious. He personally knows hundreds of people who were constantly dosing themselves with drugs before coming into Christian Science who will solemnly declare that they have not swallowed a grain of medicine since adopting this religion, varying in their several cases from one to fifteen years; and furthermore, a large percentage of them have not been confined to bed with sickness since they became Christian Scientists.

Are Christian Scientists ignorant as a class?

Attend a meeting of Christian Scientists at any of their churches in New York, Boston, Chicago, St. Louis, Kansas City, Denver, or Salt Lake City, and judge for yourself.

Here are two recent expressions of opinion regarding the intellectual status of Christian Scientists from sources adverse to the religion:—

"At the same time, from all parts, especially in the cities and towns, come reports of the inroads of Christian Science upon our churches. Presbyterians and Baptists appear to be suffering more from it than any others. Ministers are astonished and grieved to find that some of their choicest minds and best people are affected by it. Sooner or later they quietly drop out of the churches—vanish, leaving no trace. Those people are no zealots nor fanatics. They are quiet and reserved, disposed to avoid attention and to escape even the shadow of a 'scene.' "—From the Interior (Chicago), a leading publication of the Presbyterian denomination.

"Looking at Christian Science, we see a movement which, in a very short time, has attracted many thousands of devoted followers. These people are, for the most part, cultivated and intelligent. They are intensely in earnest. They believe with the utmost sincerity that they have the message that shall save the world, and their zeal is according to their belief."—Extract from a sermon by Rev. F. W. Hamilton, in the Roxbury, Mass., Universalist Church.

How can intelligent, well instructed people swallow all the absurdities of Christian Science as set forth in "Science and Health with Key to the Scriptures," by Mrs. Eddy? Don't you admit the possibility of this theory being overturned?

Intelligent people cease to manifest intelligence in proportion to their belief in absurdity. There are no absurdities in the teachings of Christian Science. When understood, these teachings are shorn of all seeming absurdity, for when understood they are demonstrable. A theory of healing which heals all manner of diseases without recourse to material aid, is built upon a foundation impossible to be overturned—namely, Truth.

All persons will concede that the theory of arithmetic can never be overturned because it is based on truth. A schoolboy knowing that nine times nine make eighty-one, knows beyond doubt that nine times nine billions make eighty-one billions. He can never prove this by collecting eighty-one billion material objects together and counting them, but he is nevertheless absolutely certain of the correctness of his reasoning in regard to the billions, because he has proven the principle in lesser problems. So it is with Christian Science. We first prove it in small demonstrations, and having proved its Principle, we feel absolutely certain of its larger application, and in experience one finds that as he grows in the understanding of the Principle, he is able to prove it true with the larger problems as they arise.

The proofs in healing sickness connect the present age of Christian Science with the Christianity of Jesus and his disciples, showing that the practice then and now is the same, and is based upon the same rules. This renders available as incentive and proof all the demonstrations of Jesus, even his demonstration over death, and gives Christian Scientists the absolute assurance that they are in possession of a Science which will, in its ultimate application, destroy death. They are as sure of this as the schoolboy is that nine times nine billions make eighty-one billions.—Denver Republican.

Lack of Faith Overcome.

BY E. J. KNAPP.

I FEEL very deeply my debt to Christian Science, and to a most loyal apostle for the knowledge gained of God's creation, the Science of Life, which has not only healed me of seemingly incurable lung trouble, but raised me to a plane where all past unhappy, unsuccessful, and hopeless conditions of life are fast being forgotten, and I am beginning to know life as I never knew it before. I was what is called a very sensitive child, and longed many a time to do what more sturdy and less self-conscious children did with ease. I did not inherit a strong constitution. I was not satisfied nor contented, and went to extremes, both physically and mentally, suffering often from colds and sick headaches. I was advised, cautioned, and judged, until I really believed that I was oppressed beyond reason, and questioned very much the justice of it all.

About twenty years ago, typhoid pneumonia kept me in bed nine weeks, and it was over a year before strength could be gained to pursue any occupation. Each winter after this I suffered from hard colds on the lungs, each attack becoming more and more severe. I was examined for life insurance about this time and rejected on account of my lungs, and was advised to seek a milder climate. My regular physician, after a careful examination, diagnosed the case, and advised me not to spend another winter in Chicago. I went to Colorado, where five years were spent trying to get strong and to overcome the sentence that my chances of life were such that I could only expect to extend it by being very careful. During the first year I improved somewhat, but at the end of five years I returned to Chicago, discouraged, hopeless, and was compelled to take Christian Science treatment, for I had tried everything else and was literally dying by inches. My progress was slow, owing,

Digitized by Google

as I now see, to my lack of courage to rely wholly upon God's help. I had no faith in, or understanding of, God, and when pressed hard resorted to material means. There was the trouble. How to become spiritually minded and get some idea of who and what God is, seemed the only way. I read Science and Health day and night. I felt the knowledge was in that book to make me absolutely free from all troubles. This brought courage and a more earnest desire for the Truth, yet it was some time before I thought that I could rely wholly upon Christian Science; but progress was being made in all directions, until at last I overcame a cold on my lungs without any material assistance. The hard study and earnest desire had done good work.

I felt that I was on the right road to health and happiness, and if I were courageous I would win. While meeting the claim that night, iodine, mustard, whiskey, and quinine were quite forgotten, and I trusted entirely to God's goodness and allness to bring about the desired results. Here was real progress. I had met that which I most feared, conquered the fear, and found that my body responded, the lungs cleared up, I breathed naturally, and went to sleep feeling that I was master; not only healed, but I could almost see this life as a dream, in which, through living the life of Love, we had dominion and would eventually wake up to the true sense of Life. I awoke in the morning, after a good night's rest, not quite so well, I thought, although conscious of a great victory. This same claim was met afterwards many times, and when I held strictly to the truth of Being without any material help I found myself stronger each time. But when intense fear drove me to material means, it always took longer, and there was also a sense of depression or failure. The knowledge gained through demonstration had made many things plain which before were not understood. I am now in better health than I have ever known. I feel a great sense of freedom totally new to me, and I am satisfied that a scientific knowledge of the true meaning of Scripture and Christian life will bring health and happiness to the whole human race. Christian Science is a greater blessing to mankind than is generally understood.

Church Organized at Santa Ana, Cal.

I AM pleased to state that the Christian Scientists of this place, are now regularly organized, having perfected their organization within the past two weeks. We have fifteen charter members, with the prospect of some additions within the next few weeks.

Not being able to rent a furnished hall that we could have on Wednesday evening, the Scientists secured a fine hall at a moderate rental, with a seating capacity of one hundred, which was furnished at a cost of about one hundred and fifty dollars.

This hall was papered, floor covered, chairs, pulpit, and platform put in, and otherwise made comfortable and attractive.

This was a profitable demonstration, as many of the congregation are poor in this world's goods, and we are repaid many times in individual blessings, as well as increased attendance and interest. I am a business man endeavoring to demonstrate my business and surroundings so that when the call comes I may be able to go up higher.

Alba J. Padgham.

The Legal Aspect of Christian Science.

WE are permitted to publish the following interesting and able opinion of ex-Judge J. E. McKeighan of St. Louis, Mo., written to Carol Norton, C.S.D. This clear, concise, and well-sustained opinion of a lawyer of Judge McKeighan's ability, experience, and standing at the bar, will carry with it great weight among all thinking people. We take pleasure in reproducing the same in full. It is as follows:—

St. Louis, Mo., December 12, 1898.

Carol Norton, Esq., C.S.D.,

My Dear Friend:—Referring again to your letter of November 25, I have to say that I have examined the questions hereinafter referred to which you have put to me, not exhaustively, but in a general way and sufficient to satisfy my own judgment of what my answers should be, and which answers I feel reasonably assured will be sustained. Your questions are as follows:—

> Question (A).—What are your views on the legal rights and aspects of the practice of Christian Science Mind Healing, alias Mental Therapeutics, as a system of healing disease?
>
> Question (B).—Do you consider the practice of healing the sick through mental, psychical, or spiritual means, without drugs, a vital part of the Christian Religion as founded by Jesus Christ?

First:—The following are amendments to the United States Constitution as originally framed:—

"Art. I. Religious Liberty; Freedom of Speech; Right of Petition.—Congress shall make no law respecting an establishment of religion, or prohibiting the free *exercise* thereof, or abridging the freedom of speech or of the press, or the right of the people peaceably to assemble and to petition the government for a redress of grievances.

"Art. XIV. Sec. 1. Citizenship; Rights of Citizens; Due Process of Law and Equal Protection of the Laws.—All persons born or naturalized in the United States and subject to the jurisdiction thereof are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States, nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the *equal* protection of the laws."

In the State of Missouri we have a constitutional provision on the same subject, which is as follows:—

Const. of Mo. Art. II. Sec. V.—"Religious Freedom; Belief not to affect Citizens' Liberty of Conscience.—That all men have a natural and indefeasible right to worship Almighty God according to the dictates of their own conscience; that no person can, on account of his religious opinions, be rendered ineligible to any office of trust or profit under this State, nor be disqualified from testifying, or from serving as a juror; that no human authority can control or interfere with the rights of conscience; that no person ought, by any law, to be molested in his person or estate, on account of his religious persuasion or profession; but the liberty of conscience hereby secured shall not be so construed as to excuse acts of licentiousness, nor to justify practices inconsistent with the good order, peace, or safety of this State, or with the rights of others."

Most of the states, if not all (I have not looked at the Constitution of every state), have articles or sections similar to Missouri.

The healing of disease as practised by Christian Science healers has a distinct and definite religious basis. Religion, as has been said, is "Any system of doctrine or belief which teaches the true relation between God and man." Briefly stated, Christian Science teaches (as I understand),

(a) That God is Infinite, Omnipresent, Omnipotent, and Omniscient, and that He is necessarily free from sin, dis-ease, and sickness.

(b) That man (the true, real man) is created in the image and likeness of God and could not be otherwise created, and therefore man (the real man) is, like his creator, free from sin, dis-ease, and sickness.

2. That the application, understandingly and consciously, of the foregoing principle, heals the physically sick and diseased, and this application of the principle is what the healer does, whether done for others or for himself or herself.

Digitized by Google

That Christian Scientists honestly entertain the foregoing views can no more be doubted than that thousands of the hopelessly sick on the basis of *materia medica*, have been, and are being, healed daily by its application and use.

I therefore maintain that the foregoing articles of the Constitution of the United States, and similar provisions to that quoted from the Missouri Constitution, absolutely protect the Christian Science practitioner against all prosecutions for the violation of prohibitory and restraining laws enforced by penalties, and this may be considered from two aspects, viz.:—

(a) As to laws which undertake to regulate the practice of medicine by requiring diplomas from colleges and other conditions before it can be lawfully followed by a physician. So far as the courts have as yet passed upon such laws, it has been uniformly held (in the absence of words which would specifically or necessarily include Christian Scientists) that such statutes apply only to those practising medicine or surgery as they are ordinarily and popularly understood, and not to Christian Scientists or others who may use a principle of healing not requiring drugs or surgical treatment. State *vs.* Mylod (R. I. 1898), 40 Atl. Rep. 753; Wheeler *vs.* Sawyer, 15 Atl. Rep. 67.

(b) Do the foregoing constitutional provisions protect Christian Scientists who heal by the application of what they claim and honestly believe to be a divine Principle of Healing, against prosecution under any possible statute that might be framed. The only decision that has yet been made on such a statute is State *vs.* Buswell, 40 Neb. 158. There the statute defined what the practice of medicine was by declaring that it applied to any one "who shall operate on or profess to heal or prescribe for or otherwise treat any physical or mental ailment." The Supreme Court of Nebraska held that this language would include a Christian Science healer, and that a constitutional provision in that state, similar to the one hereinbefore quoted in Missouri, did not protect such healer from prosecution and conviction (although, as a matter of fact, in that case the defendant was acquitted under the charge of the trial court), and it is not known that any other prosecution has ever been instituted in that state, notwithstanding the aforesaid decision of the Supreme Court held Christian Scientists liable to prosecution under the law of that state. I presume that public sentiment and the number of cases that have been healed has been too strong for the enforcement of the law as so construed by the Supreme Court of that state. I, myself, think that the decision was wrong, and that the Supreme Court of the United States would not sustain it.

It is true that in Reynolds *vs.* U. S., 98 U. S. Rep. 142, and in Mormon Church *vs.* U. S., 136 U. S. 1, the Mormon's religious belief that polygamy was not only lawful, but inculcated as a duty by the Bible, did not protect him from prosecution under an Act of Congress making bigamy or polygamy a criminal offense.

The same defense was made in Davis *vs.* Reason, 133 U. S. 333, where a similar statute of Idaho was sustained. The Act of Congress referred to and the statute of Idaho were sustained, on the ground that they were within the police power of the state, in the interest of the peace, good order, and morals of society, and that the mere adverse belief of any sect would not be a defense against prosecution under such laws.

Careful examination of those cases will show, however, that bigamy or polygamy was recognized as having been an offense at common law, and that from the earliest history of England, polygamy has been treated as an offense against society (Reynolds *vs.* U. S., 98 U. S. 142).

The test as to what might be punished under a prohibitory law without violating the foregoing constitutional provisions, is well stated in an extract by the court in Reynolds *vs.* U. S., from 12 Hening's Stat. 84, where it is said, "That it is time enough for the rightful purpose of civil government for its officers to interfere when principles break out into *covert acts against peace and good order.*"

The Supreme Court approved this as a test as to whether a prohibitory law was or was not constitutional. So applied, it would seem to be clear enough that to hold that the foregoing principles of Christian Science as applied to healing constitute "overt acts" as practically applied against peace and good order, would be the height of absurdity.

It is also true that in Dent *vs.* West Va., 129 U. S. 114, a law was held to be constitutional which regulated the practice of medicine and required that every physician should have a diploma of some reputable medical college before he could lawfully practise his profession; but it was distinctly maintained on principle that laws might be passed to secure the people "against the consequences of ignorance and incapacity, as well as deception and fraud." Of course, this language of the court must be construed with reference to the particular case and as having relation to doctors who use drugs and practise surgery as generally and popularly understood, and not as applicable to those who relieve the sick, as Christian Scientists do, or honestly believe they do, from principles founded on a religious basis, the principles of which are not taught in medical colleges. Neither can it be claimed that there is any deception or fraud in the practice of healing by Christian Scientists. Those who use this religious system know that no medicine is used, and therefore that no knowledge or learning with respect to medicine or surgery is required.

In Regina *vs.* Thomas and Mary Ellen Wagstaff, 10 Cox's Criminal Cases, 530 (an English case), referred to with disapproval in Reynolds *vs.* U. S., 98 U. S., the defendants belonged to a sect called the "Peculiar People," and were prosecuted for manslaughter, for neglecting to call in a physician. They were acquitted on the charge of the court, which was to the effect that while the defendants, if they had refused to give the child food and it had starved to death, might have been successfully prosecuted, yet that where the question was as to "what precise medical treatment should be applied to a particular case, they got into a much higher altitude indeed," and that "there is a very great difference between neglecting a child in respect to food, in regard to which there could be but *one* opinion, and neglect of medical treatment, as to which there might be *many* opinions." In that case the defendants had anointed the child with oil, following literally the injunction in the last chapter of the General Epistle of James, which constituted a part of their religious belief.

✙

Second:—In answer to your second question, as to whether or not I consider the practice of healing the sick through mental, psychical, or spiritual means, without drugs, a vital part of the Christian religion as founded by Christian Scientists on Jesus Christ, I emphatically answer I do. Jesus Christ certainly did not use drugs in his healing, and it needs no other proof that healing was a vital part of his religion than the reading of the Gospel account of his ministry. It is true that in one case he anointed the eyes of the blind man with clay, but it is also true that he sent him to the nearest pool to wash it off, showing his contempt for all material remedy, and that the restoration of the man to sight was not from any virtue in the clay, but in the divine Principle which he employed. As he distinctly stated on another occasion (John, 14 : 16), where he said, "The words that I speak unto you I speak not of myself; but the Father that dwelleth in me, He doeth the works." That Jesus Christ also recognized healing as being a part of the religion which he taught is shown by the instances so often quoted by Christian Scientists. It is also shown by the following consideration:—

1. As already stated, the record of his ministry was as much a record of healing as of preaching or teaching.

Digitized by Google

2. In every instance where he sent out his disciples to preach the Gospel (good tidings), the injunction to heal went with the injunction to preach (Luke, 9 : 2), and his disciples followed his instruction, as it is said, "And they departed and went through the towns, preaching the Gospel and *healing* everywhere" (Luke, 9 : 6). And so when he sent out the seventy, they also were instructed to heal the sick (Luke, 10 : 9), and that the seventy followed his instructions is shown by their report, where they declared that "Even the devils are subject unto us through thy name."

Again, after the resurrection of Jesus Christ, where he appeared unto the eleven as they sat at meat (Mark, 16 : 14–20), where he directed them to "Go into all the world and preach the Gospel to every creature," he distinctly announced that the recovery of the sick should attend the believers as a sign, or, as we would say, *evidence* that they had received and understood the Truth.

Christian Scientists fail to find anything in any part of the Bible to justify the abandonment of the practice of healing as a result of the understanding of the Truth and the true relation between God and man, notwithstanding the whole religious world for centuries has ignored the most practical part of the life and teachings of Jesus Christ, namely, healing, which he practised constantly and continuously and instructed his disciples and followers to practise.

Very respectfully yours,

J. E. McKeighan.

Reply to New York Sun.

Concord, N. H.

To the Editor of The Sun.

Sir:—On December 30 you published a notable "attack" on Christian Science, signed by a Mr. Lawrence, notable chiefly for its intolerance, its nauseous epithets, its unfounded assumptions, and its ill-concealed anger at the rapid increase of the number of Mrs. Eddy's followers throughout the Christian world. In the time of Jesus and of John, the same disposition was rampant. "John came neither eating nor drinking," and the "Lawrences" said, "He hath a devil." Jesus came eating and drinking, and they said, "Behold a man gluttonous and a wine-bibber." Luke, "the beloved physician," who had ceased to practise the Old School methods of healing, and had become a Christian Scientist under the teachings of the Master, records that when the seventy returned with joy, saying, "Lord, even the devils are subject to us through thy name," Jesus rejoiced in spirit, saying, "I thank thee, O Father, . . . that thou hast hid these things from the wise and prudent [the Lawrences], and hast revealed them unto babes"—his "ignorant" followers. But is your correspondent, after all, so learned that he can afford to hold in contempt those who may not be so highly educated as he? One would scarcely think it, judging from his contribution to the Sun. He asks, "How should she know the patient was suffering from a cancer?" Obviously, first, because Mrs. Eddy was a regularly educated Homœopathic physician in her earlier days (and to-day the Homœopathic and the Old School practitioners are lying peacefully in the same professional bed); and secondly, because the Old School physician who had the case in charge before she was called, and had given it up as absolutely incurable, *said* the disease was cancer. The "ignorant" and unlettered fishermen, in their accounts of healings by the Master and the Twelve and the Seventy, never hesitated to say, for the same reason, that they were palsied, or lepers, or withered, or blind, or dumb, or insane ("possessed of devils"), or dead. But wise Mr. Lawrence would ask, in scorn, How did those fellows know the diseases mentioned were the real thing? And when it comes to a question of faith, one could believe quite as readily that a genuine cancer was *cured* "at one sitting," as that a "tumor or a sloughing sore" could be *cured* at one sitting—either being impossible to the mind of Mr. Lawrence of Flushing. And he intimates, with a recklessly easy assurance that it is a pleasure to prick, that "a vast majority" of Christian Science cures are practically frauds; that "ninety-nine cases out of a hundred" are "as far from truth as the East is from the West." How far, pray, is the East from the West? Mr. Lawrence, with all his intelligence, is sublimely unconscious of the simple fact that the East and the West are as intimately and closely joined as were the Siamese twins, and so, of course, is equally oblivious of the inappositeness of his simile. So far as his bold statement as to the "ninety-nine cases out of a hundred" is concerned, I will venture the belief that he would not dare make it under oath.

Mr. Lawrence speaks of Mrs. Eddy as "the notorious founder," etc. If he means "notorious" in the sense of noted, or well-known, there is nothing to be said; but if he uses the term in an objectionable sense, then I must ask him for specifications that come within his own personal knowledge: let him not rely upon "they says"—the coward's resort. So far as I can learn, Mrs. Eddy is leading a marvelously quiet, unostentatious, unobtrusive (so far as her manifold obligations to Christian Science work will permit), and blameless life—a life apparently altogether above and beyond any knowledge or conception of her traducer from Flushing.

He also says she "assumes that because her followers are 'persecuted' by all the decent element of the community," etc. Now she "assumes" nothing of the kind, as your correspondent well knew when he penned that sentence. The fact is, it is not "the decent element of the community" that rails at her; it was the friends and boon companions of Barabbas who cried so passionately and persistently, "Crucify him! Crucify him!"

Mrs. Eddy is no longer young; her head is as white as snow. Is it any wonder, then, that the half million children who love her should delight to call her "Mother"? And when Mr. Lawrence says she "wishes to usurp the place of Christ," and that she claims most of his prerogatives, his statements need no refutation.

The writer of this is not a Christian Scientist, but he is an intense believer in the broadest toleration of all conscientious beliefs and practices that are not clearly inimical to public morals.

Edward A. Jenks.

Christian Science as a Curative Agent and a Religion.

It is often argued that Christian Scientists should not be allowed to heal until they have graduated from some medical school and thus become able to name disease from the physician's standpoint. Were the medical fraternity justifiable in this demand, can it give us an infallible rule for such diagnosis? Dr. Goodall, while lecturing before one of the dental colleges in Philadelphia, exclaimed, "Gentlemen, if we were compelled to hold a post-mortem on every case we lose, we should frequently have cause to blush for our diagnosis." Many of us will remember the case of the late President Garfield, for whom the most eminent physicians were employed, yet the autopsy proved how absurdly incorrect were their conclusions. Thus we learn that *materia medica* itself cannot always be relied upon for correct diagnosis in its own practice.

Another idea advanced is, that Christian Scientists need the drill of *materia medica* in order to prevent contagion and thus insure safety to the public health. It is not generally understood that the same omnipresent and omnipotent Principle which destroys disease can just as effectually overcome contagion. Never under the treatment of Christian Science were nearly whole families known to be swept away by the claims of diphtheria, typhoid, scarlet fever, etc. Yet not infrequently do we hear of this in the practice of medicine, even in the families of practitioners themselves. During many years' work among so-called contagious diseases as

Digitized by Google

well as others, we have only had one claim of infection to meet, and that was in our early experience. Yet so prone is mortal man to cling to the old and reject the new, that this certain proof of non-contagion in Christian Science practice has not seemed to arrest his attention.

Another statement made is that those few unfortunates who fail to be healed in Christian Science, die horribly painful deaths. This charge we must deny, for we know of many instances when those under the care of *materia medica* were suffering beyond description, and though not healed through the treatment of Christian Science, were so relieved that their friends ever after blessed the day in which the boon was brought to them. If Christian Scientists fail to heal they very rarely fail to give relief.

Hundreds of cases of surgery are upon record which have been healed after eminent surgeons have done their best. We know personally a lady, who received a severe injury while attempting to let herself down in an elevator. She called a Christian Scientist, who treated her for a few days, when she became anxious, fearing that she would have a stiff arm. She told her healer that she thought this a serious matter and felt that she ought to consult a surgeon. The Christian Scientist replied: "That is your privilege. I will stop treatment and let you do as you think best." She consulted the surgeon who told her that the elbow joint was displaced, the socket crushed, and the arm above the elbow broken. She asked if through his treatment the arm could be perfectly restored. He said, "No; it will always be stiff." "Then," said she, "I will return and put it under the care of the Christian Scientist again, for she can do as well as that." "Very well," he replied, "but come and show it to me when the Christian Scientist gets through with it." She promised to do so, and in three months returned. She had perfect use of the arm, no stiffness discernible. The surgeon admitted that it was one of the most wonderful pieces of surgery that he had ever witnessed.

As regards obstetrics, no treatment has been found to equal Christian Science. We know a lady who under this treatment gave birth to a babe. She had a physician in attendance, but her healer, when needed, was detained for an hour, and gave absent treatment. When she arrived she found the birth had taken place and the child was quietly sleeping. The physician in charge informed her that suffering diminished instead of increased as might be expected in the old way, and seemed greatly surprised at the turn affairs had taken. The Christian Scientist gave the mother another treatment and left. The lady afterward said that that treatment did wonders for her. Both mother and babe slept quietly all night. The mother awakened a little before six in the morning, and, feeling able to do so, arose and prepared the breakfast. She never returned to her bed except to sleep, and the third day after the birth ran the sewing machine, making clothing for the little ones. The lady has been in perfect health ever since.

Through Christian Science the claim of insanity is treated as successfully as any other. A Christian Scientist, residing in this city, went to visit a friend whose husband had for ten years been pronounced insane. Through pity for the man, she began to realize the omnipresence, omnipotence, and omniscience of the One Mind, God. After a few weeks a lady of that place, seeing the change, hearing nothing, and not wishing to question the family, wrote to a leading Christian Scientist to inquire if that gentleman had been treated by Christian Science. She wrote: "He is so changed. Awakened to life as it were, looks and acts like a sane man, and is asking, through the village papers, for work. His restoration is a wonder, after being so many years dead in despondency. His family have all gone that way, and certainly no medicine has been able to restore him. I believe Christian Science to be the one means through which he must have been healed." CHRISTIAN SCIENTIST.

Rochester, N. Y., December 15, 1898.

Rochester (N. Y.) Democrat and Chronicle.

A Methodist Minister becomes a Christian Scientist.

Dear Editor:—It is about one year since I decided to be a Christian Scientist, since I said, "Your God shall be my God," and I will live and demonstrate the true Life.

After one has preached for fifteen years and has grown to believe in theology and dogmas of men, it is not easy to break away from these associations. One cannot jump from a full-fledged sectarian to an endorsement of all that is written in "Science and Health with Key to the Scriptures," at a single bound, at least I could not. It takes courage under such circumstances to break away, even enough to get a little understanding, and not back down when the light shines, but look it square in the face. The eagle can soar above the clouds and look the sun in the face, but the owls and bats skulk off in the woods when the sun comes up.

When I allowed myself to stand face to face with this wonderful Truth the issue seemed to be very great. I said I would rather die as our fathers did than to get away from the true God; but I did not read the "little book" long before I discovered that the author taught a Principle that would heal both body and mind.

I am glad I did face the issue, and now feel my feet pressing the everlasting Truth and am sure that, "All is Mind and Mind's idea" (Science and Health). The pearl of great price cannot be bought for half price. I never understood the metaphysical exegesis of the Bible until I read "Science and Health with Key to the Scriptures." On account of my old theology I could not quite see harmony between Science and the Scriptures and read the Bible only in connection with the lesson, but about four months ago I went to one of our Leader's loyal students in Peoria, Ill., for help, and since then the harmony appears as beautiful as the rippling of the brook. I see now that Christian Science runs through the whole tenor of the Scriptures from Genesis to Revelation. It is thundered in the law and figured in the types. It glitters and sparkles, it whispers and sings all through the sacred oracles. "There is no speech nor language, where their voice is not heard. Their line is gone out through all the earth, and their words to the end of the world." Christian Science is such a beautiful way, it is the way of health and holiness. It is the very way Isaiah spoke of when he said, "And an highway shall be there, and a way, and it shall be called The way of holiness; the unclean shall not pass over it. . . . No lion shall be there." There is as much difference to me now between the new and old way as there is between the rivers and the ocean. The rivers are all going toward the ocean, and one is apt to think he is on the ocean. Most people are going up stream while they think they are going toward the ocean, at least that seemed to be my experience. Some of these rivers carry beautiful boats and the merchandise looks all right to the mortal eye. I tried some of the very best-looking ones. I thought John Wesley had it about right on Christian perfection, but always thought he gave God too much trouble to make a physical resurrection. I feel now that I am in the ocean and hope soon to get class instruction that will help me cut every shore line and pass the rough rocks without floundering.

I had read something of the problem of human life but nothing that I have ever read gave any true solution as to what God and man is until I got hold of "Science and Health with Key to the Scriptures," by Mary Baker G. Eddy. How I do admire the fidelity and courage of this woman, and what wonderful deliverance her discovery has brought to me. She has tunneled the grave of materialism and bridged the river of sin, sickness, and death by showing how they are to be destroyed. I came to Christian Science through a longing of the heart to be a better man. If I had not heard the "still, small voice" saying, "What doest thou here, Elijah?" or "Adam, where art thou?" I never could have gotten away from believing soul is in the body

Digitized by Google

and life in matter. When I made enough concession to my wife to buy Science and Health, and she seemed to get so much help from reading it, the thought came to me there might be something in it that would be new under the sun; but I had not read long before I thought of that ancient axiom: "There are more things in heaven and earth, Horatio, than are dreamt of in your philosophy." I began to think there are more things in our "little book," Mrs. Eddy, than the human mind ever conceived of. I wish to say farther that this Truth is working very beautifully with me now. What a sufferer I have been with my stomach. I quit preaching and went to digging in the ground for my health—looking in the earth instead of looking up to heaven. The Psalmist says, "Hope thou in God: for I shall yet praise him, who is the health of my countenance, and my God."

For years I felt that I was digging my grave through my stomach, but I have found a new Gospel in Christian Science, that delivers one from everything that would hinder him from doing and being what God has commanded to do and to be. My thoughts may halt and seem a little lame to the older ones, but about one year ago I seemed to be half Jew and half Ashdod. I could neither say "shibboleth" nor "sibboleth," but I think now I understand some of the language of Canaan.—John C. Harned, Secor, Ill.

Questions and Answers.

Why should Christian Scientists charge for healing the sick?

Why should any one charge for anything? Why should the laborer charge for his day's labor? Why should the grocer charge for groceries, the butcher for meat, the merchant for his goods, the cobbler for mending shoes, the farmer for his produce, the lawyer for his professional services, the preacher for preaching, the physician for prescribing for and attending upon the sick?

First: Because it is right. There should be just compensation for every service rendered. This is in accord with the law of justice, and justice is God's law. It is Scriptural doctrine that the laborer is worthy of his hire or meat.

Second: Because it is a law of human necessity. Human beings must live. They are inter-dependent. In a sense, they must live off each other. In this, however, there should be trustfulness and mutual regard for the rights of each. The Golden Rule should prevail—Do unto others as you would be done by.

By every fair consideration, are not Christian Scientists entitled to reasonably adequate remuneration for their services? What rule of ethics, law, or equity, would deny them this? It is a puerile spirit indeed that seeks to dispute this right. It costs them time, money, and much pains and study to acquire the knowledge of how to heal. It costs them suffering and persecution to become Christian Scientists, and sometimes their ordinary means of subsistence. They have to live, as well as other people. Would those who dispute their right to fair compensation have them go naked, hungry, and cold? Would they have them houseless and homeless?

Many of them give their whole time to their patients, sometimes spending whole days and nights with a single patient. Should they do this for nothing? If their material wants are not met they could no more give their time to their healing work than can others spend their time without pay.

Who but a craven would accept their goodly services without a desire to repay? Who but a critic gone mad with malice would dispute their right to reasonable reward?

Christian Scientists' charges are insignificant as compared with those of ministers, lawyers, and doctors, and nearly all other lines of business.

Within our own knowledge many who had spent thousands of dollars on physicians without receiving benefit have, for a mere pittance, been healed in Christian Science.

The true Christian Scientist endeavors at once to show his patient how to heal himself by placing in his hand the book that heals. He does not seek to hold him as a patient.

Ignorance of and prejudice against Christian Science and its methods is the only excuse for the foolish claim that Christian Scientists should not charge reasonably for their work.

But Jesus received no compensation for his work?

Who ever said he did not? He wore clothes. He ate and slept. He was entertained. He was not a beggar. He did not starve. He evidently was provided for. His material, human needs were met.

He and his disciples had money provided them in some way. One of them carried a bag of silver. Jesus commanded his disciples to shake the dust off their feet in all places where they were not hospitably received—provided for. He it was who said the laborer is worthy of his meat—hire. How strange that it should be urged that those who are now doing the Master's work should go naked and starve. It is neither asked nor expected of any but Christian Scientists. Queer, is it not?

A Case for the Doctors.

THE following report in the New York Sun of December 31, of the cure of Rev. C. H. Holden, pastor of the Clinton Avenue Baptist Church in Detroit, comes perilously near a Christian Science cure. Those "fellow-pastors" should be prosecuted by the Old School physicians for unlawfully "practising medicine," for (if the report be true) they must have deprived some trembling doctor of a comfortable and long-continued income.

Concord, N. H. JUSTICE.

Detroit, December 30.—The Rev. C. H. Holden, pastor of the Clinton Avenue Baptist Church on Field Avenue, lay on a bed in an upper room of his residence yesterday, his features drawn and wasted with great bodily suffering. Around him knelt a group of fellow pastors, lifting up their voices in earnest prayer, one after another, that God would restore to health and strength and service their brother who had been stricken. The voices were beginning to quiver and tears were flowing freely, when the Rev. Mr. Barlow, an aged preacher, arose from the kneeling circle, walked over to the sufferer, and cried: "Brother Holden, in the name of the Lord Jesus Christ, I bid you rise and walk."

The next moment the stricken pastor lifted himself, placed his feet on the floor, and walked to the door of the room and back again, without suffering the slightest pain. Mr. Holden then dressed himself and began moving around the house. To-day he was without pain and said he would preach in his pulpit Sunday. Six months ago Mr. Holden was the victim of a bicycle accident. His left leg was badly bruised and kept growing worse. For six months the only rest he has had was from the use of opiates. He could not move without suffering the most excruciating pain. Mr. Holden believes that God answered the fervent prayers of his brother pastors, and that the healing is permanent.

The Lectures.

At La Crosse, Wis.

The free lecture on Christian Science, delivered at the theatre on the evening of January 23 by Edward A. Kimball, C.S.D., of Chicago, who is sent out by The First Church of Christ, Scientist, of Boston, was largely attended. Nearly every seat on the lower floor was occupied, while many were

Digitized by Google

seated in the balcony. Mr. Kimball appeared here under the auspices of the First Church of Christ of this city.

His lecture was devoted largely to wonderful cures attained through Christian Science, and he cited several cases which, if true, are marvelous. He said that all cures produced by drugs can also be produced by Christian Science, and many people who had tried all remedies were finally cured by it. There are sometimes failures, said he, and Christian Scientists do not pretend that they have reached the point where failures are impossible. There are now over five thousand persons being treated in the city of Chicago every day, and during the past eighteen years there have not been one hundred deaths under the treatment.

When there are failures, Mr. Kimball said, the Associated Press telegraphs the news all over the country, that "another victim of Christian Science has died."

Mr. Kimball related one instance which he said the audience was not obliged to believe, but it was a fact. He said about six years ago there was a little child taken to a foundling's home in Detroit. The child was not developed, having no hair on one side of her head, one eye was sunken in, and the limbs were imperfect. The child also suffered from a skin disease. A Christian Scientist took the child away from the home, and within two years she was healthy and perfect in every way.

Various other instances were referred to by the speaker, equally wonderful.—Morning Chronicle.

At Fort Worth, Texas.

January 16, 1899, Alfred Farlow, C.S.D., of Kansas City, Mo., gave a lecture in City Hall, under the auspices of the First Church of Christ, Scientist, of Fort Worth.

About six hundred were present, among them ministers, lawyers, and doctors. A number of Christian Scientists came from the neighboring towns of Dallas, Weatherford, Alido, and Veal Station to hear this lecture. The newspapers gave us a very brief report, although Mr. Farlow interviewed them personally. Since the lecture a number of strangers have come to our Wednesday evening meeting, inquiring the *way* in Christian Science. We expect to have another lecture at the end of three months, even though there is only a handful of us in Fort Worth. What the seekers after the Truth received from this lecture we do not know, but we do know that we, as Christian Science students, are more grateful than words can express to our Mother for providing these good things for us.

At Eureka, Cal.

There was a large attendance at the lecture of Dr. F. J. Fluno, of Oakland, at Russ Hall recently, the subject of the discourse being "Christian Science." The doctor talked for just one hour, and in a very able and interesting manner set forth the doctrine in which he believes. He held the attention of his hearers throughout. Besides those who attended from this city, there were over one hundred and fifty Fortunaites who came in on the special train last night to attend. At the conclusion of the lecture the visitors from the valley and a number from this city spent the time until eleven o'clock in a social chat, while waiting for the train to leave for their homes.

Dr. Fluno left for his home in Oakland on the steamer Pomona.—Eureka (Cal.) Semi-Weekly Standard.

At Eau Claire, Wis.

Kimball, the Christian Science lecturer, who was here recently is meeting with unprecedented success wherever he goes. At Madison he addressed an audience of over eight hundred, and at Minneapolis the hall was crowded to excess. People are asking themselves, "Can these things be?"

Eau Claire Daily Leader.

Testimonies.

The day that Carol Norton arrived in this city to lecture, a messenger came stating that I was wanted in a case of the grip with its so-called fatal after-effects. The sufferer was an old lady in the seventies who was being treated by *materia medica*, and the case got so bad that the good doctor told her to make preparations for death, and also recommended that if she had any relations or friends they should be sent for at once. I could not go immediately for the reason above stated, but went the day afterward, and found everything in confusion, as is usual in such cases; but after two weeks' treatment she is about the house, dressed, and able to go out, and would go were it advisable to allow her to do so. When I approached the case it almost made me quail; her age, her decrepit condition, the advanced stage of the disease, the expectoration and paroxysms of coughing, the remarks of the nurse, telling her not to be afraid to die, that she had always been a good woman, etc., made me feel a trifle squeamish, but I picked up a copy of the Psalms and read aloud the ninety-first Psalm; then I read from Science and Health, beginning with page 392, and continued reading aloud for ten pages. In the mean time the patient presented the aspect of suffocating, breath very short, panting like a dog on a hot day, but in a short time I heard the regular breathing, and then a gentle snore, and the patient had fallen asleep and slept for fully half an hour.

I then gave directions that the public should be kept away as much as possible, and promised to go again the next day, which I did. I learned then that the neighbors had been in and the subject of death had been discussed, so that fear had again taken possession, and the good work of the day previous was almost undone. I continued this way for a week, with alternate success and relapse, until finally Truth was the victor.

Several other cases of the grip have yielded to the influence of Truth as taught in Science and Health, by Mary Baker G. Eddy. One of our most prominent physicians was buried one day last week from the effects of the grip.

H. T. Howell, Pottsville, Pa.

Dear Editor:—I am reading all the Christian Science literature I can get. I believe it is the religion of Christ. I would like to take your Journal, and if you can give me the addresses of any papers, weekly or monthly journals, I would be pleased to subscribe for them. I believe Christian Science will soon be the religion of the world.

Yours for Christ and humanity,

St. Louis, Mich. Dr. W. H. Scott.

Notices.

Attention, Subscribers.

Attention is called to the fact that there is now no special price made for the Sentinel when subscribed for in connection with the Journal, as was done previous to the enlargement of the paper. The prices which now govern the Sentinel will be found on page four.

The next admission of candidates for membership with the Mother Church will take place June 3, 1899. Applications to be presented at that time must be in the hands of the clerk on or before May 15.

Per capita taxes and contributions to The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass.

Hereafter "Questions and Answers" will be found on page 14 of the Sentinel.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES.
In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Price, (cloth), each	$3.18
Two to Twelve books to one address, each, prepaid	3.00
Twelve or more books to one address, each, prepaid	2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	6.00
Twelve or more to one address, each, prepaid	5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), each, prepaid	$2.25
Twelve or more books to one address, each, prepaid	2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, prepaid	4.00
Twelve or more to one address, each, prepaid	3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid	5.00
Twelve or more to one address, each, prepaid	4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen; all prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price 50 cents per copy; $5.00 per dozen.

CHRIST AND CHRISTMAS. An Illustrated Poem.

Single book, prepaid	$3.00
Twelve or more books to one address, each, prepaid	2.50

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5 co half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price by mail, 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU I SAY UNTO ALL, *WATCH.*"—*Jesus.*

Published Weekly at 95 Falmouth Street. | BOSTON, MASS., FEBRUARY 23, 1899. | Vol. 1 No. 26

President McKinley at the Home Market Club, Boston, Mass.

PRESIDENT MCKINLEY'S visit to Boston was an important event in the history of this country. His appearance before the Home Market Club was looked forward to with unusual interest, not only by Boston and New England, but by the people of the country at large and all other countries. It was generally expected that he would outline the colonial policy of the administration, hence his words were eagerly listened to and read. His remarks were wise and conservative, but there was no attempt to meet the general expectation in this respect. His reception everywhere he appeared in Boston was most cordial and enthusiastic.

We herewith publish the substance of his remarks before the Home Market Club:—

I do not know why, in the year 1899, this republic has unexpectedly had placed before it mighty problems which it must face and meet. They have come and are here, and they could not be kept away. Many who were impatient for the conflict a year ago, apparently heedless of its larger results, are the first to cry out against the far-reaching consequences of their own act. Those of us who dreaded war most, and whose every effort was directed to prevent it, had fears of new and grave problems which might follow its inauguration.

The evolution of events which no man could control has brought these problems upon us. Certain it is that they have not come through any fault on our own part, but as a high obligation, and we meet them with clear conscience and unselfish purpose, and with good heart resolve to undertake their solution.

War was declared in April, 1898, with practical unanimity by the Congress, and, once upon us, was sustained by like unanimity among the people. There had been many who had tried to avert it, as, on the other hand, there were many who would have precipitated it at an early date. In its prosecution and conclusion the great majority of our countrymen of every section believed they were fighting in a just cause, and at home or at sea or in the field they had part in its glorious triumphs.

It was the war of an undivided nation. Every great act in its progress, from Manila to Santiago, from Guam to Porto Rico, met universal and hearty commendation. The protocol commanded the practically unanimous approval of the American people. It was welcomed by every lover of peace beneath the flag.

The Philippines, like Cuba and Porto Rico, were intrusted to our hands by the war, and to that great trust, under the providence of God and in the name of human progress and civilization, we are committed. It is a trust we have not sought; it is a trust from which we will not flinch. The American people will hold up the hands of their servants at home to whom they commit its execution, while Dewey and Otis and the brave men whom they command will have the support of the country in upholding our flag where it now floats, the symbol and assurance of liberty and justice.

What nation was ever able to write an accurate programme of the war upon which it was entering, much less decree in advance the scope of its results? Congress can declare war, but a higher power decrees its bounds and fixes its relations and responsibilities. The President can direct the movements of soldiers on the field and fleets upon the sea, but he cannot foresee the close of such movements or prescribe their limits. He cannot anticipate or avoid the consequences, but he must meet them. No accurate map of nations engaged in war can be traced until the war is over, nor can the measure of responsibility be fixed till the last gun is fired and the verdict embodied in the stipulations of peace.

We hear no complaint of the relations created by the war between this government and the islands of Cuba and Porto Rico. There are some, however, who regard the Philippines as in a different relation; but whatever variety of views there may be on this phase of the question, there is universal agreement that the Philippines shall not be turned back to Spain. No true American consents to that. Even if unwilling to accept them ourselves, it would have been a weak evasion of manly duty to require Spain to transfer them to some other power or powers, and thus shirk our own responsibility. Even if we had had, as we did not have, the power to compel such a transfer, it could not have been made without the most serious international complications. Such a course could not be thought of. And yet had we refused to accept the cession of them we should have had no power over them even for their own good.

We could not discharge the responsibilities upon us until these islands became ours, either by conquest or treaty. There was but one alternative, and that was either Spain or the United States in the Philippines. The other suggestions—first, that they should be tossed into the arena of contention for the strife of nations; or, second, be left to the anarchy and chaos of no protectorate at all—were too shameful to be considered.

The treaty gave them to the United States. Could we have required less and done our duty? Could we, after freeing the Filipinos from the domination of Spain, have left them without government and without power to protect life or property or to perform the international obligations essential to an independent state? Could we have left them in a state of anarchy and justified ourselves in our own

Copyrighted, 1899, by Mary Baker G. Eddy.

Digitized by Google

consciences or before the tribunal of mankind? Could we have done that in the sight of God or man?

Our concern was not for territory or trade or empire, but for the people whose interests and destiny, without our willing it, had been put in our hands. It was with this feeling that from the first day to the last one not one word or line went from the executive in Washington to our military and naval commanders at Manila, or to our peace commissioners at Paris, that did not put as the sole purpose to be kept in mind, first, after the success of our arms and the maintenance of our own honor, the welfare and happiness and the rights of the inhabitants of the Philippine Islands.

Did we need their consent to perform a great act of humanity? We had it in every aspiration of their minds, in every hope of their hearts. Was it necessary to ask their consent to capture Manila, the capital of their islands? Did we ask their consent to liberate them from Spanish sovereignty or to enter Manila Bay and destroy the Spanish sea power there? We did not ask these; we were obeying a higher moral obligation which rested on us and which did not require anybody's consent. We were doing our duty by them as God gave us the light to see our duty, with the consent of our own consciences and with the approval of civilization.

Every present obligation has been met and fulfilled in the expulsion of Spanish sovereignty from their islands, and while the war that destroyed it was in progress we could not ask their views. Nor can we now ask their consent. Indeed, can any one tell me in what form it could be marshalled and ascertained until peace and order, so necessary to the reign of reason, shall be secured and established? A reign of terror is not the kind of rule under which right action and deliberate judgment are possible. It is not a good time for the liberator to submit important questions concerning liberty and government to the liberated while they are engaged in shooting down their rescuers.

✠

We have now ended the war with Spain. The treaty has been ratified by the votes of more than two-thirds of the Senate of the United States and by the judgment of nine-tenths of its people. No nation was ever more fortunate in war or more honorable in its negotiations in peace. Spain is now eliminated from the problem. It remains to ask what we shall now do. I do not intrude upon the duties of Congress, or seek to anticipate or forestall its action. I only say that the treaty of peace, honorably secured, having been ratified by the United States, and, as we confidently expect, shortly to be ratified in Spain, Congress will have the power, and, I am sure, the purpose, to do what in good morals is right and just and humane for these peoples in distant seas.

It is sometimes hard to determine what is best to do, and the best thing to do is oftentimes the hardest. The prophet of evil would do nothing because he flinches at sacrifice and effort, and to do nothing is easiest and involves the least cost. On those who have things to do there rests a responsibility which is not on those who have no obligations as doers. If the doubters were in a majority, there would, it is true, be no labor, no sacrifice, no anxiety, and no burden raised or carried; no contribution from our ease and purse and comfort to the welfare of others, or even to the extension of our resources to the welfare of ourselves. There would be ease, but, alas! there would be nothing done.

But grave problems come in the life of a nation, however much men may seek to avoid them. They come without our seeking, why, we do not know, and it is not always given us to know; but the generation on which they are forced cannot avoid the responsibility of honestly striving for their solution. We may not know precisely how to solve them, but we can make an honest effort to that end, and if made in conscience, justice, and honor it will not be in vain.

The future of the Philippine Islands is now in the hands of the American people. Until the treaty was ratified or rejected, the executive department of this government could only preserve the peace and protect life and property. That treaty now commits the free and enfranchised Filipinos to the guiding hand and the liberalizing influences, the generous sympathies, the uplifting education, not of their American masters, but of their American emancipators. No one can tell to-day what is best for them or for us. I know no one at this hour who is wise enough or sufficiently informed to determine what form of government will best subserve their interests and our interests, their and our well-being.

If we knew everything by intuition—and I sometimes think there are those who believe that if we do not they do—we should not need information; but, unfortunately, most of us are not in that happy state. This whole subject is now with Congress, and Congress is the voice, the conscience, and the judgment of the American people. Upon their judgment and conscience can we not rely? I believe in them, I trust them. I know of no better or safer human tribunal than the people.

Until Congress shall direct otherwise, it will be the duty of the executive to possess and hold the Philippines, giving to the people thereof peace and order and beneficent government, affording them every opportunity to prosecute their lawful pursuits, encouraging them in thrift and industry, making them feel and know that we are their friends, not their enemies, that their good is our aim, that their welfare is our welfare, but that neither their aspirations nor ours can be realized until our authority is acknowledged and unquestioned.

✠

That the inhabitants of the Philippines will be benefited by this republic is my unshaken belief. That they will have a kindlier government under our guidance, and that they will be aided in every possible way to be a self-respecting and self-governing people, is as true as that the American people love liberty and have an abiding faith in their own government and in their own institutions.

No imperial designs lurk in the American mind. They are alien to American sentiment, thought, and purpose. Our priceless principles undergo no change under a tropical sun. They go with the flag. They are wrought in every one of its sacred folds, and are indistinguishable as its shining stars.

Why read ye not the changeless truth,
The free can conquer but to save.

If we can benefit these remote peoples, who will object? If in the years of the future they are established in government under law and liberty, who will regret our perils and sacrifices? Who will not rejoice in our heroism and humanity? Always perils, and always after them safety; always darkness and clouds, but always shining through them the light and the sunshine; always cost and sacrifice, but always after them the fruition of liberty, education, and civilization.

I have no light or knowledge not common to my countrymen. I do not prophesy. The present is all-absorbing to me, but I cannot bound my vision by the blood-stained trenches around Manila, where every red drop, whether from the veins of an American soldier or a misguided Filipino, is anguish to my heart; but by the broad range of future years, when that group of islands, under the impulse of the year just past, shall have become the gems and glories of those tropical seas; a land of plenty and of increasing possibilities; a people redeemed from savage indolence and habits, devoted to the arts of peace, in touch with the commerce and trade of all nations, enjoying the blessings of freedom, of civil and religious liberty, of education and of homes, and whose children and children's children shall for ages hence bless the American republic because it emancipated and redeemed their fatherland and set them in the pathway of the world's best civilization.

Items of Interest.

Loubet Elected.

Saturday, February 18, M. Emile Loubet was elected President of France to succeed M. Felix Faure. As was expected, the election of the new president was followed by a riot. Paris was besieged and armed cavalry was necessary to clear the streets. During the rioting forty-six persons, including fourteen policemen, were injured and two hundred and fifty arrests were made.

There is every sign of a campaign against President Loubet similar to that which drove M. Casimir-Perier to resign. Clearly, La Patrie Francaise will leave no stone unturned to achieve this object, its chief ground of objection being that the President is a Dreyfusard.

The keynote of M. Loubet's policy may probably be found in the following conversation with M. Bourgeois, leader of the Moderate Radicals, who came to offer to the new President the support of his party. Before accepting it, M. Loubet said:—

"You are doubtless aware that one of the first enactments of any ministry of mine will be a stringent law to stem the current of insult, infamy, and defamation which now befouls France. I fear that, perhaps, legislation of this kind will scarcely tally with the radical ideas."

M. Bourgeois' answer was a cheerful acquiescence.

Medical Bill Killed In Michigan.

From the Lansing Tribune we extract the following:—

Wednesday evening, before a committee of representatives, the Board of Health and Dr. Baker received a hard political blow at the hands of Dr. Charles W. H. B. Granville, president of St. Luke's Hospital at Niles. It has virtually killed whatever chance they had of passing restrictive medical laws, Dr. Granville's eloquence even making converts from the Baker ring. Many representatives were exceedingly outspoken in endorsing Granville's views, and the feeling that now pervades the Capitol is that the usefulness of the present Board of Health has passed away, and that a bill to establish a sanitary commission will be introduced to take charge of the health of the state, and that it will pass both houses.

Speaker Reed's Joke.

Speaker Reed met Representative Lacey of Iowa in the shadow of the entrance to the members' lobby of the House. He peered at the Iowa man, who bears a strong resemblance to the Secretary of War.

Walking up to him, and greeting him with a cheerful laugh and a handshake that conveyed a suggestion of great relief, he astonished the representative by drawling out:—

"Lacey, you look so much like the Secretary of War that you ought to be whitewashed."

Exports and Imports.

The foreign trade of the United States for January preserves the remarkable character of the trade for the last year. The exports of merchandise are nearly twice the imports, and the excess of exports is $57,043,639. The excess of exports in 1897 was $42,597,865, and in 1896 $57,598,960. Both the imports and exports have increased about $8,000,000, as compared with January, 1898, leaving the excess of exports substantially unchanged.

To Bar Cervera from the Cortes.

The Supreme Military Court will communicate to the Chambers its decision that Admiral Cervera and Captain Diaz Moreu, formerly commander of the Spanish cruiser Cristobal Colon, have no right to sit in Parliament, they being involved in the military proceedings resulting from the loss of the Spanish squadron at Santiago.

No Hypnotism.

Hypnotism, mesmerism, animal magnetism, and similar cults are to be prohibited in Missouri, if the Legislature will pass a bill which has been introduced. To practise or give exhibitions of any of these will be punishable by a fine of $50 to $200, or a jail sentence of thirty days.

Reports from Manila are to the effect that heavy firing was again renewed by the insurgents on Sunday last. No losses are reported, although the Americans were kept busy dodging the bullets. Our troops are suffering more from the heat than from the fire of the enemy.

Information is received from Washington that the resignation of Secretary Alger, voluntary or by request of the President, will shortly occur. It is also said that President McKinley has practically decided as to who shall be the new Secretary of War.

The cruiser New York and the battleship Indiana have sailed for Havana, where Rear Admiral Sampson will assemble the squadron, and carry out the programme of manœuvres that has been planned.

Information is received from Spain that all the surviving captains of Spanish warships destroyed in the naval battles off Santiago de Cuba and in Manila Bay by the American fleets will be court-martialled.

It is reported that a serious riot between Christians and Mohammedans has occurred in Old Servia, in which several persons were killed on both sides and many wounded.

A beautiful sword and Bible, bought by the Sunday School children, were presented to Commodore John W. Philip, who commanded the Texas during the war with Spain.

General Horace Porter, the United States ambassador to France, recently visited Rome, and was accorded a most cordial reception by the King and Queen of Italy.

Information is received that Agoncillo has left Canada, en route to London, where he hopes to interest the powers of Europe in the cause of the Filipino insurgents.

President McKinley visited the Legislature of Massachusetts and made a brief speech. He also addressed the G. A. R. veterans at their annual state encampment.

The Baldwin Locomotive Works of Philadelphia, has received an order from the Chinese government for eighty-one locomotives of modern type.

The Senate has passed a bill creating the office of admiral of the navy. Rear Admiral Dewey, it is understood, will be named for the office.

Among the pleasant duties that Congress has marked out for the President, is the presentation of a medal to Miss Helen Gould.

The Senate has confirmed the nomination of the Hon. Edward R. Meek to be district judge for the northern district of Texas.

M. Felix Faure, President of France, died very suddenly February 16, after an illness of only about four hours.

The President and his party made a circuit of the subway while in Boston.

CHRISTIAN SCIENCE SENTINEL

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY THURSDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

95 Falmouth Street, Boston, Mass., U.S.A.

SEPTIMUS J. HANNA, C.S.D., Editor. CAMILLA HANNA, C.S.D., Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.
Ten copies or more to one address, one year, each copy, ninety cents.
Twenty-five copies or more to one address, one year, each copy, eighty cents.
Fifty copies or more to one address, one year, each copy, seventy-five cents.
Foreign subscriptions, one year, each copy, $1.50.
Six month's subscriptions received at half the above rates.

TERMS OF SALE.

Two cents a copy, postpaid, to any address; twenty-five copies, forty-five cents; fifty copies, eighty cents; one hundred copies, $1.50.

Entered as second-class matter.

As to Questions.

QUESTIONS calling for answer should not be sent to the Rev. Mary Baker Eddy nor to Mr. Frye, her secretary. Questions of such character that they require answering should be addressed to the proper department in Boston.

We are aware it is difficult for the Field always to know to whom to address inquiries. The work at headquarters is necessarily divided into separate departments.

The publication of the works of the Rev. Mary Baker G. Eddy is a separate department, and everything relating to this department, of whatever nature, should be addressed to Mr. Joseph Armstrong, C.S.D., Publisher.

All applications for membership in the Mother Church and matters pertaining thereto should be addressed to Mr. Wm. B. Johnson, C.S.B., the clerk of the Church.

Matters relating to the Lectureship should be addressed to the Board of Lectureship.

Matters relating to the Massachusetts Metaphysical College and Board of Education should be addressed to the Board of Education.

Matters relating to the Publishing Society, namely, the Journal, Sentinel, Quarterly, pamphlets, tracts, etc., come within the province of the Christian Science Board of Trustees and the Business Manager of the Publishing Society, Mr. Joseph Armstrong, C.S.D. All inquiries, remittances, and other matters pertaining to the literature should be addressed to the Christian Science Publishing Society.

All inquiries or matters pertaining to cards, church notices, places of the meetings of Christian Science societies, Christian Science Institutes, Dispensaries, and Reading Rooms, should be addressed to the Christian Science Publishing Society. All inquiries with reference to the publication of pamphlets, tracts, or the designation of newspapers in which Christian Science matter shall be published, belong to the Christian Science Board of Trustees and the Business Manager. Letters addressed to the Christian Science Publishing Society requiring the action of the Board of Trustees will be duly presented to the Board.

Only letters relating to reading matter published in the Journal and Sentinel, and articles or communications for publication, should be sent to the Editorial Department. It is not the province of the editors to answer promiscuous questions relating to all branches of the work. They have neither the authority nor the information necessary to do so.

Many questions are sent to the editors, business manager, and others, both by letter and telegram, that it is impossible for them to answer. It is best for the workers in the Field to rely more upon divine guidance and less upon human, in working out the various questions that arise. Having worked them out for themselves it will be their demonstration, and not that of some other person. We recognize the fact that there are certain current matters concerning which workers in the Field must sometimes make inquiry, but by far too many questions are sent in to headquarters that can only be answered through the work and demonstration of the inquirers themselves. We especially request that the numerous inquiries as to the meaning of Church Rules and By-laws cease. We have no information relative to these not possessed by the Field. These Rules must speak for themselves. They are their own interpreters.

As to the Order of Church Services.

THERE still seems to be some questioning as to the meaning of the order of service, as set forth in the May Journal of 1896, first page. One question is, as to whether the Church Rule contained in the Manual shall be read by the Branch Churches. We will say, it is our understanding that this rule is to be read only in the Mother Church.

It is also our understanding that the Church Tenets on Communion Day are to be read only in the Mother Church.

In compliance with requests, we herewith republish the order of service to be followed in the branch churches. On ordinary Sundays the following is the order:—

1. Organ voluntary.
2. Anthem by choir.
3. Hymn.
4. Reading Scriptural selection.
5. Silent prayer followed by the audible repetition of the Lord's Prayer with its spiritual interpretation.
6. Hymn.
7. Announcing any necessary notices.
8. Reading of Lesson-Sermon.
9. Collection and solo.
10. Hymn.
11. Reading Scientific Statement of Being and pronouncing benediction.

The following is the order for Communion Day.

1. Organ voluntary.
2. Anthem by the choir.
3. Hymn.
4. Reading a Scriptural selection.
5. Silent prayer followed by the audible repetition of the Lord's Prayer with its spiritual interpretation.
6. Hymn.
7. Announcing any necessary notices.
8. Collection and solo.
9. Reading the Lesson-Sermon.
10. Kneeling in silent Communion; concluding with audible repetition of the Lord's Prayer (spiritual interpretation omitted).
11. Hymn.
12. Reading Scientific Statement of Being and pronouncing benediction.

On Wednesday evenings the following is the order:—

1. Organ Prelude.
2. Hymn.
3. Reading from the Bible and correlative passages from "Science and Health with Key to the Scriptures."
4. Silent prayer with audible repetition of the Lord's Prayer (spiritual interpretation omitted).
5. Hymn.
6. Experiences, testimonies, and remarks on Christian Science.
7. Closing Hymn.

Where there is no choir, organ, or piano, of course, only congregational singing can be had.

Miscellany.

Alger Thanks Helen Gould.

Miss Helen Gould was thanked in person by Secretary Alger for her share in the relief work done by the women of New York City in behalf of the soldiers during the late war with Spain.

The call was partly due to a woman's suggestion. The secretary has great faith in his wife, and when Mrs. Alger suggested that he call upon Miss Gould and tell her how much he personally appreciated her great generosity, the Secretary of War determined to do so. So, in spite of the weather that prevented his personal inspection of the transport Sheridan in Brooklyn, he drove to Miss Gould's Fifth-Avenue home.

The meeting between General Alger and Miss Gould was very cordial. Miss Gould declined to tell what the Secretary of War said to her, but General Alger was more communicative.

"I had long intended to thank Miss Gould in person for what she did, although she is already aware of the sentiments of the War Department toward her," he said. "This was the first opportunity I have had to do so. It is the first time I have seen her. She was extremely modest about her work. From the beginning she had longed to aid the country, and after trying several ways decided that the best plan was to aid the soldiers and sailors directly. Her only anxiety at all times, she said, was to know which of the many things needed was the wisest to do, to contribute most to the health of the men and their welfare. She said that other women had done just as much in proportion to their ability, and that the credit belonged not to her alone, but to the Woman's War Relief Association and to women everywhere who had so freely offered their services to the country. Miss Gould referred to the good work done by the women nurses."

The World Moves.

The citizens of Indianapolis gave a reception recently to Senator-elect Beveridge and Minister-to-Austria Harris, at which a number of Democrats made speeches. Mr. Beveridge, in responding to the kindly sentiments of his neighbors, among other things said:—

"As I heard the eloquent speeches of Mr. Morse, that nobleman of political foes, and of John W. Kern, that Prince Rupert of political battle, the immortal words of Galileo came to my mind, 'After all, this old world moves.' In my boyhood, creeds measured their love of God by their hatred of each other, and political parties demonstrated their affection for the flag by perpetual partisan warfare that invaded social relations. But to-day Christian harmony has taken the place of sectarian strife, and patriotic brotherhood has dethroned partisan rancor from the hearts and minds of men."

Surely the optimist is right. Slowly, but surely, the world is moving toward that time when Justice and Mercy shall walk hand in hand; when Pride shall stoop to kiss her sweeter and better sister, Humility; when Anger and Implacable Hate shall hide themselves from the haunts and homes of men. We talk of corruption and fraud in politics until we come to believe that it is all corruption and fraud, but, after all, these shadows are the more apparent because of the greater light of our day of Christianity and civilization. The world does move.—Des Moines News.

Mrs. Eddy Defines Christian Science.

Some thirty odd years ago, Mrs. Mary Baker Eddy, then of Lynn, Mass., recovered from a serious illness through the exercise, she declares, of convictions based on a new and careful study of the Bible. Impressed with the efficacy in her own case of what she regarded as a great discovery, she began applying it to others with results that led her to adopt Christian Science as the name of the new system.

According to the founder, the system is both doctrinal and curative, and it is in the latter sense that Christian Science is at the present moment the subject of sharp controversy in the United States and abroad.

Mrs. Eddy declares the cardinal point in Christian Science to be: "There is no matter; all is Mind." Further, she holds that "all evil, whether moral or physical, must be non-existent, because contrary to the omnipotent Good, God." From a survey of the healing work of Jesus, it is argued that "genuine healing must be wrought upon thought, not body," and "Jesus' mission was not limited to any period, but touches universal humanity."

Saturday Evening Post, Philadelphia, Pa.

Keel of the Maine Laid.

The anniversary of the blowing up of the battleship Maine in Havana Harbor, was marked by the beginning of work on the powerful man-of-war which will bear the name of the historic battleship.

The new Maine will be built by the Cramp Shipbuilding Company of Philadelphia, and at the company's yards at eleven o'clock on February 15 the first piece of the keel of the vessel was laid. There was no formality in the proceedings, but the shipyard was thrown open to the public and a great cheer was given by the crowd as the group of workmen set in place the first steel piece of the keel. Other pieces of the steel keel were immediately hoisted and placed by the side of the first, and thus was started what will be one of the most powerful fighters of the new navy.

The builders will endeavor to have the new battleship ready for launching on February 15 of next year, and to have her ready for service on the third anniversary of her predecessor's destruction.

President Saluted Them.

One pleasing incident of the recent visit of the President to Boston has not been reported apparently. As President McKinley and his party drove from the Touraine to go to Tremont Temple, the carriages were stopped for a minute or two at the corner of Tremont and Boylston Streets, evidently while the police cleared the way.

The President's carriage was drawn close to the curb beside the new Masonic Temple, now building. As usual, the people cheered, and Mr. McKinley bowed several times to right and to left. Putting on his hat he waved his hand to two workmen who were standing on a narrow ledge outside the building about fifty feet above the ground. The men were in overalls, having put down their tools for the moment, and seemed at first not to understand that the President of the United States saluted them. He waved his hand again and then one of the men realized that the honor was intended for them and doffed his hat. The men's embarrassment was noticeable. Boston Herald.

A Peculiar Disease Cured.

Litchfield, Mich., January 23.—Mrs. D. S. Watters, wife of a prominent business man, has been critically ill with a peculiar disease for several weeks. Local physicians are puzzled over the case, and one by one admitted they could do nothing for the patient's relief. Dr. Williams of Jonesville was called, and after several days' treatment gave up the case.

Saturday night relatives again called Dr. Williams by 'phone, and entreated that he take charge of the patient once more. It is alleged that Dr. Williams refused to respond. In the mean time the patient suffered excruciating pain, and begged for relief, even death.

Finally the services of Rev. Hayden, a Christian Scientist, formerly a Baptist minister, were accepted. Medicines were laid aside and the pain vanished. Mrs. Watters rested easily the balance of the night. Next morning she ate a breakfast of toast and poached eggs. She is now rapidly recovering.

The Rev. B. Fay Mills.

In a sermon on "The Life that Now Is," delivered at the Hollis St. Theatre, Boston, Sunday evening, February 12, the Rev. B. Fay Mills said in part: "There are four views of the present earthly life of man. First he was located on a narrow neck of land, alone, insensible. Second, life as a tale told by an idiot, full of sound and fury, signifying nothing. Third, an inexplicable problem. Fourth, spiritual life. By spiritual I mean purposeful, moral. This supposes the existence of an intelligent and benevolent consciousness working toward an end that justifies the means. We can explain evil on the basis of an infinite power of good. We cannot explain good on the hypothesis of an infinite evil. With the theory of a divided kingdom of good and evil, we can explain nothing. There is no such thing as living by an accurate and complete knowledge. The wise man lives according to the theories that will best explain the most and most important facts.

Your Vermiform Appendix.

Have you still got your vermiform appendix? If so, Dr. J. Morrison of Washington advises you to keep it, and not let some surgeon cut it out with his sharp knife.

Dr. Morrison says excision of this appendage which is giving so much trouble, is "not only improper, but criminal," and that the "abominable doctrine of evolution as applied to man is largely responsible for this surgical vagary." Dr. Hutton, another eminent physician, contends that the knife is seldom, if ever, necessary in appendicitis. On the other hand, some of the best physicians contend for the use of the knife in every case.

With the doctors disagreeing respecting your appendix, the only way is to hold on to it as long as possible. After all, it is your appendix. It doesn't belong to the doctors until they cut it off.—Des Moines News.

Benefits to Wage-earners.

Cassier's Magazine gives some figures that show in a striking manner how new inventions benefit wage-earners by providing employment in new lines of industry. In 1880 there were no electric street cars. Less than twelve thousand men operated two thousand and fifty miles of street car lines then in existence. There are now over eighteen thousand miles of electric lines, employing one hundred and sixty thousand men. In 1870 the census reported only one hundred and fifty-four shorthand writers in the United States. Owing to the invention of the typewriter, there are now about thirty-five thousand stenographers and typewriters, of whom twenty-one thousand are women.

On Christian Science.

"Observer" Has Another Letter on the Subject.

Editor Ontario:—It was recently stated in a sermon delivered in the Bridge Street Church, that Christian Science was "Pantheism," a religion of heathenism, existing before the advent of Christ, with a little addition tacked on by Mrs. Eddy. The Century dictionary defines a Pantheist as "one who believes that God and the universe are identical." Science asserts God is Spirit, and is reflected only by spiritual things. God is not, therefore, it is said, identical with material forms, but is identical with Spirit and with nothing else. Christian Science is therefore not Pantheism, but in direct opposition to it. Pantheism believes in the intelligence of matter, which belief Christian Science overthrows.

There are over four hundred sects of Christians, each one of the four hundred founding its claims upon the Bible, and having some dogma peculiar to itself, each sect numbering thousands, some millions of believers. Among them we may well ask where and what is truth? In examining the claims of a religion how often we look with a prejudiced eye? A man who is prejudiced is one who judges in advance of the evidence. He does not wait for the facts and found his judgment thereon, but comes to a conclusion because of certain mental conditions of his own. Prejudice has caused the great wars between different religions, which have deluged the world with blood, caused millions to die the most horrible of deaths from persecutions; each persecutor invoking the name of God and claiming to be warring for God to destroy obstinate unbelievers; praying to God to help their arms and destroy His enemies. Protestants have flown at each other's throats in many lands, each claiming to be God's appointed to chastise the rebellious. In these modern days better counsels prevail, and people are allowed freedom of worship and of thought, none daring to molest. Every religion must pass through a baptism of fire. For thirty years this has been the case with Christian Science. During this period Science claims a million of believers, spreading what they regard as Truth over the earth. Christian Science founds its belief on the Bible as the great corner-stone of the edifice. In the National Cyclopædia of American Biography, in a notice of Mrs. Eddy, are these words: "Many people of the thinking class are turning to this science and adopting it, because in it they find a solid foundation, a sure and abiding peace, the verification of the promises of Jesus and a demonstrable Christianity."

Nearly two thousand years have rolled away since Jesus' death. Mrs. Eddy looked at the world. Notwithstanding the efficacy of the atonement, what a picture does the world present? According to Christianity the world is leprous with sin. Instead of taking advantage of the atonement, millions are rushing to perdition. The salt of the earth, compared to the mass of men, is infinitesimal. Still there is no change. Still the promised time, when the world shall recognize Jesus, seems very distant. She thought, Have we known all the Truth? Have we followed the example and precepts of Jesus so closely that nothing remains to be done? Does nothing remain to be discovered? Must this present state of things continue? Is there no balm in Gilead—is there no physician there? Meditating on these things light came to her. She thought, We believe in God. God is good. God is everywhere. Man was created in the image and likeness of God. God is Spirit. Man is the temple of the Holy Ghost. God being the all good there cannot be evil where God is. Then there cannot be sin and disease where God is. Then is there something distinct from God in man? Christian Science reveals Mind as the only living and true God, and all that is made by Him as harmonious, immortal, and spiritual. Material sense defines life as something apart from God, and man as very far apart from God. Science reveals Life as a complete sphere, as eternal, self-existent Mind. Material sense defines life as a broken sphere, organized matter, and mind as separate from God. Science reveals Spirit as all. Material sense says that matter is something beside God, and that matter and evil are as real as Spirit and Good. Science declares that evil is the absence of Good. Good is ever-present, evil is therefore unreal and Good is all that is real. Science says to all diseases, "Know that God is all power and all presence, and there is nothing beside Him; and the sick are healed. Material sense says there is something beside Him which he does not, cannot reveal. Science declares sickness is a belief, a latent fear, made manifest on the body in different diseases. Science says to fear, You are the cause of all sickness, but you are a falsity, darkness, nothingness. You do not exist, and have no right to exist, for God, who is perfect Love, casteth out fear. Science says if suffering exists it is mental only. Matter has no sensation, and cannot suffer. A person says he is sick; convince that person that he is in error, that sickness is an evil, that it cannot possibly exist where God the Good is, and the man's mind becomes permeated with the idea, and sickness disappears. I have said matter does not, cannot suffer. Remove mortal mind from the body, and carve the body as you will, it does not suffer. Take, for example, the

Digitized by Google

hypnotist, when by his will he works upon the mind of another, so that to the subject bitter becomes sweet, sweet bitter. Legs can be amputated without pain, because the mortal mind is controlled by another mind. I have seen an enormous quantity of red pepper administered to a subject, sufficient to kill him if in a normal state, and yet do him no injury whatever, because the hypnotist controlled the mortal mind, and the subject believed it to be sugar. It is the mortal mind that makes the suffering. Now let Christian Science convince the mind that its idea of being sick is an error, because where God is there cannot be sickness, and the man recovers. This mortal mind is in antagonism to God; it is earthly and material. Christian Science is a religion of reason. Its basis demonstrable knowledge. Its God is known and provable. Its men the true image and likeness of God. Its prayer the effective, workable understanding possessed by Christ Jesus. Its principal object is the cure of sin and sickness as taught and proclaimed by Jesus. Its social and civil purpose the establishment of the brotherhood of man within the commonwealth of God. Its appeal is made to all in the words of the apostle, "Show me thy faith without thy works, and I will show thee my faith by my works." Space precludes a longer notice of Christian Science. It is impossible within the compass of a newspaper column to present more than the barest skeleton of the subject as I understand it. Those who wish to know the claims of Science should read the works of Mrs. Eddy and judge for themselves. Very superficially acquainted with the tenets of Christian Science, I am quite aware how imperfectly I have presented the subject. OBSERVER.

Belleville, Ont.

Business Men Healed.

IN the list of members of the First Church of Christ, Scientist, of Kansas City, Mo., the best-known name is that of A. E. Stilwell, president of the Kansas City, Pittsburg, and Gulf Railroad, the Missouri, Kansas, and Texas Trust Company, and many other institutions that one could name. The story of how Mr. Stilwell came to be a believer in these doctrines is full of interest, and it presents some unusual features.

About twelve years ago, Mr. Stilwell was one of the leading special agents connected with the Travelers' Insurance Company of Hartford, Conn. His duties carried him all over this country and Europe, as he had general charge of the agencies of the company.

He had long been a sufferer from spinal meningitis, and the day came when he feared he would be compelled to give up his work altogether. In the course of his travels he had appealed to physicians in all parts of America, and in many portions of Europe, but he failed to get any relief.

When his health was almost gone, he found himself in Minneapolis, Minn., and a friend in that city advised him to try Christian Science. As he expressed it himself, he "sneaked into the office of a healer," fearing that some one would see him. In three treatments he was healed of the spinal affliction entirely.

For many years Mr. Stilwell had been compelled to use glasses on account of astigmatism. Oculists of this country and Europe had been consulted, with the result that his case was pronounced incurable.

A leading English specialist went so far as to tell Mr. Stilwell that if he were to go without glasses for seventy-two hours he would lose his eyesight, and that it could never be restored.

Even though he had become a believer in Christian Science, he was afraid to throw away the glasses, and he continued to use them for several years after he was healed of the spinal trouble. About seven years ago, while at Coney Island, he dropped his glasses and they were broken. He remembered that the English oculist had told him that he must not be without them for three days, and yet the prescription for the glasses was in Kansas City, and it was impossible to get new lenses within the time required. Not knowing what else to do, he went back to New York and was treated by a Christian Science healer.

Three days lengthened into three years, and three years into twice three years, and yet Mr. Stilwell is not blind, nor has he used glasses since that lucky Friday at Coney Island.

This is the story as Mr. Stilwell himself tells it.

Harry P. Child, assistant general manager of the Kansas City Stock Yards Company, is another of those who have had remarkable ocular "demonstrations." Through fifteen years Mr. Childs suffered with granulated eyelids. Doctor after doctor was called, but the affliction grew worse instead of better. During the last of the years of misery, Mr. Childs was in a dark room fifteen times, and each time he entered it he remained for two weeks, making thirty out of fifty-two weeks spent in almost total darkness.

At the end of the year of blackness, he was discharged by the doctor and pronounced cured. It was only a few days until his eyes were covered with ulcers, and the doctor was recalled. After a thorough examination the physician announced to Mr. Childs that medical skill could not do anything for him, and that he might as well make up his mind to the fact that his eyesight was gone forever.

It was a desperate situation, and in his desperation Mr. Childs was persuaded to try Christian Science. He says that he was treated less than a week before his eyes were healed completely, and he is using them to-day.—Kansas City Times.

The Lectures.

At New York City.

A lecture was delivered by Mr. Carol Norton, C.S.D., Wednesday evening, February 15, at Scottish Rite Hall, Madison Avenue and Twenty-ninth Street, New York City. His subject was, "Christian Science and Common Sense." The lecture was given under the auspices of the Second Church of Christ, Scientist, and took the place of the regular Wednesday evening meeting. The meeting was opened by the singing of our Mother's hymn, "Shepherd, show me how to go," which was read by the First Reader of the church, Mrs. Laura Lathrop, C.S.D.

The lecturer was then introduced by Mr. Arthur E. Stilwell, C.S., President of Kansas City, Pittsburg, and Gulf Railroad, who spoke substantially as follows:—

As the children of Israel were led through the desert by the pillar of fire by night and of cloud by day, so to-day through the desert of material sense over one million people are being led into spiritual understanding by the great truths that Mrs. Eddy has brought to this world. It has been truly said that no prophet ever came to this earth, but that the first thing he encountered was a stone wall across his path. And so it has been with Mrs. Eddy in her efforts to re-establish in this century the pure spiritual teachings of Christ. She has been trying to follow his commands when he said, "Go ye into all the world and preach the Gospel, heal the sick;" trying to bring to the world the healing power which our great Master came to give to this world. Thirty years ago her system was met with contempt. No one would believe in her ideas for quite a while. At last a few were healed; a few heard the glad tidings which she had brought to the world, or which she had rediscovered. Jesus first brought it to the world, but beneath the mass of theology and dogma it was hidden, and thirty years ago she found it, and to-day, through the desert of material sense over a million people are following this great light.

I myself have witnessed its growth in England, I have witnessed its growth on the Continent, and in the city in which I live—Kansas City. Ten years ago there were a very few Christian Scientists there, and now we number over two thousand, and have two church organizations, one of which

Digitized by Google

has just completed a fine edifice with a seating capacity of fourteen hundred, being one of the largest churches in Kansas City. In that city hundreds have been healed of all kinds of incurable diseases. I myself know many who expected to be operated upon by a surgeon, and as a last resort successfully tried Christian Science.

I myself, eleven years ago, was healed of a so-called incurable spinal disease; and was also cured at that time of a skin disease that I had had for two years which had baffled the skill of the best physicians; and four years later I was cured of very bad eyesight. And since that time any number of my friends, especially those in the employ of the company that I am with, have had their eyesight restored and have been able to give up glasses. Now it is strange that while all the world was preaching the Gospel as Christ had commanded, that they were satisfied if they did not heal the sick. To-day hundreds of thousands of people in this land have been healed, and I suppose that out of the number at least eighty per cent were healed only by coming to Christian Science as a last resort. They came when all material means had failed them, and this great spiritual Truth not only healed them physically but also healed them mentally.

I was once riding in France, and there you know most of the farmers live in small villages, few of them living on their farms. It was about dusk, and as we were coming through a little village I could hear the vesper bells ringing, and as those vesper bells were ringing you could see the laborers, who had been bending over and looking down to the ground, straighten up and think of home. Now it seemed to me that that was the best illustration that I had ever seen of the power of Christian Science. We were stooping over and looking down into matter. We were thinking of nothing but matter; we were not obeying the commands of the Master when he said, "Look up." And these great truths, like the vesper bells, peal out their message. We hear their tones, which sound sweet to us, and we look toward Christian Science and are healed.

We have with us to-night a gentleman whom I have known for years who will speak to you about Christian Science. He has been in the front ranks spreading this beautiful Truth. He has been healing the sick for a number of years to my certain knowledge, and I know that you will all be more than interested; and I hope that those who hear of this Truth, if it is the first time that they have ever heard it, will be like those laborers in France whom I spoke of, and will hear the sweet tones of the vesper bells of home.

I now have the pleasure of introducing to you Mr. Carol Norton, C.S.D., Member of the International Board of Lectureship of the Mother Church of Christian Science in Boston, Mass.

At Kansas City, Mo.

Edward A. Kimball, C.S.D., which stands for Christian Science Doctor, lectured before a large audience on the doctrines of Christian Science at the Coates Opera House, Friday evening, February 10. In spite of the cold weather, the theatre was completely filled before Mr. Kimball appeared on the stage, and it was evident that many of those present were not believers in Christian Science, but came to hear an eloquent speaker.

It was shortly after eight o'clock when Mr. Kimball walked on the stage, accompanied by Mayor Jones. The mayor made a neat introductory speech and Mr. Kimball was greeted cordially. The lecturer is the First Reader of a Chicago church. He is a tall, well-built man, bald, and of impressive mien. From a distance he does not look unlike David B. Hill. Mr. Kimball is an earnest and forcible speaker, and brings out the points of his arguments strongly. He wore a black Prince Albert suit, with a white flower in the lapel of his coat.

As a sort of preface, Mr. Kimball said that in order that his audience might realize in part the feeling that animated him in becoming a Christian Scientist and in expounding his views on the subject, he would state that he was a physical example of the power of the Science to heal. He said that many years ago he was at death's door, and that physicians could do nothing for him. They had said he must die, and as a drowning man grasps at a straw, he turned to Christian Science, although he was loath to do so, as he then did not believe in the efficacy of the treatment. Christian Science cured him, and since then he has been an ardent Scientist.

Kansas City (Mo.) Times.

At Savannah, Ga.

Friday evening, February 10, Guards Hall contained quite a good audience to hear a lecture on "Christian Science," by Mrs. Livingston Mims of Atlanta, Ga., who is one of the Board of Lectureship appointed by the Mother Church of Boston. The audience was a thoroughly representative one, and the profound attention given every word was a just tribute to the culture and enthusiasm of the woman and the forcible and spiritual character of her lecture.

Mrs. Mims was introduced by Mr. Pleasant A. Stovall, editor of the Evening Press, who said:—

"Ladies and Gentlemen: I have the honor to present a lady well known in Georgia. Not only is she prominent in the social circles and good works of her own home, Atlanta, but her influence has extended far beyond the state of Georgia. She has given careful study to the subject of Christian Science and is well equipped to discuss a question which is now exciting so much interest. Of Mrs. Mims it may be said that she 'touches nothing she does not adorn.' It is especially pleasant to have her in Savannah, for this is her old home, and what she says will always be listened to with appreciation. There are no bounds to the work of a good woman, when the work is animated by intelligence and enthusiasm. And now permit me to introduce to you Mrs. Livingston Mims of Atlanta."

Mrs. Mims was elegantly gowned in white brocade silk. Her gray hair and clear complexion made her a striking figure. She read her lecture in an easy and charming way, and her clear voice could be heard throughout the hall.

Savannah (Ga.) Press.

At Wausau, Wis.

Edward A. Kimball, C.S.D., of Chicago, a member of the Christian Science Board of Lectureship of Boston, appeared in Alexander Hall, Tuesday evening, January 31, 1899, under the auspices of the First Church of Christ, Scientist, of this city. A good sized audience was in attendance, considering the extremely cold weather, and also the fact that another entertainment was in progress in the city the same evening. A large sleigh load of people drove up from Schofield to hear the lecture, and there was a goodly gathering of Wausau representatives of the faith, and of those who looked for enlightenment on the subject. It was the first appearance of a Christian Science lecturer in this city, and the local church is to be congratulated upon its success.

The stage was prettily decorated with palms and potted plants, placed to advantage here and there, and easy chairs gave a homelike aspect to the scene that was inviting. The speaker was ushered upon the stage by Prof. Karl Mathie, city superintendent of schools, who gave a short talk in explanation of the mission of Mr. Kimball, and then introduced the lecturer to the audience.

After a pleasing introductory, Mr. Kimball began at once upon the subject of the evening, and handled it in a manner that showed deep insight, and all present lent a listening ear and were abundantly rewarded for their attention. Mr. Kim-

Digitized by Google

ball spoke for two hours, and even then his "good night" came all too soon for the majority of his audience.

Wausau (Wis.) Pilot.

At Sheboygan, Wis.

Tuesday evening, February 7, at the First Church of Christ, Scientist, Mrs. Annie M. Knott, C.S.D., of Detroit, Mich., spoke to a crowded house, many being unable to get seats, standing during the entire lecture, and they said they would have enjoyed standing another hour if Mrs. Knott would have continued. Some people drove sixteen miles in the cold in order to attend the lecture, and said they were well rewarded for coming. Others said, "That woman would win a heart of stone, for she denounced nothing but simply filled the void of human craving with hope and divine Love."

An old gentleman said, "I never felt God so near in all my life." A lady remarked that it seemed to her from all she heard that the Christian Science God must be much more friendly to humanity than the Creed God, and that she would like to become better acquainted with Him.

One good woman who used to be a strong Lutheran, said, "I never understood the unreality of evil so clearly before." Mrs. Knott's illustration of the incorrect figures on the child's slate not being governed by the principle of mathematics, showed why Jesus said: "Judge not according to the appearance."

Many other complimentary remarks too numerous to mention went to show how well Mrs. Knott's address was received by the large, intelligent, and appreciative audience.

Sheboygan (Wis.) Daily Journal.

At Worcester, Mass.

Rev. Irving C. Tomlinson, C.S.B., member of the Christian Science Board of Lectureship in Boston, lectured Tuesday evening, February 7, in Association Hall, under the patronage of the First Church of Christ, Scientist, of Worcester. It was a most gratifying audience that greeted the lecturer, numbering fully five hundred, and the attention which it gave Rev. Mr. Tomlinson indicated that it had more than a passing interest in the subject of Christian Science, of which Mr. Tomlinson is one of the ablest advocates.

He treated the subject from many points of view, and his arguments in favor of it were logical and forceful, and found a surprising amount of sympathy from the audience. One thing particularly the meeting demonstrated, and that was that there are far more intelligent, thinking people studying this question of Christian Science in Worcester than was generally supposed, and among the audience were men like Rev. Dr. Daniel Merriman of the Central Congregational Church, Rev. B. D. Marshall, Lyman A. Ely, M. P. Higgins, and ex-Alderman George W. Coombs.

Worcester Daily Telegram.

At Dubuque, Iowa.

Friday evening, January 20, 1899, E. A. Kimball, C.S.D., of Chicago, delivered a very interesting and convincing lecture in the Stout Auditorium, under the auspices of the First Church of Christ, Scientist. The audience was large and attentive. Mr. C. H. Berg, mayor of the city, presided, and briefly introduced the speaker, assuring the audience that they would receive a rare treat.

Mr. Kimball spoke for an hour and a half. He said that he was there as a visible example of the power of Christian Science to rescue a man from the grave. He also declared that when understood Christian Science was applicable to every phase of human existence; that it was invaluable to the man in business, and could save from all sorrow, sickness, and sin.

The lecture has done a vast amount of good, by removing prejudice from the minds of many of the people of this city.

Clerk.

At Haverhill, Mass.

Rev. Irving C. Tomlinson, C.S.B., of Concord, N.H., who spoke to an audience of several hundred in City Hall, Friday evening, February 3, on the subject of Christian Science, found willing hearers. He is a pleasant, scholarly looking gentleman, of urbane manners. In speech he is convincing and forceful. His address we give fully, believing it to be of interest to a wide circle of readers in these days when the discussion of this subject interests so many.

Haverhill Evening Gazette, February 4, 1899.

The Boston Lecture.

The lecture in Boston by Rev. Irving C. Tomlinson, C.S.B., set for February 27, has been postponed to March 20 to accommodate Rev. Edward Everett Hale. Dr. Hale's lecture on Unitarianism was abandoned by reason of the storm of February 13, and the 27th was his only open date, hence the change.

Experience of a Collegian.

At the close of three years of arduous college work, in the spring of 1893, after repeated threatenings warded off by will-power, I collapsed with nervous prostration, but looked to the summer vacation to rest me as it had always partially done before. Being no better in the autumn, but rather worse, I began treatment with a physician who was a Harvard graduate, a lecturer in the Medical College here. I was told that it would take a year to cure me, and as, at the end of four months, the conditions had not even started toward betterment, we decided to make a change.

The new doctor said that it would take him, or any one else, three years to restore my health, and for over a year I took his medicine every two hours, but at the end was so far worse that he ordered me to bed, for he said it was impossible to keep any one with my will-power and energy from overdoing constantly. The claim then called itself *prolapsus uteri*, with other complications, and we consulted a specialist who was connected with a college here.

This third physician said that not one doctor in a dozen would know how serious the case was, but after three months' careful work he could effect nothing here, so advised a change of scene and environment. He had me moved to the ideal country home of some very dear friends, where I received the fondest care in the midst of everything heart could wish, according to the old way of thinking, but after sixteen weeks I returned home, discouraged, for an examination.

The prospect of an operation was the result, together with the verdict that it would be at least two years more before I could be up and dressed and five years before I could take up study and work, as I had completely exhausted the vitality which should have lasted me until I was forty years old.

After this decree we determined to try Christian Science, although I had no faith in it whatever, but consented, to please my mother, thinking anything preferable to an operation. We arranged with a Scientist for treatment, and at the end of five days I was raised off the bed where disease had bound me for thirty-three weeks, and a new life began in joy and gladness that I had found the Truth that makes us free.

The eighth evening after I began treatment I went with a friend to my last doctor's office, having to walk two blocks to the cable, ride about twenty, and walk two more at the other end. When the doctor saw me he did not know me, and when I was introduced he looked as if he saw a ghost. He couldn't sit still in his chair, but got up, walked the floor, sat down, put his hands in his pockets, took them out, and over again showed the greatest astonishment. Especially when I told him that the previous day, upon examination, the muscles which were relaxed four inches, and which for eight months he had done everything known to modern specialists to contract, had been found to have resumed their normal length and all the organs their proper positions.

Digitized by Google

I had felt humiliated because so many people knew of my case, but was thankful for it when, after my healing through Christian Science, nearly twenty of the friends either took treatment or began to investigate the subject, for they "knew that there had been something the matter with me!"

For three years I have been rejoicing in "the glorious liberty of the sons of God," enabled to do any day twice as much as at any time in my life, with the use of *no* will-power, and only on the rarest occasions the slightest feeling of fatigue. Science and Health is my constant companion, and grows more precious every day.

The Bible has been made a new book to me, full of living interest and practical every-day help, for whereas once I was blind, now I see, and for this illumination of spiritual common sense I am even more grateful than for the physical healing.

The idea that we can know God *now* and *here*, and do not have to wait until after death to inherit *eternal* Life, has been the greatest help to me.

The longer I work in Christian Science the more I see how much we owe to our Leader for exploring this new-old Way, and making plain to all humanity, in the face of unspeakable persecution, *how* to work out their own salvation.

Eloise Cameron MacGregor, Chicago, Ill.

"God is my Life, Health, and Strength."

THOUGH from childhood my health had been extremely delicate, it was not until the summer of 1894 that I became an invalid. During that fall and winter I fought disease, aided by untiring physicians and nurses, but becoming more and more helpless.

In the late winter I was carried to Chicago (my home was then in Burlington, Iowa), where for five months I had the best of surgical care, undergoing a severe operation. It was during this experience that I first consciously realized the ever-presence of divine help. Isaiah, 41 : 10, has ever since been to me an illumined text. In June I returned to my home, seemingly much better, but it was only a few weeks before the same old struggle began afresh.

About Christmas, 1895, I gave up and tried to reconcile myself to going. What a month of mental agony I spent! I turned toward God, feeling the warmth of divine Love, and groping for more light—as I had never done before. I could not frame a prayer, but in the night-watches I have stretched out my arms simply crying, "Father! Father! Father!" The cry was not in vain, peace came to my soul, and for the first time in my life I could say with my whole heart, "Thy will be done." Lo! when I lay still, simply trusting the Father's love, the blessing came.

I had heard a little of Christian Science, but nothing good, and when my aunt told me that a friend was going to bring a healer to see me, I would not listen. I had nothing left but my faith, and I feared to have that disturbed. I appealed to my mother, and the friend was asked to postpone the visit. We thought we would be safe then, for they surely would not come until we sent for them, but, thank God, they did. On the twenty-sixth day of February, 1896 (I shall never forget the day), my mother was called down-stairs to see them. After some time she returned to me, saying, "There is a dear Christian woman down-stairs. I wish you would let her talk with you." "If it's the Christian Scientists I don't want them," I replied. But she urged a little, assuring me it was not what I thought—until I consented to see the healer. A moment later she stood in the doorway, and her face seemed a benediction to me. Pausing a moment, she said, "You are not afraid of me, are you?" I answered, "No; but I don't want my faith in God disturbed." "But," she replied, "Christian Science is the *understanding* of God." That was what I wanted. She came in, talked a little, read a passage from Science and Health, and held a few moments' thought with me, then went away, leaving with me the sentence, "God is my life, health, and strength."

Soon after she left the room, my mother going with her, the tea-tray was brought in. Without thinking what I was doing, I got up, took the tray, and carried it across my bedroom and sitting-room to the radiator. When I reached it I began to realize what I had done, and was frightened; but those words, "God is my life, health, and strength," kept ringing in my ears; my fear was calmed, and I turned back to my room, wild with joy. That evening I sat up until ten o'clock, and next morning I, who had not walked across my room for months, met the healer at the sitting-room door. In two days I went down-stairs, and in a month I began teaching three hours a day. In the summer I had the privilege of attending a class, and it was indeed a blessing. I did not at first see that in my anxiety to make up for the time I had lost from my teaching, I was allowing the old ambitions to crowd out the new thought, so when struggles came I was not prepared to meet them, and was almost overwhelmed. Opposition of friends, financial trouble, and my old disease all came at once, and finally my family called in a physician. The struggle was severe, but I kept hold of some of the blessed truths I had learned, and in the end Truth was victorious.

That was eighteen months ago, and while I have had many things to overcome, I have striven day by day to clear my own field—to live in purity of thought. And oh, the blessings that have come, the wonderful peace that I am beginning to taste—the peace "that passeth understanding."

Mrs. M. D. Henry, Brookline, Mass.

Poisons.

BY SCHUYLER S. CLARK.

SOME weeks ago there appeared in a New York newspaper an article which was briefly as follows: A man was taken sick one morning, went to bed, and sent for a physician. The latter diagnosed the case, but was unable to learn, either by examination or by questioning, what ailed him; he grew worse and was taken to a hospital. Here it was found, through closely inquiring into what he had eaten for a day or two previous, that the day before he was taken ill he had been using a solution of pyrogallic acid, a substance used in photography, and he remembered that during the night following he had taken a drink of what he supposed to be water from a glass on the table, but which possibly might have been the developing solution. The doctors at once concluded that this was the cause of the sickness, and proceeded to give such treatment as would counteract the action of the drug upon the system. The man died in less than a week. An examination discovered the presence of the drug in his stomach, and the verdict rendered was that death was caused by *pyrogallic acid poisoning*.

The article ended by stating that pyrogallic acid was not known to be poisonous (it being a compound not taken internally) and is not labelled *poison* when sold; but that this case shows beyond a doubt that it *is* a poison, is injurious to the human system, and is hereafter to be considered as such.

The disastrous results attendant upon the above account cannot be over-estimated. Hundreds of thousands of people read the New York papers; other thousands read the innumerable medical and scientific journals in which the same may have been, and undoubtedly was, published as a test case. Thus it is believed by all (non-Scientists) who read, and put down and established by mortal mind at large, that pyrogallic acid is a poison. This then is the birth, this the beginning of the would-be history of a new poison; and it is to choke this lie in its incipiency, to pick it off at its very start with the sharp-shooting rifle of Truth, that the present article is written. Let all men know by these presents—the Christian Science Sentinel—

First, that Pyrogallic acid is not a poison.

Second, that no drug has any *intrinsic* poisonous qualities.

Digitized by Google

Third, that all so-called and so-believed and so-feared poisons originate as such in like manner as described above, and exist wholly and solely in the thought of those who believe them to be injurious.

It was with this firm conviction, this understanding, that Christ Jesus said: "If they [them that believe, understand] drink any deadly thing it shall not hurt them." It was after having demonstrated this Truth that the author of the Christian Science text-book wrote as she did on page 70 and on page 391. It is with the divine authority given in that text-book and in the Bible, of which it is the key, that the Christian Scientist stands "sentinel on the watch-tower of Truth," ready to intercept all false notions and unrealities before they enter either his own consciousness or the thought and life of humanity.

Let it be known, furthermore, that the seeming poisons from which we need with special care to protect ourselves, are these very notions that drugs are poisonous, that sickness is real, and that death is bound eventually to swallow us all. These are poisons poured out before us continually; are we drinking them, are we inhaling unconsciously this thought and believing it? Or are we taking habitually and prayerfully the effective antidotes of Truth and Love and obeying the injunction given in Science and Health, page 130, line 8?

Communication from a Non-Scientist.

THERE is a growing opinion in the minds of thinking people that most all the newspaper items regarding sickness and the treatment of disease tend to educate the people in error, and that the time has come when there should be a better understanding regarding disease. The introduction of what is known as Christian Science, with its system of spiritual, and physical healing, is accomplishing good results in this respect. The daily demonstrations of this system attested by hundreds of thousands of thinking men and women to-day, is indeed wonderful. It would be difficult to find an intelligent community of a thousand people anywhere in this broad land, where there are not those who love the Christ, and are earnestly striving to know more of this system.

The editor of the Interior, a leading publication of the Presbyterian Church, published in Chicago, in a recent issue says, "From all parts, especially in the cities and towns, come reports of the inroads of Christian Science upon our Churches. Presbyterian and Baptist appear to be suffering more from it than any others. Ministers are astonished and grieved to find that some of their choicest minds and best people are affected by it," etc.

I am not a Christian Scientist, but I do believe most firmly in Christian healing as taught by Christian Scientists. This belief comes from a knowledge of its power as I have witnessed its demonstrations time and again, and have listened to the testimony of many who have been healed by its power, after human wisdom with its nearly thirty thousand remedies, had failed to bring relief. Paul said to his brethren, "Prove all things; hold fast that which is good."

This system has been tried and found good, and every day brings fresh evidence that men and women are learning the error of the drug system; and are beginning to understand that Jesus, when he taught his disciples to pray, "Thy will be done, in earth as it is in Heaven," intended to teach mankind that sin and sickness were to be overcome here on earth. The time has come when Christians should recognize this *fact* and realize that it is God's will that they should "be strong in the Lord, and in the power of his might."

When the parent with his afflicted child went to the disciples, as recorded in the ninth chapter of Mark, and they were unable to heal him (even though it is supposed they had been given special power to heal), he then took him to Jesus who declared that "All things are possible to him that believeth," and demonstrated the fact by healing the afflicted boy. The disciples then besought Jesus to tell them why they had failed to heal. Read what he tells them, Mark, 9 : 29.

Jesus demonstrated what he taught, and assured his followers that the works he did should also be done by them. The power to overcome disease has been shown by Christian Science healers in our day. If the disciples under the immediate instructions of the Great Teacher, failed in some cases, it should not seem strange that there should be some failures during the first twenty-five years of the Christian Science effort to revive the work of Christian healing, as practised during the first *three* centuries of the Christian era.

H. C. BAIRD.

Woodford County (Ill.) Democrat.

Unity in Omaha.

IF not too late to chronicle an event which marks the onward progress of our cause in the West, I would like to make mention of one of the natural sequences of the breaking of bread to the sixty-seven students who assembled in Concord the twentieth of last November.

One of our number was called to this Love-feast, and before his return there was an influx of thought trending towards some change, soon to take place in our midst. It soon became evident to many what this change might be, so that as early as the fifth of December the body of students who had for more than eight years been holding regular services in the Bee Building came together to consider an invitation from First Church of Christ, Scientist, of Omaha, to unite with them in church worship.

Very little discussion seemed necessary. Thought was ripe for action. Any step that the interests of our cause demanded, all were ready to take. Laying aside all personal considerations, it was unanimously resolved that our association be disbanded, and that we make individual application for membership in First Church of Christ, Scientist. The following Wednesday evening meeting was the last held in the Bee Building. On the thirty-first of December the Reading Rooms were closed to the public, and all property of the association turned over to the church, the latter voting that all moneys be placed in a church building fund, already started by the children of the Sunday School.

Communion Sunday (December 11) found us all under one roof, with a membership of two hundred and thirty-four. This step taken, a higher sense of Love and unity prevails, coupled with a determination to work more earnestly for the establishment of our blessed cause.

Several have asked, "How did you make such a demonstration?" The reply has been, "It was not *our* demonstration, it was Mrs. Eddy's." We do feel that divine Love, through our Leader, opened the way for this demonstration. Results are daily proving this to be true.

We can say to the Field that Omaha is not asleep. A grand work is going on. And as many influential members of the Orthodox Churches are asking for their letters to join the Church of Christ, Scientist, some of the ministers are keeping the subject of Christian Science well advertised from the pulpit, for which we are very thankful. The M.D.'s are a little more quiet in public, but they, too, are feeling the touch of Truth, and would, if they could, have the Christ idea legislated out of the State of Nebraska; but, as was stated in a recent Sentinel, "as well might the Legislature attempt to legislate Almighty God out of the universe as to undertake to prevent healing by virtue of His law." The Mother's recent counsel to go on healing the sick, "notwithstanding class legislation to the contrary," is most comforting and encouraging.

As we grow in grace, I trust the Field may hear more of our good works.

C. W. CHADWICK.

Jottings from China.

Dear Sentinel:—Welcome! Welcome! You are an angel of Love bearing good cheer, strength, and courage to those far away. You are faithful in your coming, and bring good tidings of great joy.

The dear Mother, Mrs. Eddy, sees the great needs, longings, and seekings of those of her own household and others, and refreshes and encourages with the constant outgoing helpers from her great heart. They go watering the vineyards, and making green, fruitful, and beautiful the waste places.

You honor her, and thus must bless humanity. You, in your humble sweetness, give promise of great power for good. You will enter thousands of simple homes as a bright light, revealing the might of Truth to the suffering world. The protecting care of Love is with you in your good work.

Thanksgiving Day.

Thanksgiving Day is yearly observed at the United States Legation in Peking, China. The United States missionaries there and in that vicinity, and all other Americans, are invited to spend the day with the minister and his family at the Legation.

November 24 of this year, at eleven o'clock, about seventy people assembled in the drawing-rooms and listened to a patriotic sermon of gratitude and thanks delivered by Dr. H. H. Lowry of the Methodist Mission. Although he has spent twenty-nine years in China and is devoted to his work, he loves his home land, and keeps well posted in her affairs. At one o'clock fifty-six people partook of a Thanksgiving dinner. Methodists, Presbyterians, Congregationalists, and people representing Alliance, Y. M. C. A., and Bible societies, Episcopalians, Roman Catholics, Universalists, a Christian Scientist, and those claiming no special faith, all came together at the same feast, as Americans, giving thanks for a common cause. The afternoon was spent in making the house jubilant with patriotic songs and good cheer.

A Significant Picture.

At Peking, China, there are eight foreign Ministers who have asked their respective governments for a Legation guard of soldiers or marines.

These guards were promptly sent to the different Legations, and were escorted from the railroad station to their destinations by Chinese officials and soldiers.

The thought was conceived to have their photographs taken in one group. They came together in the large grounds of the British Legation. The United States marines (Manila boys) marched to this Legation bearing the stars and stripes. None of the others had their flags with them. The eight different guards drew cuts for their places to stand. The United States guard drew the center, and there the men stand in the picture with their flag waving.

The United States officer said afterward, "No one seemed to object to the flag, and *I* surely could not, for it would have broken the men's hearts had they been obliged to give it up." *Think of it!* Was there ever such a picture? The warriors of eight nations peacefully standing side by side in a foreign land; and——Well, *look* at it and *study* it.

S. P. C., Peking, China.

November, 1898.

Faith in the Doctor.

An exchange quotes a story said to have been told at a "charity dinner."

A man was brought into the accident hospital who was thought to be dead. His wife was with him. One of the doctors said, "He is dead;" the man raised his head and said, "No, I'm not dead yet," whereupon his wife admonished him, saying, "Be quiet; the doctor ought to know best."

From the Press.

One feature of the growth of Christian Science is the increasing attention it receives from the press. In Leslie's Weekly for February 2 an article on Christian Science states:—

"As a practical religion it is an accomplished fact. . . . To-day Christian Scientists maintain more than four hundred churches, whose congregations aggregate over half a million people."

A Pennsylvania paper says, in a recent issue:—

"To write of the great influence of Christian Science upon the world of religious thought, and the revolution it is effecting in medical practice, scientific thought, literature, business methods, and social conditions, is a work of too great magnitude to be undertaken at this time. The age is eagerly discussing Christian Science and crying loudly for more light; its value to the present and future welfare of people can only be estimated when we fully know the number who, through its operations, have been relieved from dread disease, pain, error, hopelessness, and spiritual darkness. Its teachings reveal the promise of, and the way to, a new and higher order of society. That marvelous results have been wrought by Christian Scientists, no one acquainted with the facts will dispute."

What the Scientists are doing is for the good of mankind and the extension of Truth. They do not force their tenets or practice upon any one. Nevertheless their growth is constant and vigorous.

A few days ago the writer was talking with a Denver Scientist, who had just returned from an Eastern business trip. "I spent last Sunday in Kansas City," he said, "and attended church services with the Christian Scientists there. They have just erected one of the finest church buildings in the city. It holds fifteen hundred people and is all paid for. The congregation includes some of the leading men and women in Kansas City—all earnest, energetic, and full of enthusiasm over Science."

It is believed by Christian Scientists that the Bible promises are for use and not merely for admiration. Man's desire for Truth is constantly growing stronger. The Christian Scientist finds that his religion can be turned into every-day use. He cannot find upon the gold and silver coins of the United States the words: "In Gold We Trust." He knows that the letter "l" in the sentence was purposely omitted, and he looks upon the real statement as beautiful, exact, and practical.—K. B. Denver Republican.

Charm of Farm Life.

No one pretends that farmers are making money rapidly; they have their vexations and discouragements as do others, but they have several things to be very thankful for. They have good homes in nearly every case, plenty of wholesome food, and decent clothes. They are not under the eye of the task-master, nor working under great nervous strain, with every minute lost from work counted against them when pay-day comes. They need not, in the language of the shops, "be afraid of their jobs;" they are working for themselves, and are sure of their pay even if it is not so large as they might wish it to be.

The man who looks upon his farm as a machine from which dollars only are to be made, and does not value any other of the numberless blessings it gives him, will never cease to talk about hard times. It is not alone for the money it will produce that the farm should be prized. It should be valued because it brings men and women near to nature's heart and their children grow up strong and stalwart, ready to meet the trials of life with bodies strong enough to perform every task. The farm is pre-eminently the strong-

Digitized by Google

hold of the home; it is the place where home ties are strongest and where life is at its best.

The average farmer and his family live better in every way, have better food, better clothes, and better social surroundings than does the family of the man who lives in a city on a salary of one thousand dollars a year. The progressive farmer of to-day lives in a style that is not equaled by the city man who earns two thousand dollars a year. The farmer of to-day has frequent mails, an abundance of literature, good facilities for travel, and is able to enjoy more of the comforts of life than the man in any other calling in life. If he looks at his farm from this point of view he will value his farm at its true worth, and be contented, and contentment is better than great riches. If farmers would remember that they see but the outside show and glitter of city life, and could see the darker side, very few of them would be willing to exchange with the city man. The educated farmer of to-day is the social peer of any man, while money is almost the sole criterion of social worth in the city. As between the two, the farmer holds every vantage point.—Farmer's Voice.

The Sentinel.

A Salutation to the Sentinel.

I pause to salute the Sentinel. With true military genius, our beloved Leader has set this watchman on the tower, and how faithfully it shall fulfil its mission is foretold in its past record. Its modest bow of infancy; its manly growth of vigorous youth; and now at the age of its Weekly majority it steps forth as the ever vigilant Christian Science Sentinel, only *twenty-one* weeks from its inception.

How aptly the words of the Prophet Ezekiel (Ezekiel, 3 : 15–21) seem to apply to this hour, and again to be echoed along our lines with the admonition to *watch* with greater vigilance. The faithful Sentinel, who is never found slumbering at his post of duty, or lulled into stupefaction by plausible pretenses, will, from his post on the watch-tower, from whence he scans the mental horizon, sound the note of warning, whenever the enemy seeks to penetrate our lines.

From thousands of grateful hearts all over our land and on foreign shores there arises a song of thanksgiving to-day for the monthly visitant, our beloved Journal, replete with the joyful tidings which come from those redeemed from sin and misery, through the ministrations of this new-old gospel of Christian Science. But with equal welcome the more frequent call of the little Weekly has won its way to our hearts, and we rejoice to see it emerge from its swaddling-clothes and rise to the full stature of manhood as the Sentinel upon the watch-tower of Zion's wall. May God, Good, speed it upon its mission, and may its bugle-note arouse a slumbering world to see its great need, and to find that need supplied in the all-inclusive bounty of a loving Father, as revealed in Christian Science.

C. Henry Clark.

The Nursling.

We received the nursling (Weekly) with joy. It fills a very important need, especially Church Rules and news of expansion in Christian Science teaching and demonstrations from nearly all parts of the world. In the fourth month of its "sturdy growth," the Watchman of Israel, has renamed it in her own name, "Christian Science Sentinel," and who can understand its broad, full meaning. John the Revelator said "He had a name written that no man knew, but he himself" (Revelation, 19 : 12). Having on the whole armor of Love she consecrated anew this messenger of Truth to her many children, and all who will, may receive the blessing that knows no bounds—watch our thoughts and acts, and observe to obey the voice of Truth and Love, "What I say unto you I say unto all, Watch."

Emeline A. Merriman, Lowell, Mass.

Christian Scientists.

Correction Asked for Regarding their Belief and Membership.

Editor Provo Enquirer:—In behalf of fairness to all readers of your paper, we ask you kindly to publish the following so as to correct the false impressions that would go out from statements made in an article that appeared in the issue dated January 21, 1899, by Rev. J. C. Andrews.

1. There are more than one million Christian Scientists instead of seventy thousand as given by the article referred to.

2. Christian Scientists believe in the immaculate conception of Jesus. They believe and teach that God was his father and Mary his earthly mother, and that Joseph was not his earthly father, for the simple reason that he had none.

Christian Scientists believe and teach that Jesus, the Christ, was the promised Messiah, the Saviour, the Way-Shower in the flesh, for all mankind.

They believe that what he did and taught was for all mankind and for all time, and that the only reason why the world is not doing his work to-day is because the world is not good enough.

We believe in his life-work as divinely appointed. We believe in his baptism, crucifixion, burial, resurrection, and ascension as given in the Scriptures, and we believe all his commandments are meant for all his people in all ages.

Our denomination will be greatly obliged if you will kindly publish the above. Lewis B. Coates,

First Reader in the Christian Science Church, Salt Lake City, Utah.—Provo (Utah) Daily Enquirer.

The Mission of a Smile.

A smile once met a broken heart—a heart filled with darkness and woe. In that heart a light began to dawn; it knew not how or why or whither, but the east grew gray, and red, and bright. The uplifted heart grew great with goodness, and its light reflected light. Other smiles went forth into other dark places, and other lights grew and illumed the soul—and these in their turn fanned the dying flame of purpose in many a weary heart.

So shalt thy reward be, oh gentle soul, that thinkest a smile is worth the giving,—a smile that begins in the heart and stops not short of heaven's throne. Go thy humble way, live and think for others' sakes, and in the fulness of the years thy thoughts will not be lost; and when is measured unto thee again the good that thou hast done, infinity alone can contain thy reward.

Waldo Pondray Warren.

To-day.

To-day is the grandest of temporal terms. Yesterday no longer is, and to-morrow will never come. All that was ever done, was done to-day; every victory won, every song of triumph sung, every world overcome, was done to-day. All that ever was, is to-day. All that ever will be is to-day. All that ever can be, can be to-day. To-day the grandest verities of Being voice the immortal strains of Life, Truth, and Love. To-day is not sad, or weak, or commonplace to him who sees to-day aright. To-day is creation's dawn, resurrection-morn and judgment-day. To-day is eternity.

Waldo Pondray Warren.

Church Organized at Knoxville, Tenn.

We are now organized as First Church of Christ, Scientist, with a membership of nine. The charter was granted by the state of Tennessee, December 24, 1898. This charter provides (with all other privileges granted church organizations), the following: "To heal the sick as Jesus' disciples healed, and as taught in our text-book, 'Science and Health with Key to the Scriptures,' by Mary Baker G. Eddy."

Questions and Answers.

Question. *Will the Bible, if read and practised, heal as effectually as your Book "Science and Health with Key to the Scriptures"?* C. S. Bean, Ossipee, N. H.

Just the degree of comparison between the effects produced by reading the above named books can only be determined by personal proof. To rightly read, and to practise the Scriptures, the spiritual sense thereof must be discerned, understood, and demonstrated. God, being Spirit, His language and meaning are wholly spiritual. Uninspired knowledge of the translations of the Scriptures has imparted little power to practise the Word. Hence the revelation, discovery, and rendition of Christian Science—the Christ Science or new tongue whereof St. Mark prophesied—became requisite in the divine order. On the swift pinions of spiritual thought man rises above the letter, law, or *morale* of the inspired Word to the spirit of Truth, whereby the Science is reached that demonstrates God. When the Bible is thus read and practised, there is no possibility of misinterpretation. God is understood, knowable, and applicable to every human need. Herein is the proof that Christian Science is Science, for it demonstrates Life, not death, health, not disease, Truth, not error, Love, not hate. The Science of the Scriptures coexists with God; and "Science and Health with Key to the Scriptures" relegates Christianity to its primitive proof, wherein reason, revelation, the divine Principle, rules, and practice of Christianity acquaint the student with God. In the ratio that Christian Science is studied and understood, mankind will, as aforetime, imbibe the spirit and prove the practicality, validity, and redemptive power of Christianity, healing all manner of diseases, sin, and death.

MARY B. G. EDDY.

Question. *Must mankind wait for the ultimate of the millennium until every man and woman come into the knowledge of Christ and are taught of God and see their apparent identity as one man and one woman—for God to be represented by his idea or image and likeness?*
H. S. B. Rankin, Island of Madeira, January 17, 1899.

God is one and His idea, image, or likeness, man, is one. But God is *infinite* and so includes in One, *all*. Man is the generic term for men and women. Man as the idea or image and likeness of the infinite God is a compound, complex idea, or likeness, of the Infinite *One*, or one Infinite, whose image is the reflection of all that is real and eternal in infinite identity. Gender means a kind. Hence mankind, in other words, a kind of man who is identified by sex, is the material, so-called man, born of the flesh, and is not the spiritual man whom God, Spirit, creates who "made all that was made." The millennium is a state and stage of mental advancement, going on since ever time was. Its impetus, accelerated by the advent of Christian Science, is marked, and will increase till all men shall know Him [divine Love] "from the least to the greatest," and one God and the brotherhood of man be known and acknowledged throughout the earth.

MARY B. G. EDDY.

A first Church of Christ, Scientist, was organized in Lansing, Mich., January 26, 1899, with fifteen charter members. Services have been held, and active work carried on for something over a year, in a very quiet way, the Christian Science literature really doing the work; some sixty copies of "Science and Health with Key to the Scriptures," and "Miscellaneous Writings," having been placed, besides any number of Journals and Quarterlies. Some good healing has been done. The services are well attended, a Sunday School will soon be organized, and a great growth is looked for, if we are faithful workers. "What I say unto you I say unto all, Watch" (Jesus).

Prayer.

BY R. L. Z.

Dear God my heart inclines to Thee,
Help me to know Thy living Way;
For Thou art Light dispelling gloom
Revealing an eternal day.

Dear Father, I would ask of Thee
The wisdom all my steps to guide;
The knowledge of Thy perfect law
Wherein no evil can abide.

Dear Mother,—sweetest of all words,—
Rule in me with tender grace;
My heart make loving, "just and pure,"
That I may help the human race.

Dear Father-Mother God, my *all*,
As homeward flies the weary dove,
So would I, childlike, come to Thee,
For Thou art *everlasting Love*.

Testimonies.

For twenty years I was a hard drinker. My father was such before me, and two brothers followed in his footsteps. Whiskey was more to me than bread and meat, and since I was twenty years old I have hardly known the time when I would hesitate between taking something to eat or something to drink; if I could not get both, I would always take the drink. I drank because I liked it, not because I wanted to get drunk, and my capacity for drinking whiskey without becoming beastly drunk was notorious. I have gone through all the horrors of the earlier stages of delirium tremens, and there is scarcely any experience that occurs in the life of a confirmed drunkard but what has been mine.

I have frequently tried to quit, but my appetite was too strong for my good intentions. My life has been passed in the West, some of the time on the frontier where no higher power was ever regarded than a Winchester or a Colts 45, and where whiskey was more generally drunk than water.

Some months ago, after three days of unusually hard drinking, I determined to make one more effort to get rid of the devilish habit that had me hard and fast. A man who worked with me had several times told me that I could be healed through Christian Science, and I made up my mind to try it. I called on a Scientist and stated my case. Although soaked with whiskey at the time, I was sincere in my desire to quit, but I did not think any power on earth could help me. The Scientist assured me that God could do it, and at my request gave me a treatment. I promised her I would try to come to church the following morning, which seemed like a foolish promise to make.

That night I slept soundly, and in the morning I got up for the first time in fifteen years without any desire for a drink of whiskey. I could not understand it. My hand was steady and my head clear, all of which seemed beyond my comprehension. I went to church that morning, and from that day to this I have not taken a drop of strong drink of any kind. This is in itself remarkable; but what is still more wonderful to me is that I *have not had the least desire for liquor* at any time since the first treatment. Saloons and old companions have no more attraction for me now than if I had never known them. At first I had many times daily to refuse invitations to drink, but it took no effort to do so, and now my case is so well known hereabouts that I am no longer troubled in that way.

I find much help in the study of the Bible and Science and Health, and no longer rely on medicine to bring health to man or beast. I have charge of a large stable of horses, and where formerly I would have dosed them for every ail-

Digitized by Google

ment, I now handle them, when out of condition, without a drop of medicine.

In many ways I have been helped by Christian Science, and am trying to understand more and more of it, for I know it is the one thing that no man can get too much of. I would like to hear from any drinker who wants to quit but thinks there is no hope for him to do so.

Frank C. Wise, Florence, Col.

We always welcome the coming of the Sentinel, the Journal, and the Quarterly Bible Lessons, for great is the good we receive through them; but works, not words, must show how truly thankful we are.

My husband and I were members of the M. E. Church, and for conscience' sake we left the Church, because we did not believe they had the true light. When I was informed by the pastor, that the day of healing and of miracles was passed, I answered, that if this were true, for aught I knew, the day of redemption might have passed also. We wandered about for several years. We sought health through Spiritualism and magnetic treatment, but failed to find it. At last we turned to Christian Science, with little hope, however, of receiving help; but were willing to give credit for any benefit we might receive. Our joy was unspeakable when, almost instantly, I was healed by absent treatment, of a disease that had bound me for two years. The doctors had told me I was such a wreck physically that there was nothing for them to build upon.

We purchased Science and Health, which surely brings health and good tidings to all. We have had proofs without number that God is able and willing to supply every need.

We have seen colds, whooping cough, scarlet fever, broken bone, la grippe, measles, diphtheria, and fevers healed through Christian Science. A child who mistook gasoline for water and drank almost a half glass, and that too on an empty stomach, was healed in ten minutes. At another time, the same child ate poison berries, which were likewise rendered harmless.—Mrs. B. B. Quinby, South Omaha, Neb.

We began with three persons meeting in a private residence to study the Lesson Quarterly. We have added to our numbers, and last December we secured Franklin Hall, in the Masonic Temple, for our services.

There has been much opposition to Christian Science. It has been hung in effigy and preached against in all the pulpits. Science and Health was accepted by the Public Library, and afterwards rejected and returned to the donor through the Post Office. But notwithstanding all this, Truth goes marching on. Science and Health says (page 263), "The higher Truth lifts her voice, the louder will error scream," and we are comforted by the assurance that a high thought of Truth has been lifted up, or error would not scream so loudly.

We have a congregation numbering from ten to twenty-one, and frequently some one out of interest or curiosity comes in. We have a Sunday School of six children, who last Sunday started a church building fund as the result of Judge Ewing's description, in the February Journal, of the church built by children in Schofield, Wis.

"Tall oaks from little acorns grow," and who can tell the result of the penny collections for a church building fund from these little children? We all know that God can provide a table in the wilderness.—C. C. M., Lisbon, N. H.

On going home one day at noon, my wife informed me that our little daughter was very sick with fever. I asked my wife if she wanted an M.D., or if I should treat her as best I knew. To my great relief she said we would try Christian Science. During the afternoon I did the best I could to treat the child. When I went home at closing time, I found that a number of my neighbors had been in during the afternoon, and she was not much better. I sent all the family to bed and stayed with her myself. At 2 A.M. the fever yielded.

Those who had been in to see my child were very busy in talking of my arrest, but on coming the next day and finding her well they had no more to say.

Lyman S. Reasoner, Byesville, O.

Stephen, Marshall Co., Minnesota, February 9, 1899.

In the spring of 1896 a few Scientists here began to meet weekly and read the Bible and Science and Health; August 6, 1898, we organized as First Church of Christ, Scientist, with eleven members; February 1, 1899, we re-organized under a state charter, with a membership of sixteen. The attendance at the Sunday services is about twenty-five, and at our Wednesday evening meeting twenty. Our Sunday School has an attendance of about eighteen.

O. HALVORSETH, Clerk.

Notices.

New Church By-laws.

The following By-laws have recently been adopted:—

The number of First Members of the Mother Church shall not exceed one hundred.

Owing to the change in our church ministry, all the students of Christian Science must drop the title of Reverend, and Doctor, except those who have received these titles under the *laws* of the *state*. My beloved brethren will some time learn the wisdom of this By-law.

The Mother Church, and the branch churches, shall not confine their membership to such persons only as have been students of their Readers.

The subject of the Lesson-Sermon in the morning services of the Mother Church, and of the branch Churches of Christ, Scientist, shall be repeated at their second service on Sunday. The correlative Biblical texts in the Lesson-Sermon shall extend from Genesis to Revelation. The subject given in the International Series shall be discontinued.

Free Distribution of Literature.

Upon the recommendation of a Christian Scientist known to the Publishing Society, the Sentinel and the Journal will be sent free for one year to any Public Library having a Reading Room. This free subscription may be continued if the recommendation is renewed.

Upon request from the clerk of a church where a lecture is to be given, copies of the Sentinel will be sent by mail, postpaid, for free distribution to strangers and inquirers at the lecture. Order blanks may be had from the lecturers, whereon clerks will specify the number of copies required for this purpose. These orders should be sent to the Christian Science Publishing Society early enough to secure delivery of the papers in time for the lecture. If sent by express, it will be sent at the expense of the receiver.

No subscriptions for the Quarterly will be received for less than one year. No subscriptions for the Sentinel will be received for less than six months. Orders other than subscriptions, for Sentinel, Journal, and Quarterly, should be given for current issues and back numbers only.

THE next admission of candidates for membership with the Mother Church will take place June 3, 1899. Applications to be presented at that time must be in the hands of the clerk on or before May 15.

We wish to state that Numbers 19, 20, and 23 of the Sentinel are out of print. We will be glad to duplicate any other number to subscribers failing to receive these.

Works on Christian Science.

Written by Rev. Mary Baker G. Eddy.

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 665 pp. Revised and Enlarged 1894. THE ORIGINAL, STANDARD and only text-book on CHRISTIAN SCIENCE MIND-HEALING.

Price, (cloth), each $3.18
Two to Twelve books to one address, each, prepaid 3.00
Twelve or more books to one address, each, prepaid . . . 2.75
Full Sheep, stiff covers, Bible paper, marbled edges, each, prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid 6.00
Twelve or more to one address, each, prepaid 5.75

Orders for Science and Health in lots of twelve or more to one address, may include any or all of the different styles of binding.

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles written by the author and published in the CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.

Price (cloth), each, prepaid $2.25
Twelve or more books to one address, each, prepaid . . . 2.00
Morocco, limp, round corners, gilt edges, convenient for pocket, 4½ x 6½ inches, narrow margins, each, prepaid 4.00
Twelve or more to one address, each, prepaid 3.75
Levant, divinity circuit, leather lined to edge, round corners, gold edge, silk sewed, each, prepaid 5.00
Twelve or more to one address, each, prepaid 4.75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all of the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen; all prepaid.

FEED MY SHEEP. Written by Mary Baker G. Eddy. Music by Lyman F. Brackett. Price 50 cents per copy; $5.00 per dozen.

CHRIST AND CHRISTMAS. An Illustrated Poem.

Single book, prepaid $3.00
Twelve or more books to one address, each, prepaid 2.50

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Price by mail, $1.06; $5.00 half dozen; $9.00 per dozen, all prepaid.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEED-TIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHER'S THOUGHTS, CREDO, MATTER, SOUL; 80 pages, cloth covers, red edges. Price by mail, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen, all prepaid.

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science; 35 pages. Leatherette covers, gilt top. Price by mail, 37 cents; $3.00 per dozen, prepaid.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Price by mail, 26 cents; per dozen, prepaid, $2.50.

NO AND YES. A brief statement of very important points in Christian Science; 56 pages. Pebbled cloth covers. Price by mail, 27 cents; $2.50 per dozen, prepaid.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Price by mail, 21 cents; $2.00 per dozen, prepaid.

CHRISTIAN SCIENCE SENTINEL

"WHAT I SAY UNTO YOU I SAY UNTO ALL, *WATCH.*"—*Jesus.*

Published Weekly at 95 Falmouth Street. | BOSTON, MASS., MARCH 2, 1899. | Vol. 1 No. 27

Was President for One Day.

Distinguished Honor Thrust Upon David R. Atchison.

THE following incident, which is being published in the newspapers, will doubtless be read with interest, especially by the many who have supposed that Polk was one of the Presidents who served a day longer than his term.

The roll of Presidents of the United States, as ordinarily given, from George Washington to William McKinley, may be historically correct, but there is one omission. If the name of David Rice Atchison should be inserted people generally would exclaim, "Who was he?" Yet David R. Atchison was actually President of the United States for one day.

When? Why, from noon of March 4, 1849, until noon of March 5, 1849. And in this connection there is a story known to few people, and almost forgotten by them.

It was during his service in the Senate that occurred the incident in Atchison's career which made him a unique figure in American history. He was at one time elected president pro tem. of that body, and frequently presided over its deliberations.

It so happened that March 4, 1849, fell upon a Sunday. The term of President Polk expired, according to law and custom at noon, on that day. General Zachary Taylor, hero of the Mexican war, just then ended, out of deference to prevailing religious scruples, decided to defer his inauguration until Monday. As will be seen, this left a gap of twenty-four hours between the terms of Polk and Taylor. As the Vice-President's term ended the same time as the President's, the mantle of authority fell, according to constitutional provision, upon the president pro tem. of the Senate.

This happened to be, at that particular time, David Rice Atchison of Missouri. But Senator Atchison seems to have little appreciated the honor conferred upon him by chance. On Saturday, the last day of the expiring session of Congress, he presided over the stormy and prolonged sitting of the Senate. Again and again was the clock "set back" in deference to that ancient and amusing fiction of law, and it was nearly daylight Sunday morning before the gavel finally fell.

Exhausted by his unusual and worrisome labors, Senator Atchison went to his lodgings and went to bed. He slept until late in the evening, and then, after rising for a meal, turned in for the remainder of the night. By the time he was up and about on Monday, General Taylor had become President Taylor, and President Atchison's brief term was over. He afterward often laughingly remarked that he had slept through his term.

Had it been necessary to secure the action of the President of the United States during those twenty-four hours there would have been a pretty search for the legal chief executive. It happened, however, that no matter required the attention of the President that Sunday, and Atchison's term came and went without the performance of a single official action by him. In fact, he admitted that he forgot all about being President.

After he left the Senate, Atchison retired to his immense farm in Clinton County, Missouri. The remainder of his long life was comparatively uneventful, but he ever occupied a high place in the estimation of his fellow-citizens. He died in 1886, in the seventy-ninth year of his life. His name lives in Atchison County, Missouri, and in the thriving city of Atchison, Kan., both of which were named in honor of him.

Items of Interest.

Anglo-American Alliance.

The Independent contains an article written by Lord Charles Beresford on an Anglo-American alliance, in which he says, in part:—

"England and America could form the most powerful alliance possible, because they are the two most patriotic countries in the world; because they alone of all the nations have an army and navy without conscription. If we of England get into any difficulty all the best of our manhood will volunteer, as the Americans have recently done. With the United States and England combined, we could well afford to smile at our enemies. If while I am in America I can in any way help to bring about a more harmonious condition between the two races, I shall feel that I have done much. A life devoted to this mission could not be without worth. Parliament has already met, or I should visit all the chambers of commerce in the large cities to try to get the sentiment of the American people about the 'open-door' policy of England. This is the question which should at present greatly interest commercial America, and the reason of this is clear. It means that England, America, Germany, and Japan shall, by an agreement, maintain free and equal commercial relations for all time in the Orient. If China is to be broken up, Russia will become all-powerful in the north and France in the south, Germany will get what she can, while America will probably procure nothing; for, though I think she is destined to be a great trading nation in the Orient, greater than Britain or any other country, her interests there now are comparatively slight, and in the scramble for spheres of influence it is not likely that the American people would feel that their interests demanded a struggle for a portion of it at this time. The United States has more interest in the open door than England has. The interests of both countries require that trade in the East be opened."

Copyrighted, 1899, by Mary Baker G. Eddy.

Digitized by Google

In a recent speech in New York city, he explained further what he means by an "alliance."
